SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Smiley, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." The Field—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." Notes and Queries—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

"The Breech-Loading Armoury Company, Limited.

"To the Directors,

"Gentlemen,—At your request I have examined the specifications, statements of contracts, and other sales, and documents belonging to Messrs Calisher and Terry, London and Birmingham. Taking these statements, of which I have no doubt, as a basis of calculation, I can have no hesitation in certifying that, including all the various items, a profit of £.0 per cent. on the outlay of capital has been realised upon the above-mentioned sales and contracts.

"I am, Gentlemen, your obedient Servant,
Signed "Henry Croysdill, Public Accountant,
"14 Old Jewry Chambers.

"London, 6th May, 1865."

Note.—The dividend warrants will be made out to each shareholder on the register at the end of every financial year.

THE BREACH-LOADING ARMOURY COMPANY (Limited).

(Messrs Calisher and Terry, Contractors, London and Birmingham.)

The detailed prospectus of this Company can be had at the offices, 32 New Broad street, City, or the bankers, brokers, and solicitors. It contains the most ample information, with reports and opinions of the leading journals, on the great superiority of the well-known rifle manufactured solely by this firm, whose patents for England, France, America, Austria, and Belgium, are transferred to this Company, together with the goodwill of their extensive business, the manufactories at Birmingham, depot in London, and the important and costly stock-in-trade. The firm have already completed extensive contracts with the Home, Foreign, and Colonial Governments, and 35,000 stand of arms have been lately supplied to the New Zealand Government. There is also a payment on account of contracts due from Her Majesty's Government to the firm. The works are in full operation, and the orders now in hand are sufficient to keep the Company fully employed for a considerable time. The transfer of the business to this Company has been effected upon the most advantageous terms; and shareholders come into possession of a tried and highly remunerative concern, free from exorbitant charges, while the profits, which will commence at once, will be large and certain. This Company offers the most positive advantages to capitalists as a first-class, lucrative, and permanent investment. The dividends will be paid at the London and Birmingham Banks.

THE BREECH-LOADING ARMOURY COMPANY, Limited.

Notice.—Applications for Shares in this Company must be forwarded to the London and Westminster Bank, Lothbury; Messrs Hallet, Ommanney and Co., bankers, Great George street, Westminster; National Provincial Bank of England, Birmingham; or to the secretary, John Bowing, Esq., C.C., at the offices of the Company, 32 New Broad street, City. A large number of shares have been already subscribed, and the share list will be shortly closed. If no allotment be made, the deposit will be returned.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.

"The only good sauce."

The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.

Ask for LEA AND PERRINS' SAUCE.

*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, 4th May, 1865.

DEBENTURES ISSUED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz.:—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years..... 6 per cent. per annum.

— Five years ..... 6½ — —

— Seven years..... 7 — —

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers. The first payment of interest will be made on the 30th June next.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, May 4, 1865.

DEPOSITS RECEIVED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

RATES FOR MONEY ON DEPOSIT.

This Company receives money on deposit in sums of £10 and upwards at the undermentioned rates from this day until further notice, viz.:—

At 14 days' notice ..... 3 per cent. per ann.

At one month's notice..... 3½ — —

For fixed periods of—

Not less than 3 months and up to 6 months..... 4 — —

Beyond 6 and up to 9 months... 4½ — —

Beyond 9 and up to 12 months... 5 — —

Beyond 12 and up to 24 months... 5½ — —

Forms of application can be obtained of the Secretary, to whom all communications must be addressed.

By order of the Court,

ALFRED LOWE, Secretary.

17 and 18 Cornhill, London, June 15, 1865.

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present.—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryamjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ramchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,982,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,530	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 5,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premiums on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,64,730 rs 4a 10p, and the Directors proposed to apply them as follows:—

Rs.	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (in all 10,00,000 rs.)
5,54,636-4-10	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Homusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Maneckjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq., and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

A MACKINTOSH, Manager.
JOHN SMITH, Secretary and Accountant.
Bombay, 3rd April, 1865.

We have examined the above Balance Sheet of the Financial Association of India and China (Limited), and accompanying account of Profit and Loss, at 31st March, 1865, and having compared them with the Company's books, find them to be correct. We have also examined the securities, and counted the cash taken credit for as in possession of the Company, and have found the same to be in order.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

PROSPECTUS.

Deal and Sandwich in Kent possess unequalled advantages for the establishment of—

1. A commercial and packet harbour, with suitable docks and warehouses for the international trade and traffic of Great Britain, Belgium, Holland, and Northern Europe.
2. A harbour for the use of vessels in the Downs.
3. A repairing dock for the Thames Estuary and the British Channel
4. A port for the commerce of Kent.

As a commercial and packet harbour for the vast and growing trade and traffic of Northern Europe, the advantages of Deal consist in its proximity to Dunkirk, and in the rapidity with which a line of communication between London, Deal, Dunkirk, Brussels, Amsterdam, Berlin, and the North may be maintained.

In order to accelerate the intercourse between England and the North of Europe, the Belgian Government has granted concessions for completing the breaks in the railway route from Dunkirk to Brussels by way of Furnes and Thield, and these important links are now approaching completion. The French Government also, with the view of fitting the port of Dunkirk to the increasing requirements of European commerce, has recently made large pecuniary grants for its enlargement. Deal possesses all the advantages which Dunkirk requires in the establishment of a twin port.

As a Channel harbour the Deal Dock will afford an asylum to vessels in the Downs, which is, perhaps, the greatest sea thoroughfare in the world, and where it is no uncommon occurrence for 400 or 500 vessels "waiting a wind" to anchor at one time. Hundreds of ships, also, which during winter wait the breaking up of the ice in the Northern ports, will here find a home.

As a repairing dock it will supply vessels congregated in the Downs with the means of "refit," and all appliances which disaster, "wear and tear," or seasonal detention may have rendered necessary.

As a floating dock, in the track of the Continental trade, it will not only command the local trade of the district, but it is certain also to create a new trade for itself by offering facilities which do not at present exist between London and Portsmouth.

The Company, which obtained its Act last session of Parliament, has entered into a satisfactory arrangement for the execution of the works, including the payment of 7 per cent. per annum upon the paid-up capital during the period of construction, which it is estimated will not exceed two years.

The site chosen for the entrance to the dock is admirably adapted for the purpose, being close to deep water. The entrance, protected by the Goodwin Sands and by the "Brake Sand," is also at such a distance from any rapid tideway that vessels will be able to enter the harbour in almost any weather.

Powers are granted by the Act for making a navigable cut to Sandwich, to be supplied with water from the river Stour, which will form the nucleus of an inner Local Dock accommodation.

The land to be taken for the dock consists chiefly of sand hills, little raised above high water mark, and of small intrinsic value. The substratum also being chalk, the work of excavation will be easy, and the foundations inexpensive.

The capital of the Company is comparatively small; but it is enough. A larger capital would, without adding to the efficiency of the undertaking, diminish dividends. Low cost of land constitutes the first element of success in the establishment of a dock; and as the price of land, in the case of the Downs Dock, will be small, the returns of profit on the enormous amount of business which the dock must enjoy cannot be otherwise than large.

It may be added that the dock is planned with a view to progressive extension. Associated also as it will be with suitable commercial establishments, and having command of two main lines of railway, the Downs Dock is destined in no short time to form a grand Auxiliary S. a Dock to the Port of London.

Possessing these prominent advantages, the undertaking is felt to be one of especial value by the chief shipping, marine insurance, and commercial interests of the kingdom; and the public at large, adding to these considerations the cheap rate at which the land may be obtained, regard it as certain to yield large and augmenting dividends on the capital employed.

Applications for shares addressed to the Directors will be received in London by Messrs J. Hutchinson and Son, 15 Angel court, Throgmorton street, E.C.; the National Bank, Old Broad street, E.C.; and Mr Sleigh, Secretary (pro tem.), 2 Austinfriars Old Broad street, E.C.; in Deal, by the National Provincial Bank of England; and in Sandwich, by the London and County Joint Stock Banking Company; but no application can be considered unless a deposit of £1 per share on the number of shares applied for has been made. In the event of the Directors not being able to accede to a request, the sum deposited will be promptly returned; and in cases of reduced allotment, the balances will be applied towards the full deposit of £2 per share.

FORM OF APPLICATION FOR SHARES.

(This form should be presented entire to the bankers brokers, or secretary of the Company, who will detach the receipt and return it to the applicant.)

To the Directors of the Downs Docks Company (Limited).

Gent'emen,—I request you to allot me shares of £10 each in the Downs Dock Company (Limited), and I hereby agree to accept such shares, or any less number that may be allotted to me, subject to the regulations of the Company, and to pay the further deposit of £1 per share on allotment, and I authorise you to enter my name on the Register of Members of the Company in respect of the shares allotted to me.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of purchasing and working the well-known deposits of Phosphate of Lime, situated at the Island of Sombrero, in the West Indies and at Logrosan, in Estremadura; thus avoiding the serious competition that would necessarily arise if the two properties were in the hands of parties having antagonistic interests.

SOMBRERO ISLAND.

This property is held on lease, granted by Her Majesty for a term of 21 years, from the 16th March, 1865, to the present proprietors, at a fixed rental of £1,000 per annum, without royalties, in consideration of the large expenditure incurred by them in erecting buildings, machinery, and other works thereon, for the development of the undertaking, and of the great benefit thereby conferred upon the agricultural interest.

The island has been worked for the last eight years by the present proprietors, and upwards of 10,000 tons per annum of the phosphate have been sold, in the United Kingdom alone, and large quantities of the article have also been disposed of on the Continent, and in the United States.

The average profits on the sales for the last three years have been £20,000 per annum, which may be considerably increased by the application of additional capital.

The quality of this phosphate is well known, as containing from 75 to 80 per cent. of bone phosphate, and its quantity is estimated at upwards of a million tons.

The business is fully organised, and in active operation; and the benefit of existing contracts for the delivery of nearly 10,000 tons Phosphate during the six months will be transferred with the lease of the property to the Company; and it is estimated that the profit on these contracts will be upwards of £15,000—thus giving a substantial guarantee for the payment of an early dividend. Further contracts of an equally profitable nature for delivery of upwards of 30,000 tons, during the next six years, have been entered into, and these contracts will also be transferred by the present proprietors to the Company.

LOGROSAN (ESTREMADURA) PHOSPHATE.

This property is held on lease from the owner in fee, for the term of 99 years, from the 16th April, 1863, at moderate Royalties. It is situate about 24 miles from Villaneuva, on the railway from Badajos to Ciudad Real, where a station has recently been opened, and uninterrupted railway communication is thereby afforded to the port of Lisbon. The vein of phosphate runs for a length of two miles, and has proved in some places to be 40 feet deep, and from 7 to 16 feet wide; how much deeper it goes is not known. One definable space, which has been measured, contains upwards of 250,000 tons, and this extends over a comparatively small portion of the surface of the concession.

The Directors have entered into a provisional contract to purchase this property subject to a good title, free from incumbrances, being made by the vendors to the Company, and also to the ratification of an agreement on the subject of the royalties.

The deposit at Logrosan contains from 80 to 90 per cent. of phosphate of lime; an average quality of 85 per cent. can therefore be safely calculated upon. At the low price of 1s per unit, £4 5s will be its value per ton.

To the agricultural interest, the further development of these deposits of phosphate of lime is of the greatest importance; whilst as a commercial enterprise, the undertaking promises to be most successful. The profit from Sombrero Island alone, can be confidently estimated to produce more than 15 per cent. on the capital to be called up for its purchase and working; and as the development of the Estremadura quarries proceeds, the Directors anticipate a largely increased ratio of dividend from that source. The present undertaktaking will virtually have a monopoly of the market, for there are no other similar deposits of equal magnitude and practical value at present known; there will, therefore, be no serious competition.

Organised arrangements already exist with leading firms in the United Kingdom, on the Continent, and in the United States, for the sale of the article. The Company will thus commence its operations with the advantage of an established connection, and avoid the trouble, risk, and expense of forming a new business.

The consumption of superphosphate and other phosphatic manures in the United Kingdom, is estimated at from 200,000 to 300,000 tons annually, and that quantity is probably not applied to one-tenth part of the land which would be benefited by its use.

The purchase money of the two properties is £250,000, which the vendors agree to take as follows:—£35,000 in debentures, and £90,000 in paid-up shares of the Company, which shares, for the purposes of dividend, are to rank only to the extent of the calls from time to time made on the ordinary shares, until July 1, 1866, after which date, provided the Company shall declare a dividend of ten per cent. on the capital then paid-up, these shares are to be entitled to participate in future dividends to the full extent of their nominal value. The vendors take the remaining half of the purchase money in cash by instalments, without interest, extending over a period of twelve months.

In order to meet these instalments, and to provide funds tor the due and efficient carrying out of the objects of the Company, calls will be made as follows:—

£5 per share, being equal to 20 per cent., £1 on application, and £4 payable on allotment.
£5 per share, being equal to 20 per cent., payable 10th October, 1865.
£5 per share, being equal to 20 per cent., payable 10th February, 1866.
£2 10s per share, being equal to 10 per cent., payable 10th June, 1866.

It is not anticipated that any further calls will be required. Subscribers will have the option of paying the above calls in advance, or of paying the whole £25 in full, and on such payments 6 per cent. interest per annum will be allowed, from time of payment.

Applications for shares may be forwarded to the Bankers of the Company, with the deposit of £1 per share. If the number of shares allotted be less than the number applied for, the deposit paid will, so far as necessary, be credited towards the payment due on allotment. Should no allotment be made the deposit will be returned in full.

The articles of association, leases, plans, reports, and valuations, with analyses of the respective products, may be inspected at the office of the solicitors.

Prospectuses and forms of application for shares may be obtained of the brokers, bankers, solicitors, and of the Secretary, at the temporary offices of the Company.

PURE WATER.—THE LONDON

and GENERAL WATER PURIFYING COMPANY (Limited), 15 Strand, SUPPLY their FILTERS on hire in the metropolis and its suburbs, at the following rentals per annum, which include all charges:—

Filter No 1, yielding ½ gallon per minute,				7s	6d.
— No 2,	—	1	—	12s	6d.
— No 3,	—	2	—	£1 0s	0d.
— No 4,	—	4	—	£1 10s	0d.

Applications to be made to the Secretary, at the Offices of the Company, 15 Strand, W.C., where the filter may be seen in operation, one view of which will convince the most sceptical that no existing filters approach them either in simplicity of construction or in perfection of operation. Testimonials from Dr Letheby and other eminent authorties who are using the filter can be had on application.

"FORD'S EUREKA SHIRT"

COMPANY (Limited).

(Incorporated under the Companies Act, 1862, and minimum dividends of 10 per cent. guaranteed.

Capital, £50,000, in 10,000 shares of £5 each.

First issue, 5,000 shares. 10s to be paid on application, and £1 10s on allotment.

The holders of such first shares to have the preference, pro rata, in all further issues. If no allotment be made, the deposit to be returned in full.

Calls not to exceed £1 each, and at intervals of not less than three months.

DIRECTORS.

James Bridger, Esq., Mitcham, Surrey, Director of the Mitcham and Wimbledon Gas Company.
Boyd Barnett, Esq., Clifton garden, Maida Vale, Chairman of the London Oil and Colour Company, London Docks.
Henry Faulkner, Esq., Clapham Rise, Director of the Whittington Life Assurance Company.
William Jackson, Esq., Debenham, Suffolk.
(With power to add to their number.)

BANKERS—The Bank of London.

BROKER.

Cecil Gardiner, Esq., New City chambers, 121 Bishopsgate street within, E.C.

MANAGER—Mr Richard Ford.

SECRETARY—Mr Benjamin Bridger.

AUDITORS.

L. H. Evans, Esq., public accountant, 15 King street, Cheapside.
G. W. Wood, Esq., 25 Gloucester street, Warwick square, Pimlico.

Offices—38 Poultry, E.C.

ABRIDGED PROSPECTUS.

The Company is formed for the purchase, carrying on and extending the business of Mr Ford, the manufacturer of the well-known "Ford's Eureka Shirt" and other articles of necessary clothing, as now conducted in Wood street, Cheapside, E.C., and elsewhere. The "Eureka Shirt" has been for the last fifteen years a very useful and much sought for article of dress, and its manufacture has proved highly remunerative to the proprietor.

The sole manufacture of "Ford's Eureka Shirt" is protected by his trade mark, any forgery of which is by Act 25 and 26 Vic., cap. 88 (commonly called "The Merchandise Marks Act, 1862"), punishable as a misdemeanour.

It is confidently expected from the present state of the business that, with an increased capital, dividends of at least 15 per cent., ranging from that to 25 per cent. and upwards, will be derivable by the shareholders from this undertaking.

A trade has already been established with colonial merchants, which may be considerably augmented by additional capital.

Mr Ford will act as Manager, without salary, until the above dividend of 10 per cent. per annum is paid for the said three years.

Prospectuses and Forms of Application for Shares may be obtained from the broker, and at the offices of the Company, 38 Poultry, Cheapside E.C.

AGENCY WANTED FOR

CANADIAN PROVISIONS.—A Gentleman from Montreal, who has been eight years in Canada in the Commission and Shipping business, consisting of Flour, Grain, Petroleum, Butter, Cheese, &c., is prepared to treat with merchants doing in Canadian or American produce, with a view of an Agency, either to purchase for or influence consignments, or would join a Gentleman as Partner with sufficient capital, and satisfactory references, to establish a business in the above, either in London or Liverpool. The advertiser has a thorough knowledge of the Canadian Butter Market, having travelled twice a year through the interior to purchase for Montreal houses, and on his own account. Also understands the Wholesale Grocery Market, and would have no objection to cross the Atlantic twice a year to purchase on commission or otherwise. Has some capital and some shipments of butter now for sale; can give bankers' references.—Address W. R., care of Davies and Co., Advertising Agents, Finch lane, Cornhill.

TAFF VALE RAILWAY COMPANY,

The Directors of this Company are prepared to issue Debenture Bonds, bearing interest at the rate of 4 per cent per annum, payable half-yearly. Applications to be made to the undersigned.—By order of the Board of Directors, EDWARD KENWAY, Secretary.

Cardiff, June 1, 1865.

LONDON, CHATHAM, AND DOVER

RAILWAY COMPANY.
LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned.

W. E. JOHNSON, Secretary.

Victoria Station, Pimlico, S.W., May 29th, 1865.

ATLANTIC & GREAT WESTERN

RAILWAY.—NEW YORK DIVISION, FIRST MORTGAGE BONDS; Pennsylvania Division, Second Mortgage Bonds; Ohio Division, Second Mortgage Bonds. Interest payable 1st July, at the Consolidated Bank (Limited). The Coupons from the above Bonds will be paid on the 1st July, at the rate of 4s to the dollar, and must be left two clear days at the Office of the Company, 5 Westminster chambers, Victoria street, Westminster, S.W., for examination. If sent by the post a cheque for the amount will be remitted in course.

5 Westminster chambers, Victoria street,
Westminster, S.W., June 6. 1865.

PHILADELPHIA AND ERIE

RAILROAD SIX PER CENT. STERLING BONDS, guaranteed by the Pennsylvania Railroad Company, and principal and interest payable in London at the counting house of their agents, Messrs T. Wiggin and Co.

These bonds are part of a first mortgage of 5,000,000 dollars, secured on the Philadelphia and Erie Railroad, which is now open for traffic over its entire length of 288 miles, subject only to a prior mortgage of 1,000,000 dollars on a small portion of it.

In addition to the security of the Philadelphia and Erie Railroad, the Pennsylvania Railroad Company has agreed to pay the principal of these bonds at par when they mature, and also the interest warrants as they fall due, at their agency in London; and the bonds are endorsed with this agreement under the seal of the said Company, and the signatures of its President and Treasurer.

The bonds are for £200 each. The interest is payable 1st April and October, and the principal in March, 1881.

Messrs T. Wiggin and Co. are authorised to Sell a Limited Number of these Bonds at 73 per cent., with interest from 1st April.

Applications may be made either to them, at their counting house, 15 Old Jewry chambers, or to

AGENTS IN INDIA.

Messrs Pearce, Macrae, and Co., Calcutta.

SECRETARY—Samuel C. Fox.

Offices—3 Winchester buildings, Great Winchester street, E.C.

This Company is formed for the cultivation of the tea plant and the manufacture of tea, in Assam and Northern Bengal; in furtherance of these objects, arrangements have been made for the purchase of three valuable estates on very advantageous terms.

The property in Assam consists of the two estates of Aumchong and Sonapore, situated within about ten miles of Gowhatty, the capital of the province, and comprises 3,000 acres of good land; 530 acres of which are now planted, and in course of yielding a good return.

These estates adjoin the Burhampootea river, on which steamers regularly ply throughout the year, affording ready and economical facilities for transport of produce, &c.

The estate in Northern Bengal is situated near Darjeeling and Kursiang, on the lower slope of the Himalayan mountains, and consists of 300 acres of excellent soil, 160 acres of which are already planted, a considerable portion having six-year-old plants, which will produce seed sufficient to extend the cultivation to any extent, and at little expense. The proprietor is at present in treaty with Government for an extra 1,200 acres of land, and, if obtained, he will convey the same to the Company without any addition to the purchase money.

An excellent road, constructed by the Indian Government, and worked by a local transit company, leads to Pier Pointe, whence there is a direct railway route to Calcutta and other populous towns.

The timber on that portion of land still uncleared is of great value for tea boxes, and the Darjeeling district possesses cheap and abundant native labour.

For the purposes required, the quality of the soil and the situations of these properties are unsurpassed.

The plantations are in efficient working order, under able and experienced managers, who thoroughly understand the growing and making of tea, and whose services the Directors propose to retain.

The Assam Teas have now a well-established reputation in the home and Indian markets, as possessing all the requisites of good leaf; and those of Darjeeling are acknowledged to excel all others in delicacy of flavour; some tea from this district was lately sold in the London market for 4s per lb.

The ECONOMIST, of the 11th March, 1865, remarks:—"It is quite evident that, if proper care in the cultivation and cure of Indian Tea is taken, the result will prove a great success to all interested, as it only requires the superior strength and quality to be maintained to ensure a ready sale at remunerative prices."

The large profits which the Assam and other Companies in India have derived from tea cultivation are now ascertained facts. The former, upon a paid-up capital of less than £200,000, has divided £145,000 amongst its shareholders, and its shares bear a premium of 100 per cent. Even much more favourable results have attended local undertakings, which have paid handsome dividends, whilst their shares are selling at premiums varying from 90 to 500 per cent.

The price to be paid for these properties is £47,000 sterling, payable as follows, viz.:—

	£
On allotment of shares	10,000
In paid-up shares	10,000
In 6 months from allotment	5,500
In 1 year from allotment	4,000
In 18 months from allotment	5,000
In 2 years from allotment	7,500
In 3 years from allotment	5,000

These conditions the Directors consider to be most advantageous. They show the confidence of the vendors in the value of the property, and the period over which the instalments extend will enable the young plants to be in good bearing before all the purchase money is fully paid.

The purchase money of the estates is moderate, being only about £70 per acre, whereas the cost of the majority of the tea estates lately brought before the public is about £100 per acre under cultivation.

PARTICULARS OF CULTIVATION.

Plant in 6th year	40	acres.
Do. 4th year	60	—
Do. 3rd year	75	—
Do. 2nd year	145	—
Do. 1st year	370	—
	690	acres.

No promotion money will be paid, and the preliminary expenses will be confined to such as are absolutely necessary. The operations of the Company in England will be conducted through an agency, thereby obviating the heavy expenses necessarily involved in a separate office establishment.

The public in subscribing to undertakings of this nature should bear in mind that they are not only securing to themselves a good return upon their outlay of capital, but that, in addition, they are really purchasing valuable landed property, the market price of which is periodically increasing as the cultivation extends, and which may at any time be realised.

Prospectuses and forms of application for shares, with copies of the articles of association, and all information, may be obtained from the brokers or solicitors, or at the offices of the Company.

THE ALBERT BRIDGE COMPANY.

Incorporated by Act of Parliament (1864), and with which the Battersea Bridge Act is incorporated.
Capital £90,000, in 9,000 shares of £10 each, with power to borrow £30,000.
Deposit £1 per share on application, and £1 per share on allotment: Calls of £2 each to be paid at intervals of three months.
Each shareholder is only liable for the amount of the calls that may be due upon shares standing in his name.

SECRETARY—J. W. King, Esq.

TEMPORARY OFFICES.

6 Great Queen street, Westminster.

The Act of Parliament authorising the construction of a bridge over the river Thames from Chelsea to Battersea, with approaches thereto, received the Royal assent on the 29th July, 1864.

The bridge will connect Chelsea and Battersea, starting from Cheyne walk at its junction with Oakley street, and terminate in the Prince Albert road, Battersea, adjoining Battersea Park.

It will be constructed on the most modern and improved form of the suspension principle, with cylinder foundations, and of a width of not less than 40 feet, giving a clear headway in the centre of 21 feet above Trinity high water mark, the abutments forming a portion of the proposed embankments on the Surrey and Middlesex shores.

A responsible contractor has agreed to complete the bridge, ready for traffic, in eighteen months for £82,000, taking part payment in paid-up shares of the Company.

If required, the contractor has agreed to collect the tolls of the new bridge and Battersea bridge (which will become the property of the Albert Bridge Company), and keep the two bridges in repair for the space of twelve months after the opening of the Albert Bridge, and has authorised the Directors to retain the sum of £4,000 to guarantee the shareholders for the same period a minimum dividend of 5 per cent. per annum, after paying all costs, charges, &c.

During the progress of the bill in the House of Lords, very satisfactory arrangements were entered into for the purchase of Battersea bridge by the Albert Bridge Company, viz.:—The Albert Bridge Company agreed to purchase Battersea bridge (the purchase to be completed on the opening of Albert bridge) for a yearly rent-charge of £3,000 per annum. The tolls on Battersea bridge are yearly increasing. For the year 1862 they amounted to no less than £6,153.

The tolls on the new Chelsea bridge (free on Sundays), for the year ending March, 1863, were upwards of £4,000, and have been increasing, taking the corresponding month of last year, at a rate exceeding £100 a month.

The situation of the Bridge is peculiarly favourable for traffic; it provides for Chelsea, Brompton, Kensington, and the West End of London a shorter and better route to Battersea Park, Wandsworth, Clapham, Tooting, Mitcham, and other places south of the Thames.

The Act of Parliament also authorises the Company to construct a new street from the King's road, Chelsea (opposite Oakley street), to the Brompton and Fulham road (opposite Sumner place), and a short road from the Lower Wandsworth road to the Queen's road, Battersea, thus giving a direct thoroughfare from the Cromwell road, Kensington, to Clapham Common.

The great advantage the Albert Bridge possesses over the other metropolitan bridges is—

First—The small sum for which the bridge will be completed: the approaches on both side of the river being already made, the Company will not be called upon to pay compensation.

Secondly—The very satisfactory arrangements entered into with the proprietors of Battersea Bridge will give the Albert Bridge Company a clear profit of £3 000 per annum, after deducting a sum per annum sufficient for maintenance of bridge and expense of collecting of tolls.

Presuming the tolls on Albert Bridge equal to the tolls on Battersea Bridge, the shareholders will have a clear income of 9 per cent. on their capital.

Application for shares may be made in the annexed form, and must be accompanied by a deposit of £1 per share. If no allotment be made, the deposit will be returned to the applicant without deduction. Prospectuses may be obtained from Messrs J. and A. Scrimgeour, the Brokers of the Company; at the Union Bank of London; from the Secretary at the offices of the Company; from the Engineers; and from the Solicitors.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Albert Bridge Company.

Gentlemen,—Having paid into the Union Bank of London, Pall Mall, the sum of £ , being £1 per share on shares in the above Company, I request you will allot me that number of shares, and I hereby agree to accept the same, or any less number that may be allotted to me, and I undertake to pay the balance of the deposit and calls thereon.

ABRIDGED PROSPECTUS.

The Cheshire Amalgamated Salt Works Company has been formed for the purpose of purchasing and developing existing salt works, and by a judicious union of interests under one management, to effect at once a large saving in agencies and working expenses.

The salt district of Cheshire is the source of four-fifths of the entire quantity produced for home and foreign supply.

The Company has entered into a contract to purchase the extensive and well-known works belonging to Mr Blackwell and Messrs Kay and Son, which are considered the most complete and efficient in the trade, and consist of the following freehold and leasehold properties:—

The Northwich Works,
The Winsford Works,
The Whitehall Works,
The Malkin's Bank,
The Wheelock Works, and
The Wharton Salt Works.

These works are now employing 500 men, and producing upwards of 200,000 tons of salt per annum, all of which meets with a ready sale.

By the terms of the contract for purchase the works are to be handed over at once to the Company, although the payment for the same is to be spread over a period of more than twelve months. The purchase includes machinery, plant, workshops, brine shafts, railway waggons, barges, and flats, as well as contracts, both for manufactured salt and the supplying of brine to other works in the district.

The supply of brine, of which the Company will have the entire control, is inexhaustible, and an extra revenue of £2,000 per annum is actually derived from the sale of brine to other salt manufacturers.

The demand for salt is not merely confined to the United Kingdom. The exports to the Continent and our Colonies, including India, are about one million tons annually, valued at more than £400,000 sterling, whilst the demand for home consumption is increasing day by day, and no fresh sources of supply are as yet discovered in the country.

Messrs Blackwell and Kay have stipulated that they shall receive nearly one-third of the purchase money in shares of the company, and a like amount in debentures, not payable until after a term of five years, during which time they will bear interest at the rate of 5 per cent. per annum.

From information derived from parties having a personal knowledge of the trade, the directors feel justified in stating that these works will yield a dividend of not less than 12 per cent. per annum to the shareholders under their present rate of production, which can, however, be very materially increased at a very small outlay.

No promotion money has been or will be paid by the Company.

The articles of association may be inspected at Messrs Ashurst, Morris, and Co.'s offices, 6 Old Jewry; and prospectuses and forms of application may be obtained of the bankers, brokers, and solicitors of the company, and of Messrs G. H. and A. T. Jay, 15 Tokenhouse yard.

THE CHESHIRE AMALGAMATED

SALT WORKS COMPANY (Limited).

Notice is hereby given, that the List of Applications for Shares in this Company will be closed on Wednesday next, the 21st instant.—By order,

CHARLES CAMPBELL, Secretary.

THE NORTHERN ASSURANCE COMPANY.

Established 1836. Incorporated by Act of Parliament.

CAPITAL, £2,000,000.

HEAD OFFICE, 3 KING STREET, ABERDEEN.

LONDON—1 Moorgate street. EDINBURGH—20 St Andrew square. GLASGOW—19 St Vincent place.
DUNDEE—14 St Andrew place. MELBOURNE—Collins street West.

ANNUAL MEETING, 1865.

The TWENTY-NINTH ANNUAL GENERAL MEETING of this Company was held within their house in Aberdeen, on Friday, the 9th June, 1865,

DR. CRUICKSHANK, late Professor of Mathematics in the University of Aberdeen, Chairman of the General Board, in the Chair.

The Chairman laid on the table the accounts and balance sheet of the Company, together with the following REPORT for the Year ending the 31st December, 1864:—

FIRE DEPARTMENT.

The Directors are happy to be again in a position to report a large increase in the business of this department; and, notwithstanding some exceptionally heavy losses, to announce that the transactions of the year have yielded a considerable surplus.

The following is a statement of the actual progress and results of the business for the year:—

Receipts.	£	s	d	£	s	d
Premiums, less sums paid for re-insurance				168,512	19	9
(being an increase of £19,579 2s 10d upon the premiums of the preceding year)						
Payments.						
Losses (including all outstanding claims)	£116,853	6	9			
Charges of management, commission to agents, and other outgoings of this department	42,357	13	1	159,210	19	10
Leaving to the credit of profit and loss a surplus of				9,301	19	11

LIFE DEPARTMENT.

In this department likewise the Directors have the satisfaction of reporting that the ordinary rate of progress has been fully maintained during the past year. The premium revenue shows a large increase, while the claims by death, both in number and amount, exhibit a very considerable reduction upon those of the preceding year.

The following are the actual figures of the respective branches into which this department is divided:—

I.—ASSURANCE BRANCH.

(Participating and Non-Participating Classes combined.)

	£	s	d	£	s	d
Number of lives upon which new policies were issued during the year	528					
Aggregate amount thereby assured	328,611	0	0			
Premiums thereon	10,565	2	6			
Proposals declined or not completed, 204, for	147,100	0	0			
Receipts and Expenditure for the Year.	£	s	d			
Premiums received, less re-assurances	84,255	14	8			
Interest on accumulated funds	18,214	16	8			
Together				102,470	11	4
Claims by death (including bonus additions on participating policies), and sums paid for policies surrendered	£46,665	6	11			
Commission to agents and proportion of general charges	9,590	2	8—	56,255	9	7
Surplus				46,215	1	9
Carried to the respective funds of this branch, which now amount to.				£ 483,489	s 9	d 11
Number of policies current on 31st December, 1864	6,107			£	s	d
Aggregate amount thereby assured, after deducting re-assurances				2,658,111	0	0

II.—ANNUITY BRANCH.

Receipts and Expenditure.	£	s	d	£	s	d
Amount received for 21 annuities granted during the year				9,461	18	3
Interest on accumulated fund				2,181	3	11
Together				11,643	2	2
Paid in respect of 221 current annuities	£4,595	9	0			
Commission to agents, and proportion of general charges	271	6	11—	4,836	15	11
Surplus				6,776	6	3
Carried to the annuity fund, which now amounts to				54,239	3	2
8 annuitants died during the year, holding annuities amounting to				111	1	4

Profit and Loss Account.	£	s	d	£	s	d
Surplus on fire account, 1864	£9,301	19	11			
Balance of interest account, after crediting the life and annuity funds with their several proportions	11,984	0	4			
Making an available balance of				21,286	0	3
Which the Directors recommend for appropriation as follows:—						
1. In payment of a dividend of 12½ per cent. on the original shares, and at the same rate proportionally on the new shares; the amount required for this purpose being	£11,656	5	0			
2. In making up the reserve (fire) fund to £100,000. This will require only	1,185	8	1			
Leaving, to be carried forward to next year, a balance of	8,444	7	2—	21,286	0	3

NEW ACT OF PARLIAMENT.

The Directors have the pleasure of stating that the new Bill, for which, as the shareholders are aware, application was to be made to Parliament in the present session, is expected to receive the Royal assent in the course of a few days. Its main features (so far as it differs from the Acts of 1848 and 1861, both of which it repeals) may be briefly summed up as follows:—

1. The powers of the Aberdeen and London Boards, within their respective jurisdictions, to be henceforward the same; and the supreme powers of the Company to be vested in the two Boards collectively (under the title of the "General Court"), instead of in the former board exclusively, as heretofore.

2. The Company, for all legal purposes, to be held to have a domicile in London.

3. Power to convert the stock of the Company into shares of a higher denomination, in virtue of which the Directors propose to call a special meeting (of which due notice will be given) for the purpose of authorising the conversion of the present £20 shares (£1 paid) into £100 shares (£5 paid).

4. Provision for payment of half-yearly instead of yearly dividends, as heretofore.

5. Power to hold the shareholders' meetings either in Aberdeen or London.

6. Power to the General Court to establish local boards; and, in places where no local boards exist, to appoint local committees composed of persons who may, or may not, be shareholders of the Company.

7. A clause limiting the deductions which it is in the power of the Company to make from the premiums of the participation branch to the sums actually paid as commission to agents and others for introducing business on the participation principle, and declaring that the 10 per cent. on premiums allowed to the shareholders for "management and guarantee," shall in future be held to cover every other expense with which the branch might have been chargeable. Hitherto the Directors, in reckoning the profits of this branch, have given it credit for the gross premiums, and made an effort to defray the agency commission and other expenses directly chargeable to these premiums out of the shareholders' allowance. The increased cost of obtaining business having, however, rendered it necessary, in the interest of the policy-holders themselves, to modify this practice and fall back upon the powers contained in the Act of Incorporation, the clause in question has been inserted for the satisfaction and protection both of assured and shareholders. The new arrangement will have no retrospective effect, and the assured—present and future—will have all the benefit of the continuance of the practice hitherto adopted as regards policies effected prior to 1865.

BONUS YEAR—1866.

As the fifth investigation into the state of the life branch of the Company's business will be made before the Directors again meet their constituents in annual meeting, they take this opportunity of calling upon them, assured as well as shareholddrs, to second the endeavours of the board and executive to increase the business of this department, by making known, each in his own circle, the important and rare advantages which the Company holds out to its policy-holders, especially those who elect to become members of the participating class.

This Company, by its moderate premiums, its extensive resources, and liberal conditions, offers inducements, in the transaction of every form of life assurance, such as no other sound and well-conducted office can outbid. But it is on the peculiar advantages of the system upon which its participation branch is based that the Company rests its strongest claims to public support. There the whole profits, less a fixed per centage of one-tenth of the premiums, for management and guarantee of the sums assured, belong to the policy-holders; and in reckoning these profits, the Company is, under its new Act of Parliament, precluded from deducting anything beyond what is actually paid away as commission to agents—without whose intervention the Directors are sorry to say very few policies are effected; as the experience of the offices (now only one or two in number) who pay no commission, and of those who have found themselves compelled to adopt the practice, abundantly proves.

It might seem scarcely necessary to remind the shareholders and the assured on the participating system of the direct personal interest they both have in promoting the business of the Company, but the comparatively small assistance which the Directors receive from either body (the former numbering nearly 800, the latter over 3,000) proves how little their attention has been directed to the claims which the institution has upon them. It would, therefore, afford the Board sincere pleasure to find, by the results of the present year's operations, that many of the gentlemen to whom they are now appealing have, on reflection, seen that it is their business, quite as much as that of the Directors, to assist in disseminating a knowledge of the advantages of the Company, for which no more favourable opportunity could be found than the approaching return of another quinquennial investigation and declaration of bonus in the life department. Every policy effected on the participation principle before 31st December next will be included in the division, though, according to the practice introduced at last investigation, the bonus will not accrue until five yearly premiums have been paid. The Directors cannot, of course, foretell what the surplus available for the bonus to be declared next year may amount to, but they have every reason to believe that it will not disappoint the expectations of any of those who have joined the branch since the last division.

The foregoing report having, on the motion of the Chairman, been unanimously approved and adopted, a dividend at the rate of 12½ per cent. (free of income tax) was declared payable on the 16th June current.

Thanks were voted to the Boards of Directors and office-bearers of the Company, at home and abroad, and to the Chairman for his conduct in the chair.

The Political Economist.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE FINANCIAL RESULTS OF THE PRESENT ADMINISTRATION.

Every great public improvement goes through many stages in public opinion, of which the transitions are gradual and the shades delicate, but the beginning and end of the whole progress are very marked. At first the objectors say "It is "too mad to be possible," and at the end they say "It is too "obvious to be clever." The finance of the present Government has now passed through both stages. Five years ago its opponents said it was too wild to be admissible, and now they say it is too reasonable to depend on persons, too plain not to have been adopted under *any* circumstances. Sir Stafford Northcote, with that conspicuous fairness which always distinguishes him as a financier and statistician, told his constituents in an election address that the measures of his rivals had been very successful. He did not say what some of his followers say, that there was nothing particular about the measures, and that any measures would have secured success.

There is a notion and a most dangerous notion growing up that under any system of policy and legislation, the country is sure to be prosperous—"as long," the argument goes, "as "men eat and drink the revenue will go well," and whatever Parliament does, men will work and consume. But history does not countenance this notion of the impotence of Parliament. Government cannot help industry, but it may impede industry. A legislation which removes obstacles will be beneficial to industry and will promote revenue; a legislation which retains impediments and imposes restrictions will impair revenue.

The proof of this is to look at the times when we *did* impede industry. Take the last year before the Free-trade legislation began in earnest. The accounts stand of taxes imposed and repealed as follows:—

	Taxes imposed. £	Taxes repealed. £
1836	3,721	1,021,786
1837	100	234
1838	1,733	289
1839	...	1,063,258
1840	2,155,673	18,959
1841	...	27,170
	2,161,227	2,131,696

showing about a balance of reductions and impositions—the principal item of the latter being the increase of the Customs and Excise in 1840, and of the former the penny-post reform. What was the condition then of the revenue? Was it elastic as it is now? Did it fill the Exchequer as it does now? Did it strengthen Government as it does now?

	£
1836	48,591,180
1837	46,475,194
1838	47,333,460
1139	47,844,899
1840	47,567,565
1841	48,084,360

showing an actual reduction of revenue in the three years, and the great deficits caused by this stationary revenue, just when expenditure was augmenting, were a main item in the accumulated account of national dissatisfaction that drove the Whigs from power, and gave Sir Robert Peel a majority of ninety.

A Conservative statesman is reported to have said: "Any-"body can be Chancellor of the Exchequer. Whatever he is "fool enough to do, the eating and drinking nature of Eng-"lishmen will be sure to pull him through and bring him round." But if there were any magical power by which the consuming power of England must be augmented year by year, independently of legislation and whatever legislation was, and if that consuming power was sure to produce a great revenue, this last reserve of pecuniary strength would have been as patent for the Anti-Free-trade financiers as for Mr Gladstone. But the conclusive evidence of obvious figures shows the whole difference. Compare the last six financial years with which we can deal with the six which we have described—the last six of the old *regime*. The figures of the last six years are these, cast into the same form as before:—

	Taxes imposed. £	Taxes repealed. £
1860-1	2,890,904	2,945,931
1861-2	80,000	2,689,558
1862-3	252,500	353,671
1863-4	30,811	4,646,319
1864-5	9,000	3,244,384
1865-6	...	5,420,000
	3,263,215	19,299,863

Digitized by Google

showing a difference of 16,036,648*l* of taxes repealed or reduced over taxes imposed and augmented. The old six years showed an equal account of relief conceded and burden laid on. The new six years shows this immense surplus of charge reduced. What, then, has been the course of the revenue? All but the last year we can test by the facts—

	£
1860-1	70,283,674
1861-2	69,674,479
1862-3	70,603,561
1863-4	70,208,964
1864-5	70,313,436

For the five years of which we have actual experience, notwithstanding the great reduction of taxation, our resources remained the same. So great was the augmentation of tax-paying power, that though the calls upon it were so very much less, it replied to those demands with an equal copiousness and effect.

The reason of the contrast is very plain. Our policy is now wise, and therefore we succeed. Our policy used to be bad, and therefore we failed. While the Government by laws and restrictions would not let the people work as they wished to work, and as it was best they should work, it did not know where to turn for a shilling. Now that it lets the people exert their industrial powers to the best advantage, the Government has so much money that it hardly knows what to do with it.

The policy of Mr Gladstone is in its essentials the same as the policy of Sir R. Peel. At a time when it was far less generally recognised than now—in the spring of 1863, we published an elaborate supplement, showing how identical the two in essence were. They are not, indeed, new; they are simply the development of Free Trade, and the alleviation of the burdens on industry. They are principally the establishment and enactment of the higher conclusions of cultivated thought. We are far from approving of everything which has been done. Both in 1860 and 1861 we said that Mr Gladstone's measures were likely to cause a deficit; and the event proved that we were not mistaken. Mr Gladstone concentrated in the Budget of 1860 several things which might well have been diffused over successive years. But two observations are both certain and important:—first, that his objects were always right even when he endeavoured to gain that object too early and too soon. Next, that his measures have been perfectly individual. The whole finance of Lord Palmerston's administration bears the characteristic mark of Mr Gladstone's mind. For years past, not always rightly, but always most earnestly, his mind has been concentrated on these measures and on many others. He has worked on them till they have become a part of him and of his nature. So long as he lives he cannot help aiming at similar things. Under a free Government such as ours, the financial reforms of late years were certain at last to be accomplished. Right reason and moral principles eventually find their way into the minutest recesses of fallacy and error. But right reason will not move of itself. Somebody must *take it with him.* "Great passions," says Burke, "belong as naturally to great intellects "as a great fire to a great heat." It is the immense zeal of the one man, not the placid approbation of the many, which completes incomparable reforms years before they would otherwise have happened.

The measures of the present Administration relating to the other parts of finance have been important, but have not been at all equal in effect to their revenue measures, nor at all comparable in the knowledge they indicate or the capacity they require.

	£
There has been a decrease of expenditure in the five years finally completed as compared with the last year of the present Administration of	3,040,083
And there is a further decrease estimated during the present year of	313,206
	3,353,289

but at the same time during several years the expenditure has been very great—far greater than that of Lord Derby's Government. Now the expenditure is reduced, and is less than when Lord Palmerston began to reign; but his first policy—a right and reasonable policy perhaps—a most popular policy certainly—was to augment our expenditure. His Government has *at last* diminished the public expenditure, but it cannot be called a cheap Government. Its defence is that it was politic and necessary to spend the public money; it cannot say that it has not spent it. It has ruled during an "armed "peace," and, therefore, it has spent more than was ever before spent in time of peace.

The operations on the debt are only the result of the other two operations on the revenue and the expenditure as far as Government is concerned. It is true there is a silent process by which the debt is gradually extinguished by the sale of terminable securities, and some of Mr Gladstone's measures give facilities for this process. But still such purchases of life annuities depend, not on the policy of the Government, but on the pleasure of the annuitant, and they will be much the same under any administration. It is for his wonderful operations on the revenue that Mr Gladstone will, as far as we now see, be remembered as a great financier. Very few people, however, were aware that he had diminished the Exchequer bills, the floating debt of England, by about a third. As this is the debt at variable interest, its comparative magnitude is of great importance in periods of very dear money such as we lately experienced.

The following tables show the exact results of the most recent finance:—

CAPITALS of the FUNDED and UNFUNDED DEBT, and ESTIMATED CAPITAL of TERMINABLE ANNUITIES, at the end of each Financial Year, from 1859-60 to 1864-5 inclusive.

	Capital of Unredeemed Funded Debt. (*)	Estimated Capital of Terminable Annuities.	Amount of Unfunded Debt.	Total. (*)
	£	£	£	£
On 31 March, 1860	785,962,000	16,889,010	16,228,300	810,079,310
— 1861	785,119,600	16,240,287	16,689,000	818,048,896
— 1862	784,272,348	16,619,052	16,517,900	817,409,290

PROPORTIONAL REPRESENTATION OF THE NORTH AND SOUTH OF ENGLAND.

We are now able to present our readers with more accurate and complete electoral statistics than the rough calculation on which we ventured last week. The materials from which we have compiled the two following tables, are taken from the Parliamentary Paper, $\frac{1865}{133}$, and from "Miscellaneous "Statistics," part IV., p. 23, 1862, issued by the Board of Trade. Some of the figures are not as recent as we could wish, but they are the best procurable, and will suffice for the purpose of comparison.

We have divided England into two parts, nearly equal as far as population is concerned;—one comprising the more Northerly counties and the chief seats of manufacturing industry,—the other the Southern and more agricultural portion of the kingdom. The assessment under the three schedules A, B, D, shows for the Southern portion a preponderance of wealth nearly in the same ratio as the preponderance of members it enjoys;—but of this total of assessed income, the metropolitan district furnishes one-third. If we were to omit Middlesex from one table, the comparison would be of course greatly modified. We give the totals, first with, then without, Middlesex. Thus:—

Division.	Population.	Property.	Members. Actual.	Proportion to Population.	Proportion to Property.
		£			
[illegible]	9,126,249	97,021,678	195	226	206
[illegible] Middlesex	9,726,790	123,030,994	272	241	261
[illegible] without Middlesex	7,830,285	79,570,254	258	186	169

MR CARDWELL'S ACCOUNT OF HIS NEGOTIATIONS WITH CANADA,

It is almost to be regretted that Parliament has not been asked this session to come to some decision on our relations with Canada. There is a slight want of firmness in the tone of Mr Cardwell's despatch to Lord Monck, recapitulating his negotiations with the Canadian Commissioners, which may yet be productive of mischief. He seems to have assented to several demands from that side and postponed several demands on this, under the influence of a doubt as to the length to which Parliament was prepared to go. The Canadian Government, it will be remembered, thought it expedient to send over four commissioners or agents, Messrs Macdonald, Cartier, Brown, and Galt, all of them members of the Cabinet, to confer with Her Majesty's Government upon the speediest means of effecting the confederation of the British American colonies, upon the share in Canadian defence to be taken by Great Britain and Canada herself, upon the Reciprocity Treaty, and upon the settlement of the Hudson's Bay territory. Of these, the first two subjects are incomparably the most important, and upon neither does anything appear to have been finally decided. With regard to Confederation, indeed, the Secretary for the Colonies merely tells us again what he had already told us in the Queen's Speech, that he strongly approves the project, and that the Government will use all "proper influence" to induce the maritime colonies to accept it, as the Canadas have done. Of the inducements to be held out he gives no hint, and for aught we can perceive New Brunswick and Nova Scotia may continue to reject the project for the next twenty years, and the Government will still be exerting all its "proper influence" in vain. Until the majority of electors in those colonies can be induced to understand all the bearings of a most complex proposition in international relations nothing whatever can be accomplished,—a state of affairs certainly not satisfactory. It is still less so, because the Canadian Provinces appear far less disposed to deal generously with the Mother Country in the matter of defences than the United Provinces might be expected to do. They ask a great deal, and they offer very little. They require us first to execute the works at Quebec, for which Parliament has already granted a small vote. They then, while professing willingness to complete all remaining works, demand that Great Britain should guarantee the necessary loan, thus throwing upon us the ultimate obligation for their works as well as our own, and moreover compelling us to commence the system of colonial guarantees with which we have been threatened for some years, and which is viewed by financiers with great suspicion and dread. Further, they ask that the Government should give them this guarantee now, *before* the Colonial Parliaments have agreed to construct the works, and that the Home Government should engage itself to keep up a fleet upon Lake Ontario. These terms, which betray the old Colonial spirit of reliance upon the mother country rather than the self-dependence expected from a rising State, were of course rejected, Mr Cardwell declining the guarantee until the Provincial Legislature had spoken, and evading the equipment of a Lake fleet by pleading the terms of the treaty with the United States. Less than this Mr Cardwell could not have done, but he nevertheless holds out hopes of a guarantee at a future time, which Parliament will scarcely confirm, and entirely fails to suggest the alternative plan which would be acceptable to Great Britain.

This is the point at which as it seems to us there is evidence of weakness. Public opinion in this country has during the long American war worked itself singularly clear upon this matter of Canada. It has expressed a cordial willingness to fight for Canada, provided Canada is anxious to maintain that connection, and displays that anxiety by doing her fair share in the work of defence. That fair share has been tacitly supposed to be doing, in proportion to her resources, all that we do, except perhaps borrow money. This being the decision, we really do not see why it should not have been clearly laid before the Canadians, with the alternative that if the Colonies after grave and careful discussion considered the terms too heavy, they should be permitted to go free. At present they still think that as England is sure to fight for them in any case, they need not offer more than they can help, and above all need not offer assistance to increase with their resources and population. This, however, is not what England expects, and it would be wiser as well as more honest to face the truth fairly and tell the Canadians that as they are no longer subjects they can not expect the protection irrespective of conquences, which subjects receive from the Sovereign power. They are only entitled to aid, and the conditions of that aid must be settled, like the terms of any other alliance, by mutual agreement. Mr Cardwell seems to have been fettered by the traditions of his office, and to have thought it rather his duty to simplify the task of the Government in Canada than to deal with that Government as a separate party to a possible contract.

At least it is difficult to understand on what other view he consented to the very remarkable arrangement respecting the territory of the Hudson's Bay Company. The Canadian Government is anxious to purchase the territories of that Company, and so become master of the great region which, to use the expression of a recent traveller, will one day furnish British America with a Far West of its own. That wish is perfectly reasonable, and not inconsistent with British interests; but the Canadians, instead of buying out the Company, require that the British Government should guarantee the necessary indemnity. That is in effect,—British credit being an article of direct money value,—they require this country to give them a vast expanse of territory, fuller, perhaps, of minerals than any territory in the world, for nothing. Why should we do it? If, indeed, Canada assenting to English demands and acknowledging their justice, should request that the Hudson's Bay territory be given to her to make them easier, then, indeed, the Imperial present might have been reasonably made; but to give it beforehand seems to be a futile waste of power. Indeed, it is more, for the territory ought to have belonged to the United Provinces as a State, rather than to the two Canadas alone. There is a want of completeness and even of consideration in such piece-meal arrangements which is not statesmanlike, and we greatly fear that in the end matters will remain pretty nearly as they are. The two Canadas will be united under a Federal instead of a single Government, and Great Britain will be liable for their defence and that of the maritime colonies, before any organisation sufficient to call out the internal resources of the colonies has been completed. Such a termination of a very great and beneficial scheme, accepted by the whole nation, would not be creditable to the Colonial Office. Yet, unless Parliament is willing that a distinct alternative should be laid before the Colonial Legislatures, it will hardly be avoided.

THE IRISH CATHOLICS AND THE LIBERALS.

The assent announced by Sir George Grey to a plan which will satisfy all but the most bigoted of the Irish Catholics on the subject of University education, amounts to a *coup de grâce* for Mr Disraeli's political flirtation with the Catholic party, and will probably secure the doubtful Irish seats definitively to the Government at the coming elections. Of all the Irish Catholic members, only Mr J. P. Hennessy announced himself dissatisfied with the views of the Government, and it was only Mr Hennessy, as we pointed out last week, who fell into Mr Disraeli's trap when the leader of Opposition implored the Irish Catholics to trust the Tory party for a Papal and anti-Italian foreign policy. Even Sir G. Bowyer and the O'Donoghue were satisfied with the proposal of the Government, and Mr O'Reilly and Mr Monsell were evidently pleased. In short, the Catholic party and the Liberal Government, for some time estranged from each other—thanks to the political attentions of Mr Disraeli to the former, and the political attentions of the Italian nation to the latter—are once more reconciled, and likely to act together in perfect harmony during the coming struggle. Whether any party can gain much by the uncertain Irish Catholic vote, we are not sure. Neither Tories nor Liberals can govern consistently and in perfect conformity with their true principles, without feeling that they may alienate it at any moment. And neither party can twist their policy so as to secure the Catholic vote without tergiversation and disgrace. But for this very reason the adherence of the Irish Catholics to the Liberals is, so long as it lasts, perhaps less dangerous than their flirtations with the Tories. With the Liberals they live upon terms of distant cordiality with a perfectly well understood chasm between their principles. It is a league of justice and self-interest devoid of sentiment,—the Liberals giving what they would think it right to give to their most strenuous opponents, and the Catholics repaying them by a moderate support on general questions involving the continuance of the Administration. But the tie between the Tories and the Catholics is

Digitized by Google

much more dangerous, because much warmer on some points and liable to violent rupture on others. On the very questions on which the Liberals as a matter of principle rather than of feeling support the Roman Catholics, the Tories are obliged by their ecclesiastical prejudices to thwart them; but on the more general political issues, involving the sentiment towards authority and absolute government, where the Liberals thwart the Roman Catholics, the Tories, not merely on principle, but with all the warmth of hearty sympathy, are on their side. Thus the Tories are in danger of a somewhat feverish feeling towards the Catholics, one of alternate attraction and repulsion of feeling, while the Liberals feel scarcely any hearty political sympathy with them on any point, though they serve their cause—on all questions of political tolerance and religious equality—from genuine conviction of its justice. For these reasons, we think there is less political danger in the not very close alliance between the Catholics and the Liberals than in the intenser feelings both of sympathy and aversion which relate them to the Tories. The Catholics expect nothing but justice from the former; from the latter, they expect at once injustice and favour. Hence there is far more temptation for a Tory Administration, with such a not very scrupulous politician as Mr Disraeli near its head, to stretch its principles somewhat to please the Catholics, than there can be to the Liberals.

It will be said, however, that the concession just made is a proof to the contrary,—that it is an electioneering *move*, intended for the purpose which it seems likely to answer, to determine the swaying balance between the Catholics' predilection for a Tory foreign policy and a Liberal home policy. If by an electioneering move be meant a course taken partly in order to influence the elections, no doubt it is so; but then so is every public measure which a Government brings in not solely from a belief in its usefulness, but also from a belief in its popularity. The nearness of the elections does not make any difference if the measure be one which may be sustained from other than electioneering motives. And we do not hesitate to say that the conciliatory policy which has actually been announced by the Government is one which all moderate men would have approved at any time during the present Parliament, We only wonder that it has been so long deferred. The situation is this. The Catholics of Ireland have at present only two ways of getting degrees. They may send their sons to the Queen's Colleges where all the secular instruction is given by professors who are usually not Catholics, and, at any rate, are never chosen because they are Catholics; and after instruction at these seminaries, with separate religious instruction from professors of their own faith, they are qualified to appear at the Queen's University, and obtain, if they can, a University degree. But to this plan many of the Catholics of Ireland sincerely object. They say that they believe all instruction should be given on a plan of which the Catholic theology is the centre and the pivot. They think no true culture can be secured by thus separating the various branches of knowledge into independent units, and failing to give the true relations between the different elements in the universal whole of human knowledge. But Catholics who think in this way, and therefore object to send their sons to the Queen's Colleges, have no means of obtaining an Irish degree for them at all. They may be examined by the University of London, which now admits men from all parts of the world whether with or without a college education, and gain their degree there, but they cannot obtain any degree in Ireland under such circumstances. The Government very justly thinks this is a grievance of which Catholics have a right to complain, and they propose, therefore, to affiliate Roman Catholic Colleges as well as the Queen's Colleges to the Queen's University in Ireland, and recast the Council of the Queen's University, so as to give Catholics a security for having examiners in the philosophical subjects whom they can trust not to put dogmatic questions or be influenced by dogmatic considerations. The only criticism which it is possible to make on this reform, is that as the University of London has local examinations in Dublin when they are wanted, it is not altogether a necessity. But the answer is that the University of London, though a very impartial body, has from time to time offended the Catholic sentiment of the student by the tenor of its philosophical examinations. At one time Paley's Moral Philosophy—a very bad text-book for students of any creed—was the text-book of the examiners in moral philosophy, and Roman Catholics were asked to give reasons which they despised for philosophical dogmas which they rejected. Now it would scarcely be fair to secure a philosophical examination in perfect accordance with the Catholic sentiment in the University of London where the Catholics are so small a proportion of the University's constituents. Besides this, there is a very pardonable feeling in Ireland, that as all Protestants can get a good Irish degree without making any sacrifice of conviction for the purpose, the same class of degree should be open on the same terms to the Irish Catholics, so that they should not be the only Irishmen obliged to seek an English degree. On the whole, there can be no question but that it is quite fair that the exclusively Catholic Colleges should be placed on equal terms with the secular Queen's Colleges as regards the examination for degrees. It will secure not only justice for the students there after completing their education, but also greater care in the choice of the men who are to give that education. We may be sure that there will always be an eager rivalry between the adherents of the Roman Colleges and the students of the Protestant or neutral Colleges for the University distinctions open to all alike. And the prospect of this rivalry must have a wholesome effect on the separate education given in the Roman Catholic seminaries, and secure for it a higher standard.

From every point of view, therefore, we cannot but applaud the decision of the Government, and we do so not the less but the more because it will influence the elections. It *ought* to influence the elections. When the Catholics see that the Liberals—and the Liberals alone—are really anxious to secure their civil equality—equality for their priests with Protestant chaplains in the gaols—equality for their students in University distinctions—nay, that a large party of Liberals, though not yet the Government, wish to secure equality to the Catholic Church of Ireland with the Protestant, the Catholics ought to feel that, notwithstanding their greater differences with Liberals than with Tories on every question of general policy, it is better for them, and better for the country at large, that Liberals should govern, at least till social and political equality between men of all religions has been finally secured.

IMPORTS AND EXPORTS.

MEMORANDUM by the Inspector General of Imports and Exports as to the method adopted for ascertaining the real value of the imports into the United Kingdom.

(Issued by the Statistical Department of the Board of Trade in April 1864.)

The real value of the imports into the United Kingdom, as shown in the statistical accounts published under the authority of the Government, is ascertained as follows:—

1. In the case of certain articles,—of those, namely, in regard to which the tariff prescribes that their value (either with or without a specification of quantity) shall be stated in the entry inwards at the Custom House,—it rests on the declaration of the importers.

If the officer of Customs to whom such declaration of value is tendered should see reason to question its correctness, he is entitled to require further evidence on the point, or he may satisfy his doubts by an examination of the goods.

The articles of which the value is ascertained by this method, however, are but few compared with the whole number of those included in the statistical registry, and they are generally of minor importance.

2. In the case of the more numerous and more considerable articles which are entered at the Custom House by quantity alone, the value exhibited in the statistical record is obtained by means of a process of computation which combines the quantity with the average prices of the several commodities.

The average prices thus employed are supplied to the Inspector-General of Imports and Exports in part by some of the leading merchants and brokers of the city of London, who willingly aid an operation so obviously serviceable to the public,—in part by three gentlemen, who have special facilities for watching the course of the markets, and who receive a fixed remuneration from the Treasury for collecting such prices in the ports of London, Liverpool, and Hull respectively.

In striking the average price for each article, regard is had to the specific distinctions under which it is exhibited in the tariff,—these distinctions being of necessity observed also in

Digitized by Google

the Statistical Registry,—and not being in every instance identical with those which are commonly recognised in mercantile transactions.

As the same article, in many cases, varies widely in its market value, according to the country of which it is the produce, separate prices, applicable to the importations from the differenf countries, are in such cases required.

The rules which are required to be kept in view in fixing the average prices will appear more distinctly on reference to the annexed copy of an explanatory note which was addrsssed to the merchants and brokers from whom assistance was sought at the time when the registry of real value was first established.

When the prices obtained from different sources are found to disagree,—such disagreement, unless it be referable to some known cause, is made the subject of a careful investigation, before the average is finally adjusted.

The average price of an article being fixed for a particular month for the porte of London and Liverpool separately,—and, in the case of certain descriptions of merchandise, for the port of Hull also,—the quantity imported into each of the ports is computed at the price belonging to it, and the mean value thus ascertained of the importations into the two or the three ports, is adopted as the general rate of valuation for the importations into the kingdom at large.

The value attached to the importations of each article for the entire year is the sum of the value affixed to the importations of each successive month.

The manner in which the operation is effected is shown in the annexed table. (Signed) JOHN A. MESSENGER.

Explanatory Note referring to a Classified "List of Articles imported into the United Kingdom for which Rates of Valuation are desired."

[Addressed to merchants and brokers from whom periodical returns of average prices were requested.]

The object for which it is sought to attach rates of valuation to the various commodities enumerated in this list, is the ascertainment (as nearly as possible) of the true money equivalent of our imports, considered both collectively and in the detail of individual articles, and with reference as well to the trade carried on with particular countries and colonies as to the general commerce of the kingdom with all parts of the world.

The rates, when obtained, are to be applied to the quantities of the several commodities as they appear in the records kept by the Inspector General of Imports and Exports, which records, being founded upon the entries passed by the merchants at the Custom House, exhibit the articles imported from all countries under those designations and distinctions, and these alone, which are recognised in the Customs tariff.

Digitized by Google

Hence, estimates of value adapted to a different specification of the same articles, to varieties of fabric or degrees of quality of which the Customs tariff takes no cognisance, would not be available for the purpose which this inquiry has in view.

On the other hand, it is important that any well-defined differences in the price of a commodity affecting the whole produce of *particular countries* should be noted, since a neglect of such differences would lead to a false representation of the comparative value of the trade carried on with those countries respectively.

What is required, therefore, is in general a single rate of valuation, but in particular instances more than one rate, corresponding as nearly as possible with the average market price of the article in the United Kingdom during a given period for each description of merchandise included in the accompanying list;—a *single* rate wherever the same average price may be deemed fairly applicable to the importations from all countries alike;—*separate* rates for the importations from different countries where the nature of the case requires that they should be so discriminated.

The distinctions which are conceived to be necessary in regard to the produce of particular countries are indicated in the list under the heads to which they belong, but a practical knowledge of the various commodities will probably suggest other distinctions of the same kind as necessary to be introduced, and point out some of those which are inserted as unnecessary to be retained.

The articles have been distributed into classes with the view of facilitating the process by which values are to be affixed to them. The division is of course an arbitrary one, and where it seemed that an article might almost indifferently be assigned to either of two classes it is inserted in both. (Signed) JOHN A. MESSENGER.

ON HOUSE ACCOMMODATION FOR LABOURERS.

(COMMUNICATED.)

A GREAT deal of public attention has been directed for some time to the insufficient habitations of a large portion of the British people. Too much, indeed, can hardly be said in reprobation of this crying evil. It may be pronounced, without fear of exaggeration, that a majority of our population is lodged in a manner injurious to health, decency, and morality. But although a great deal has been said and written upon this most important subject, the discussions relating to it have been usually of a very superficial character, and the remedies either adopted or proposed are little calculated either to remove or even to mitigate the mischief. It is proposed in the following paper to subject this important matter to a somewhat close examination, and to point out how, and how only, the mighty evil can be cured. But first a few words upon the only practical measure supposed to bear upon the lodging question which is likely to receive the sanction of the Legislature—I allude to the Union Chargeability Bill. We are told that in what are called close parishes, meaning thereby parishes with a single owner, or with a few owners who combine, cottages have been pulled down to avoid the payment of poor rates, and that when the burden of rates is thrown upon a wider area, upon the Union instead of the parish, the motive for the demolition of existing cottages will be removed and that new cottages will be built. That in some instances cottages in close parishes have been pulled down and the erection of new cottages prevented, in order to diminish the burden of rates, must be allowed, and also that the new law will remove this motive for so doing. It seems equally certain, without discussing its merits in other respects, that the practical effect of the Union Chargeability Bill in this way will be in a national point of view almost insignificant.

1. Because the close parishes form but a small portion of the whole country, while their population forms a still smaller proportion of the entire population.

2. Because in a great number of close parishes the labourers are exceptionally well lodged. This is peculiarly the case on the estates of the great landowners, but it is also common on less extensive properties. The worst housed being those who are the tenants of small capitalists and speculators.

3. Because the temptation to pull down cottages, or to repair insufficiently those that still exist, arises less from a desire to keep down rates, than from another cause which lies at the root of the whole matter, and which we will now proceed to consider.

This cause is the undeniable fact that cottage building does not pay. Houses intended for labourers, if solidly built, or of the requisite dimensions, cannot be let at rents which will yield a suitable return for the outlay. This can easily be shown: a pair of twin cottages each with five rooms, and less than five will not properly accommodate a married couple with children, cannot in most districts be built at a less expense, including the value of the land, than 250*l*. Indeed, generally speaking, this calculation is too low.

Now 5 per cent. on 125*l* is 6*l* 5s per annum for one cottage; to this must be added rates, taxes, and repairs, and we arrive at as much as 7*l* 10s, an amount which in the rural districts few labourers can or will pay. The large class of artisans and workers in manufactories earning, with the help of their families, from 1*l* to 5*l* a week, can well afford to pay a remunerative rent for house accommodation, but such people ordinarily prefer to spend their incomes on meat, drink, and clothing, caring comparatively little how they are lodged. In short the root of the evil under discussion may be summed up in the following propositions:—

1. That the construction of suitable dwellings for labourers does not answer in a pecuniary point of view.

2. That it does not answer because one large section of the labouring class has not the means of paying adequate rents, and another large section is unwilling so to do.

Having thus pointed out the root of the hideous evil we see around us, in the small, crowded, filthy habitations of a majority of our fellow-countrymen, the next thing to be done is to point out a remedy. This can clearly only be found in a change of opinion among labourers. They must learn the necessity of providing themselves with comfortable homes if they wish to live comfortably and to bring up healthy children in the paths of decency and morality. A large section of them have it in their power to attain the end in view at once, or within a short time. The remainder can only do so by degrees. But when a comfortable cottage is considered by every father of a family a sort of necessary of life, the natural rate of wages will rise, and the object in view will thus be attained. It can be attained, so far as I can see, in no other way.

With regard to the indifference so widely diffused among this working class on the question under discussion, the general habit of taking a lodger at 1s or 1s 6d per week may be referred to. In portions of the South of Scotland known to the writer, employment is ample, and wages high, but the cottages are miserable, often containing only two rooms, seldom more than three. Many people appear to suppose that suitable dwellings for the working class could be provided under the influence of feelings of benevolence on the part of the wealthier classes. That of landowners alone has been hitherto appealed to, but one does not see why manufacturers and indeed all employers of labour might not be required to provide dwellings for their workmen upon grounds but little different in kind and in cogency. This view of the subject followed out to its legitimate consequences abandons the competitive system which now governs society, and would lead to a modified communism. All honour is due to those persons in all conditions who have provided house accommodation for the workmen in any way dependent upon them. It is difficult to discover a more noble and useful employment of wealth and position.

But let us calmly calculate the sum which would be required to do what is requisite in this respect for the whole population, and we shall see at once that eleemosynary efforts can go but a little way towards it.

It is certain that more than half the entire population is badly lodged. Let us take the half at 15,000,000, say 2½ millions of families, and that 50*l* would be necessary to supply the wants of each family. We have to furnish an outlay of 125,000,000*l* sterling. This calculation is far under the truth. The statement requires no comment.

The reader will perceive that what precedes might readily be expanded into the dimensions of a pamphlet. In some portions, as in that which refers to the natural price of labour, he will perhaps think that explanation is really required. It appears however to the writer that he has trespassed as far as he can venture to do on the columns of a newspaper. The general conclusion to which he has arrived

Digitized by Google

is, that when the working classes are able and willing to pay adequate rents, they will obtain sufficient house accommodation, but not till then.

SAVINGS' BANKS RETURN.

Literature.

TYLOR'S DEVELOPMENT OF CIVILIZATION. Researches into the Early History of Mankind, and the Development of Civilization. By EDWARD BURNET TYLOR, Author of "Mexico and the Mexicans." London: Murray and Co. 1865.

IT is about four years since Mr Tylor gave to the public his "Mexico and the Mexicans," a well-written book, and interesting in regard to the common topics of travellers; but still more so, we could not help thinking, from the indications which it artlessly presented of a ruling and ever-present passion for philological research. Philology, it is true, did not prevent the author's talking, —as all travellers in the tropics *must*,—about mosquitoes and the like nuisances; but philology quickly diverted his attention, and led him to divert that of his readers, from the creatures themselves to the higher subject of the local names they bore, and to the ethnological pedigree of their sponsors. Our recollections of such matters make us glad to meet Mr Tylor again as a professed philologist, in which character his ingenuity and originality will render his book suggestive to the most inquiring, and frequently amusing to the most careless reader. We speak thus, because he is a very speculative philosopher, governed by a curiosity which constantly impels him towards the furthest boundaries of the ascertainable; while he is, however, too cautious and modest to be noisily asseverative about his views; and thus there is more chance of their not being considered with sufficient seriousness in many quarters than of their making an undue impression upon persons unqualified to sift each argument.

We proceed to explain the subject of a disquisition, which, if not the most valuable in the volume, is the most prominent, and, we think, the most original. The early history of mankind, before credible memorials appear of individuals, is a history of customs, rudimentary arts, and rudimentary religious observances, which leave traces of themselves, often by apparent anomalies, in the usages of more cultivated generations. Now language is one of these customs or arts; it is not among those most obviously interesting to travellers, in regard to its local variations, seeing that Yes and Ja, Oui and Sì, answer all purposes with equal efficacy; but it is highly interesting to the historical inquirer, because the art is universal, and its fashions change gradually and imperceptibly, according to laws of their own, and independently of many outward circumstances.

Thus, etymology becomes a general record of antiquities, which establishes the common ancestry or ancient intercourse of nations now inhabiting various climates, and widely differing in their creeds, modes of living, and civil institutions. It is true that some rude languages are remarkably variable; for a custom has been found, scattered in every quarter of the world except Europe, of prohibiting all words to which the catastrophes of reigning families, &c., could attach anything like disagreeable associations. But language is either spoken or written, and the latter kind mostly varies less rapidly and more methodically than its counterpart, to which it may even communicate a portion of its own stability. Written language, it must also be observed, has the older positive history between the two. Oral speech may be hypothetically traced to rude imitative elements, or to a sudden birth of Nature, or illumination from

> "—— some other deity than Nature,
> That shapes men better."

But written language can be traced by external evidence to its humble origins. Alphabetic is founded on syllabic orthography; and the latter on the use of hieroglyphics. On Egyptian monuments symbolic characters are intermingled with the alphabetic (or syllabic?) originally derived from them; and the same thing is often doubly represented. The symbol is apparently retained to guard against an ambiguity in the phonetic equivalent; as if an Englishman wrote *box*, and added a little rough drawing to show whether he meant a plant or a receptacle. We might imagine, to make the cases analogous, that a *bow*, or any object whose name began with a B, was drawn for that letter, an orange for O, and so on; or, perhaps, that the *bow* stood for the two letters *bo;* and that in some cases nearly the same pictures showed bows or oranges to be the actual subjects of discourse. From such beginnings, we have alphabets more or less perfect; the old Hebrew, which distinguishes consonants more regularly than vowels; the Latin, distinguishing vowel qualities but not quantities; the Greek, partly distinguishing both; and our own alphabet, which is used with less consistency than most of the ancient ones. From the same elements, where they have not been simplified with like intelligence, comes the Chinese character, combining phonetic, pictorial, and generic symbols, which have been alike disfigured by usage to secure a certain amount of expedition. From the same elements came the old Mexican character, to which Mr Tylor has devoted peculiar attention, and in which an analogous development is traced.

Now, a modern Englishman can speak whatever he writes, and write whatever he speaks, although some classes of documents,—calculations, statistic tables, and, perhaps, chemical formulas,—are more readily understood by the eye than by the ear. But when we know that the Egyptian scribes frequently drew and spelled the same common name, and that a Chinaman sometimes explains his speech by drawing characters in the air, it becomes conceivable that pictorial writing may have once expressed many things more clearly than speech, and that it may have been necessary to primitive speakers in its rudimentary forms, say in tracing figures in the air, in pointing to objects, and in gesticulations, such as the ruder classes of men use abundantly even at present. Such considerations justify a philologist, not, indeed, in hastily and phantastically delineating a primitive language of mixed cries and gestures of which the latter would be objectively the most significant—but in adding to the materials of science, as Mr Tylor does, a diligent collection of notes on the Gesture language of Man, as it actually exists in divers places. This language forms the main subject of the opening chapters of his work, till we are led to view it in connection with permanent writing by means of the Roman numerals, and some other ingenious exemplifications.

We find here many curious and amusing particulars respecting the systems of manual communication which have grown up in asylums for deaf mutes—among rude Indian tribes, who are often unable to understand the speech of their nearest neighbours—among the Cistercian monks, who have made a virtue of taciturnity—among Mimes in the days of the Roman Empire, &c. We find our author speaking with some energy of the uniformity and universality of this language, and its direct dependence on the instincts of human nature. He even intimates by examples that a savage from any country can understand and be understood in a deaf and dumb school. Now, it is difficult to measure the full scope of these statements; but the details furnished by Mr Tylor present some striking difficulties to us. He cites an assertion that the New Zealanders give a "silent assent" by "elevating the head and chin in place of nodding acquiescence." But both gestures, he ingeniously observes, have a similar relation to the ordinary gesture of dissent. It is more remarkable that some of the Indians visited by Captain Burton expressed *yes* by waving the hands straight forward from the face, and *no* by waving the *hand* from right to left. These signs, we are told, "correspond with the general practice of mankind," because we suppose the hand is moved in the same direction as the head might have been. But let us suggest another important point which remains to be considered. The classical languages distinguished nodding towards a person (ἐπινεύω and *annuo* or *adnuo*) as a sign of *assent*, from nodding backwards (ἀνανεύω, *renuo*) as a sign of dissent. It is clear that a New Zealand suppliant, kneeling before the Homeric Jupiter, might have misinterpreted the signal of his disapprobation. We doubt not but that Mr Tylor might partially explain the paradox; but, after all reductions, the negative gestures of humanity seem to differ as much as the old negative words of some languages which have no obvious general affinity: com-

Digitized by Google

pare English *nay*, *no*, and the prefix *un*, with Hebrew *lo'*, *'eyn*. We are driven to conclude that Nature goes for little and custom for a great deal in every kind of human communication.

Before examining the acts of savage nations as indications of the first steps which man makes in his progress to civilisation, Mr Tylor stops to consider, in a chapter on the Growth and Decline of Culture, some objections which present themselves to his mode of inquiry. There is no palpably continuous progress in the universal history of Invention; the most savage tribes may have had more cultivated ancestors, and again barbarous ancestors, at a higher stage in their genealogies.

There are countries, and perhaps whole continents, in which arts and religions, systems of education, and political organisations, may have been several times swept away by wars, immigrations, or diverse calamities or corruptions, and have as many times gradually been rebuilt upon new foundations. All modern savagery, it may plausibly be deemed, represents degenerate rather than undeveloped humanity; at least what we know most distinctly of the life of primitive nations, say from Egyptian monuments or Hebrew history, displays a graceful mixture of simplicity and completeness, further removed from the life of the Cannibal Islands than from that of the Englishman of the nineteenth century. On these points Mr Tylor inclines to such views as are most encouraging to the antiquarian who would "magnify" his vocation. He observes, for instance,—

"Among the lower races, arts which belong to the daily life of man or the family, and cannot be entirely suppressed by violent interference, do not readily disappear unless superseded by some better contrivance, or made unnecessary or very difficult by a change of life or manners..... ..The Metal Age does not degenerate into the Stone Age except under very peculiar circumstances .....Perhaps this difficulty [our want of evidence as to the results of decline in civilisation] rather affects the history of particular tribes than the history of culture as a whole."

In regard to such points, it is mostly easier to study the history of a country than that of a race. We know, for instance, how England was overrun by the Saxons and Danes without any decided permanent detriment to the arts that had flourished in the British Roman period. But what if it be true that some of the Welsh Britons, finding themselves straitened at home, emigrated to America under Madoc, and that their descendants were afterwards found living there like wild Indians? What if many arts among men thus cast away have been neglected for want of stores and organised labour till it was too late to recover them?

There are large tracts in all quarters of the world in which we find traces of a Stone Age; but their first inhabitants may, in some cases, have been originally acquainted with the use of metals. Mr Tylor finds traces of a Stone Age in Hebrew and Egyptian observances, viz., in the knives used in embalming and circumcision, as men are always slow to mix up mere technical improvements with their solemn ordinances. But he partly fails, we think, to find vestiges of stone knives in the Indo-Germanic languages. If the Latin *saxum*, a rock, comes from *seco*, to cut, it must be from a passive form rather than an active. It must express a cliff or cloven rock rather than a cleaving or cutting tool. Compare *rupes* from *rumpo*. On the other hand, our author finds in places important criteria by which nascent are to be distinguished from declining arts. We refer especially to his discussions of the Australian *boomerang*, of an art between matting and weaving found among New Zealanders and American Indians, and of the ornamentation of primitive pottery.

From the history of the useful arts, we turn to that of mythologic tradition and talismanic rites, in which we evidently tread on less secure ground. We must expect irregular vicissitudes, and not gradual progress, in the development of all doctrine which cannot be constantly verified by vulgar experience. But the roots of superstitious error are traced by our author to the natural imperfections of the childish and inexperienced intellect, always apt to confound thoughts and things, dreams and perceptions, and to suppose that objects may be represented in all their outward relations by their images and even their names. It may be thought that in this sphere the deepest ignorance is founded on corrupted knowledge, and the grossest credulity fostered by designing subtlety. But there is a singular rudeness about sorcery in the countries where it most flourishes, in which, *e.g.*, the rattle and the drum, as Mr Tylor observes, continue to play a leading part among people who have long been familiar with better instruments.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 22nd inst. The return for the previous week is added:—

DEBTOR.	June 22, 1865. f	c		June 15, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,724	81
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	797,822,975	0	.....	823,871,025	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	7,689,816	10	.....	7,166,942	33
Treasury account	131,499,115	0	.....	108,134,924	3

Sundries	11,894,355	33	.....	10,773,885	43
	1,380,078,539	47	.....	1,368,745,024	55

The Bank return is not good this week. Compared with that of last week, it shows a decline of more than 12,000,000f in the discounts, and an augmentation of 16,732,000f in the coin and bullion. The deposits are 13,540,000f more, and the circulation of notes 36,000,000f less.

The city of Marseilles has contracted for a loan of 8,000,000f from Messrs de Rothschild of Frankfort and Paris. Of the amount, 2,000,000f are offered for public subscription. The bonds are of 500f, issued at 490f, and bearing 5 per cent. interest.

Messrs Rostand and Co., the great sugar refiners, of Marseilles, have stopped payment. Their liabilities are estimated at from 8,000,000f to 15,000,000f. Their failure has produced great consternation at Marseilles. The shares of their Company, which last week were 645f, were the day before yesterday quoted at 25f on the Bourse of that city, and at Paris have been done in the *coulisse* at 17f 50c.

The strike of the cabmen employed by the Petites Voitures Company which commenced last Thursday has not yet ceased; but the company has been able to set running a considerable number of its vehicles, by employing as drivers stablemen and others accustomed to horses. The company possessing a monopoly of all cabs properly so called, and the greater part of the superior sort of vehicles designated *remises* or flies, the strike has been productive of the greatest inconvenience to the public, and has done injury more or less considerable to certain branches of trade. There is accordingly a universal outcry for the suppression of the monopoly; and most of the newspapers have served up to their readers the economic commonplaces against monopolies in general, and have with much irate eloquence demonstrated the iniquity of one of cabs in particular. The wonder is that there should exist any necessity for treating such a question at all in the year of grace 1865, in the *soi-disant* capital of civilisation. A greater wonder is that the Emperor, who looks into such matters himself, should not see that there that there is just as much reason for destroying the monopoly of public conveyances in Paris as there was for putting down those of butchers and bakers.

During the last three days the Bourse has displayed a certain degree of firmness, but the business done has been limited in amount, especially that of to-day. The quotations are irregular, some having risen and others fallen. The most marked rise has been in the Mexican loan; the Italian loan has also improved. The following are the quotations—that of the Three per Cents. is ex-coupon:—

The Parliamentary system in France is really very droll. The Corps Legislatif has now been occupied for more than a fortnight with the Budget of 1866; but, instead of discussing the sums demanded for different purposes, and the possibility of reducing them, as an English House of Parliament would do, it has listened to speeches of enormous length, and appalling dulness, on all manner of subjects,—public institutions, the salaries of professors, the right of negroes to vote in colonies, infernal machines for blowing up ships, the advantages and inconveniences of the maritime inscription, the depressed state of agriculture, and the education of their Royal Highnesses the sons of Pomare, Queen of the Tahiti islands. It follows, that though one would suppose that the Minister of Finance is oppressed with labour and care, he is in reality the least busy of all his colleagues, and he is the happiest withal, since all the palaver of honourable deputies is addressed to him, while the votes of money he asks for are accorded *nemine dissentienti*.

The deficit of the budget of 1863 was stated last week. A Bill now before the Corps Legislatif fixes that of 1862 at 34,953,625f, the total expenses in that year having been 2,212,839,327f, and the total receipts 2,177,885,702f. Your readers must not be surprised that several budgets are in different forms before the Legislature at the same time. That is the French way of doing business, and grave authorities here affirm that it is infinitely more scientific than, and therefore superior to, the English custom of presenting a budget, once for all, and then being done with it.

The Minister of Finance having found that the long period of four months heretofore allowed for the payment of sugar duties was very inconvenient to the Treasury, proposed a few days back to the Corps Legislatif to introduce a clause into the Budget Law reducing it to one month. This created great commotion among the refiners and importers, and they made strong representations against it. In consequence an arrangement has been made that the period shall be reduced to two months instead of one, and that at the expiration of these a prolongation may, under certain circumstances, be obtained. The arrangement is to come into effect from the 1st September.

A treaty of Commerce and Navigation concluded on the 4th March last, between France and the Hanse Towns of Bremen, Hamburg, and Lubeck, has been ratified and promulgated. It is to come into operation on the 1st of July next, and is to last for twelve years. It is in substance the same as previous treaties of the like kind.

An Imperial decree declares applicable to England the treaty of commerce concluded on the 30th June, 1864, between France and Switzerland.

A convention has been signed between Spain and France, by which the former undertakes to suppress the surcharges on importations by her land frontier, that is from France, and the latter extends to Spanish productions the tariff applicable to importations from England, Belgium, the Zollverein, Switzerland, and Italy. The convention, on the part of Spain removes a grievance of which the South of France and the North of Spain Railway Companies had complained, and it will augment the importation into France of Spanish ores and fruits, particularly oranges. France on her part gains the advantage of having her tariffs the same on all her frontiers. But the chief interest of the convention lies in the probability that now that Spain has been induced to move in the path of Customs reform, she can, under a little gentle pressure from England and France, be made to go farther.

In the summary last week of the answers of the Chamber of Commerce of Lyons to the questions relative to banks and currency proposed by the Superior Council of Commerce, there is a misprint which requires correction. Instead of "The Chamber does not think that the extension of *currency* in France has prevented the accumulation of savings," read "the extension of *luxury*."

M. Victor Bonnet, who possesses considerable authority as an economist, and is a brilliant writer, has collected into a volume entitled *Le Credit et les Finances*, various articles on economic questions, contributed by him to the *Revue des Deux Mondes* and other periodicals, and has added to them some new matter. The work is divided into two parts. The first one treats specially of the Bank of France, of the causes and effects of the raising of the rate of discount, of the liberty of banks (*id est* the issue of notes), of disposable capital, and other kindred subjects which have latterly occupied public attention. His object is, he tells us in his preface, to demonstrate:—1. That there is no disposable capital in a country, except that resulting from savings, which is an excess of resources over wants. 2. That credit is a powerful auxiliary in circulating this capital, but is not capital itself; and that when the said capital becomes rare there is no means of credit which can replace it, and it must be paid dear, according to the law of supply and demand. 3. As to money or the precious metals, it is the form in which disposable capital circulates, and follows all its laws, being abundant when that capital is abundant, and rare when it is rare. In discussing the various branches of his subject, M. Bonnet displays great ability, and at the same time proves that he has diligently studied our English writers, especially James Wilson and Stuart Mill. And he writes with the terse telling argumentative power, the concision, elegance, clearness, which are the distinguishing qualities of good French authors. In one respect, however, he seems to me to have eluded a grave difficulty. He is opposed to the issue of notes by more than one bank, and yet is fully alive to the great evil and loss, of having in France the enormous sum of from four to five *milliards* (160,000,000*l* to 200,000,000*l*)* in circulation in the form of the precious metals: but he does not state how this sum can be reduced to reasonable limits *without* the agency of more than one bank of issue. What he says on the utility of banks of deposit has no direct application to the point. The second part of the book treats of the credit of railways and the means of completing them, of budgets and taxes, and of the influence of political liberty in economising national expenditure. On these matters, as on the preceding, M. Bonnet writes vigourously and well.

The establishment by the Agra and Masterman's Bank of a branch in this city excites much interest in the commercial world. The Bank has purchased for its offices a large house, No. 10 Place Vendôme, for 1,400,000f. "By this acquisition," says the *Finance*, "the Company indicates a desire to take part in French enterprises. We felicitate it thereon, and we also felicitate our own country. When the spirit of initiative seems to abandon French companies, it is well that foreign capital should manifest a confidence which every day is declining among us." According to the same journal, the Bank has bought from the Immobillière Company a large tract of building ground at Marseilles, and is in negotiation for the purchase of 150,000 metres more in the same city. Since when, I would ask, has the buying of land for building formed part of legitimate banking operations? Has the theory that the capital of a bank should always be capable of prompt realisation ceased to be true?

The Grande Combe Coal-pit Company realised in 1864 profits of 2,015,582f, and after 431,075f for the payment of works, interest on loans, and the statutory reserve had been deducted, there remained 1,584,507f, which was sufficient to allow a dividend of 65f per share to be declared. The quantity of coal extracted was 506,000 tons. The Grande Combe is one of the most important coal-pit companies in this country.

The Northern, Eastern, Lyons, Western, South of Austria, Saragossa, Roman, Portuguese, and other railways are advertising the payment of coupons on bonds and shares from the 1st July next.

The Credit Mobilier announces that it will from the 1st July pay the following coupons:—Credit Mobilier shares, 25f; Southern Railway shares, 22f 50c; and bonds, 7f 50c; Immobiliere Company shares, 25f; and bonds, 7f 50c; Ports of Marseilles bonds, 15f; Parisian Gas bonds, 12f 50c; French Transatlantic shares, 12f 50c; Ottoman loan, 1863, bonds, 15f; Entrepots et Magasins Generaux shares, 15f; Vieille Montagne bonds, 12f 50c; Paris Omnibus shares, 45f; and bonds, 12f 50c; Cordova to Seville Railway shares, 7f 50c; bonds, 7f 50c; Austrian Railways shares, 12f 50c; Russian Railways shares, 12f 50c; Mines d'Auchy au Bois bonds, 6f 25c; Credit Mobilier Espagnol shares, 10f; Phœnix Espagnol shares, 3f 75c; Imperial Ottoman Bank, not yet fixed. When the shares and bonds of French companies are "to bearer," the amount paid will be some centimes less, on account of the tax.

The Spanish Mercantile and Industrial Company announces the payment from 1st July of 57 reals as half-year's interest of 6 per cent. on shares. At Paris, the payment is to be made by Messrs de Rothschild.

The report of the Spanish Credit Mobilier on the operations of 1864 has been published. It says that that year was of exceptional gravity, owing to the outbreak of a commercial, financial, and industrial crisis, which shook or ruined some of the best established houses, and caused numerous failures; but that nevertheless the affairs of the company were maintained in a good position. The cession to a special company of the principle of lighting the city of Madrid with gas is, the report affirms, advantageous both to the Credit Mobilier and the company. For it the Mobilier is to receive 40,000 shares of the company of 500f each, and for five years, from 1870, a fourth of all the profits above 10 per cent. On the other hand, it is to give up to the company all its works, and to guarantee it interest of 8 per cent. on its capital for ten years, from 1st January, 1866. The extraction of coal in the

* Some authorities estimate the amount much higher

Digitized by Google

pits ceded to the Credit Mobilier had made great progress; it was 57,000 tons in 1864, and only 41,729 tons in 1863. The preparatory operations for working the iron mines of Irun had been continued actively. The Mobilier sold last year, on advantageous terms, some of the building ground it possesses at Madrid, but declined an offer for the remainder, in the belief that from the position it occupies, it is destined to rise in value. The Phœnix Assurance Company, under the patronage of the Mobilier, had commenced business, and had obtained fair success. As to the Northern Railway, a bill relative to the payment of the debt it owes the Mobilier has passed the Cortes, and there is every reason to believe, says the report, that the crisis from which the line suffered last year will not be durable; there is likewise reason to hope, it alleges, that the Government will accord the just demands of the Northern company. The Cordova to Seville line was able to distribute 4 per cent. on its shares, though its receipts were not large; and the Cordova to Malaga line is on the eve of being terminated. On the whole, the profits of the Mobilier in 1864, from its investments and other operations, were 85,464,831 reals, and after deducting 15,276,723 reals for depreciation of securities and 1,463,940 for expenses, there remained 68,724,167 reals. Of this sum, 24,613,227 reals have been paid to the shareholders as interest of 6 per cent., being 114 reals per share; and the meeting resolved, on the proposition of the directors, that a further distribution as dividend of 9,120,000 reals, or 38 reals per share, should be made. Adding to these two items the reserve and the per centage of the directors, there was a total of 35,638,372 reals, leaving 33,085,795 reals to be carried forward. The sum awarded to shares makes 8 per cent. of the nominal capital, and the report declares that the directors consider it under the circumstances very satisfactory. The balance carried forward exceeds 6 per cent. of the capital. In French money, the revenue per share is 30f; in English, 1*l* 4s.

The following is the market report:—

Flour.—Business continues inactive at *Paris*, and yesterday the quotation was 43f to 47f the sack of 157 kilogs. Six marks, current month, were 46f 25c to 46f 50c; July and August, 47f 50c. Type Paris, the 191 kilogs, 27f 75c disposable.

Wheat.—At *Paris*, yesterday, certain lots went at a decline: choice white was 26f 50c to 27f the sack of 120 kilogs; choice red, 26f to 26f 25c; first qualities, 25f to 25f 50c; current sorts, 24f 50c; and ordinary, 24f.

Cotton.—The sales at *Havre*, in the week ending Friday, were 11,636 bales, chiefly Asiatic, and the arrivals 9,192, the greater part from England. The stock was estimated at 54,900 bales. The closing quotations were 5f to 10f higher for most sorts. Low New Orleans was consequently 220f the 50 kilogs; good ordinary qualities in Broach, 150f; Tinnevelly, 125f; Madras, 145f; China, 127f; Egypt, 215f. The market on Monday was very active, but was calmer on Tuesday and yesterday. The quotations yesterday of New Orleans varied from 210f to 240f Jumel, 237f 50c; Tinnevelly, 140f; Madras, 160f; and for delivery, 147f 50c to 162f; China, 125f and 130f.

Coffee.—The sales at *Havre*, in the week ending Friday, were 280 sacks Port-au-Prince, 83f the 50 kilogs in bond; 250 Cape, 85f to 87f 75c; 130 Gonaives, 88f 50c to 89f; 200 Saint Marc, 91f; 300 Rio not washed, disposable, 80f to 82f 50c; 1,669 ditto, for delivery, 77f; 12 Rio Carnooly, disposable, 92f; 80 ditto, washed, 105f; 317 La Guayra non grages, 95f to 96f; 170 ditto for delivery, 97f; 50 grages disposable, 107f; 30 Nicaragua from Liverpool, 22f 50c; 75 Mocha, 95f. By auction, several lots of different sorts of damaged were sold. The arrivals exceeded 6,000 sacks. This week, Rio, 83f 50c, 85f, and at prices kept secret; Leogane, 84f; Cape, 86f and 85f; La Guayra, prices not stated; Malabar, 92f and 90f. At *Nantes*, last week, 100 tons Ceylon plantation were taken at prices kept secret. No sales this week. At *Bordeaux*, last week, 475 sacks Maracaibo, 107f 50c; several lots Rio, 81f 50c; 350 La Guayra grage, 198f; 200 Mysore, 118f. Some damaged La Guayra was also sold by auction. This week, Rio washed and unwashed, at prices not stated. At *Marseilles*, last week, 396 sacks Rio for delivery, 75f; 2,500 Maracaibo, 85f:—by auction, some damaged Rio. Nothing done this week.

Sugar.—Calm prevailed at *Havre* in the week ending Friday: some French West India usine, 62f to 65f the 50 kilogs, duty paid; 1,100 Havana, part at 31f 50c, the rest at 31f 75c to 72f, No 12 in bond. Some damaged Havana was sold by auction. The arrivals were unimportant. This week French West India, 48f 75c, bonne quatrieme, and 49f 27c; usine, 50f to 65f 50c. At *Nantes* last week 344 sacks Rio, low number and indifferent quality, 39f 50c; 649 Mayotte, also low, 40f; some lots French West India usine, 55f to 63f. This week, Santiago 100f; French West India, 48f 75c, and 48f 50c bonne quatrieme. At *Bordeaux*, last week, 116 casks French West India, 48f bonne quatrieme; 100 ditto, 47f, and some usine, 60f 75c. Nothing done this week. At *Marseilles*, last week, 2,000 casks Havana by Spanish ship, 29f 50c, No 12 in bond; 400, 30f 50c same number; 2,500 by English ship, 39f, same number; 680 casks French West India, 30f bonne quatrieme. At *Marseilles*, nothing has been done owing to the sensation produced by the failure of Rostand and Co.

Indigo.—The demand was less active at *Havre* in the week ending Friday: 50 chests Bengal, new, 75c to 85c above the estimates. The arrivals were 194 chests. No sales this week. At *Bordeaux*, this week, somes sales of Bengal have been made, but at prices not given.

Hides.—Business was not animated at *Havre* in the week ending Friday: 505 Buenos Ayres, salted saladeros ox, light, 54f the 50 kilogs; 2,978 Monte Video ditto cow, 45f to 46f; 1,334 Monte Video salted mataderos, 41f 50c to 42f; 421 Monte Video dry ox, 95f; 317 Valparaiso drysalted ox, 77f 50c; 500 ditto cow, 67f; 763 New Orleans salted, 38f. Some sales were made by auction, the greater part damaged. The arrivals were only about 2,500. This week Calcutta calf, 97f 50 La Plata horse, dry, prices kept secret; Bahia dry, 70f.

Wool.—At *Havre*, in the week ending Friday, 270 bales Buenos Ayres and Monte Video unwashed went at 1f 40c to 2f 80c the kilog, 8 bales Buenos Ayres washed, 6f 10c. By auction, various lots of damaged Buenos Ayres, Monte Video, and Rio Grande were sold. The arrivals were about 746 bales. This week, Monte Video unwashed, 1f 95c to 2f 10c; and per 100 kilogs, 195f and 225f; washed, 285f; Algeria unwashed, 9f 90c. La Plata lambskin, still-born, 1f 50c.

Tallow.—The sales at *Havre*, in the week ending Friday, were 63 casks La Plata, disposable, 49f 75c to 50f the 50 kilogs; 324 old, disposable, 49f; 150, for delivery, 50f. No arrivals. This week, La Plata, for delivery, 50f 25c and 50f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 104f 90c.

Spirits.—At *Paris*, yesterday, 3-6 first quality, disposable, 56f to 57f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, of 86 deg., 74f; 3-6 beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The finance and revenue accounts of the Government of India for the year 1863-4 has been issued, together with the estimate of revenue, expenditure, and cash balances for 1864-5. The total revenues and receipts of all the presidences and provinces of India in the year 1863-4 amounted to 44,613,032*l*. The estimated revenues and receipts for the year 1864-5 is 46,284,106*l*, and the expenditure, 49,547,483*l*, thus showing an excess of expenditure over income of 263,377*l*.

The estimated accounts of revenue and expenditure of the Government of India for the year ending the 30th of April, 1865, have been issued, together with the actual accounts for the previous year. In the year ending the 30th of April, 1864, the gross revenue, after deducting drawback and repayments, amounted to 44,279,467*l*, but direct claims upon revenue, including charges of collection, cost and charges of opium and salt, allowances under treaties, and other charges, amounting in all to 8,642,569*l*, reduced the net receipt into the Government treasuries to 35,636,898*l*; and, the expenditure of the year being 35,558,551*l*, there was a surplus of 78,347*l*. For the year ending the 30th of April, 1865, the gross receipts are estimated at 45,994,636*l*, and the claims upon revenue, amounting to 9,362,700*l*, leave a net revenue of 36,631,936*l*, or nearly a million more than in the previous year; but the expenditure being estimated at 36,895,313*l*, there is a deficiency of 263,377*l*. The great item of land revenue, abkaree, &c., though still producing above 20,000,000*l*, brought in a net income in the year 1864-65 less than in the previous year by about 160,000*l*. The assessed taxes produced some 1,196,000*l*, showing a decline of about 240,000*l*. The Customs brought in 2,065,000*l*, a falling off to the extent of about 140,000*l*. Salt produced 530,000*l* more than in 1863-64, rising to 5,262,000*l*; opium 280,000*l* more, advancing to 4,806,000*l*; and stamps above 180,000*l* more, producing 1,815,000*l*. The cost of collection of the land revenue increased in the year 1864-65, and exceeded 11 per cent.; of assessed taxes the cost of collection advanced to 32.6 per cent., and of Customs to 8·44 per cent. The cost of collection of salt revenue fell to 3·85 per cent., but including the cost of salt it rose to 6·431 per cent. The cost of collection of opium revenue fell to 1.92 per cent., but including the cost of opium it rose to 36 per cent. The tributes from native States rose to 742,280*l*. The allowances and assignments under treaties, of which a list is given for 1863-64, include some large items—120,000*l*, the pension of the ex-King of Oude; 73,255*l*, the personal allowance of his Highness Newab Nazim; 53,570*l*, stipend, &c., of the Prince Azeem Jah Bahadoor. The military charges of India in the year 1864-65 are estimated at 15,607,779*l*, an increase of a million over the charges of the previous year. Public works, taking 5,685,817*l*, absorbed a greater expenditure than in 1863-64 by 310,000*l*. The salaries and expenses of public departments took 1,171,220*l*, being more by 13,700*l*; law and justice, 2,306,890*l*, being more by 186,000*l*; police, 2,347,240*l*, more by 47,000*l*; education, science, and art, 585,780*l*, more by 144,000*l*. The interest on the debt declined from 5,095,819*l* in 1863-64 to 4,981,594*l*. The guaranteed interest on the capital of railway and other companies took 2,490,831*l* in 1863-64, from which was to be deducted 821,548*l* net traffic receipts, leaving a deficiency of 1,669,283*l*. In 1864-65 the guaranteed interest absorbed 2,718,952*l*, but the net traffic receipts rose to 1,323,667*l*, leaving a deficiency of 1,395,285*l*.

The French Government has decided that, after the 1st July next, certificates of origin will not be required to accompany merchandise imported into France, and that the certified invoices hitherto obligatory in the case of goods charged ad valorem will no longer be required. The dues charged on shipping at Kœnigsberg and Pillau have been reduced to the following amounts:—At Pillau—If with cargo: On arrival, 8 silvergroschen per last; on departure, 8 silvergroschen per last. If in ballast or empty: On arrival, 4 silvergroschen per last; on departure, 4 silvergroschen per last. At Kœnigsberg—River Pregrel's Mouth—Money for vessels coming to Kœnigsberg, in and out—If with cargo, 3 silvergroshen 6 pfennige per last; if in ballast, 1 silvergroschen 9 pfennige per last.

Return showing the number of Vessels and Tonnage entered Inwards and cleared Outwards at each of the twelve principal ports of the United Kingdom, during the year 1864:—

Ports.	Entered Inwards. Vessels.	Tons.	Cleared Outwards. Vessels.	Tons.
London	11,206	3,359,782	7,695	2,421,421
Liverpool	4,967	2,698,522	4,673	2,652,954
Hull	2,945	758,953	2,258	625,929

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 21st day of June, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,998,845	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	15,348,845
		Silver Bullion	...
	29,998,845		29,998,845

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,480 025
Rest	3,220,869	Other Securities	20,750 345
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	9,581,293	Notes	9,294,390
		Gold and Silver Coin	945,065
Other Deposits	13,666,566		
Seven Day and other Bills	449,097		
	41,470,825		41,470 825

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,153,552	Securities	31,327,370
Public Deposits	9,581,293	Coin and Bullion	16,294,910
Private Deposits	13,666,566		
	44,401,411		47,622,280

Dated the 22nd June 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,220,869*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£37,554
An INCREASE of Public Deposits of	779,095
An INCREASE of Other Deposits of	731,185
No change in Government Securities.	
An INCREASE of Other Securities of	1,233,708
An INCREASE of Bullion of	249,241
An INCREASE of Rest of	10,223
An INCREASE of Reserve of	274,181

The increase in the Government deposits with that in the private deposits exceeds the large increase of 1,233,708*l* in the private securities, and the reserve is therefore 274,181*l* in excess of that of last week. There is an increase of 249,241*l* in the stock of coin and bullion held by the Bank.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20,528,617	21,172,957	20,725,685	20,635,207	21,153,552
Public deposits	6,486,685	9,629,594	10,279,053	9,287,594	9,581,293
Other deposits	13,224,470	13,399,245	13,809,996	13,051,661	13,666,566
Government securities	12,896,068	11,084,751	11,251,395	11,122,267	10,480,025
Other securities	12,853,957	20,242,910	21,408,064	20,729,589	20,750,345

Coin and bullion	18,169,026	15,909,638	15,026,113	14,319,081	16,294,910
Bank rate of discount	3½ p. c.	3 p. c.	4 p. c.	6 p. c.	3 p. c.
Price of Consols	91½	91⅞ xd	92	89⅝ xd	90 xd
Average price of wheat	76s 7d	54s 1d	46s 9d	40s 3d	41s 1d
Exchange on Paris (short)	25 7½ 12½	25 27½ 35	25 20 27½	25 17½ 22½	25 17½ 22½
— Amsterdam ditto	11 18 18½	11 16 16⅛	11 16 17	11 17½ 17⅝	11 17⅛ 18
— Hamburg (3 months)	13 7½ 8	13 8⅝ 9½	13 8½ 8⅝	13 8⅛ 9	13 9½ 9⅝

In the corresponding week of 1855, the news received from the seat of war in the Crimea was unfavourable; the combined attack on the Malakoff and Redan, by the French and English troops, having been repulsed with great loss to the allies. Money was very abundant on the Stock Exchange.

In 1862, a naval engagement near Memphis, which had been occupied by the Federal army, had terminated in the destruction of a great part of the Confederate fleet. In London a new loan to Venezuela had been authorised by the bondholders.

In 1863, the Polish question and the continuance of the struggle between the insurgents and the Russian armies were continuing to attract the attention of Europe. In London, the money market had become easier, in consequence of a temporary cessation in the bullion export demand.

In 1864, the difference between the King of Denmark and the Government had caused a ministerial crisis at Copenhagen. A naval engagement had taken place off Cherbourg between the Kearsage and Alabama, which had resulted in the destruction of the latter. The Cortes had been closed at Lisbon by the King in person. The commercial negotiations between France and Switzerland had been terminated, and the treaty signed by the representatives of the two Powers. Details had been received of the Federal repulses on the Chickahominy. The bank of Amsterdam had reduced its rate to 4½, and the Bank of England to 6 per cent. The funds were dull. A fall of 3 per cent. had taken place in Spanish Passive stock.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 370,513*l*; in 1862, a deficiency of 6,843,665*l*; in 1863, a deficiency of 7,598,068*l*; and in 1864, a deficiency of 7,677,928*l*. In 1865, the deficiency is 7,083,779*l*.

DISCOUNT AND MONEY MARKET.—The Bank return of this week indicates that the usual precautions are being taken by the mercantile community at the approach of the half-year. There is less money offering in the general market, where the Bank rate is fairly maintained. The provision for the anticipated expenditure at the coming elections tends also to limit the supply of money, and in consequence there is more activity in the discount department at the Bank. Exceptional operations have nevertheless taken place at 2⅞ per cent., and there are no appearances to indicate that other than the temporary causes alluded to influence the market or its future prospects.

The application of the joint stock principle to ordinary mercantile affairs by the combined houses who have formed the Merchants Company (Limited), has been the subject of general comment; and, like every new and bold step, it has evoked considerable criticism. Setting aside the opposition that any measures calculated to promote competition with the great mercantile interests are sure to encounter, there is no reason why public confidence should not be accorded to an undertaking in which the experience of those long accustomed to commercial pursuits is secured for the conduct of affairs. Like joint stock banking in its infancy, its future is in some quarters regarded with doubt; but there is a fair field for the operations of a combination of this nature, and the presentation of an annual balance sheet where operations have been conducted with prudence cannot but be an advantage to all concerned.

The following are the current terms for mercantile paper of various dates.

30 to 60 days	3	per cent.
3 months	3	per cent.
4 months	3½	per cent
6 months—Bank bills	4	per cent.
6 months—Trade ditto	4½	per cent.

Digitized by Google

In the Stock Exchange there is a steady inquiry with sufficient employment for money at 3 per cent. on Government securities for short periods.

The allowance for deposit, at the joint stock banks and discount houses, is as follows :—

Joint Stock Banks	*2 per cent.
Discount houses at call..	2 per cent.
Do. with seven days' notice	2¼ per cent.
Do. fourteen days	2½ per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*.

No bullion operations are reported at the Bank to-day.

The following are the rates of discount current in the chief continental cities :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4½ 5
Brussels	3	3
Madrid	8	...
Hamburg	...	2¼
St Petersburg	5½	5

The following changes appear in the Bank of France return of this week on a comparison with that last issued :—

	£
Increase.	
Cash	672,000
Advances	24,000
Treasury balance	940,000
Current accounts	540,000
Decrease.	
Commercial bills	488,000
Notes	1,040,000

English Government Funds.—Various causes are assigned for the reaction in the markets, and the constant relapse in the prices of stocks after the smallest symptoms of improvement. Even at their present quotation, Consols do not seem to attract investors ; and numerous opinions are ventured as to the future of Government stocks ; it being frequently repeated that high prices, like those of years back, will not be again seen. We have several times referred to the exceptional causes under which, during the course of the last three years, sales of Government securities have predominated so as to depress the price to its present level. Some attempts at speculation have lately been made, but they have resulted each time in loss. It is, nevertheless, to be expected that investments will ultimately turn the course of the markets, and, probably, before long. At present the investing classes are not operating. The mercantile public, paralysed in part by losses in the produce markets, and occupied with providing for their customary wants at the close of the half-year, stand aloof ; and bankers, in expectation of demands from the country as well as from clients in town, reserve large balances in hand. The general public have an unusual amount of engagements in connection with new companies and projects, which have been launched upon the markets in unprecedented numbers and amounts. Hence there are literally at this moment no operations on account of investors, and every sale tends to a further reduction in the price of stocks. Consols have declined from the quotation of last week, and close at 89⅞ to 90 for money, and 90 for account in July. New Three per Cents. and Reduced, 89 to 89¼. India Five per Cents., 104⅛ to 104⅜.

Exchequer bills are still dull, at 2s to 5s prem., and India bonds, 16s to 21s prem.

Foreign Stocks.—The change of Ministry in Spain has occasioned a slight improvement in Passive stock and in the Certificates of coupons. Business continues, however, on the most limited scale, and operations of small amount influence quotations easily. A few purchases are made occasionally in the cheap dividend-paying stocks, and hence the tendency of prices is generally upwards, the markets being steady. Mexican 3 per Cents. have improved, and Greek stock is also rather firmer. Turkish securities remain well supported. The dealings in the Confederate loan are few, and the price is still declining. The following are the prices of stocks dealt in to-day :—4½ per Cent. Brazil, 80 to 82 ex div. 4½ per Cent. Chilian, 78 to 80 ex div. 7 per Cent. Egyptian, 96 to 97 ; ditto, 1864, 93¾ to 94¼. 3 per Cent. Mexican, 25⅜ to 25⅝ ; ditto, 1864, 24½ to 24¾. 6 per Cent. Monte Videan, 65. 5 per Cent. Peruvian, 81 to 82. 3 per Cent. Portuguese, 49 to 49½. 5 per Cent. Russian, 1822, 91½ t 92½ ; 4½ per Cent. ditto, 1850, 89½ to 90½ ; 5 per Cent. ditto, 1862, 91 to 92. 3 per Cent. Spanish, 48¾ to 49¼ ; ditto deferred 3 per Cent., 40¼ to 40¾ ; ditto Passive, 30¾ to 31 ; ditto Certificates, 15⅛ to 15⅜. 6 per Cent. Turkish, 1864, 93 to 94 ; ditto, 1858, 73 to 74 ; ditto, 1862, 74 to 75 ; 5 per Cent. ditto, 1865, 46 to 47 ; 3 per Cent. guaranteed, 101 to 102. 6 per Cent. Venezuela, 1862, 38 to 40 ; ditto, 1864, 41 to 42. 5 per Cent. Italian, 65¾ to 66¼.

The closing prices of French 3 per Cent. rentes, telegraphed this evening from Paris, is 66.45.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

Italian 5 per cents	65¾ 6	66 ¼

The biddings for 250,000*l* Government bills on India took place at the Bank of England, on Wednesday last. The proportions allotted were—to Calcutta, 121,200*l* ; to Madras, 31,900*l* ; and to Bombay, 100,000*l*. The minimum prices were 1s 10½d on Calcutta and Madras, and 1s 10⅜d on Bombay. Tenders on Calcutta and Madras, at 1s 11d, will receive about 60 per cent., on Bombay at 1s 11⅛d about 45 per cent., and above these prices in full.

Railways and other Shares.—The markets have been generally dull during the day, and prices mostly show a reaction from those of the past week. There is less speculation, attention having been diverted to the shares of the new companies lately introduced, and investors operate with extreme caution on the declining markets. Caledonian stock is 1 per cent. lower than on last Friday ; Great Eastern, ½ per cent. lower ; Great Northern stocks are, the ordinary 1 per cent. higher, the "A" stock 1 per cent. lower ; Great Western, 3 per cent. lower ; Lancashire and Yorkshire, 1¼ per cent. lower ; London and Blackwall has advanced 2 per cent. ; London and North-Western notes a decline of 1¾ per cent., and Metropolitau of 3 per cent. ; Midland stock is 1¾ per cent. lower.

The market in the shares of financial and miscellaneous companies has been rather more animated. No material alteration in prices has occurred, but in some instances there is a slight falling off. Hudson's Bay shares have recovered from the extremely low quotation to which they had declined, and are fairly supported on the rise. Closing quotations are International Financial, 1½ to 1¾ ; General Credit, 1⅞ to 2 ; Credit Mobilier and Foncier, 3¾ to 4 ; Hudson's Bay, 16½ to 16¾.

In joint stock bank shares the market continues extremely firm. The value of the shares in the old banks is steadily improving, and there are comparatively few sellers. The new institutions are not so well supported, but quotations have in several instances improved over those current last week.

American stocks and shares have improved. The cessation of the war, and the measures now in course of adoption for the purpose of reducing the expenditure of both branches of the military service, have given confidence to purchasers,

RAILWAY DIVIDENDS.—The Royal Portuguese Railway Company have notified that a sum of 7f 50c will be paid per obligation fully paid up, for interest for the prior half of the year 1865, on and after 1st July; also a sum of 15f per share fully paid up, for the same period.

FOREIGN EXCHANGES.—There was very little doing, and no alteration in rates.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—During the week we have received some large amounts of gold, comprising 57,500*l* per Atrato, from the West Indies; 106,000*l* per China, from America; 74,000*l* per Edinburgh, from America; 50,000*l* per City of Limerick, from America; 186,900*l* per City of Baltimore, from America; 17,000*l* per Messageries steamer, from Brazils; total, 491,400*l*. About half of this sum has been delivered; the remainder will be in London to-morrow. The Bank has only received about 63,000*l* in bars, and 8,000*l* in sovereigns during the past few days, and as there is now some inquiry for gold for the continent, we think all immediate arrivals will be sent away. The Poonah has taken 5,400*l* to the East, and the Messageries steamer 79,240*l* to Alexandria.

Silver.—The Atrato has brought 136,000*l* from the West Indies, the Doré portion of which has been sold at 60⅞d. per oz. standard; the fine bars were sold at 60½d per oz standard, but the rate may be now considered somewhat firmer.

Mexican Dollars.—The Poonah has taken 10,630*l*, and the Messageries steamer 56,000*l* from Marseilles to China. Our market is now almost cleared of the coin, and we quote the price as from 4s 11⅛d to 4s 11¼d per oz.

Exchange has risen considerably during the past week. The Council drafts were disposed of yesterday at and above 1s 11d for Calcutta and Madras, and 1s 11⅛d Bombay, and since then, during this day, the demand for drafts by the banks has been so considerable that 1s 11¼d 60 days' sight, has been paid for drafts on Calcutta, the sight rates being 1s 11⅜d on all places, with an indisposition to sell.

India Government loan notes remain unchanged in price. They may be quoted 108 to 109 for 5½ per Cents., 101 to 102 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 2⅜d per oz. Silver—Bar silver, 5s 0⅛d to 5s 0⅝d per oz std, last price, nearest; ditto, containing 5 grs gold, 5s 0⅞d per oz std; Mexican dollars, 4s 11⅛d to 4s 11¼d per oz, nearest; 5-franc pieces, 4s 11¼d to 4s 11⅜d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS. — Advices from Bombay state that the liabilities of Mr Byramjee Hormusjee Cama, whose failure was announced in London on the 23rd ult., reach about 3,300,000*l*, and the assets 2,800,000*l*, A deed of assignment had been despatched to England.

Notice has been given that a petition to wind up the affairs of the "London Marine Insurance Association" is to be heard before Vice-Chancellor Wood on the 24th inst.

Notice has been given that a petition for the winding up of the City and County Assurance Company (Limited) is to be heard before the Master of the Rolls on the 24th inst.

At a meeting of the creditors of Mr John Stewart, engineer and ironfounder of Blackwall, held on Wednesday last, it was decided to work out the contracts now in hand. The liabilities were stated at 30,894*l*, and the assets at 18,600*l*.

Telegrams from Marseilles announce the failure of Messrs Charles Rostand and Co., sugar refiners, with liabilities estimated at about 500,000*l*. A favourable liquidation is expected.

PUBLIC COMPANIES.—The directors of the Provincial Bank of Ireland have declared a dividend for the half-year ending Midsummer next, at the rate of 4 per cent. on the paid-up stock, and also an extraordinary dividend of 1*l* 10s on each 100*l* share, and 12s on each 10*l* share, payable on the 15th July.

The Nowgong Tea Company of Assam, and the Eastern Assam (Tea) Company, have both declared a dividend at the rate of 10 per cent. per annum, payable on and after 1st July

At an extraordinary meeting of the London, Buenos Ayres, and River Plate Bank held on Monday last, an interim dividend at the rate of 10 per cent. per annum was declared.

At the meeting of the South Australian Banking Company, held on Tuesday last, a dividend was declared at the rate of 10 per cent. per annum.

The meeting of the Borokai Tea Company took place on Tuesday last, when the directors' report was adopted, and a dividend declared at the rate of 8 per cent.

The Parkfield Iron Company (Limited)—capital 400,000*l*, in 16,000 shares of 25*l* each, in which a minimum dividend of 7½ per cent. is guaranteed for the first three years—is formed for the purpose of purchasing and working the Parkfield collieries and iron works, which comprise 250 acres of very valuable mineral wealth. The rapid extension of the iron trade must give any Company of good resources, and well managed, very great advantages.

The Steam Biscuit and Flour Company, Limited—capital 200,000*l*, in 20,000 shares of 10*l* each; first issue 10,000 shares, of which more than one thousand have been subscribed already,—is intended to carry on the wholesale biscuit and flour trade, which requires a very considerable capital, and has ramifications through the United Kingdom. The Company has entered into arrangements for the purchase of established works of great efficiency. The Company will be superintended by a manager of practical experience.

The Belgrave Mansions Company (Limited) Grosvenor gardens, Grosvenor place—capital 105,000*l* in 5,240*l* shares of 20*l* each—has been formed for building on land belonging to the Marquis of Westminster in Belgravia five or more considerable houses. The site is most fashionable, between the bottom of Grosvenor place and the Victoria Station. A minimum dividend of 8*l* per cent. per annum will be guaranteed by Messrs Trollope, the well-known house agents, who also take an important share in the undertaking, in the belief that it will be remunerative.

The North Rancie Iron Company (Limited), has for its object to purchase the freehold estate and other property of Campagna, and the concession of the iron mines therewith connected, being among the very best in Europe. The make of iron from these mines has recently augmented rapidly.

The Credit Foncier and the Mobilier of England invite subscriptions for 50,000 preference shares in the Atlantic Telegraph Company. The shares will bear interest at the rate of 8 per cent. per annum. The subscription list will close on Tuesday next the 27th inst. for London, and on the following day for the country,

The London Quays and Warehouse Company, Limited, is announced. The capital required is 500,000*l* in 20,000 shares of 25*l* each. The first issue will be confined to 10,000 shares.

The first ordinary meeting of the shareholders in the Halcombe and Co. Sack Contractors Company, Limited, was was held on the 17th inst., Rear-Admiral Currie in the chair, who in moving the adoption of the report, congratulated the shareholders on the position and prospects of the company.

The head office of the Delhi Bank has been removed to London.

Digitized by Google

The London Merchants Company (Limited) — capital 1,500,000*l*, in 150,000 shares of 100*l* each—is an undertaking which has attracted great attention, because it aims at combining the business of three well-known firms in the city of London. The good-will of the business of each firm is to be sold to the new Company, and the price taken is calculated upon the actual profits of the last three years. It will be paid, one-third in shares of 50*l* paid up, and the rest in debentures payable at intervals. The amount to be so paid is 375,000*l*. The partners in each house bind themselves not to enter into any fresh mercantile transactions in England for ten years.

The Chubwa Tea Company of Assam, limited, capital 300,000*l*, in shares of 10*l* each, is formed for the purpose of purchasing and developing several valuable estates in Upper Assam. They comprise about 16,000 acres, well adapted for the cultivation of tea.

MISCELLANEOUS.—The General Credit and Finance Company of London are in receipt of advices from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 25th May, 1865, of duties collected as follows on account of the Venezuela loan of 1864; viz., 69,731 dols 86c.

The mail from Guayaquil has brought a remittance of 586*l* on account of dividends on the debt of Ecuador.

It is announced that Messrs Baring Brothers and Co. have received the following remittances on account of New Grenada dividends:—From custom-house of San Jose de Cucuta, 511*l* 3s 5d; from the custom-house of Sabanilla, 212*l* 9s 10d; total, 723*l* 13s 3d.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days sight, is about 110⅛ per cent. At this rate there is a small profit on the importation of gold from the United States.

The Commercial Times.

LETTERS FOR SWEDEN AND NORWAY.—A daily packet service having been established between Stralsund in Prussia and Malmoe in Sweden, all letters addressed to Sweden, and not specially directed to be sent by any other route, will, in future, be forwarded via Stralsund. In exception, however, to the above arrangement, letters for Gothenburg and Uddevalla will continue to be forwarded, as a rule, during summer, by the Swedish mail packets leaving Hull every Saturday.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was small, and the whole changed hands at the full prices of Monday. A few superior samples of white produce realised 50s per quarter. For foreign wheat there was a moderate demand, and previous quotations were well supported. Barley ruled firm at quite previous rates. For oats, the market was somewhat active, at an advance in price of 6d per quarter, as regards good and fine corn. Beans and peas were very firm, and were fully as dear as on Monday. Flour moved off steadily at fully late rates. This week's imports are small, and are confined to 10,460 quarters of wheat, 10,540 barley, and 620 sacks of flour.

The trade for wheat and flour at Liverpool, this morning, was firm, at fully late rates. At Wakefield, good and fine wheats changed hands at an advance in price of 1s per quarter from Friday last.

It is stated that in consequence of the scarcity of corn and the high price at which it has sold during the last twelve months, the cultivation of that cereal is being rapidly renewed in Egypt; whilst the cultivation of cotton is, in several districts, being discontinued.

There has been a very excited cotton market at Liverpool throughout the week, and the sales have been on a very extensive scale. On Wednesday, 40,000 bales changed hands, a number which has never been exceeded, if even equalled. All classes seemed ready to buy, and there is no doubt if holders had not exhibited some reserve in selling their cotton, that the sales would have been larger than they were. Yesterday, although there was less excitement, yet, through the firmness of holders, prices advanced ¼d. Prices may be quoted 1½d to 2¾d higher than last Friday. To-day the market is much quieter, the late large purchases of spinners having given them a present supply.

Intelligence from Alexandria to the 18th inst. has been received. At that date very little business was passing in cotton; nevertheless, fair open-ginned produce was quoted at 17d per lb, cost and freight. During the week ending June 6, the market ruled quiet. Fair open-ginned realised 15d; fully fair ditto, 15¼d per lb, free on board. The arrivals since May 27 had been 6,557 bales, and the sales 11,498 bales. The annexed statement of shipments is from the Egyptian Commercial and Trading Company's circular:—

Exports of Cotton from Alexandria from Oct. 3 to June 1.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1860—1861.....	84,999	33,275	7,291	125,565
1861—1862.....	110,668	21,878	5,429	137,975
1862—1863.....	144,208	34,596	7,297	186,301
1863—1864.....	194,278	59,185	11,667	265,130
1864—1865.....	205,920	30,116	7,042	243,078

Freight to Liverpool, ⅝d per lb.

Advices from Pernambuco are to May 28. During the preceding fortnight the cotton trade had ruled heavy, at lower prices. At latest date, Pernams, on shore, were quoted at 11 65.100d; Paraibas, on board, 11 89.100d; and Maceios, on board, 11 15.100d per lb, without freight and insurance.

The markets for colonial and foreign grocery produce at Mincing lane, this week, have been very quiet. As compared with Friday last, the prices current, to-day, exhibit scarcely any change. Sugar—both raw and refined—has had a drooping tendency; but most other articles have ruled firm. Last week, duty was paid in London on 1,462,455 lbs of tea, whilst the export for the week ending June 15, was 151,345 lbs, making a total of 1,613,800 lbs, against a total of 1,463,814 lbs last year.

At Pernambuco, during the fortnight ending May 28, the value of sugar was advanced 9d per cwt, in consequence of limited arrivals, only about 400 bags per diem, from the interior. The shipments since October 1, showed a considerable decrease as compared with the corresponding period in 1863-4, the total export from Oct. 1 to May 28, 1864-5, being 32,279 tons, against 44,055 tons in 1863-4. The shipments to Europe in the above periods were 18,791 tons, and 30,756 tons in 1864-5 and 1863-4 respectively. The following were the prices current at latest dates:—Whites, No. 1 to 2, 33s 4d to 34s 11d; No. 3, superior, 31s 10d to 32s 6d; No. 3, regular, 30s 3d to 31s; No. 4, 28s 9d to 29s 6d; Somenos, 26s 5d to 27s 2d; muscovado yellow, 20s 4d to 20s 8d; good brown, 18s to 19s 11d; ordinary unclayed brown, 17s 5d per English cwt of 3½ arrobas, free on board.

During the week ending May 23, good and fine qualities of coffee at Rio de Janeiro moved off freely, on higher terms; whilst the trade for inferior parcels was decidedly firm. The stock was estimated at 80,000 bags, and the quotations ruled as follows:—Prime superior, 66s 6d to 68s 2d; superior and prime good first, 63s 2d to 64s 10d; good first, 59s 10d to 61s 6d; ordinary, 54s to 55s 8d; good second and ordinary, 46s 6d to 51s 6d, free on board, including freight, 60s.

The present series of public sales of colonial wool will be brought to a close to-morrow. During the week, the biddings have ruled somewhat active; but long-stapled descriptions have chiefly commanded an animated sale. For these, prices are fully equal to those current last series; but all faulty wools, as compared with the same period, exhibit a decline of ½d to 1d per lb. The export demand for France has continued good. Up to this evening, about 160,000 bales have been disposed of.

In the English wool trade, a fair business is doing, and prices are rather on the advance. Silk is firm in the extreme, at enhanced quotations. Flax moves off freely, at fully last week's currency

Scotch pig iron, in the early part of the week, was worth 55s 1½d, but is now quoted at 55s cash, mixed numbers. For other metals the trade is quiet. Most oils have ruled firm: linseed oil is quoted at 33s 9d per cwt on the spot. In tallow, a considerable improvement has taken place, P. Y. C. being worth 41s 6d to 41s 9d per cwt on the spot.

In commercial circles at New York, during the week ending June 10, the leading changes, as regards price, from the preceding week were confined to spirits of turpentine and crude petroleum, the fluctuations in the value of which had been considerable: the closing price of the former was $1.75 to $1.80 per 280 lbs; of the latter, 34c to 34½c per gallon, on the spot. The stock of turpentine at latest date was 450 barrels. In the export trade for breadstuffs scarcely any business doing, the shipments since the commencement of June having been quite unimportant. Cotton having further declined in price, the market for cotton yarns and goods was decidedly quieter, and although no quotable change took place in prices, there was the appearance of a drooping market as regards nearly all descriptions. Wool, woollen goods, as well as flannels, were in but moderate request; nevertheless, prices, in most instances, ruled firm. Silk goods continued in demand, and changed hands at high quotations. In the various articles of grocery produce, a fair average business was transacted at about previous rates. Financially, the chief feature to be noticed is the continuance of large shipments of gold to Europe: during the week ending June 3, these, including shipments to other quarters, amounted to about 339,930*l*, making a total since Jan. 1 of about 2,687,400*l*, against 4,741,500*l* during the same period last year; 3,852,840*l* in 1863; 3,621,750*l* in 1862; 601,040*l* in 1861; 2,872,170*l* in 1860; and 5,456,900*l* in 1859. The figures of the return of the New York banks for the week ending June 3, stood thus:—discounts, 42,083,310*l*; specie, 4,269,290*l*; circulation, 1,064,620*l*; deposits, 37,387,140*l*. The balance in the sub-treasury on the 3rd inst. was 8,993,570*l*. For money, during the week ending June 10, there was a somewhat improved demand: the best short-dated paper was quoted 7; 3 to 4 months' ditto, 7 to 8 per cent. The total imports of dry goods and general merchandise, from Jan. 1 to June 3, were valued at 12,945,370*l*, against 22,010,960*l* in the corresponding period last year; and 16,015,510*l* in 1863—the import of dry goods in the last week being valued at 82,050*l*, against 230,250*l* last year.

Imports of Foreign Dry Goods at New York for Five Months ending with May.

THE COTTON TRADE.

LIVERPOOL—JUNE 23.

The cotton market on Saturday became animated, and each day since the demand has been unusually extensive from all quarters, and prices have rapidly advanced. Attention has been strongly attracted to the reduction of stocks, and to the prospects of decreased available supplies from America and Egypt, as well as Brazil, to meet the increasing requirements of consumers. For Sea Island a good demand has prevailed, but prices are without material change. In American a large business has been transacted by the trade as well as exporters and speculators, and prices have advanced 1¼d to 2d per lb. Brazil has been in very great request, and an advance of fully 2d per lb is readily obtained. The demand for Egyptian has been unusually extensive, accompanied by a rise of about 3d per lb in the current qualities. Smyrna has become scarce, and has advanced 2d per lb. A very large business has been transacted in East India, at rapidly advancing prices; the lower kinds, which had been previously neglected, and were comparatively plentiful, have risen as much as 3d per lb, whilst other grades are quoted 2d per lb dearer, with the exception of Scinde and Bengal, which have advanced 1½d per lb. China and Japan have participated in the general activity, and are 2½d per lb dearer in the week.

To arrive, very large transactions have taken place daily, and the latest quotations were, fair average, at sea, 18d; ship named, 18¼d; Egyptian, open, fair, ship named and at sea, 19½d and 20d; fully fair, shipped, 20d; fair, shipping or shipped, 19¼d; guaranranteed fair, shipping or shipped, 19½d; ship named, 20d; middling fair, shipping or shipped, 18½d; Dhollerah, fair new merchants, ship named, 12½d; Oomrawuttee, fair, May sailing, 13¼d; Western, ship named, 12¼d, 12½d, and 12⅝d; at sea, 12½d; Bengal, fair, ship named, 8½d; fair new, 2nd March sailing, 9d; good fair, at sea, 8½d and 9d.

The sales of the week amount to 139,830 bales, including 45,600 on speculation, and 30,230 declared for export, leaving 64,000 bales to the trade. Sales to-day, about 15,000 bales, with a firm market.

LONDON—JUNE 23.

Annexed is a portion of the circular, issued this week, by the London Cotton Brokers' Association :—An improved demand on Friday was followed by a good business on Saturday, at enhanced prices; and on Monday and each succeeding day a large business has been transacted, resulting in an advance on Tinnivelly and Western Madras of 2⅛d to 3d, and on other descriptions of 2d per lb, the market closing firmly at these rates. There has been a considerable inquiry for cotton afloat, but the operations have been limited by the small quantity available.

NEW YORK—JUNE 10.

The arrivals of cotton, this week, have been moderately extensive, viz., 8,395 bales, consisting of 2,310 bales from New Orleans, 889 Mobile, 4,290 bales by railroal; the remaining quantity being in small parcels from sundry ports. This additional supply raises the import since Sept. 1, to 227,726 bales. The trade since our last has ruled heavy, and prices have declined 5 cents per lb from Saturday last. About 8,700 bales have been offered at the public sales. The prices current are as follows :—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	27	27	27	27

Freight to Liverpool, 3-16d to ¼d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

The transactions in goods in the leading markets held this week have been only moderate. Prices, however, have continued steady. There has been a steady sale for iron, at full quotations. For the time of year, coals have moved off briskly.

MANCHESTER, June 22.—Since this day week a large business has been done in several descriptions of yarn, and at an almost daily advance. Doubled yarns have risen 2d to 3d per lb, and are

Digitized by Google

so much engaged as to be almost not procurable. India yarns have but faintly responded to the rise, and been dealt in only a very little. Yarns for the continent have again been taken freely, but the rise in quotations in these descriptions is now so great that some holders have shown signs of desiring to resell. Manufacturers have paid unwillingly the prices asked, being doubtful of seeing value in return on their productions, and, indeed, being fearful of being obliged ere long to stop their looms. Cloth has had more than an average sale, and generally at some advance, not, however, in proportion to the enhancement of cost which is visible in both cotton and yarn. India shirtings have risen fully 1s per piece, and been bought to a fair amount, chiefly on speculation.

BRADFORD.—Down wools have improved a little, but the demand is chiefly upon deep-grown and lustrous wools. Prices are very firm. The demand for yarns is considerable. Spinners hold firmly to their prices. The piece trade continues good, manufacturers being now all well employed to order, but buying is not so general as it was.

LEEDS.—Plain cloths and quiet mixtures, for the colder season of the year, with a sprinkling of fancies for exportation, as well as for the home trade, comprised the goods in chief request. The market, however, was wanting in animation, but prices are steady.

HUDDERSFIELD—There has been a large attendance of both home and continental buyers, and these latter have operated freely in all kinds of low-priced and medium fancy goods. Piece dyed black doeskins, at 3s to 4s per yard, are still selling briskly and in large quantities.

ROCHDALE.—An improvement is manifest in the inquiry for Yorkshire low woollens; but prices are unchanged. There is a steady demand for wool, and the addition of the new clip to the supply has not been any advantage to the buyers, so far as the market is concerned.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 10.—The arrivals of flour have been moderate. All descriptions have sold heavily at further reduced rates. Limited supplies of wheat are on sale, yet the trade is slow, but at late rates. In corn, considerable business has been done, and prices for the most part have ruled firm. Annexed are the prices current:—Flour — State, superfine brands, $5.60 to $5.90; State, extra brands, $6.20 to $6.35.; State, choice brands, $6.40 to $6.55; Ohio, common brands, $6.85 to $7; Ohio, fancy brands, $7.5 to $7.10; Ohio, good and choice extra brands, $7.15 to $8.75; Michigan, Indiana, Wisconsin, &c., $5.60 to $6.75; Genesee, extra brands, $6.80 to $9.50; Missouri, $8.50 to $11.50; Canada, common, $6.35 to $6.65; Canada, good to choice extra, $6.70 to $8.70 per barrel. Wheat—Amber Michigan, $1.73 to $1.75c; white Western, $1.77. Corn—Unsound Western mixed, 80c to 85c; sound ditto, 90c to 93c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, coastwise and by land-carriage, having been very moderate, the show of samples has not increased. Although the demand has been by no means active, a few parcels have changed hands at an advance in the quotations of 1s per quarter, at which, however, clearances have not been effected. The show of foreign wheat has been only moderate. Really fine parcels have sold to a fair extent at full prices; but all other kinds have moved off heavily at late rates. The few samples of English barley on offer have sold at full currencies. In the value of foreign barleys, no change has taken place.

There has been a fair inquiry for malt, at steady currencies. The supply has been seasonably extensive. Oats have commanded the late advance in the quotations. Both beans and peas have been in short supply and moderate request, at late rates. The flour trade has been tolerably firm.

The accounts at hand from all parts of the country in reference to the crops continue very favourable. Rain is wanted in some localities; but the wheats promise a large yield. Potatoes are looking well. Haymaking has progressed rapidly.

The local markets have been steady for wheat, at very full prices. All kinds of spring corn have commanded extreme rates.

The value of produce in America continues too high to admit of shipments to England. On the continent, the fluctuations in the value of wheat have been trifling.

The corn trade in Scotland has ruled steady, at full prices. Most of the markets have been scantily supplied with grain.

In Ireland the transactions in wheat and most other articles have been on a very moderate scale, at about stationary prices.

A very small supply of English wheat was on sale at Mark lane, to-day, and the trade ruled firm, at fully Monday's prices. Foreign wheat—of which there was a moderate supply on the stands—was in fair request, and the quotations ruled firm. Barley moved off steadily, at full currencies. For oats, there was a good demand, and fine corn changed hands at an advance in price of 6d per quarter. Beans and peas were very firm, at fully late rates. For flour, the trade was firm, at quite previous quotations.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—A quiet tone has prevailed in this market, and on the spot only a limited business has been done at previous rates. The sales, to yesterday evening, of West India were 2,106 casks, including Barbadoes, by auction, at 29s to 34s 6d, and crystallised Demerara and Berbice at 34s 6d to 39s per cwt. Floating cargoes of Havana have sold rather dearer. The deliveries last week improved, amounting to 4,386 tons, leaving the stock 85,105 tons, against 75,923 tons in 1864.

Mauritius.—3,034 bags in sale on Tuesday brought 33s 6d for good sirops, and 34s to 41s 6d for low greyish to fine white semi-grainy. Two floating cargoes have been taken for the United Kingdom, No. 12 at 25s 3d, and No. 12½ at 25s 6d per cwt.

Bengal.—4,756 bags only partly found buyers: brown bastard, 24s to 26s 6d; low to middling Gurpattah, 30s to 31s 9d; fine dry white sirops, 38s to 39s per cwt.

Madras.—584 bags fine grainy sold at 37s to 38s per cwt.

Foreign.—Three cargoes of Cuba muscovado have been sold for arrival at 21s 6d to 22s; two cargoes of Havana, No. 12, at 25s 3d, and molasses sugar 20s 6d, and a cargo of Maceio at 20s 3d for the United Kingdom. At auction, 50 hhds Porto Rico chiefly sold at 28s 6d to 34s; and 237 chests 100 bales Cuba muscovado at 29s to 32s per cwt. 3,000 bags unclayed Manilla brought 26s per cwt.

Refined.—The home trade have again bought sparingly, and prices have slightly declined.

MOLASSES.—The only business of importance to report, is a cargo of clayed Cuba at 14s 3d ex quay, for Liverpool.

RUM meets a moderate inquiry at previous quotations. About 400 casks sold: Leewards, 1s 6½d; Berbice and Demerara, 1s 6½d to 1s 7d; and common to fair Jamaica, at 3s 4d to 3s 8d per gallon.

COFFEE.—Since the favourable result of the Dutch sale was known (good ordinary bringing 45½c to 46c, or 1½c to 2c above the valuations), there has been a much more active demand, and prices have advanced 6d to 1s per cwt; native Ceylon in particular being in request. 677 casks 451 barrels and bags plantation Ceylon sold at 81s to 87s 6d for low middling pale to good middling blue; fine, 91s to 92s 6d. 512 casks

Digitized by Google

4,529 bags native sold: small, 66s to 67s 6d; good to fine ordinary, 68s 6d to 71s; fine, 73s. 500 bags mixed pale East India realised 65s 6d to 66s 6d. 291 bags pale Guatemala, 74s to 75s; and 9,026 bags Costa Rica, 74s 6d to 83s per cwt.

COCOA.—The better qualities of Trinidad have brought an advance of 2s to 3s per cwt. Common sorts without alteration. 976 bags Trinidad part sold at 56s to 82s for ordinary grey to good red. Of 300 bags St Lucia, a few lots sold at 47s per cwt.

RICE has met a somewhat better demand; about 10,000 bags on the spot have changed hands. Rangoon, &c., 9s to 9s 4½d; and white Bengal, 13s 7½d to 15s 9d per cwt. For arrival, two cargoes Necrancie at 10s for the Continent, or 10s 9d for the United Kingdom.

IMPORTS and DELIVERIES of RICE to June 17, with STOCKS on hand.

TEA.—The market has ruled quiet, the public sales of China have passed off without animation: fine Moning and Kisows realised 2s 4d to 2s 8d, being extreme rates. Japan greens declined 2d per lb.

SPICES.—All descriptions are without material alteration. 555 bags pimento part sold at rather firmer rates: good. 2¾d; one lot, 2⅞d. Black pepper is in fair request. About 1,600 bags sold, chiefly Penang, at 3d to 3 1/16d; a little Singapore at 3⅛d to 3¼d. Of white, a few lots Singapore have sold at 5⅜d to 5½d per lb. 24 cases Penang cloves were bought in at 1s 2½d to 1s 3d, and 204 bags Zanzibar at 3⅜d to 3½d per lb. 305 casks Jamaica ginger realised 56s to 99s per cwt.

SALTPETRE—About 1,100 bags Bengal, refraction 7¾ to 3½, sold early in the week at 25s 9d to 26s 6d, but recently there have been no transactions, and the market closes flat.

IMPORTS and DELIVERIES of SALTPETRE to June 17, with STOCKS on hand.

COCHINEAL has obtained an advance of 1d per lb. 296 bags in auction part sold: Honduras silver, 3s 1d to 3s 5d; black, 3s 5d to 4s 4d; Teneriffe silver, 3s 2d; black, 3s 3d to 3s 10d; and Mexican silver, 2s 9d to 3s 1d per lb.

DRUGS.—The sales were small, and went off without change in prices.

JUTE has sold slowly, at rather lower rates. Of 8,438 bales in auction, barely one-half found buyers: low to fine, 10*l* 10s to 21*l* 15s; cuttings, 6*l* per ton.

OILS.—Olive is in small supply, and Mogadore has sold at 49*l* 10s per ton. Palm is more in request, and is worth 37s. Cocoa-nut also has met a more active demand, at 43s for Ceylon, and 44s 9d for Cochin. Linseed is scarcely so firm as last week, though there is no quotable change in prices. Refined rape oil is 1s dearer, business having been done at 46s 6d per cwt.

TALLOW.—Petersburg, with an improved demand, has advanced to 41s 9d for present delivery, and to 42s 9d for last three months delivery.

PARTICULARS OF TALLOW.—Monday, June 19, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closed without improvement. The public sales were small and went off without animation, at previous rates. 540 casks West India were sold to-day, and the week's business in this description amounts 2,923 casks. 1,455 bags Mauritius on sale part found buyers at 28s to 29s for brown sirops. 870 bags Dumma Bengal, sold at 27s 6d to 31s; and 304 bags date Madras, at 25s per cwt. Afloat, a cargo of Havana, No. 12 to 12½, at 25s 6d for the United Kingdom.

COFFEE continues in good demand, at full rates. 40 casks plantation Ceylon, sold at 83s 6d to 86s; 378 bags native Ceylon, 71s to 75s: and 193 casks 1,215 barrels Jamaica, at 68s to 92s for good ordinary pale to fine colory. A parcel of Rio was offered, but only low bids were made, and it was withdrawn.

RICE.—Of 850 bags Madagascar in auction, a small part sold at 15s per cwt. Privately, 1,200 bags Necrancie and Rangoon, at 9s 6d to 9s 7½d per cwt.

TEA.—About 12,000 bags passed to-day; prices were irregular, but generally without material alteration from yesterday's rates.

TALLOW.—Potersburg closed at 41s 6d on the spot, and 42s 3d for last three months' delivery. At auction, 1,587 casks were offered, and a good part sold: South American, 40s 6d to 41s 6d; Australian beef, 39s 3d to 39s 6d; sheep, 41s 3d to 41s 6d; East India, 38s; and Petersburg, 39s 9d to 40s 3d per cwt.

COIR GOODS brought fully former rates at the auctions this afternoon.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is nothing new as respects the home or foreign markets for refined sugar.

DRY FRUIT.—But little business has been done during the week. No change in prices to report.

COLONIAL WOOL.—Prices firm.

FLAX.—Market firm.

TOBACCO.—There has been even less demand for American growths during the past week. Substitutes of pure descriptions have been in rather better demand.

LEATHER AND HIDES.—The leather market of the past week has shown scarcely any alteration. The demand has about equalled the supply of fresh goods, which however was rather limited at Leadenhall on Tuesday. Good crop hides, 40 lbs and 50 lbs, light English butts, and light and middle weight calfskins, were the articles most wanted. Prices remain stationary.

METALS.—We have to note continued quiet. Copper is still rather weaker in quotations, with the greatest shyness on the part of buyers Tin is a trifle better from some speculative operations in Straits. The Dutch Trading Company's sale takes place on the 29th, when 170,000 slabs of Banca and Billiton will be offered. Iron maintains its steady position. Spelter is a little less firm this week than last. Lead continues to be neglected. Tin plates are in steady demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	0
Fat by ditto	2	1½
Yellow Russia	43	3
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, June 19.—The total imports of foreign stock into London, last week, amounted to 14,169 head. In the corresponding week in 1864 we received 11,092; in 1863, 8,323; in 1862, 8,212; in 1861, 10,075; in 1860, 8,082; and in 1859, 6,936 head.

There was a full average supply of foreign stock on sale in our market to-day, in, for the most part, fair condition. Sales progressed steadily, at late rates. The arrivals of beasts fresh up from our our own grazing districts were very moderate. Those from Lincolnshire and Northamptonshire were in good order. From Scotland, the receipts were limited when compared with several previous weeks, whilst the supply from Ireland was trifling. On the whole, the demand for all breeds ruled firm, at an advance in the quotations of Monday last of 2d per 8 lbs. The best Scots and crosses were disposed of at from 5s to 5s 2d per 8 lbs. There was an increased supply of sheep in the pens, and the mutton trade was quiet. Prime Downs and half-breds realised 6s to 6s 4d per 8 lbs, but most other breeds were rather lower. Lambs were in fair supply and sluggish request on rather easier terms. Prices ranged from 6s to 7s 8d per 8 lbs. There was a good demand for calves at last Monday's currency, viz., from 4s 4d to 5s 4b per 8 lbs. The supply was only moderate. We have to report a slow inquiry for pigs, at late rates. The supply was good.

SUPPLIES.

	June 20, 1864.	June 19, 1865
Beasts	5160	4990
Sheep and lambs	28730	28290
Calves	311	436
Pigs	520	400

THURSDAY, June 22.—The supply of beasts on sale to-day was tolerably extensive, and all breeds moved off slowly on rather lower terms. The general top figure for Scots and crosses was 5s per 8 lbs. The show of sheep was moderate, yet sales progressed slowly at drooping prices. The best Downs and half-breds changed hands at 6s to 6s 2d per 8 lbs. We have to report a dull trade for lambs at barely previous rates. The quotations ranged from 6s to 7s 8d per 8 lbs. The supply of calves being extensive, the veal trade was heavy at 2d per 8 lbs less money. Prime small pigs were rather dearer, but milch cows ruled heavy.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	to 3	10	Prime Southdown sheep	6	0	to 6	2

Lambs, 6s 0d to 7s 0d.

HOP MARKET.

BOROUGH, Friday June, 23.—The accounts from the plantations are still very favourable. The hop trade, consequently, rules quiet, yet very little change has taken place in prices, as compared with Monday. The supply of produce on offer is very moderate. Mid. and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, 100s to 140s; Yearlings, 100s to 130s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 23.—These markets are well supplied with potatoes for the time of year. The demand for them rules heavy, at from 60s to 120s per ton. New potatoes are in fair supply. Jersey qualities command 7s to 10s, and foreign, 5s to 9s per cwt.

HAY MARKETS.

THURSDAY, June 22.—The various markets are very moderately supplied with hay and clover, the trade for which ruled firm, at extreme rates. Straw moves off slowly, at previous quotations.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Meadow hay	90 to 110	90 to 115	90 to 110

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—The demand for home consumption continues fair, though the business done this week has been of no great amount, as holders are very firm, and endeavour to obtain rather better prices, which buyers show some reluctance to submit to.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—Moderate attendance. Wheat quiet, at Tuesday's extreme rates. Flour quiet, at late rates. Indian corn unchanged. Beans, oats, and oatmeal quiet.

The Gazette.

TUESDAY, June 20.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 10th of June, on 11,961 miles, to 733,742*l*, and for the corresponding week of last year, on 11,605 miles, to 648,470*l*, showing an increase of 356 miles and of 85,272*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,422 miles, to 599,968*l*, and for the corresponding week of 1864, on 8,167 miles, to 527,406*l*, showing an increase of 255 miles and an increase of 72,580*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 19.—In the share market to-day dullness was the prevailing feature, but Canadian and American securities and the banks closed with a firm tendency, while English railways were disposed to weakness, and none of the other descriptions showed any average alteration. Of the English lines, Metropolitan District (ordinary) recovered ½; Great Western (Hereford) improved ½, and ditto (original) declined further ¾, Caledonian ½, Lancashire and Yorkshire and North-Western a further ¼ each, Midland ¾, Metropolitan 1¼, and ditto (new) ⅝. In colonial, Atlantic and St Lawrence and Grand Trunk of Canada (2nd preference) advanced 1 each, ditto (4th preference) ½, ditto (equipment bonds) 2, and Great Western of Canada (shares of both descriptions) a further ⅛ each. In foreign, Sambre and Meuse recovered ⅛ each; and Bahia receded ¼, and Pernambuco ½. In American, Atlantic and Great Western (New York, of both descriptions) 1 each, ditto (Pennsylvania, first mortgage) 2, ditto (second mortgage) 1, Illinois Central (shares) further 1½, and United States (5-20) further 1½. In British mines there was no alteration. In foreign mines, St John del Rey improved 3½, and Vallanzasca Gold ¼; and Cobre Copper declined 1, Washoe Gold (ordinary) ½, and Santa Barbara Gold ⅛.

TUESDAY, June 20.—In the share market to-day little more than a nominal amount of business was transacted, and English railways showed a tendency to depreciation; but the other descriptions were without material average alteration. Of the English lines, Metropolitan District (ordinary) further improved 2; and Midland (Birmingham and Derby) declined 1, and Chatham, Manchester, Sheffield, &c., North-Eastern (Berwick), ditto (Leeds), and ditto (York) ½ each. In colonial no change is recorded, and in foreign the only alterations were an improvement of ½ in San Paulo, and ¼ in Namur and Liège (preference). In American, Erie shares (paid up) advanced ¼, and United States (5-20) a further ¼. In British mines, West Chiverton and Wheal Seton went up 2½ each, and Chiverton and East Carn Brea ¼ each; and South Wheal Frances declined 2½, and East Wheal Russell ½. In foreign mines, Washoe Gold (paid up) declined 1, and ditto (ordinary) a further 1.

WEDNESDAY, June 21.—In the share market to-day there was no recovery from the recent dulness, and English railways again closed with average weakness; but Canadian showed several instances of improvement, and American securities and miscellaneous shares were firmer, the other descriptions not being materially altered in tone. Of the English lines, Blackwall advanced 2, North London 1½, and Chatham ½; and Great Northern (A stock) declined 3, Metropolitan District (paid up) 2, South Devon 1, South-Eastern ¾, Caledonian and Midland ½ each, Great Western, Lancashire and Yorkshire, North-Western, and Metropolitan (new) ¼ each, ditto (extension) ⅛, and ditto (stock) a further 1. In colonial, Great Western of Canada (of both descriptions) advanced ⅛ each, Grand Trunk of Canada ¼, ditto (Equipment bonds) and ditto (4th preference) ⅛ each, and ditto (deferred), ditto (1st preference), ditto (2nd preference), and Atlantic and St Lawrence 1 each. In American, Illinois Central shares advanced 2¾, Virginia (6 per cent.) ½, and United States (5-20) and Erie shares (paid up) further 1½ each. In British mines, Great Laxey and Great Wheal Vor improved ½ each, and Chiverton a further ½; and Clifford Amalgamated receded ½, and Wheal Trelawney 1. In foreign mines, St John del Rey were 1 better, and Lusitanian declined ¼, and Washoe Gold (of both descriptions) further 1½ each.

THURSDAY, June 22.—In the share market to-day much quietude prevailed, the tone at the close being favourable in the cases of Canadian railways and foreign mines, but the reverse in British mines; while in the other descriptions there was average steadiness. Of the English railways, Great Northern (A stock) recovered 2, and Metropolitan 1¼; Bristol and Exeter advanced 1, and Manchester, Sheffield, &c., and North Staffordshire ¼ each; and Great Eastern declined ½, Great Western Oxford, 1, ditto (original) a further ½, Lancashire and Yorkshire, North Western, Midland, and South-Eastern a further ¼ each, and South Devon a further 1. In colonial, Great Western of Canada (6 per cent.) advanced 1. In foreign, Pernambuco improved ¼, and Great Luxembourg receded ⅛.

FRIDAY, June 23.—The railway market was quiet to-day, with little business. London and North-Western and Great Western stocks declined ¼ per cent. On the other hand, Great Eastern advanced ⅛.

ABRIDGED PROSPECTUS.

The Act of Parliament authorising the construction of a bridge over the river Thames from Chelsea to Battersea, with approaches thereto, received the Royal assent on the 26th July, 1864.

A responsible contractor has agreed to complete the bridge, ready for traffic, in eighteen months for £82,000, taking part payment in paid-up shares of the Company.

If required, the contractor has agreed to collect the tolls of the new bridge and Battersea bridge (which will become the property of the Albert Bridge Company), and keep the two bridges in repair for the space of twelve months after the opening of the Albert Bridge, and has authorised the Directors to retain the sum of £4,000 to guarantee the shareholders for the same period a minimum dividend of 5 per cent. per annum, after paying all costs, charges, &c.

During the progress of the bill in the House of Lords, very satisfactory arrangements were entered into for the purchase of Battersea bridge by the Albert Bridge Company, viz.:—The Albert Bridge Company agreed to purchase Battersea bridge (the purchase to be completed on the opening of Albert bridge) for a yearly rent-charge of £3,000 per annum. The tolls on Battersea bridge are yearly increasing. For the year 1862 they amounted to no less than £6,153.

The situation of the Bridge is peculiarly favourable for traffic; it provides for Chelsea, Brompton, Kensington, and the West End of London a shorter and better route to Battersea Park, Wandsworth, Clapham, Tooting, Mitcham, and other places south of the Thames.

The great advantage the Albert Bridge possesses over the other metropolitan bridges is—

First—The small sum for which the bridge will be completed: the approaches on both sides of the river being already made, the Company will not be called upon to pay compensation.

Secondly—The very satisfactory arrangements entered into with the proprietors of Battersea Bridge will give the Albert Bridge Company a clear profit of £3,000 per annum, after deducting a sum per annum sufficient for maintenance of bridge and expense of collecting of tolls.

Presuming the tolls on Albert Bridge equal to the tolls on Battersea Bridge, the shareholders will have a clear income of 9 per cent. on their capital.

Application for shares may be made in the annexed form, and must be accompanied by a deposit of £1 per share. If no allotment be made, the deposit will be returned to the applicant without deduction. Prospectuses may be obtained from Messrs J. and A. Scrimgeour, the Brokers of the Company; at the Union Bank of London; from the Secretary at the offices of the Company; from the Engineers; and from the Solicitors.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

COPY OF CERTIFICATE OF PROFITS.

"The Breech-Loading Armoury Company, Limited.

"To the Directors.

"Gentlemen,—At your request I have examined the specifications, statements of contracts, and other sales, and documents belonging to Messrs Calisher and Terry, London and Birmingham. Taking these statements, of which I have no doubt, as a basis of calculation, I can have no hesitation in certifying that, including all the various items, a profit of £20 per cent. on the outlay of capital has been realised upon the above-mentioned sales and contracts.

"I am, Gentlemen, your obedient Servant,

Signed "HENRY CROYSDILL, Public Accountant,

"14 Old Jewry Chambers.

"London, 6th May, 1865."

THE BREECH-LOADING ARMOURY COMPANY (Limited).

(Messrs Calisher and Terry, Contractors, London and Birmingham.)

The detailed prospectus of this Company can be had at the offices, 32 New Broad street, City, or the bankers, brokers, and solicitor. It contains the most ample information, with reports and opinions of the leading journals, on the great superiority of the well-known rifle manufactured solely by this firm, whose patents for England, France, America, Austria, and Belgium, are transferred to this Company. The transfer of the business to this Company has been effected upon the most advantageous terms; and shareholders come into possession of a tried and highly remunerative concern, free from exorbitant charges, while the profits, which will commence at once, will be large and certain. This Company offers the most positive advantages to capitalists as a first-class, lucrative, and permanent investment. The dividends will be paid at the London and Birmingham Banks.

Applications for Shares in this Company must be forwarded to the London and Westminster Bank, Lothbury; Messrs Hallet, Ommanney and Co., bankers, Great George street, Westminster; National Provincial Bank of England, Birmingham; or to the secretary, John Bowing, Esq., C.C., at the offices of the Company, 32 New Broad street, City. A large number of shares have been already subscribed, and the share list will be shortly closed.

THE BREECH-LOADING ARMOURY COMPANY, Limited.

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in the Company will be CLOSED on SATURDAY next, the 1st July, for London, and on MONDAY, the 3rd, for the country.—By order,

JOHN BOWING, C.E., Sec.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL,

Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

TO CLEAR THE HEAD, GIVE Lightness to the Spirits, Vigour to the Body, increase all the wholesome Appetites, improve Digestion, unload the Bile, strengthen the Stomach, purify the Blood, and produce robust Health, no Medicine is equal to Dr LOCOCK'S EXCELSIOR WAFERS. They taste delightfully, and never fail to restore both health and spirits. Sold at 1s 1½, 2s 9d, and 4s 6d per box. Prepared by Da Silva and Co., 76 Bride lane, London, E.C., sole preparers of Dr Locock's Pulmonic Wafers, for all disorders of the breath and lungs. To be had of all druggists.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

HOLLOWAY'S OINTMENT AND PILLS.—Bad legs, bad breasts, ulcers, abscesses, wounds, and sores of all kinds may be thoroughly healed by the application of this ointment to the parts affected, after they have been duly fomented with warm water. The discharges should not be checked at once, but rather encouraged, for any sudden check must of course be always dangerous. Nature is the noblest of physicians, and must not be oppressed, but seconded; all sores are for a time the safety-valves of the constitution, and should not be closed or healed until they assume a healthier character. Under the action of this powerful ointment, together with the pills, the depraved humours of the body will be quickly removed

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Specie at their London office for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

OVERLAND ROUTE from MARSEILLES. — Services Maritimes des Messageries Imperiales French Mail Steam Packets.

The 19th of every month, at 2 p.m., for Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hongkong, and Shanghai.

The 9th of every month for Messina, Alexandria, Aden, Seychelles, Réunion, Mauritius.

For passage, freight, and information, apply to B. W. and H. Horne, 4 Moorgate street, London; G. H. Fletcher and Co., Liverpool; at the Offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

Passengers, eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

CUNARD LINE.

This Company undertakes for a stipulated commission—

To collect the rents of the owners of landed and other estates; to receive the pay and pensions of military and naval officers on service at home or abroad; also the dividends and coupons of the holders of home, colonial, and foreign state or municipal stocks.

To negotiate loans of large or small amounts for temporary purposes or fixed periods, upon the deposit of title deeds and other approved securities, or upon the mortgage of real estates. To facilitate this object, registers are kept for private use, in which the requirements of intending borrowers and lenders are recorded.

To negotiate the purchase and sale of property of every description.

And generally to act as agents in all monetary transactions for parties at home, or on behalf of residents in the British colonies, or foreign countries.

Reliable information is furnished to parties desirous of making investments in public or private undertakings.

The agency commissions are fixed upon a moderate scale.

Transactions upon which the guarantee of the Company may be required are the subjects of special agreement.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley. Cornhill, E.C.

Steamship	Loan	Docks
Iron Works	Gas	Waterworks
Insurance	Telegraph	Hotel
Marine Insurance	Land	Irrigation
Foreign Mines	Cornish Mines	Devon's Mines

And other Public Companies.

Mr PETER WATSON, Stock and Share Dealer, begs to state that every information respecting any of the above Companies may be had on personal application, or by letter, as to purchases and sales, with advice as to the most desirable investment.

From the close proximity of his offices to the Stock Exchange, and also the Mining Exchange, he is enabled to act with promptitude on all orders entrusted to him in the purchase or sale of every description of stocks or shares, at net prices for cash or fortnightly settlements.

Telegraphic messages of customers to buy or sell in any of the above companies punctually attended to, at net prices for cash or half-monthly settlements, at the closest possible market prices of the day.

Twenty years' experience (two in Cornwall and eighteen in London).

BANKERS.
The Alliance Bank and the Union Bank of London.

The present is an unusually favourable period for the investment of capital.

A selected list of railways, banks, financial, foreign funds, steamships, foreign and Cornish and Devon mines, &c., sent on application, with special recommendations as to investments, &c., on the distinct understanding that any business resulting through his information or advice may be done through him.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

SHAREHOLDERS IN FINANCIAL

BUBBLES will do well to immediately Sell (if they can), for when the accounts for the half-year (ending this month) are made up no bona fide profit can be expected; but, in all probability, very "heavy losses" will be the result. The future trading in many will be very precarious and doubtful, hence the advice to sell immediately and avoid further liability. Investors should then re-invest in bona fide, safe, and long-established companies, which are managed for the general body of shareholders, and not for private individuals only. By acting on this advice great profits, instead of heavy losses, may thus be made.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

INVESTMENT OR SPECULATION.

—The present market price of Government (foreign) Bonds, Banks, Steamship, Marine Insurance, &c., will yield the immediate purchaser some five, eight, or twelve per cent. per annum (paid half-yearly on fixed days with the greatest regularity). In addition to the high rate of interest or dividends there is every probability of many of the above having a good rise in market value.—PETER WATSON, Stock and Share Dealer, 79 Old Broad street, London, E.C., can give every information respecting the above, and he is in a position to BUY and SELL at net close market prices of the day.

Messrs Cash and Edwards, King's Arms yard, Moorgate street.
SECRETARY (PRO TEM.)—L. M. Soffel, Esq.
Offices—92 Cannon street, E.C.

ABRIDGED PROSPECTUS.

The objects of the Company are for purchasing the freehold estate, mills, canal, &c., of Crampagna, and the concession in perpetuity of the iron mines, of North Rancie, comprising 2,500 acres, which confers on this Company the command of the most celebrated iron and steel ores in Europe.

The blast and Catalonian furnaces in the neighbouring districts which would be supplied by the Company are daily increasing, and since the opening of the railway in these vicinities in 1858, the make of iron has increased fourfold, and it is confidently stated that it will be again doubled within four years.

From negotiations which have taken place with the ironmasters the Company are assured that more than 50,000 tons of ore per annum will be immediately required; and the railway authorities are ready to grant special terms, highly favourable to this Company.

Contracts also are offered to be entered into for the price at which the ores are to be produced to the Company.

The average produce of the ores in the furnace without being calcined is from 45 to 60 per cent. iron, and the prices vary for the bar from £7 to £8 16s per ton; and for the steel, £17 4s to £62 per ton, the highest being the present invoice rates. The kidney yields 58 per cent. iron; compact, 60 per cent. iron; inferior, 45 per cent. iron.

By blast furnaces the yield produces 55 per cent. of the most excellent quality of iron known on any market; it is part crystalline, owing to the great amount of natural steel.

The pig iron from the Rancie Ores sells from a minimum of £7 per ton to £8 16s; bar, £15 per ton to £16; steel, £17 4s per ton to £18 to £62. The highest are the present invoice prices.

The steel produced from this iron is stronger and more elastic than that obtained from Sweden and Russia.

PROFITS.—The cost of ores delivered at the railway depot of Foix, including dues and charges of all kinds, will not exceed 6s 2d per ton, and when the railway is completed to Tarascon, which is expected within twelve months, the cost to Foix will not exceed 5s 2d. In no case will the profit be less than 7s, and intermediately up to 12s per ton, and even higher in many cases. Taking, therefore, the minimum profit of 7s per ton, and the sale at only 100,000 tons, the profit per annum, would be 35,000l upon the capital of 75,000l called up, or upwards of 45 per cent.

As an inexhaustible supply of ore is deposited above the base of the workings no sinking is required, and all the ores being brought to surface through levels by tramways the heavy outlay of capital for machinery and its daily maintenance is entirely dispensed with.

The properties of the Company are situated in the heart of the iron district, where skilled labour is abundant. Foix is the focus of the iron ore, charcoal, and coal trades, also the terminus from which the railway companies have based their tariffs for minerals to be carried in all directions.

The freehold estate of Crampagna and the concession of North Rancie in perpetuity, have been secured for the sum of £50,000, of which £38,000 is to be paid in fully paid-up shares of the Company, and the remaining £12,000 in cash, by easy instalments.

Full prospectuses and forms of application for the remaining 3,700 shares may be had of the Bankers, Solicitors, Brokers, or Secretary of the Company,

SKIN DISEASES AND THEIR REMEDIES.
By ROBERT J. JORDAN, M.D
Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.
"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—MEDICAL TIMES AND GAZETTE, August 4th, 1860.
To be had direct from the Author, 27 George street, Hanover square, London, W.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition.
Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.
At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.
Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Sefsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Smiley, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 18 Princes street, Edinburgh. No agents of any kind anywhere.

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MELAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

THE PATENT
KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

The Political Economist.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE MONEY MARKET.

The Bank return to Wednesday evening bears evidence of the increased demand for money which has prevailed during the last week. The reserve of notes in the banking department is 347,000*l less;* and the private securities are 1,285,000*l more.* The total amount of bullion is 16,407,000*l*, or 112,000*l* more than last week.

It is certain that for a few days past the market rate has been fully up to the Bank minimum of three per cent. It is probable that the demand thus manifested may be chiefly occasioned by the adjustment of transactions maturing at the end of the financial quarter and the commercial half-year. The excitement of the general election interferes with business, and for a few weeks forward it may happen that the rate of discount will relapse into the torpid condition which prevailed a fortnight ago. But symptoms are not wanting to justify the belief that the value of money is not likely at present to fall much lower. During the last week the arrivals of gold have been 650,000*l*, but the demand from abroad has been sufficiently active to absorb almost the entire quantity, and but a very small portion has been taken to the Bank. The demands upon the floating capital of the country are incessant, and the growth of the floating capital is slow and limited. As far as can be seen at present, the harvests will be favourable, not only in this country, but in North America and over large parts of Europe. A harvest generally favourable is always an element of ease and strength, and an abundant yield in the United States this year might go a long way to smooth the restoration of prosperity to the States of the Union.

We do not look, therefore, to any rapid rise in the rate of interest, but the probabilities seem to point to a state of things in which higher rates are more probable than lower ones.

The accounts from Bombay relative to some alleged suspension for a few hours of the Bank of Bombay are confused. The whole commercial condition of Bombay is locally so peculiar and complicated, that we may expect to hear of very singular occurrences. We are told, for example, that lately large quantities of diamonds, pearls, and precious gems brought a few months ago by the wealthy traders of Bombay chiefly for show, have been urgently offered for sale in the bazaar, in order to obtain silver for the payment of engagements.

THE LANCASHIRE PUBLIC WORKS ACT.

The final meeting of the Lancashire Central Relief Committee on Monday last was a legitimate occasion for something more than national rejoicing. There was room for not a little honest pride and for mutual congratulations of no formal kind on the efficiency both of the private and the official labour which have done so much to lighten the weight of past calamity and improve the future prospects of England's wealthiest province. Mr Villiers deserves no little credit, as the Relief Committee were not slow to remark, alike for the conception of the Public Works Act and for the energy and economy with which its details have been carried out; and though no official energy would have been of much avail without the admirable ability and zeal which all classes have shown in co-operating for the relief of the distressed districts, it is also true that the great local benevolence and care actually displayed would have been quite unable to turn the recent emergency, as it has been turned, to the permanent benefit of Lancashire without the hearty co-operation of the Government, and the very efficient aid rendered by its subordinate officers, Messrs Farnall and Rawlinson. There has been a disposition in some quarters to depreciate the effect of the Public Works Act, on the ground that the kind of labour to which it gave employment was not, in the main, the kind which was in want of employment. "The greatest number of distressed operatives employed directly at any one time," says Mr Rawlinson's last report, "was 4,002, besides upwards of 2,000 employed indirectly in getting stone and other materials." Well, the employment of 6,000 operatives in the depth of the cotton famine was, no doubt, in itself only a minor palliative to its terrible effects. But this is very far indeed from being the true measure of the benefit afforded. Indirectly, as Mr Rawlinson remarks, a much more considerable relief was given than such numbers point to; for very many operatives, having learnt their trade as drainers, paviors, and so forth, left the district, and got employment of that nature elsewhere. Even this, however, suggests only a small part of the benefit conferred. The greatest gain that has been reaped by Lancashire is not the relief in the past, but the store that has been laid up for the future. The million sterling which has been sunk in draining the great towns of Lancashire and supplying them with wholesome water represents a benefit which, we do not hesitate to say, only the rising generation will adequately appreciate. It is, in fact, a sanitary revolution which would not have taken place at all without the cotton famine; and even with the cotton famine would not have been brought about without the aid of the

Digitized by Google

Public Works Act and those lucid expositions of the urgent needs of the population addressed by Mr Rawlinson to one municipality after another in the depth of the distress. Lancashire has for a generation or two been so busy in sinking every available shilling in new machinery and new facilities for her great manufacture, that the sanitary needs of the people had in almost all its great towns been neglected,—in some absolutely overlooked. Every one who knows Lancashire well knows how utterly indecent and unhealthy were the provisions for the drainage of most of its large manufacturing towns before this merciful calamity descended upon it. The cesspools,—if they could be called so,—behind the houses of the operatives were enough to generate more fevers than Lancashire had ever suffered from, though there were many towns in which this natural result of filth was a regular visitant. Then, again, the water supply was generally utterly and terribly inadequate to the wants of the people. Reservoirs of filth were brought close to every door, but the antidote of pure water was as scarce and difficult of access as it ought to have been cheap and plentiful. We are well persuaded that not only would this state of things, had it lasted, have done much to demoralise Lancashire, but that no rapid increase of population there, such as we may now well look forward to, could have taken place without bringing every year a fearful access of disease. Nor do we believe that the cotton famine alone would have led to any reform. As it was, the larger capitalists of Lancashire, fully, and we believe wisely, confident as they were of regaining within a few years the whole and more than the whole of their former prosperity, were employed in building new mills and putting up new machinery for future use, instead of turning their attention to sanitary reforms. We do not mean to condemn them for so doing. On the contrary, they were acting on the truest economic principles in availing themselves of a time when labour was cheap and plentiful to prepare the means of economising it and increasing its efficiency against the time when it might become dear and scarce. The effect was to diminish the pressure of the cotton famine by creating a fresh demand for labour in the building and machine-making trades. But true as all this is, it shows that Lancashire would not have been awakened to the consciousness of its gross sanitary deficiencies by the mere occurrence of a great opportunity. The wealth of the county would have used that opportunity to prepare for a new start in manufacturing energy when the crisis had passed away, but would scarcely have improved the opportunity, as it has done, for great municipal reforms. It was the Public Works Act, and the earnestness with which Mr Rawlinson preached from town to town the duty of using the opening thus afforded for a most needful and long required revolution which determined the issue, and we do not doubt that the effect has been to secure a future for Lancashire, such as would have otherwise been quite beyond its reach. Those "200 *miles of street* which have been "sewered, formed, paved, channelled, and flagged" during the famine, represent a new impulse to both the physical and moral future of Lancashire such as no other kind of work could have given. The work has not only been done, but well done, no fresh instalment of the Government loan having been advanced till the work done with the previous advance had been inspected and approved. The draining of land and the supply of fresh water to the towns have also contributed to the wealth and respectability of the county to an extent only second in importance to the sewering; and we do not doubt that when these great works, on which a million sterling has already been spent, are completed, Lancashire will be in a position to support a double population with greater ease, comfort, and decency than that with which she supported her former population before the famine.

For the wisdom which has thus turned a period of misery into a preparation for far more solid and permanent prosperity, we have clearly to thank the Government which introduced the Public Works Act and the very able men who carried it into execution. For it is pretty evident that the municipalities would not have engaged in this great undertaking on their own account. In the first place, they could not, even if authorised to borrow on the security of the rates, have borrowed on terms anything like so favourable as those which the Government have granted—not only without losing a shilling, but with advantage to themselves, for they have of course borrowed on even easier terms than the easy terms on which they have lent to the municipalities. And not only has the Government aid induced many corporations to borrow which would not otherwise have ventured to do so, but, as we intimated before, the Government officers have been chiefly instrumental in persuading the municipal authorities of the gravity and extent of their needs. Even without Mr Rawlinson and Mr Farnall, the relief organisation would no doubt have been very efficient; but without them the sanitary reforms would have been embraced by comparatively few corporations, and but languidly carried out even by those few.

When we compare the Lancashire cotton famine with the Irish potato famine, there is undoubtedly *bonâ fide* reason for national satisfaction. Of course, the great difference has been in the characters of the people amongst whom the two great fatalities fell and exploded. Lancashire had both far vaster resources and far better habits of organisation than Ireland. And as was the people affected by this calamity, so also, naturally enough, was the value of the help rendered to them. Still it is satisfactory to know that, while all the efforts of the Government to break the force of the former calamity were clumsy and more or less failures, the efforts of the Government to break the force of the latter calamity have been eminently successful,—so much so, that the time is likely enough to come when the Lancashire cotton famine will be looked back to as a "blessing in disguise," not only on account of the sounder and more permanent system of cotton-growing for which we have paid this great price, but not less for the gigantic step in sanitary reform to which this disaster gave occasion, and which will raise the moral standard of the labouring population of our richest county to a new level of decency, respectability, and comfort.

ELECTION PROSPECTS.

THE dissolution is now definitively announced for the 6th of July, and as the writs for the new Parliament will be issued the same day, and as every one will be anxious to lose no time in despatching what is always a troublesome and laborious affair, we may assume that the borough elections will be over by Thursday week, and the county elections in the course of the week following. As several of the counties are not contested, and as the course of affairs in the boroughs will be mainly instrumental in determining the general character of the new Parliament, we shall be able to form a pretty fair opinion as to the result before the middle of the month. The estimates are various,—so various that no great reliance can be placed upon them. We are assured, on one side, that the Carlton Club counts upon a Conservative gain of seven seats, and, on the other, that the Liberals will gain seventeen;—but how far all who are set down as Conservatives will steadily oppose Lord Palmerston's Government, and how far all who are set down as Liberals can be calculated as certain to stand by it on critical occasions, are questions as to which it would be wise not to be too confident.

In several respects this general election differs from all the previous ones we can remember, and the issue in consequence must be looked for with unusual curiosity. The Parliament may be said to have expired by the simple efflux of time: it dies rather than is dissolved. The dissolution, therefore, is not an "appeal to the country" in the usual signification of that phrase:—that is, it is not an appeal to the country for its judgment of this or that Government, or for its opinion on this or that question;—it is simply a summons to the nation to send up fitting representatives, wise and able senators. The opportunity is a rare one; and it is greatly to be desired that the people should use it and respond to it in a suitable manner. There are two reasons on this occasion, not why party feelings and interests should be laid aside, but why parties should act on rather wider and sounder principles than usual,—not why representatives should be chosen with less care, but why they should be chosen more with reference to their general sagacity and trustworthiness than to the views they may chance to hold or the measures to which they may be pledged. The first reason is that there is no special question vividly before the country for its decision—for though an attempt, naturally enough, is being made, and is responded to by a great number of candidates, to elevate Parliamentary

Digitized by Google

Reform into that position, it is generally felt that this is rather owing to the absence of any other prominent topic than to any very spontaneous or overwhelming interest that is felt respecting it throughout the country at large. The Liberal party has no "cry"; neither has the Conservative party. The only thing approaching to enthusiastic feeling anywhere is the general popularity of a Premier who has passed his eightieth year, whom his supporters have no idea of deserting, and whom his opponents have no wish to oust. In general there is active and resolute hostility from the party out of power to the leaders of the Government; but in this case, Lord Palmerston is more popular with many of his formal antagonists than with many of his nominal supporters. If his continuance in office during the remainder of his life-time is deprecated eagerly by any one, it is by certain members of the Radical section only. There is, therefore, nothing before the public now to warp their choice of good and fitting candidates—no temporary reason to induce them to prefer an inferior man who is sound as to a special dogma, to a superior man whose creed on that point is less in harmony with the popular demand of the hour.

The second reason is, that the campaigns of the new Parliament will have to be fought on a fresh and at present unconjecturable field. The programme of the next five years, or even of the immediate future, cannot be in the least laid down beforehand. All that we know of the future is that it cannot be a mere continuance of the past. If anything is certain, it is that, sooner or later in the history of the new Parliament—probably, we fear, very soon—the leadership of the House of Commons must pass into other hands than those which have wielded it so long and with such singular tact, energy, and popularity. What will ensue on Lord Palmerston's retirement when fatigue compels him to retire, or who will succeed to his sceptre, it is impossible to predict. Possibly there may be a change of Government: probably there may be a reorganisation of parties to a great extent and of a very remarkable character. We shall have to deal with occurrences which we cannot foresee, as to which we can lay down no rules and exact no pledges beforehand, but which we are sure will be significant and important in no ordinary measure. We want, therefore, men who are not tied down to any prescribed course of action under this or that set of imagined circumstances, but who are qualified by their capacity, and can be trusted for their integrity, to act with judgment and spirit under any possible circumstances that may arise. When wise men send envoys into unknown lands and among unknown people, they choose, not men who can obey orders and observe rules, but men who can exercise discretion in all new emergencies.

It is conjectured that half the members of the coming Parliament will be new men, so that there will be a more extensive change of *personnel* than has ever been known since 1832. That there will be some gain to the party of extreme opinions is also believed, and is very probable. That the moneyed interest and the railway interest will be more largely represented than before is, we are assured, certain; but whether this be a matter for congratulation we cannot pronounce till we see who the representative individuals are to be. Great fortunes and wholly new fortunes have been amassed within the last few years, and it is natural that some of their possessors should be desirous of entering the great assembly of the nation; and many of them no doubt are qualified to do good service there. As a rule, men of property are supposed to incline towards Conservative, or at least moderate, opinions; but on the other hand the commercial classes, among whom this recent wealth has sprung up, usually hold Liberal, and often extreme Liberal views. In most party questions it is probable that the majority of these gentlemen will side with the existing Government. One encouraging feature we may notice in conclusion—the appearance of a certain number of young men, unconnected with noble or territorial families, who have announced their intention of devoting themselves to statesmanship as a profession. It may be in the recollection of our readers that we called attention, two or three weeks ago, to the scarcity of rising men of this sort, consequent upon the character and notions of existing constituencies. Since that time the candidature of Mr W. Gladstone at Chester, and the election of young Mr Brassey at Devonport, give us hope that the deficiency we pointed out may, in some measure, be supplied at this general election.

OFFICIAL PURITY.—THE BETHELL CASE.

A SECOND Select Committee has given the Lord Chancellor a second qualified acquittal. In the Edmunds' case the House of Lords acquitted him of everything except want of judgment. In the Wilde-Welch-Bethell case the House of Commons acquit him of everything except haste and want of caution. We frankly accept both decisions. We are glad to believe, as both Committees have declared, that there is no reason to suppose that in any of these proceedings—either in his acceptance of necessitated resignations, or in his selection of preferred nominees,—Lord Westbury was "actuated by "improper motives." We may even admit that in his several appointments he has not carried predilection for his own relatiues to any unprecedented or possibly indefensible extent, and that none of the near connections on whom he has conferred the vacant places can be pronounced incompetent or disqualified. We may go yet further, and allow that so busy and often overworked a man as the Lord Chancellor of England must necessarily be a great deal in the hands of his subordinates both as to the selection of candidates and the decision of secondary matters; and that mistakes, in both directions, when arising merely from over-haste, or over-trust in those about him, ought not to be visited with too harsh censure. But when all these admissions are made, and when the most favourable view has been taken which it is possible to take of the conduct of the various parties implicated in these questionable and tortuous transactions, enough remains to warrant much surprise and to call forth the deepest grief and humiliation.

We feel ashamed and in a manner disgraced before foreign nations. We were in the habit of believing in, and priding ourselves upon, our superior official purity. We knew that in the American Republic and in the French Empire places were bought and sold, that valuable considerations were given for profitable concessions, that men in high places did not scruple at times to use official information for purposes of private gain; but we had no conception that practices of this sort, or practices in the least resembling them, prevailed among ourselves. It was centuries with us since a judge had bartered a decision. It was generations since a senator had actually sold a vote. For a minister or an official to make money out of his secret knowledge, or to profit by his patronage in any direct or pecuniary shape, were enormities really undreamed of among us; while even defalcations and peculations among the lower branches of the Civil Service were rare in the extreme. In all these matters there was a very high tone of feeling and profession, and (as was supposed) an almost equally correct standard of practice. Cases of corruption among public servants were of most unfrequent occurrence, and when they did occur they encountered the severest reprobation, and usually the promptest punishment. We trusted that we were not as other men are; and on the whole we had reason for our pride. But in the face of the revelations now made, it will be difficult to feel this self-complacence any longer; and, unless we can in some measure purge ourselves from these unclean doings, assuredly it will be impossible to protect ourselves against the taunts of other nations, who were never very prone to credit our superior virtue, and who have long been irritated by our somewhat Pharisaic assumption and censoriousness,

For, let us consider for a moment what it is that has come to light. It is not merely the offences that have been discovered, but the mode in which these offences have been treated, and in a manner condoned, that are so damaging to our repute. It is not so much the pecadilloes or even the magnificent peculations of subordinate officials that display the laxity of public morality at which we have to blush, as the general disposition in far higher quarters to regard these sins with lenity and pardon. The first implies merely that there are here and there corrupt individuals in the public service: the second implies that corruption is gradually creeping over our principles. It is true that when the matters came before *the public*, the public acted, as it nearly always does, in a spirit of uprightness and purity. Both Houses of Parliament spoke out strongly as soon as the affairs were brought officially before them, and the Press was not backward or lukewarm in its denunciations. But how were the offences treated *before* the public had cognizance of them—a cognizance which was purely accidental?—Mr Edmunds was appointed to one of his offices by a Whig Lord Chancellor and to another by a Tory Lord Chancellor. He was the

Digitized by Google

trusted officer of the highest legal personages in the realm. He was discovered to have been guilty of a series of deliberate peculations continued during a long series of years. His official superiors, instead of dismissing him with ignominy, or instituting a criminal prosecution, or in any way publishing his delinquency, mercifully allowed him to escape such publicity by resignation and promised restitution of his plunder. It is impossible to argue that this mode of proceeding, if it implied great lenity and consideration towards the offender, did not also imply a very inadequate estimate of the magnitude of the offence:—and this, as far as the national reputation is concerned, is the damaging part of the transaction. But this was not the worst. Mr Edmunds was permitted further to avoid publicity by resigning another post which he held under the House of Lords, and was granted a pension on resigning;—and this pension was granted by a Committee of that House, and with a sort of general connivance on the part of the House itself, although it is not denied that most of the Peers were well (though unofficially) aware that Mr Edmunds had been detected in transactions that would not bear the light. The great body of them, in fact, were disposed to be lenient to the offender, so long as they could be so without public scandal. His offence excited in their minds no such vivid or indignant reprobation as could only be satisfied by severe punishment or stigma. They pitied him because he had lost a lucrative position and a fair reputation in his old age, and they voted him the same pension as they would have done had he been the most immaculate of men. And it is not alleged (to say the least) that they did this in ignorance of what was charged against him.

The case of Mr Wilde was similar, but not so bad. He had grossly neglected his duty, and had been guilty of irregularities which permitted his subordinates to peculate, though there is no reason to believe that he himself in any way profited by their illicit gains. He, like Mr Edmunds, was called upon to explain his conduct. Like Mr Edmunds, he was unable to do so satisfactorily; and accordingly received from the Chief Registrar, acting for the Lord Chancellor but, as Lord Westbury declares, without his specific authority, a threat of dismissal, unless he should evade that sentence by instant retirement. The same gentleman, Mr Miller, went on to suggest to Mr Wilde that he had better retire on the plea of ill-health. Mr Wilde took the hint, sent in a most inadequate excuse and most weak medical certificate, and at once was allowed to retire upon a pension. Thus, within a year, two official delinquents who ought to have been dismissed were allowed to retire – indeed, advised to retire—by the same high legal authority, and on retirement were granted the same pension as they would have obtained for the most faithful service. The Lord Chancellor, at least, did not take a very severe view of the offences of either of these gentlemen; or was unusually inclined to temper justice with mercy; or was too busy or too indifferent to think much about the matter.

But this is not all, nor perhaps the worst. It is clear that, in reference both to the appointment of Mr Edmunds years ago, and of Mr Welch last year, there was corrupt bargaining of some sort, whether to obtain the appointment or to participate in the emoluments of it;—though it is equally clear that neither Lord Brougham in the first case nor Lord Westbury in the second had the least knowledge of these underhand and disreputable proceedings. What was the nature of the pecuniary arrangement between Mr William Brougham and Mr Edmunds, in virtue of which the latter gentleman paid over a large portion of his original official salary to the former, was not made at all plain even by the elaborate report of the Lord's Committee. All that *was* plain, was that it was of an illicit nature which both parties desired to keep secret, and that their Lordships thought exceedingly ill of the transaction, and expressed their thought in no ambiguous terms. In the case of Mr Welch it is pretty well proved that the Lord Chancellor appointed him, chiefly though not solely, in consequence of the application and recommendation of his son, Mr Richard Bethell, and without any inquiry into his qualifications:—and that Mr Welch had procured the good offices of Mr Bethell by lending him some money, and by promising him more. Mr Welch further admitted that this was not the only case in which he gave similar *douceurs* in order to obtain the assistance of persons supposed to have influence in procuring appointments. This evidence, whatever we may think of the accuracy of individual witnesses, discloses the existence of a practice which is criminal by law, utterly disreputable to the service, and which we confess we did not believe to have survived to the present day, though we used occasionally to hear of it in the old times of the Regency. We hope that the recommendation of the Committee of the House of Commons will be followed up, and that legal proceedings may be instituted against the offenders, so that the truth, and the whole extent of the truth, may come to light.

But even this is not all. Before both Committees there was a terrible amount of discrepancy and contradiction in the evidence of the several witnesses—an amount and a kind which no degree of charity can attribute to mere inadvertence or forgetfulness. Falsehood there must have been, and falsehood in no stinted measure; though at whose door it is to be laid, or how the sum total is to be divided, it is impossible to determine. Mr William Brougham and Mr Edmunds must settle the matter between them in the one case, and Mr Miller, Mr Charles Wilde, Mr Welch, Mr Bethell, and the Rev. Mr Harding in the other. Mr Miller, the Committee inform us, contradicted himself in one of the most damaging parts of his evidence in a manner irreconcileable with any idea of trutbfulness, and his books contained alterations and erasures of a most suspicious sort. We do not see, we confess, how after these disclosures, he can continue to hold the post of Chief Registrar, nor how the Lord Chancellor can feel safe for a day in the hands of a deputy who writes letters in his behalf which he never authorised, and in terms which fill him with amazement, and who makes out jobbed appointments ready for his signature without ever consulting him about the matter. Certainly, as the alternative of resignation or dismissal was offered to Mr Edmunds and Mr Wilde, *à fortiori* ought it to be offered to Mr Miller.

It is not a pleasant reflection that two of the parties most compromised in the transactions on which we have felt it necessary to comment thus severely, should be next heirs to peerages, and will in the course of nature sooner or later take their seats in the Upper House. There could not well be a stronger argument in favour of peerages for life. But our object in these remarks has not been to stigmatise any individual, but to point out that stigma, and stigma of no ordinary depth and colouring, will rest upon us as a nation, unless, by the strongest practical expression of surprise and disgust, and by the promptest measures to clear ourselves from all complicity with, or tolerance for, transactions of the sort we have been describing, we make it plain to the world that our standard of public integrity at least is as high and pure as ever, and that no one can fall short of it with impunity.

BOARD OF TRADE RETURNS.

During the first five months of the present and two previous years, the total value of the exports of British and Irish produce and manufactures, according to the returns issued by the Board of Trade, was as follows:—

	£
1863	50,512,670
1864	64,069,060
1865	63,901,576

The above comparison shows a decline in our shipments compared with 1864, of 3,167,484*l*; but an increase compared with 1863 of 10,158,906*l*.

In May only, the shipments were:—

	£
1863	11,284,289
1864	14,176,640
1865	13,194,758

It will be perceived that the shipments in May, current year, were 981,882*l* less than in the corresponding month in 1864; but 1,910,469*l* in excess of 1863.

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first four months of 1865, compared with the same period in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease. £
Coffee, raw	791,744	818,535	36,791	...

	1,442,614,913	57	1,380,078,539	47

The Bank return in a commercial point of view is better this week, since it shows an augmentation of 41,724,000f in the discounts. But the stock of coin and bullion have increased by 15,275,000f, so that the demand for accommodation is still far below the power of the Bank to satisfy it. In the circulation of notes there is a slight augmentation of 4,686,000f, and in the deposits there is one of 18,376,000f.

The Bourse from Thursday last up to yesterday was a prey to the distrust with which it has been afflicted so long, and consequently there was a considerable fall in prices. A bad monthly settlement was expected, but an important rally has taken place to-day. That this amendment will be durable is not, however, thought likely, the principal cause of it being the desire to render the settlement less difficult. In the midst of the depression of the past week the *Rente* displayed considerable firmness, and so did the Italian loan, and they have both participated largely in the improvement of to-day. The Mexican loans have fallen heavily, owing to the last news from Mexico *via* the United States being considered unfavourable. The quotations are as follow —that of the Bank of France is with a coupon of 78f detached :—

At last the Corps Legislatif has done with the Budget of 1866. The only important modification made in it is, that the tax on riding and carriage-horses and on carriages has been suppressed, although the Government proposed to make over the proceeds of it to localities. The impost was disliked by the people who paid it, and was somewhat less productive than was expected; and yet, perhaps, under the existing system of taxation, it ought to have been maintained. That system for forty years and more has been subjected to no serious revision, notwithstanding the changes that have taken place during that time, and notwithstanding the creation of railways and the conclusion of commercial treaties which have modified everything. It consequently weighs rather unfairly on the working and poorer classes, as did all taxation *ante* the commercial reform epoch, and on that account an impost which fell principally on the rich had much to recommend it. Apart from this tax, the Chamber, *apropos* to the Budget, has spent another week in listening to dull, heavy, wearisome speeches on different subjects. It has also had a debate about railways, which has attracted considerable attention out of doors. In the course of it, the Southern Railway Company was attacked with considerable bitterness, for, among other things, not executing a line from Agen to Tarbes, and for its monopoly of the Canal Lateral de la Garonne. M. Emile Pereire, chairman of the Company, replied that the non-execution of the line was excusable, seeing that it had been ascertained that the passenger movement between the two places only averages ¾ of a person per diem. And as to the Canal, he observed that it had been annexed to the railway by law, before the Company had anything to do with it, and that the persons who now complain that the Railway possesses it, actually proposed that it should be destroyed, in order that the line might be carried along its bed. M. Pereire spoke with great force and effect, and adorned his somewhat arid subject with *esprit*. His speech was, I believe, the first one of any length that he has delivered since his entrance into the Chamber, and it proved that he possesses the command of language, the promptitude of judgment, and the general tact which are necessary for the Parliamentary debater. The Northern Railway was assailed with great vehemence by M. Brame, for having, as he said, in violation of the law, entered into secret conventions with an Iron Company in Belgium, and with the Gas Company at Paris, to carry iron and coal for them at less than the regular tariffs. M. Delebecque, vice-chairman of the Company, denied that there was any such treaty with the Gas Company, and as to the Belgium Company he said that that which had been entered into was applicable only to the lines which the Northern Company holds in Belgium, and that in France the full tariffs are exacted. M. Brame attempted to substantiate his accusation by producing a paper bearing the signature of Delebecque, but M. Delebecque said that there other persons of his name, and that the signature was not his; also that the paper did not admit of the interpretation M. Brame put on it. In spite of this contradiction, M. Brame seemed disposed to maintain his assertions, and a scene of much confusion arose. The Lyons and Mediterranean Company was attacked by M. Pouyer-Quertier for taking twenty-one days to carry cotton from Marseilles to Rouen, when it can be got from Liverpool in eight or ten, and in times of pressure, even three or four; the consequence was, he said, that the manufacturers of Normandy are under the necessity of preferring the Liverpool to the Marseilles market. The answer was that the cotton was taken much below the regular tariff, in order that the company might not be hurried in the delivery. The pecuniary importance of the guarantee which the Government has given to companies for the execution of secondary lines and embranchments was discussed with something like painful interest. No less than 33,000,000f will have to be paid for the guarantee of interest in 1866, and according to one honourable deputy, a sum of 470,000,000f in subventions, and an annual charge of 189,725,000f will have to be provided. But the correctness of the calculations by which he arrived at these results was disputed by M. de Franqueville in the name of the Government; and he estimated the guarantee at 33,000,000f to 35,000,000f for 1865, 34,000,000f for 1866 (the Government, however, only demands 33,000,000f) the same sum for 1867, 30,000,000f for each of the next two years, 44,000,000f for 1870, 46,000,000f for 1871, 48,000,000f for 1872; and for the next three years 46,000,000f, 40,000,000f, and 34,500,000f. M. de Franqueville, moreover, calculated that at the present moment the capital necessary to provide these annuities would not exceed 400,000,000f. But after all, there is so much uncertainty as to what the lines will produce, that all calculations of the guarantee are exceedingly vague; and this is proved by the fact that neither the Government nor the companies, nor any two disinterested persons present the same figures. In addition to the guarantee, the Government has to disburse 1,400,000,000f in subventions and works.

The Corps Legislatif having wasted much time at the beginning of the session, is under the necessity of postponing to next year various important measures. Among them are bills for abolishing tonnage and differential duties on foreign ships, and for allowing the import of foreign-built ships at 2f the ton, and of shipbuilding materials free of duty; the bill for raising money for extraordinary public works by means of a sale of forests; and a bill for throwing open to the public the calling of commercial (not stock) broker, which has hitherto been a close monopoly, and for indemnifying the present brokers.

The Bank of France has fixed the dividend for the first half of the present year at 78f. That of the first six months of 1864 was 95f; and of the same period of 1863, 80f.

The Bank of Belgium announces the payment, from the 1st of July, of 57f per share, to complete the dividend of 1864.

A petition to the Queen of Spain from the French holders of shares and bonds in the Spanish railways is being signed. It represents that they are "ruined by the incessant depreciation of their property," and that that depreciation has been caused by errors made by the engineers of the Spanish Government in calculating the expense of executing the lines, by the insufficiency of traffic, and by the decline which has taken place in the Spanish public funds. The petitioners estimate their losses at 360,000,000f on shares and 200,000,000f in debentures—total 560,000,000f, or 22,400,000*l*. They remind the Queen that the French Government, in addition to 1,400,000,000f of subventions, has accorded guarantees of interest to railway companies amounting to 190,000,000f; and that the Italian Government has guaranteed to Italian railways a minimum of revenue, which is equivalent to 5 or 6 per cent. They say that it is impossible for the Spanish Government not to take into consideration a state of things for which it is mainly responsible, and they pray for an augmentation of subvention, or a guarantee of interest or of revenue.

It was to be expected that the ingenious scheme of providing for the eventual repayment of capital risked in an enterprise, by means of an investment at compound interest, which was adopted in the last Mexican loan, would be imitated. A company calling itself the Magasins Reunis is advertising that to all purchasers of 100f (4*l*) of goods in its warehouses, it will give a debenture of that amount payable within a period not exceeding 59 years, and guaranteed by good securities in the Bank of France. It promises that the goods it sells shall be of fair quality, and not dearer than elsewhere; it undertakes to appropriate from its profits a sum sufficient to produce at compound interest the means of paying the bonds in the time specified—the said sums purchasing the aforesaid securities; and it calculates that its profits will be large because it proposes to unite different branches of business in one establishment, and thereby economise on the general expenses of retail dealers. What the public will think of this scheme,—a scheme under which the descendants of a man will get back all he spends, and will in fact be the richer the more he is extravagant,—remains to be seen; but it is regarded in certain official quarters as a novelty pregnant of good, and not only has it been adopted in the affair of the Mexican loan, but it has been lauded with enthusiasm in the official *Moniteur* itself,—the laudator being no less a personage than M. Dalloz, the director of that journal. Pity it is, however, that the efficacy of the plan cannot be demonstrated until all the men of this generation shall have passed away.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended June 30, 1865, compared with the corresponding periods of the preceding year.

COMMERCIAL AND MISCELLANEOUS NEWS.

Among the evidences of the growth of more moderate and just views relative to Reform, we may mention the address to the electors of Stafford, issued by Alderman Pochin, of Manchester. Mr Pochin desires to see such an extension of the franchise as would confer upon the more intelligent of the working classes a fair share of representative power; and as the best and most equitable means of arriving at that end, he proposes that twenty seats should be so bestowed as to place them in the command of constituencies belonging almost entirely to the working classes. Mr Pochin has always belonged to the more advanced Liberal section in Lancashire, and hence so distinct a statement of his views is significant of the change which is taking place among the thoughtful and intelligent men of the party.

During the week ending the 28th inst., the value of the bullion imported was:—Gold, 433,380*l*; silver, 14,096*l*. The exports were:—Gold, 127,767*l*; silver, 35,629*l*.

Annexed are the traffic returns of some of the American railways for May:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 28th day of June, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	30,072,985	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	15,422,985
		Silver Bullion	...
	30,072,985		30,072,985

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,480,025
Rest	3,231,009	Other Securities	22,036 075
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	10,487,984	Notes	8,947,140
Other Deposits	13,724,188	Gold and Silver Coin	984,681
Seven Day and other Bills	451,740		
	42,447,921		42,447,921

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,577.585	Securities	32 613.160
Public Deposits	10,487,984	Coin and Bullion	16.407.666
Private Deposits	13,724,188		
	45,789,757		49.020,766

Dated the 29th June 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,231,009*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£424,033
An INCREASE of Public Deposits of	906,691
An INCREASE of Other Deposits of	57,622
No change in Government Securities.	
An INCREASE of Other Securities of	1,285,730
An INCREASE of Bullion of	112,756
An INCREASE of Rest of	10,140
A DECREASE of Reserve of	308,634

The mercantile discount demand has trenched upon the reserve to the extent of 308,634*l*, notwithstanding an increase of near one million sterling in the amount of the Government and private deposits. There is an addition of 112,756*l* in the stock of coin and bullion held at the Bank.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,137,271	£ 22,242,361	£ 21,738,756	£ 21,153,606	£ 21,577 585
Public deposits	6,146,999	9,672,345	10,356,373	10,218,535	10 487 984
Other deposits	13 434,749	13,851,869	16,274,739	12,809,244	13,724,188
Government securities	12,896,068	11,083,251	11,050,279	11,122,267	10 480 025
Other securities	15,497,443	21,528 788	25,348,286	22,078,630	22,036 075

Bank rate of discount	3½ p. c.	3 p. c.	4 p. c.	6 p. c.	3 p.
Price of Consols	91¾	90¾ xd	92	90¼ xd	90 xd
Average price of wheat	75s 11d	55s 4d	46s 5d	39s 3d	41s 3d
Exchange on Paris (short)	25 7½ 12½	25 25 32½	25 20 30	25 15 22½	25 17½ 22½
— Amsterdam ditto	11 17½ 18½	11 16 16½	11 16 16½	11 17½ 17½	11 17½ 8
— Hamburg (3months)	13 7½ 8	13 8½ 8½	13 8½ 8½	13 8½ 9	13 9½ 9½

In the corresponding week of 1855 news had been received of an unsuccessful attack by the allies on the Malakoff, with a loss of 4,600 men in killed, wounded, and prisoners. Large reinforcements were being sent to the Crimea. Criminal proceedings had been instituted against Messrs Strahan, Paul, and Bates. The trade of the Southern States of America was in a very depressed state.

In 1862, incendiary fires had broken out at St Petersburg. Money in London was easy, and the extensive transmission of American securities to New York was leading to large remittances of gold to London.

Digitized by Google

In 1863, the diplomatic intercourse between the English Foreign Office and the Russian Government on the subject of Poland was causing much anxiety in London. Money was becoming rather easier, and large arrivals of gold were looked for.

In 1864, the Austro-Prussian fleet had put to sea from Cuxhaven. The Emperor of Austria had had an interview with the King of Prussia at Carlsbad. Hostilities had been recommenced in Denmark. News had been received of the death of King William I. of Wurtemburg. The new Sovereign, King Charles, had issued a cordial proclamation to the people. The Emperor Maximiliam, with the Empress, had arrived at Vera Cruz, in Mexico. In America, the Federal expedition under Shergiss had been defeated by Forrest, and General Shergiss killed. General Grant's whole army had moved to the south side of the James river. The amalgamation of the house of Messrs Glyn, Mills, and Co. with that of Messrs Curries and Co. had been effected. The demand for money was active.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an deficiency of 52.694*l*; in 1862, a deficiency of 7,676,919*l*; in 1863, a deficiency of 9,068,497*l*; and in 1864, a deficiency of 9,278,386*l*. In 1865, the deficiency is 8,311,887*l*.

Discount and Money Market.—Notwithstanding the large amount of the applications made during the week to the Bank, there is no greater activity in the open market where the rate is barely maintained at the Bank minimum of 3 per cent. The state of the general trade of the country, as evidenced in the Board of Trade returns just issued, accounts for the increasing abundance of money; and the position of the Bank of France is such as to justify the belief that in Paris, as well as in London, we shall within a short time see a still further decline in the value of money. The Stock Exchange settling, which took place to-day, failed to affect the general character of the market; and, although the business transacted was in excess of the ordinary amount, it was by no means of that nature that oftentimes characterises operations at the close of the half-year.

The following are the current terms for mercantile paper of various dates:—

30 to 60 days	3	per cent.
3 months	3	per cent.
4 months	3½	per cent
6 months—Bank bills	4	per cent.
6 months—Trade ditto	4½	per cent.

In the Stock Exchange there has been little more than the usual demand for money, which on Government securities from day to day commanded about 3⅛ per cent.

The allowance for deposit at the joint stock banks and discount houses is as follows:—

Joint Stock Banks	*2	per cent.
Discount houses at call	2	per cent.
Do. with seven days' notice	2½	per cent.
Do. fourteen days	2½	per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*.

Bullion.—No transactions are reported at the Bank.

The following are the rates of discount in the chief continental cities:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4½ 5
Brussels	3	3
Madrid	8	...
Hamburg	...	2½
St Petersburg	5½	5

The Bank of France return of this week is favourable, as showing additional activity in business as well as increasing resources.

Increase.	£
Cash	610,000
Commercial bills	1,670,000
Advances	60,000
Notes	184,000
Treasury balance	1,560,000
Current accounts	736,000

English Government Funds.—The same absence of business with a total want of animation characterises the markets. Consols have fluctuated very slightly during the week, and, after touching 89⅞, advanced to 90. The operations of the Government broker caused a momentary rally; but in face of the impending dull season, it was not maintained. To-day little business has been transacted, and Consols close at 90 to 90⅛ for money and 6th July account. New 3 per Cents. and Reduced, 89 to 89¼. India 5 per Cents., 104 to 104½.

Exchequer Bills.—There is little business doing. The closing quotations are, for March, 2s to 5s; June, par to 5s prem.; India bonds, 17s to 21s.

Foreign Stocks.—There has been less business than usual in this department, where even low-priced dividend-paying stocks are for the moment almost neglected. Mexican Three per Cents. have receded about ¾ per cent. on adverse rumours concerning the state of politics and the probability of a termination of the Imperial occupation. There is, however, no good reason for these vague ideas. The regulation of a State so thoroughly disorganised as that of Mexico must of necessity be a work of time. Spanish stocks have also attracted much attention. The change of Government has given rise to many speculative opinions as to the course it will adopt on the subject of the outstanding debts. It is strongly to be hoped that measures will be taken to settle speedily, and on a satisfactory basis, with the Passive and Certificate holders, whose position is not only unsatisfactory, but damaging to the Government itself. Danubian stock has declined still further, and most securities close dull. The closing quotations of stocks dealt in to-day are subjoined:—7 per Cent. Egyptian, 95½ to 96½; ditto, 1864, 93½ to 94. 3 per Cent. Mexican, 25¼ to 25½. 6 per Cent. Monte Videan, 65. 3 per Cent. Russian, 1859, 55½ to 56½; 5 per Cent. ditto, 1862, 90½ to 91½. 3 per Cent. Spanish, 48¾ to 49¼; ditto Deferred, 40¾ to 41¼; ditto Passive, 30⅛ to 30⅜; ditto Certificates, 14⅞ to 15⅛. 6 per Cent Turkish, 1854, 93 to 94; ditto, 1858, 73 to 74; ditto, 1862, 73½ to 74½; 5 per Cent. ditto, 1865, 45 to 46. 6 per Cent. Venezuela, 1862, 38 to 40. 5 per Cent. Italian, 65¾ to 66¼.

The closing price of French 3 per Cent. rentes is telegraphed from Paris this evening, 66.65 for money, and 66.60 for July account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

Railways and Other Shares.—The markets have been dull, and have shown little of the animation usual at this period of the year. There are no special features, and, except the heavy decline in Chatham "A" stock, there is nothing of importance to report. Prices, generally, have been moderately steady, and a slight improvement is in some cases to be noted on those of the previous week. Caledonian stock is ½ per cent. lower. Great Eastern ½ per cent. higher. Great Northern 2 per cent. lower. Great Western ¾ per cent. lower. Lancashire and Yorkshire ¼ per cent. higher. London, Chatham, and Dover ½ per cent. lower. London and South-Western ¾ per cent. higher. Metropolitan stock ½ per cent. higher. South-Eastern ½ per cent. higher.

In foreign shares the only feature is the continued rise in Luxembourgs, which have improved to 14¼ to 14½.

The Chamberlain of the city of London has given notice of the proposed second issue of 200,000*l*, out of the 600,000*l* City Debenture bonds, for effecting the improvements authorised by the Holborn Valley Improvement Act of 1864. The bonds are to be issued at par for sums of 1,000*l*, 500*l*, and 100*l* each, for periods of not less than 11 years or more than 18 years, and bearing interest at the rate of 4*l* 10s per cent. per annum. The primary security provided by Parliament is the net produce of the City's duty of 4d per ton on coals brought into London, continued until the 5th July, 1882.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, is 250,000*l*.

The Committee of the Stock Exchange have appointed Monday, the 3rd July, a special settling day in the shares of the Dagenham (Thames) Dock Company, which are not to be marked at present.

American securities are rather lower, owing to the advance reported in the price of gold at New York.

The financial companies share are mostly lower.

Joint stock bank shares continue firm.

FOREIGN EXCHANGES.—The rates are rather higher than on last Friday.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Further large amounts of gold from America have come to hand during the past few days; the arrivals during the week from the States and elsewhere, as mentioned below, being very important. The demand for abroad has been active enough to absorb the entire quantity, and, with the exception of 67,000*l* purchased by the Bank of England, the whole has been sent away. The Helvetia has brought 31,000*l* from New York; the Teutonia has brought 32,000*l* from New York; the Persia has brought 178,500*l* from New York: the Pennsylvania has brought 20,000*l* from New York; the New York has brought 32,000*l* from New York; the City of Washington has brought 105,500*l* from New York; the City of Cork has brought 20,000*l* from New York; the North American has brought 15,500*l* from Quebec; the Robert Henderson has brought 24,000*l* from Otago; the Royal Standard has brought 72,500*l* from Melbourne; the Seine has brought 143,000*l* from the West Indies; making a total of 674,000*l*. The Messageries steamer has taken 55,000 sovereigns to Alexandria; these were withdrawn from the Bank.

Silver.—The Seine has brought about 160,000*l* from the West Indies, the Doré portion of which has been sold at 61d per oz standard, showing a slight rise, equivalent to 60¾d per oz standard for fine; the fine bars by the packet have, however, not yet been placed.

Mexican Dollars.—The Seine has brought about 50,000*l* from the West Indies; these have not yet been sold; the nearest quotation we can give as to price is 59¼d per oz, with a quiet market.

Exchange on India is again much higher, and Council drafts allotted last week at 1s 11d to 1s 11¼d have been re-sold at 2s 0¼d per rupee. Banks' drafts at 60 days' sight may be quoted 1s 11½d to 2s on Bombay, Calcutta, and Madras. A continuance of these rates will probably cause a demand for bar silver, which at present quotations can be laid down in India at 1s 11¾d per rupee.

India Government loan notes are rather dearer in price, and may be quoted 108 to 110 for 5½ per Cents., 101 to 103 for 5 per Cents., and 89 to 91 for 4 per Cents. The improvement has been caused by the renewal of the demand for India.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d to 5s 0¾d per oz std, last price, nearest; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 4s 11¼d per oz, nearest; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A meeting of the creditors of Messrs Woodhouse, Kenrich, and Co., East India merchants, who failed on the 27th of May, took place on the 23rd ult. The statement of affairs showed liabilities amounting to 259,460*l*, and assets 253,932*l*. It was unanimously resolved to liquidate the affairs of the house under inspection.

Messrs Ernst Brothers, silk agents, of Falcon street, City, have stopped payment. Their liabilities are estimated at about 15,000*l*.

The meeting of the Ottoman Bank (in liquidation) took place on Monday last, when the report was adopted. The balance as stated will allow of a third and final distribution of 15s per share on the old shares, and 1s 6d per share on the shares of the second issue of the late bank; making a total distribution of 5*l* 5s on the former, and 10s 6d on the latter, besides the repayment of the whole of the company's capital.

Petitions for the winding up of the Land Credit Company of Ireland (Limited), the London and Paris Hotel Company (Limited), and the Patent Carriage Company (Limited), are to be heard before the Master of the Rolls on Saturday, 1st July.

Creditors of the London and Scottish Bank (Limited) are required to send the particulars of their claims to the official liquidator by the 1st August, the 3rd November having been appointed for adjudicating upon them.

Creditors of the Brighton Brewery Company (Limited) are required to lodge their claims with the official liquidator by the 17th July, the 1st August having been appointed for the hearing.

Vice-Chancellor Kindersley proposes, on the 30th inst., to appoint an official liquidator of the Aberaman Iron Works Company (Limited).

The Master of the Rolls has appointed Mr George Scott official liquidator for winding up the affairs of the Constantinople and Alexandria Hotels Company (Limited).

The Metropolitan Ice Company (Limited) is to be wound up, and the Master of the Rolls has appointed Mr J. F. Lovering, accountant, of King street, Cheapside, the official liquidator.

The Master of the Rolls has appointed Mr Edwin Waterhouse, official liquidator to the British Ice-making Company (Limited).

Advices from Manchester mention the failure of Messrs Thomas Moore and Sons, iron merchants, with liabilities for about 30,000*l*. It is expected that the liquidation will prove favourable.

Vice-Chancellor Sir Wm. Page Wood has appointed Mr H. T. Edwards official liquidator of the Ryde Quay Company (Limited).

PUBLIC COMPANIES.—At the annual meeting of the Imperial Ottoman Bank, held on Monday last, the directors' report was unanimously adopted. It stated the gross profit for the twelve months at 336,992*l*. A dividend of 1*l* per share was declared, making, with the 10s paid in January last, a total distribution at the rate of 15 per cent. for the year.

The half-yearly meeting of the Oriental Inland Steam Company took place on Tuesday last, when the directors' report was adopted. The chairman stated that the net profit was 2,500*l*, and that the company's operations showed steady progress.

A general meeting of the Hudson's Bay Company was held on Tuesday last. The report was unanimously adopted, and a dividend of 10s per share declared, in addition to the distribution of 8s made in January last.

It is announced that a dividend of 1s 4d per share, or at the rate of 10 per cent. per annum, for the eight months ending the 30th inst., will be payable on the A shares of the Northern Assam Tea Company (Limited) on the 1st July.

An extraordinary meeting of the Malta and Mediterranean Gas Company took place on Wednesday. A dividend was declared at the rate of 2½ per cent. per annum free of income tax.

Digitized by Google

The directors of the British and Foreign Marine Insurance Company (Limited) have declared a dividend out of the interest on investments for the half-year at the rate of 10 per cent. per annum, free of income tax, payable on the 13th of July.

It is announced that an interim dividend at the rate of 10 per cent. per annum for the half-year ending the 30th inst., will be payable on and after the 1st July, on the shares of the Baugparah Tea Estates Company of Assam.

At the ordinary general meeting of the British Nation Fire Insurance Company (Limited), held on Wednesday last, the report was adopted. The annual income of the company was stated to amount to 11,758*l* 16s 5d. A dividend was declared at the rate of 5 per cent. per annum, on the paid-up capital to the 31st March last.

At the half-yearly meeting of the Canada Company, held on Thursday, a dividend of 15s per share was declared.

The second ordinary general meeting of the Public Works Credit Company was held on Thursday last. The directors' report, which was adopted, stated that the whole of the preliminary expenses had been written off; and it recommended, in addition to a dividend of 10 per cent., to give a bonus of 1*l* per share to the shares first issued, and to carry a considerable balance to the next account.

At the annual meeting of the Marine Insurance Company, held on Thursday, a dividend of 1*l* per share, and a bonus of 7*l* per share, payable on the 10th July, free of income tax, were declared. 20,000*l* was carried to the reserve fund, which now reaches 370,000*l*.

The Directors of the London, Windsor, and Greenwich Hotels Company—the capital of which undertaking is 500,000*l* in 25*l* shares—propose the purchase of certain old-established hotels in London, Windsor, and Greenwich, and the transaction of their business by one management. The purchase money of the whole of the properties—viz., the Trafalgar, the Ship, and the Yacht, at Greenwich; the Castle, and the White Hart, Windsor; and Radley's Hotel, Bridge street, Blackfriars—is 185,000*l*. Most of these hotels have for many years transacted a large and profitable business.

A prospectus has been issued of the Dalbeattie and Kirkconnel Granite Company, with a capital of 120,000*l* in 12,000 shares of 10*l* each. It has been formed for extending the workings of certain quarries in Kirkcudbright, the granite procured from which has been selected by the Board of Works for the construction of the Thames embankment. Several public works, both here and abroad, have also been constructed of the same material.

The Austin Consolidated Silver Mines Company, with a capital of 100,000*l* in 20,000 shares of 5*l* each, has been started with the object of purchasing several mining properties in California. These mines, which are situated near Austin, the chief city of the Reese river district of Nevada, yield about 200 ounces per ton of quartz.

Barned's Banking Company, capital 2,000,000*l* in 40,000 shares of 50*l* each, has been formed for purchasing the business of Messrs Barned and Co., Liverpool, and for carrying it on by means of a joint stock company. The bank was formed in 1809, and the purchase-money has been fixed at 160,000*l*.

The directors of the United Service Company propose to undertake and transact the business of agents and bankers to the army, navy, and civil service in England, India, and the Colonies. They have entered into and conditionally completed negotiations with an established firm carrying on the banking and agency business in India, with the object of its transfer to the Company, on advantageous terms, so that when sufficient capital shall have been subscribed, the directors will be in a position to commence operations without delay. The capital of the undertaking is 500,000*l* in 50,000 shares of 10*l* each.

MISCELLANEOUS.—The General Credit Company are in receipt of the following advices relative to the Venezuela 6 per Cent. loan of 1864:—Duties collected on account of the above loan per statement No. 43, from Puerto Cabello, 3,971.99 dols; ditto No. 44, ditto, 4,244.40 dols; ditto, No. 32, from La Guayra, 8,833.20 dols; ditto No. 33, ditto, 16,111.60 dols;—total, 33,161.19 dols.

The mail from Guayaquil has brought a remittance of 175*l* 17s 4d on account of the dividends on the debt of Ecuador.

Messrs Baring Brothers have received by this mail, on account of New Granada dividends, the following remittances, viz., from the Custom-house of Cartagena, 560*l*; of Santa Marta, 3,000*l*; and of Rio Hacha, 184*l* 11s 7d;—total 3,744*l* 11s 7d.

The London Financial Association are about to offer for sale by public tender 130,000*l* preference stock of the Kettering, Thrapston, and Huntingdon Railway Company. The stock will bear interest at the rate of 5 per cent. per annum, payable half-yearly. The total share capital of the company is 230,000*l*.

The English Joint Stock Bank have taken over the Bideford Bank, which was established in 1844, and consisted of four partners, one of whom (Mr Yelland) remains as manager of the branch.

The subscription list of Barned's Banking Company will be closed on Tuesday next, 4th July, at four o'clock.

The Southern Insurance Company, one of the leading companies in the colony of Victoria, has opened an office at 2 Moorgate street, under the management of a board of London directors.

The Hop and Malt Exchange and Warehouse Company (Limited) propose to construct buildings in Southwark for the accommodation of those engaged in the hop nnd malt trades. The capital is 120,000*l*, in 12,000 shares of 10*l* each. During the construction of the buildings, interest at the rate of 6 per cent. per annum will be paid on the amount realised.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per *l.* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 110⅛ per cent. At this rate there is a small profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was small. The trade, however, was by no means active; nevertheless, it presented a steady appearance, and Monday's improvement in prices was supported. About an average business was transacted in foreign wheat, at full currencies. Barley—the supply of which on sale was limited—moved off steadily at quite previous rates. Oats, owing to the large importation, were decidedly less active, and, in some instances, were rather lower in price as compared with Monday. Flour was in fair average request, and prices ruled firm. This week's imports amount to 13,950 quarters of wheat, 1,520 barley, 42,140 oats, and 840 sacks of flour.

The trade for wheat and flour at Liverpool, this morning, was firm, on higher terms. Maize, however, was a dull inquiry. At Wakefield, wheat was 1s per quarter dearer than on Friday last.

On Friday last the Liverpool cotton market, after the excitement of the day before, opened with a quieter tone, and prices were barely maintained. On Saturday and Monday the demand revived, and prices advanced ⅛d to ¼d. On Tuesday, the Manchester market not responding to the activity in the Liverpool, the market became again quieter; and on Wednesday, through the desire of some holders to realise, prices declined from ⅛d to ¼d in Surats to 1⅛d in floating Egyptians. Yesterday and to-day the demand was on a narrow scale, at declining rates, the sales to-day amounting to but 5,000 bales.

We have intelligence from Alexandria to June 26. At that date, the cotton trade was very firm, at enhanced rates—fair open-ginned produce being quoted at 18d; fully fair ditto, 19½d per lb, free on board. During the week ending June 17, a good business was transacted in cotton, at advancing prices. Fair open-ginned qualities realised 15¾d; fully fair ditto, 16d per lb, free on board. The arrivals from June 6 to June 17 amounted to only 8,220 bales, whilst the sales during the same period reached 18,888 bales.

Business in colonial and foreign grocery produce in Mincing lane continues limited, and is chiefly confined to the immediate wants of buyers. Cocoa has chiefly commanded attention, and at the public sales held during the week has changed hands at higher prices. Plantation Ceylon coffee, owing to the very limited supply in first hands, has been disposed of at the extreme rates of last week. Raw sugar is somewhat easier in price; but most other articles have supported previous quotations. Last week, duty was paid in London on 1,213,042 lbs of tea, whilst the export, for the week ending June 22, amounted to 445,570 lbs, making a total of 1,658,612, against 1,942,961 lbs last year.

The sugar trade at Havana, in May, was very active, and an advance of fully ¼ real took place in prices. The rates current on the 6th of June, according to Messrs Morales and Co.'s circular, were as follows:—Cucuruchos, Dutch numbers, Nos. 8 to 10, 20s to 21s 2d; ordinary yellows, ditto, 11 to 12, 21s 9d; middling, ditto, 13 to 14, 22s 4d to 22s 11d; fine, ditto, 15 to 16, 24s 1d to 24s 8d; florete, ditto, 17 to 19, 25s 10d to 28s 2d; ordinary whites, 27s to 28s 2d; middling, ditto, 29s 4d to 30s 6d; fine and florete, ditto, 31s 8d to 35s 1d; crystallised, No. 15 to 16, 22s 11d to 24s 8d; ditto, 17 to 20, 25s 3d to 25s 10d; muscovadoes, fair to good refining, at outports, 17s 6d to 19s 3d per cwt, free on board.

EXPORTS of SUGAR from Havana, Matanzas, and Cardemas, from Jan. 1 to May 31.

Digitized by Google

The public sales of colonial wool were brought to a close on Saturday last. The catalogues contained 160,516 bales, consisting of 22,864 bales from New South Wales and Queensland, 68,305 Victoria, 4,351 Tasmania, 25,779 South Australia, 2,439 Western Australia, 21,985 Cape, and 1,092 bales from sundry ports. At the opening sales—owing to the large quantity of wool in the market—nearly all descriptions—good and fine Sydney and Cape fleeces forming the only exceptions—changed hands at a decline in prices, as compared with the close of the previous series, varying from ½d to 1½d per lb. The reductions in the Bank rate of discount, however, subsequently induced home buyers to operate with more freedom, whilst the export demand for France, Belgium, and Germany, but chiefly for the former country, materially improved. The last three weeks of the sale were consequently characterised by a fair amount of activity, and by a higher range of prices, the closing quotations being quite equal to those current at the close of last sales, as regards all good and fine Cape and Australian wools, but faulty produce exhibited a fall in value, as compared with the same period, of ½d to 1d per lb. The transactions of export buyers were very large, and comprised about one-half of the supply offered, or about 70,000 bales. The next series of public sales will not be commenced before the 17th proximo: the supply at present consists of about 67,000 to 70,000 bales. As regards the quality and condition of the wool brought forward, Messrs Hazard and Caldecott observe:—"Port Philip wool brought forward was chiefly well grown, in fair condition, but many flocks were very full of burrs and grass seeds; on the whole, wool from this colony was not so long grown as last season. Sydney—A large proportion of this description was, as has lately been the case, much spoilt by grass seeds. Van Dieman's Land was also much infested with shives, including some of the best Launceston flocks; the condition of the wool from this colony has certainly been below the average of last year. New Zealand was of good growth, and continues to show improvement in condition. Cape of Good Hope, mostly from the Eastern province, was in ordinary condition and quality."

In the English wool trade, there has been rather less activity this week; nevertheless, the late improvement in prices is supported. Hemp is steady, at full quotations. For flax, the market is very firm, and prices are on the advance.

The metal trade has ruled quiet. Scotch pig iron has sold at 55*l* cash, mixed numbers; Banca tin at 95*l* 10s, and spelter at 22*l* to 22*l* 5s per ton. Fish oils have met a slow sale, at barely late rates, but most other descriptions have changed hands at full currencies. In tallow, a good business has been transacted, and P.Y.C., which has sold as high as 42s, is now quoted at 41s 9d per cwt on the spot.

The amount of business transacted in cotton goods at New York during the week ending June 17 was very moderate. The decision of President Johnson to abolish the tax of 25 per cent. on cotton sales had had very little effect on the market, and prices of most descriptions of goods ruled stationary. For wool and woollen goods the trade was quiet on former terms. Silk goods, however, continued very firm, and realised extreme rates. Grocery produce was in fair average request at full currencies; but in breadstuffs, beyond the immediate wants of home buyers, scarcely any business was transacted. The supplies of naval stores, however, on sale had increased, and a fair demand prevailed for most descriptions at full prices. The receipts of turpentine, since Jan. 1, had been 1,043 barrels, against 348 barrels; of rosin, 26,492 barrels, against 6,592 barrels; and of tar, 4,681 barrels, against 10,928 barrels last year. The shipments of petroleum from all ports in the United States, from Jan. 1 to June 10, amounted to 4,600,555 gallons, against 10,699,704 gallons last year, and 16,611,133 gallons in 1863. In the market for gold, there had been considerable excitement, and the quotation had been forced up to 147¾; but it subsequently fell to 143¾ per cent., which was the closing price of the week. The leading items in the return of the banks, for the week ending June 10, were:—Loans, 41,678,530*l*; deposits, 37,102,000*l*; specie, 3,696,130*l*; circulation, 1,080,550*l*. The balance in the Sub-Treasury on the 10th ult. was 8,582,620*l*. The shipments of specie, for the week ending June 10, were 414,060*l*, making a total, since Jan. 1, of 3,102,910*l*, against 5,125,040*l* last year, 3,935,140*l* in 1863, 3,951,800*l* in 1862, 601,170*l* in 1861, and 3,180,660*l* in 1860. The total imports of dry goods and general merchandise, from Jan. 1 to June 10, were valued at 13,479,460*l*, against 23,028,740*l* in 1864, and 16,672,090*l* in 1863—the value of the import of dry goods for the last week being 242,610*l*, against 82,050*l* in the preceding week, and 226,390*l* in the corresponding week last year. The following is the official statement of the extent of the public debt on March 31 and May 31, current year. The calculations are made at the rate of 4s the dollar:—

	March 31, 1865.		May 31, 1865.
	£		£
Debt bearing interest in coin	220,072,250	...	221,622,770

Debt on which interest has ceased	69,884	...	157,354
Debt bearing no interest	103,037,860	...	94,565,860
Total	473,291,024	...	527,041,264

THE COTTON TRADE.

LIVERPOOL—June 30.

The market became more animated on Saturday, after receipt of advices, per Persia, of higher prices in New York, and a large business was transacted on Monday and Tuesday at advancing rates. On Wednesday, upon accounts, per City of Washington, relieving the apprehensions of heavy restrictions on the export of cotton, and also a quieter tone in Manchester, the demand became very limited, and prices in most instances were irregular and lower, the week closing yesterday quietly, and abundantly supplied at the above quotations. For Sea Island, there is a fair inquiry, without change in value. American was in great request in the early part of the week, and continues in good demand at about ¼d to ½d advance. In Brazil, very large transactions took place up to Wednesday at an advance of 1½d per lb, the whole of the rise has since been lost, the market being freely supplied. An active demand for Egyptian occurred early in the week, and prices advanced considerably; but since cotton has been pressed for sale, and quotations are reduced 1d to 1½d from those of last week. Smyrna, after an advance of fully 1d per lb, has relapsed to last week's quotations. East India has been in good demand and advanced ½d, but closes with very little variation from last week. In China and Japan a large business has been done, and prices improved with the general tone of the market, but close only about ¼d per lb above former quotations.

To arrive, purchases to a considerable extent have been made on terms following the currency of the market. The latest quotations being on Wednesday, Pernam, fair average, ex quay, 19½d, first quality, in the river, 19d; Maceio, fair average, at sea, 17½d; Egyptian, open, fair, ship named 18¼d to 18½d; Comptah, guaranteed fair, ex quay, 13½d; Oomrawuttee, fair new native, May sailing, 13½d; and yesterday, Egyptian, open, fair, ship named, 18⅝d.

The sales of the week amount to 68,900 bales, including 28,030 on speculation, and 14,360 declared for export, leaving 26,510 bales to the trade. The sales to-day about 5,000 bales. The actual stock in the port, declared this day, proves 31,100 bales above the estimate, 39,000 being in East India and 2,000 in China and Japan, whilst there is a decrease of about 10,000 in American and the long-stapled descriptions.

LONDON—JUNE 30.

The market opened on Friday with a quieter tone and easier prices; on Saturday there was a slightly improved demand, followed by a strong market on Monday, when an advance of ½d per lb was obtained on most descriptions. On Tuesday there was a pause, and buyers have since shown little disposition to operate, even at a decline of ½d to 1d per lb from the late highest point, present quotations showing a fall of ¼d to ½d on those of Friday last. In the first half of the week there was a fair inquiry for cotton afloat, at advancing rates, but during the last few days there have not been any buyers.

NEW YORK—JUNE 17.

The cotton trade has ruled firm, and prices, to-day, are without material change from last week, middling Upland produce being quoted at 41 cents per lb. In the early part of the week, a few sales of middling Upland were made at 42 cents per lb. The week's transactions are estimated at 6,500 bales. The receipts amount to 8,527 bales, chiefly from New Orleans and by railroad, thus raising the import since Sept. 1 to 236,257 bales. The prices current are as follows:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	27	27	27	27

Freight to Liverpool, 3.16d to ¼d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a full average business doing in goods in most of the leading markets held this week, and the quotations generally have been well supported, the iron trade having ruled tolerably firm. The export demand for coals has continued steady.

MANCHESTER, June 29.—In the early portion of this week prices were impelled higher by the cotton market, but no response whatever was made here by buyers, and the business of Monday and Tuesday was exceedingly limited. On Wednesday morning the proclamation of President Johnson, removing restrictions on the sale of cotton, caused all buyers hastily to disappear, and prices have since been sliding down from the late highest quotations without resulting in any transactions. With the single exception of India goods and yarns, stocks are not heavy, and producers are well supplied with the raw material.

BRADFORD.—Business in wool is quieter, and our market is comparatively flat. The upward tendency in price is also checked. Yarns—Spinners are very busy with contracts recently entered into, but are taking very few new orders. The operations of both home and foreign buyers are characterised by caution. A like cautious policy is observable in piece goods.

HUDDERSFIELD.—Business has been chiefly confined to low goods, together with black doeskins, woollen cords, and middle-priced fancy trouserings. There has not been much doing in better class fancy goods. Manufacturers continue to buy freely from the new wools in the hands of local staplers.

LEEDS.—The markets in the cloth halls have not been characterised by much activity, the attendance of buyers being rather limited, and their operations not being extensive in any particular kind of goods. Plain cloths of good make are in fair demand, and thick goods for Canada and the United States are moving off, so that there is little or no accommodation going on either in the halls or in the hands of the manufacturers.

ROCHDALE.—Both in the plain and fancy department sales were effected without difficulty, and to a fair extent. There was more inquiry for the superior kinds of Yorkshire goods, which fetch extreme prices, but woollens of a lower class are rather a drug in the market, and prices are by no means firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 17.—Full average supplies of flour have come to hand, and in the absence of any extensive export demand, the flour trade has ruled heavy, on easier terms. In wheat, a fair business has been transacted at about previous rates. The market for corn has been tolerably active at full currencies. The following are the prices current:—Flour—State, superfine brands, $5.70 to $6.10; State, extra brands, $6.35 to $6.50; State, choice brands, $6.55 to $6.75; Ohio, common brands, $7 to $7.15; Ohio, fancy brands, $7.20 to $7.25; Ohio, good and choice extra brands, $7.30 to $8.75; Michigan, Indiana, Wisconsin, &c., $5.70 to $6.85; Genesee, extra brands, $6.80 to $9.50; Missouri, $8.40 to $12; Canada, common, $6.40 to $6.75; Canada, good to choice extra, $6.80 to $8.60 per barrel. Wheat—Winter red Western, $1.65; white Michigan, $1.87½. Corn—New, mixed, Western, 85c to 88c; white, ditto, 90c to 95c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land carriage, have been very limited, but in full average condition. The show of samples having been small, factors have been very firm in their demands, and, in some instances, prices have advanced 1s per quarter. The imports of

Digitized by Google

foreign wheat have been only moderate. Really fine parcels have produced 1s per quarter more money. In the value of other kinds, no quotable change has taken place. The few parcels of barley on offer have been taken off at 1s per quarter above last week's currency. There has been an improved demand for malt. In prices, however, very little change has taken place. The oat trade has been somewhat active, at 1s to 1s 6d per quarter more money. The imports of oats from the continent have been moderately extensive. The few beans on offer have been disposed of at very full prices. The sale for peas has ruled steady, at late rates. The demand for flour has improved, and the quotations have had an upward tendency.

The crops generally continue to progress steadily, and the fine rains of the present week have had a most beneficial effect upon them. In the neighbourhood of London nearly the whole of the crop of hay has been secured in fine condition; but the pastures are now very bare of grass.

The continental markets have been very fine for wheat on rather higher terms. All spring corn has continued very firm in price. The value of both wheat and flour in America still rules very high.

In Scotland, wheat, barley, and oats have produced rather more money, with a steady inquiry. Harvest-work is expected to be commenced much earlier than usual. The potato crop is looking splendid.

The Irish markets have been firm for most kinds of produce, and prices have favoured holders.

The small supply or English wheat on sale at Mark lane, to-day, was taken off at the prices of Monday, and the market presented a steady appearance. In foreign wheat, a moderate business was transacted, and prices ruled firm. Barley sold steadily at full currencies; but in the trade for oats there was much less activity, and prices had a drooping tendency. Beans and peas ruled firm, at full currencies. Flour was in fair demand, at quite previous rates.

Mr George Dornbusch reports the arrival off coast of 43 cargoes of grain, chiefly wheat, maize, and barley. On the whole, a steady business has been transacted in floating cargoes, at full prices. Cotton has realised 7*l* 5s to 7*l* 12s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The trade has latterly shown more disposition to buy, and a fair extent of business has been done at firm rates; many holders refuse to sell unless at advanced prices. The transactions in West India have been large, the purchases of the three days, ending yesterday, being 2,632 casks, including, by auction, Barbadoes at 30s to 35s 6d, and crystallised Berbice at 32s 6d to 40s 6d per cwt. Some inquiry has been experienced for floating cargoes for the Continent. The deliveries last week were 4,826 tons, against 4,216 tons in 1864.

Mauritius.—Only about 1,000 bags brown sirops have been disposed of at 29s 6d to 30s 6d per cwt.

Bengal.—At auction, 2,966 bags mostly found buyers; soft brown Khaur realising 25s to 25s 6d; some Gurpattah date was bought in at 32s 6d to 34s 6d per cwt. Privately, a few lots of the latter description have brought 33s 9d per cwt.

Foreign.—On the spot the transactions have been limited to 120 casks Cuba, at 30s 3d. Afloat numerous cargoes have been taken off, the sales amounting to ten cargoes: 1 Havana, No. 12½, at 25s 6d, for the United Kingdom; 5 Cuba muscovada, at 21s 6d to 22s, for the United Kingdom; two ditto at 21s 9d and 22s 3d for France; and two brown Brazil, at 20s 6d, the United Kingdom.

Refined is still rather difficult to sell, and for stoved goods prices are again lower, common quality having sold at 42s 6d per cwt.

MOLASSES.—About 350 casks West India have found buyers at 15s to 16s, being previous rates,

RUM is without alteration. 350 casks West India sold: Leewards at 1s 6½d, Demerara 1s 7d, and Jamaica 3s 9d; also a few casks Penang at 1s 5½d per gallon.

COFFEE.—Supplies in importers' hands being nearly exhausted, the public sales this week have been light; the tone of the market is still very firm, and full quotations have been realised for the small parcels offered. A few lots of plantation Ceylon in auction brought 84s for middling; 220 casks 899 bags native have realised 67s 6d to 69s for good ordinary small to fine ordinary, and 70s 6d for fine bold. 80 bales mixed Alexandria Mocha sold at 92s 6d to 93s 6d, and 3,457 bags Costa Rica at 75s 6d to 84s for fine ordinary to fine.

COCOA.—Trinidad continues to meet a steady sale, other descriptions remain dull. Of 1,599 bags Trinidad in public sale, the bulk was disposed of at 56s to 84s 6d for ordinary grey to fine red; superior, 106s. 134 bags Grenada part sold at 64s for fine. 35 bags Surinam and 31 bags Dominica were bought in.

RICE.—Market firm but quiet. On the spot the sales have not exceeded 7,000 bags, principally soft grain, at 9s to 9s 9d; a little good old white Bengal, 14s per cwt. For arrival, a cargo of Rangoon is reported at 10s 9d for the Continent, or 11s 6d for the United Kingdom.

IMPORTS and DELIVERIES of RICE to June 24, with STOCKS on hand.

TEA.—The only feature to notice is the public sales of Indian growth, which went off with good spirit at extreme rates. In China sorts there is scarcely anything passing.

SPICES.—The market for all descriptions is inactive. 210 bags pimento sold rather cheaper at 2⅜d to 2⅝d for common to good middling. Black pepper sells slowly: 500 bags Penang have sold at 3d, and 500 bags Singapore at 3⅛d to 3¼d per lb. White is a shade cheaper: 501 bags common dingy Penang sold at 5d to 5⅛d; 50 bags Singapore were bought in at 5½d. 250 bags good Zanzibar cloves have sold at 3¼d, being easier. 181 bales Jamaica ginger realised 61s to 97s; 198 bags African were bought in at 38s; 250 bags Bengal are reported at 24s 6d.

SALTPETRE.—Very flat, and no sales have occurred.

IMPORTS and DELIVERIES of SALTPETRE to June 24, with STOCKS on hand.

GUMS.—A few lots of ordinary animi have realised 5*l*; 413 boxes Singapore copal were held at 35s; and 355 cases Manilla at 34s to 37s per cwt.

SHELLAC.—About 450 chests have been offered, but only a portion sold: reddish orange, 4*l* 7s 6d; lemony orange, 5*l* 5s to 5*l* 7s 6d.

GAMBIER.—A parcel of 400 bales bales common quality, in public sale, was bought in at 22s per cwt.

RHUBARB.—100 boxes China sold: flat, 3s 2d to 4s 10d; round, 3s 1d 4s 9d per lb.

OILS.—Olive is firm at 49*l* to 49*l* 10s, for Mogadore; 51*l* for Seville, and 54*l* for Gallipoli. Palm is scarce, and has risen to 37s 6d. Tranactions in cocoa-nut have been limited to a small parcel, Cochin at 44s 6d. Linseed dull at 33s 3d to 33s 6d. Rape sells readily at 42s to 42s 6d for brown, and 45s to 46s 6d for refined.

TALLOW.—Market firm, at 41s 9d on the spot. The principal feature has been the large business done for the last three months' delivery, about 2,000 tons having changed hands at 43s per cwt.

PARTICULARS OF TALLOW.—Monday, June 19, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes firmly, at previous rates. 840 casks West India were sold to-day, making the week's transactions 3,472 casks. 2,775 bags Mauritius, in auction, realised 35s to 38s 6d for low to fine semi-grainy. Privately, 500 tons muscovado Manilla, on the spot, at 26s 6d, and 4,000 bags clayed, at 29s 6d to 30s per cwt. Afloat a cargo of Cuba has sold for France at 22s 3d; two of brown Maroim at 21s, two of Cuba at 21s 9d, one of grainy Havana at 25s, for the United Kingdom; and one of Porto Rico at 23s for a near port.

COFFEE.—A floating cargo of St Domingo has been taken for a near port at 63s 6d, insured free of 10 per cent.

COCOA.—280 bags Trinidad brought 55s 6d to 91s 6d. 280 bags St Lucia were withdrawn at 41s 6d per cwt.

PIMENTO is rather cheaper: 586 bags part sold at 2¼d to 2⅝d per lb.

NUTMEGS.—62 cases Penang went at 11d to 2s 3d for small to fine bold.

SHELLAC.—237 chests sold at 5s to 10s decline; orange 4*l* 15s to 5*l* 2s 6d; garnet, 82s to 87s; and blood button, 63s to 97s per cwt.

RICE.—2,500 bags soft grain at 9s 9d to 9s 10½d per cwt.

TALLOW.—Petersburg on the spot 41s 9d, and last three months' delivery, 41s 9d to 43s per cwt. 720 casks Australian in public sale sold at 42s for sheep, and 39s 6d to 40s for beef.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues dull. A moderate business doing. In Holland there has been various sales made for forward delivery at rather better prices.

DRY FRUIT.—All fruit continues dull. A slight advance is obtained on the lowest descriptions, and none now can be had under 19s. Raisins are lower.

SEEDS.—The growing crops of seed are reported to be small from all quarters. Rain, which was much wanted, has come too late; and with small stocks our market is generally firm.

ENGLISH WOOL.—A little easier.

COLONIAL WOOL.—No change since close of sales.

FLAX.—Market very firm, owing to the crops having failed to a great extent in France and Belgium.

HEMP.—Market firm, and but few sellers for forward delivery.

SILK.—Prices still very firm, and a fair business doing, considering limited stocks.

TOBACCO.—We have nothing new to report, prices remain unaltered, the clearance is only for small lots of the better descriptions.

LEATHER AND HIDES.—The leather trade of the past week has shown very little activity. The supplies of fresh goods at Leadenhall on Tuesday were moderate, but the attendance of buyers was small, and the transactions limited. Prices are, however, generally unaltered.

METALS.—The course of business continues quiet, without any material changes. Copper is flat, at last week's quotations. Tin has had attention from the great Dutch sale coming off on the 29th, when the price realised for Banca was 56fl, equal to about 95*l* per ton here, and this is regarded as too high for the present position of the article. Lead and spelter both quiet. Tin plates in fair demand. Iron unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	0
Fat by ditto	2	1½
Yellow Russia	43	3
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, June 29.—There was a full average supply of beasts on sale in our markets to-day, yet all breeds moved off steadily at quite Monday's currency. The top figure was 5s per 8 lbs. Sheep—the show of which was good—were in improved request, at full prices. The best Downs and half-breds sold at 5s 10d per 8 lbs. We have to report a steady inquiry for lambs, at late rates, viz., from 6s to 7s 4d per 8 lbs. The demand for calves was in a sluggish state. Prices, however, were supported. In pigs and milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d		s	d		s	d		s	d
Coarse and inferior beasts	3	6	to	3	10	Prime Southdown sheep	5	8	to	5	10

Lambs, 5s 8d to 6s 8d.

HOP MARKET.

BOROUGH, Friday, June 30.—The plantation accounts are favourable, and the hop market rules quiet. Small supplies of produce, however, are on sale, and previous quotations are steadily supported. Mid. and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, 100s to 140s; Yearlings, 100s to 130s per cwt.

HAY MARKETS.

THURSDAY, June 30.—Very moderate supplies are on sale, and the trade rules firm, on rather higher terms. New meadow hay, 4*l* to 5*l* per load.

Per load of 36 trusses.

	Smithfield.			Cumberland.			Whitechapel.		
	s		s		s		s		s

COAL MARKET.

FRIDAY, June 30.—Wallsend:—South Hetton 17s 9d—Tunstall 15s 9d—Hasting's Hartley 16s 6d—Holywell Main 16s 6d. Ships at market, 19; sold, 4; gas contracts, &c., 14—18; unsold, 1; ships at sea, 30.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 30.—Although we cannot report a very active market, there is nevertheless a fair amount of business doing at prices which show a hardening tendency.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 30.—The market moderately attended. Wheat steady at 1d per cental advance. Flour steady, and sacks are 6d dearer. Indian corn dull. Beans, oats, and oatmeal a turn dearer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 17th of June, on 11,961 miles, to 682,915*l*, and for the corresponding week of last year, on 11,605 miles, to 652,577*l*, showing an increase of 356 miles and of 20,338*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,422 miles, to 554,314*l*, and for the corresponding week of 1864, on 8,167 miles, to 539,636*l*, showing an increase of 255 miles and an increase of 54,678*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 26.—In the share market to-day dullness was again the prevailing feature, and English railways closed with a rather general tendency to depreciation. Of the English lines, Great Eastern and North London were each ½ better; Metropolitan relapsed ½; and Great Western, ditto (Oxford), and Chatham (Metropolitan Extension A stock) were each 1 lower, South-Eastern ¼ lower, Caledonian, Lancashire, and Yorkshire, South-Western, and Manchester, Sheffield, &c., and Great Northern each ½ lower; ditto (A stock), North-Eastern (Berwick), ditto (Leeds), and ditto (York), a further ½ lower, and Metropolitan District (paid up) a further 1 lower. In colonial, Great Western of Canada bonds (of both descriptions) advanced 1. In foreign, European Central declined ½, and Central Argentine ¼. In American, Panama Railroad (second mortgage) advanced 1, and United States (5-20) ¼; Illinois Central (shares) recovered ¼, and Erie shares (paid up) further declined ¼. In British mines, South Caradon declined 10, West Seaton and Wheal Seaton 5 each, West Chiverton 2½, Clifford Amalgamated and East Bassett 1½ each, Providence 1, and Grenville ¼, and Chiverton relapsed ½. In foreign mines, Port Philip receded ⅝.

TUESDAY, June 27.—In the share market to-day there was no recovery of animation, and English railways, American securities, and British mines closed with a tendency to depreciation, as also did the banks in a few months. Of the English lines, Midland and Chatham declined ½ each; ditto Metropolitan Extension (A stock) a further 2, Great Northern a further 1, ditto (A stock), and Manchester, Sheffield, &c., a further ½ each, and Great Western a further ¼. In colonial, Eastern Bengal recovered ½; Grand Trunk of Canada (2nd preference deferred) improved 2, and ditto (1st preference) and Madras (5 per cent.) receded ½ each. In foreign, Paris and Mediterranean declined ½. In American, United States (5-20's) relapsed 1½, and Illinois Central (shares) 1¼, and Virginia (6 per cent.) declined ½, and Atlantic and Great Western (New York, 1st mortgage) 1. In British mines, Wheal Bassett declined 7½, East Carn Brea ½, and Chiverton a further ¼.

WEDNESDAY, June 28.—The English railway market closed to-day with a revived tendency, but the banks were depressed in several instances; foreign railways were also rather disposed to weakness, but the other descriptions were without material average change. In English railways, Great Northern (A stock) recovered 1, and Great Western ½; and Great Eastern and Metropolitan District (paid up) improved 1 each, North-Western ¾, and Metropolitan and South-Eastern ½ each. In colonial, no movement occurred in the closing prices. In foreign, Pernambuco declined ¼, and Antwerp and Rotterdam and Great Luxembourg ⅛ each. In American, United States (5-20) recovered ½. In British mines, Nangiles advanced 2½, and Chiverton further declined ½. In foreign mines, Port Phillip improved ½, and Washoe Gold (of both descriptions) receded 1.

THURSDAY, June 29.—This being the day of the preparation for the settlement at the end of the month, a majority of the transactions were for the account, and the closing prices in English railways tended upward, but in other descriptions the movements in either direction were too few or too evenly balanced to affect the tone. Of the English lines, West Hartlepool (A stock) improved 1; Lancashire and Yorkshire, ¾; North-Eastern (Berwick), ditto (Leeds), and ditto (York), ½ each. Metropolitan District (paid up), a further 1. In colonial, Great Western of Canada shares (of both descriptions) improved ⅛. In American, Illinois Central shares advanced 1¼, and United States (5-20) further 1¼. In British mines, East Grenville closed ⅛ better, and Great Wheal Vor ½ worse.

FRIDAY, June 30.—The operations in the railway share market have been on a rather limited scale, and prices have shown depression in most instances. Colonial lines remain without any material change as regards values.

ATLANTIC AND GREAT WESTERN RAILWAY.

The accompanying Letter and Report received from Mr Moseley, who has recently visited the United States and minutely inspected the Atlantic and Great Western Railroad, will, we think, prove interesting to holders of this Company's securities :—

New York, May 29th, 1865.

EDW. F. SATTERTHWAITE, Esq., London.

DEAR SIR,—In accordance with your instructions, I have made a careful examination of the Atlantic and Great Western Railway, and also of the lines connecting with it at Dayton, and on to St Louis.

The main line commences at Salamanca, on the Erie Railway, 414 miles from New York, in the State of New York, and passes through the States of Pennsylvania and Ohio, terminating at Dayton, a total distance of the 386 miles.

The broad gauge lines in direct communication with the Atlantic and Great Western are :—

	Miles.
The Erie Railway, New York to Salamanca.....	414
The Cincinnati, Hamilton, and Dayton Railway...	60
The Ohio and Mississippi Railway.....	340

The railroad crossings and connections of the line are as follows :—

			Miles.
At Salamanca	with	Erie Railway	414
Corry	,,	Oil Creek Railway	34
		Philadelphia and Erie Railroad	451
Meadville	,,	Franklin and Oil City Branch A. and G. W. Railway	37
Cleveland	,,	Cleveland and Toledo Railroad	112
Greenville	,,	Erie and Pittsburgh Railroad	148
Ravenna	,,	Cleveland and Pittsburgh Railroad	150
Akron	,,	Cleveland, Zanesville, and Cincinnati Railroad	87
Mansfield	,,	Pittsburgh, Fort Wayne, and Chicago Railroad	258
		Sandusky, Mansfield, and Newark Railroad	116
Galion and Marion	,,	Cleveland, Columbus, and Cincinnati Railroad	258
		Bellefontaine Railway	469
Urbana	,,	Great Central Railway	188
		Sandusky, Dayton, and Cincinnati Railroad	215
Springfield	,,	Springfield and Columbus Railroad	45
		Springfield, Mt Vernon, and Pittsburgh Railroad	
		Sandusky, Dayton, and Cincinnati Railroad	
Dayton	,,	Dayton and Michigan Railroad	207
		Indiana Central and Dayton and Western Railroad	57
Cincinnati	,,	Ohio and Mississippi Railroad	340
		Indianapolis & Cincinnati Railroad	115
		Kentucky Central Railroad	112
		Louisville & New Orleans Steamers	

It affords me much pleasure to be able to report that the Atlantic and Great Western line is in most excellent order, the ballasting good, and, with the exception of some 20 miles of metal west of Salamanca, the rails are in first-rate condition. These 20 miles are now being relaid with new iron, the rails taken up will be used for additional sidings about to be built at important points on the line, and which, when completed, will amount to about 15 miles in length.

It is also most satisfactory to be able to confirm the report I made to you in March last, that during the great floods the lines escaped wonderfully, the amount of damage done to the permanent way and bridges being but trifling, and that all repairs were executed within a week by the ordinary staff of "track layers." The stations on the line at present are of course more or less of a temporary character, with the exception of Meadville, the head-quarters of the Company, a very fine building, containing the offices for the various departments, refreshment-rooms, and in addition a large first-class hotel (admirably managed), but still far too small to accommodate the greatly increasing business. In due time great alterations and additions will be made to all the stations, but at present they are well adapted to the traffic, and it is policy to thoroughly develop the traffic before expending large sums upon improvements, that in the course of a year or two are sure to prove inadequate. There are in course of construction at Meadville large workshops and engine sheds, which, with the houses belonging to the Company and rented by employés, cover an area of about 60 acres. At the Kent station there are also large works being erected, consisting of car and smiths shops, and engine-sheds, all being built in a most substantial manner.

All the heavy works now in hand are being pushed on with vigour, more especially the engine-sheds, which will be completed before the coming winter.

The rolling stock consists of—

91	Locomotives on line.
35	Ditto building.
51	Passenger cars (to carry 60 persons).
40	Ditto building.
16	Baggage and Mail cars.
2,566	Freight cars.

It is all in splendid order, the engines being of a particularly fine description.

From Dayton to Cincinnati the line belongs to the Cincinnati, Hamilton, and Dayton Railway Company. This Company expended 1,500,000 dols in laying a broad gauge "straddle" track (rails on either side of narrow gauge rails), and building passenger stations and freight houses to accommodate the Atlantic and Great Western traffic. The passenger station at Cincinnati is one of the best and most convenient in the States, containing arrangements for the comfort of passengers not usually to be met with on American lines. A fine suite of offices are nearly completed for the use of the Atlantic and Great Western Company. The freight houses adjoin the station, and are rented by firms who take the freights from the Railway Company, charging for storage, and assuming all the responsibility of delivery; an excellent arrangements that relieves the Company of a vast amount of risk. The line from Dayton to Cincinnati is in perfect order, is well ballasted and maintained, the stations are good, and there is every facility for conducting a very large traffic with regularity. The junction with the Ohio and Mississippi Railway is about half a mile from the main station. Arrangements are contemplated by which the two lines will unite at the main station. The line to St Louis, considering the severe winter and the floods, is in very good condition. The track is being carefully repaired, and a large amount of iron is being re-rolled and re-laid. It is the intention of the Directors to re-roll nearly all the metal now down. The line is broad gauge throughout.

The Franklin Branch has been extended from Franklin to Oil City, 8¼ miles, a very important addition to the line. From Meadville to Franklin the rails originally laid are very light, but from the fact of the joints being fished they have worn most surprisingly well, and would last for years to come. However, it is intended to replace them with the same description of rail used on the main line. The light rails will be kept in stock in all probability for sidings. The track is well maintained, and the enormous traffic over this branch is admirably managed.

The Cleveland Extension runs over the Mahoning Railway (leased by the Atlantic and Great Western Company for 99 years), and is a "straddle" track; the narrow gauge cars and engines belonging to the Mahoning line are therefore used in common with the broad gauge; trains of the mixed gauges being run with the greatest safety. The line is in splendid order, and the traffic over it immense.

The works on the Buffalo Extension and New Lisbon Coal Branch will be energetically carried on. Those on the Erie and Niagara line are nearly complete.

Having thoroughly satisfied myself that the lines now in operation are in proper order, I have devoted considerable time to ascertaining what are the traffic prospects for the future. I append a return of the towns and villages within a radius of about 20 miles from the main line, from which it will be seen that the railway passes through settled and populous districts. In fact, from Saegar Town (97 miles from Salamanca) west the country is as highly cultivated as any part of the States.

I am prepared for somewhat lower traffic receipts for the summer months of this year, and believe that they will be lower than at any future period, for the following reason: The heavy decline in the eastern markets (consequent upon the large fall in gold) in the value of western products, such as tobacco, grain, hemp, and hogs, has almost stopped shipments to the seaboard, holders generally hoping for a reaction in prices, and as a rule being unwilling to face a sudden loss. All this freight is in the west, and sooner or later must come east. If held back until the harvest there will be an immense pressure of freights, and the roads will be enabled to advance their rates.

The connections with the various cross-roads are highly important, and when arrangements are completed for additional sidings, transfer houses, &c., will open up to the Atlantic and Great Western at points such as Corry, Clarkesville, Mansfield, and Galion, feeders full as valuable as any now in existence, and in addition a

Digitized by Google

class of traffic that hitherto has not been sought after; I mean the stock traffic. Dull as this branch of trade is at the present time, a neighbouring line for instance is carrying from 40 to 50 cars per diem. This, at 30 dols (a minimum rate), gives upon the lower number 1,200 dols.

I anticipate that the Atlantic and Great Western will obtain about the same traffic in dull times from Cleveland to Salamanca. The amount of stock, however, to be conveyed from Cleveland will not compare with that which will be forthcoming from Mansfield, Galion, Urbana, and Dayton. The States of Kentucky, Southern Illinois, and Missouri, are the great stock-producing States, and the Atlantic and Great Western line from these points (arrived at by the Ohio and Mississippi, Cincinnati, Hamilton, and Dayton, and Cincinnati and Indianopolis, and other lines) offers to stock-producers an unbroken broad-gauge line to New York. It is a fair calculation to estimate the stock traffic over the south-western portion of the road at from 50 to 100 cars per diem. Taking the low figure at an average of 50 dols to 75 dols per car, and the lowest rate you have 2,500 dols, which added to the Cleveland estimate of 1,200 dols, gives a total of 3,700 dols per diem, or 22,200, dols pre week of 6 days for stock traffic alone.

A source of traffic at present is, and will be, for many years to come, the oil from the Pennsylvania wells. Notwithstanding the enormous yield for the last three years, the supply shows no sign of exhaustion, and as a consequence fresh adventurers are daily arriving and expending capital in the hope of "striking oil." The large number of Companies formed of late, has increased the value of land to an enormous extent, and materially added to the traffic on the Franklin Branch. It is estimated that nearly 2,000 fresh wells will be started this season, the pumping engines for these new undertakings are scattered in all directions,—200 were on the Franklin platform at one time last week. The extension of the line to Oil City will necessarily secure an immense amount of oil traffic that last year was transported East by other routes. A large plot of land has been presented to the Company in the neighbourhood of Oil City on the river bank, upon which large wharves and sheds will be built exclusively for Petroleum traffic. The oil will be sent direct from the wells on the creek to these landings, and as a saving of some 7 miles of road hauling will be effected, it is fair to suppose that a large amount of traffic that has hitherto gone by river will be diverted to the rail. The number of barrels transported by the Atlantic and Great Western line last year amounted to the enormous number of 675,028.

Coal in the course of a very short time will form one of the largest items of traffic. The facilities for shipment at Cleveland are so great (the Company having between 3,000 and 4,000 feet of river frontage) for the West *viâ* the lakes and railways, that it is impossible to estimate what the value of this traffic will be. At present it is only beginning to be developed. In addition to the Western shipments, there will be an enormous demand for Canada, viâ the Buffalo extension, and Erie and Niagara line. Cheap coal is sure to bring a large number of manufactories to the towns in the neighbourhood of the coal fields. It is a satisfactory feature that the trucks running from Youngstown (the southern terminus of the Mahoning branch, and centre of the coal district) to Cleveland, return with iron ore from Lake Superior. The "Mahoning Works," at Youngstown, consume when in full work 240 tons of coal, and turn out in bars, sheets, and spikes, 50 tons of iron per day. The freight business of these works in ore from Cleveland, and manufactured iron to different parts, is worth 105,000 dols per annum. Two other firms here contribute 75,000 dols each per annum, and others from 50,000 dols to 60,000 dols.

In addition to the sources of revenue alluded to, there is a very large and well-paying freight traffic at present derived from dairy produce, which commands a higher rate for transport than any other description of freight.

Upon the line being fully open to Cincinnati and St Louis for through traffic, I have no doubt that the most sanguine expectations will be fully realised. At present, owing to the want of rolling stock, through-freights have been canvassed for. One through train per day began to run on the 8th instant, another will be placed on the line by the middle of June, and a third by the middle of July. The opening of the through line for passengers will, however, serve as an advertisement for freights, and as new cars are added to the stock now running, energetic measures will be taken to secure a class of traffic hitherto not competed for, viz., general merchandise bound West. There is also a large amount of goods traffic to be obtained from the Cleveland and Toledo and Michigan lines running from Toledo to Chicago. The Toledo line will be in a position to give more than double the amount of freight for conveyance East compared with the total now carried for them over the Atlantic and Great Western. The relations between these lines and the Atlantic and Great Western are of a very friendly nature, and there is an evident anxiety on the part of the managers to assist in developing the Atlantic traffic. It is also gratifying to be able to report that both at Cincinnati and St Louis, all the railway authorities I had the pleasure of meeting spoke in the most encouraging manner of the traffic prospects, and expressed themselves highly satisfied at the probable early opening of the through route. Apart, however, from all questions of through traffic, I am convinced that the local traffic alone (which up to the present time has been the great source of earnings) by good management and development will yield a revenue more than sufficient to meet the requirements of the Bondholders. No new line ever built in the United States passes through more highly cultivated or better settled districts, which from the very first have thrown an immense amount of traffic upon the line.

When it is considered that this great railway was only commenced about five years ago, during a period of civil war, when labour was scarcer, and wages higher, than ever remembered, I think the Stock and Bondholders may fairly congratulate themselves upon the results obtained up to the present time. To the amazing energy of Mr Kennard, the Engineer in Chief, in the face of every possible opposition, these results are mainly due.

Under the active presidency of Mr L'Ilommedieu, and the management of Mr McLaren, the General Superintendent, there is no doubt that vast improvements in the conduct of the traffic generally will be made. Indeed, already important savings have been effected in the working expenses of the road. Both these gentlemen speak most confidently of the success of the undertaking, and of the large increase in the receipts that must follow upon the perfect equipment of the line.

The following are the stations on the Altantic and Great Western line, and the towns and villages alluded to.—I am, dear Sir, yours faithfully, EDWARD MOSELEY.

The number of miles, after the name of the Station, gives the distance of each place from

SALAMANCA,

which is the connection with the Erie Railway and transfer station, situated in Cattaraugus County, New York; population of the county is 43,735.

STEAMBURG (12 miles). A small place; lumber is the principal business derived from this station.

RANDOLPH (18 miles), population 1,500; Rutledge 5 miles from the station, population 500.

KENNEDY (25 miles), population 1,200; Ellington 12 miles from station, population 1,200.

JAMESTOWN (34 miles), population 5,000; important manufacturing and shipping point. Towns tributary thereto—Bucklands, 500; Busti, 400; Frewsbury, 600; Ellery, 400; Fentonville, 400; Kyantone, 500; Russelburg, 600; Sugar Grove, 1,000; Geary, 500; St. Clairsville, 1,200; Stockton, 700; Maysville, 1,500. These towns are 5 to 20 miles from the station in Chautauqua County, the population of which is 58,217. Road passes through south part of country; Lake Shore Railroad distance 16 miles. There is a pleasant route to the Lake Shore line at Westfield, 57 miles east of Buffalo, *viâ* steamboat on the Chautauqua Lake to Maysville, and then by coach, 7 miles to the railway; this route is much frequented in the summer months.

ASHVILLE (41 miles), population 1,000.

PANAMA (48 miles). Town of same name distant two miles; population 1,200.

COLUMBUS (57 miles), population 800; in Warren County, Pensylvania, population of which is 19,190.

CORRY (61 miles). This town is five years old, population 4,000. Crossing of the Philadelphia and Erie Railroad, and Junction with the Oil Creek Railroad, an important point for forwarding oil, and receiving merchandise and machinery for the oil region. Here are the Downer Oil Refinery Works, containing iron tanks which hold 10,000 barrels of oil. In 1860 the site of Corry was a forest, not a house to be seen.

CONCORD (66 miles). A small village.

MILL VILLAGE (79 miles). Only a station, no village of any consequence. Waterford, 4 miles, population 4,000. Philadelphia and Erie Railroad runs directly alongside Atlantic and Great Western road from this station to Corry.

MILLERS (85 miles). Small place.

CAMBRIDGE (88 miles), population 2,000. Edenboro, 6 miles, population 600.

VENANGO (92 miles), population 1,200. Rockville, 8 miles, population 1,000.

SÆGER TOWN (97 miles), population 500. From this station, west, a marked change is visible in the country; up to this point there is much forest land, and the resources of the country are undeveloped. Still, much has been done during he last four years, and a daily improvement may be expected.

MEADVILLE (103 miles), population 8,000; important commercial and manufacturing town. General offices of the railway are at this place, and a large and admirably managed hotel, the "McIlenry House," where passengers dine, &c.,—indeed, if it were twice the size, it would always fill. Eight distinct table d'hôte dinners are served here for the convenience of persons living in the house, and passengers arriving by trains. The Company's workshops are in a forward state, and will be of great service when completed. Tributary towns—Riceville, 18 miles, population 1,000; Cooley, 12 miles, population 500; Conneout Lake, 7 miles, population 600; Cochranton, Utica, Evansbridge, Sugar Creek, small villages on Franklin Branch, which joins the main line at Meadville, in Crawford County, the population of which is 48,755.

FRANKLIN (131 miles), on the branch from Meadville, population 5,000. Great point for the shipment of oil. This station is at the junction of the French Creek and Allegheny River.

Digitized by Google

Oil City (8½ miles) from Franklin, furnishes a great amount of traffic in passengers and freight to the road, population 13,000; situated at the junction of Old Creek with the Allegheny River. In the spring and fall, when the water is high, but before the opening of the Oil City, most of the oil went down the Allegheny to Pittsburgh, and thence east. In the summer when the water is low, and all through the winter, all the oil comes over the Franklin Branch.

Sutton (110 miles). No village, but a good lumbering point.

Evansburg (115 miles). Town of same name is 4 miles from station, population 800. Hackstown, 5 miles, population 500; Georgetown, 10 miles, population 700.

Adamsville (121 miles). Population 500.

Sugar Grove (124 miles). Small station.

Greenville (129 miles). Population 4,000. Tributary towns—Miner, 15 miles, population 2,000; New Hamburg, 7 miles, population 600; Delaware Grove, 9 miles, population 100; Centreville, 28 miles, population 200; Balm, 25 miles, population 100; New London and Maysville, population 100 each; Shackleyville, 10 miles, population 600.

Crossing of Erie and Pittsburgh Railroad (132 miles).

Clarksville (136 miles). Population 1,000. The Erie and Pittsburgh runs parallel with Atlantic and Great Western track 8 miles. Tributary towns—Newcastle, 17 miles, population 3,500; Pulaski, 10 miles, population 800; West Middlesex, 20 miles, population 1,000; Sharon, 8 miles, population 1,500; Jamestown, 10 miles, population 1,000; Brownsville, population 300; Lindenville, population 200; Espyville, population 200; Conneautville, population 1,500; Linesville, population 200.

Crawfords (139 miles). Large coal fields at this point.

Orangeville Ohio (141 miles). Population 1,200. Tributary towns—Sharon, 7 miles, population 5,000; Hartford, 4½ miles; Vernon, 4½ miles; Kinsman, 4½ miles; Maysville, 5 miles; Sharpsville, 5 miles.

The above-mentioned towns have a population of from 500 to 1,000 each.

Burghill (145 miles). Tributary to this station are the above-named stations, under head of Orangeville.

Large dairy farms are along the line of the road between this station and Akron, and consequently large shipments of butter and cheese are made from these points. The amount varies from 500 to 1,200 tons per annum from each station.

Johnson's Summit (149 miles). Fowler, 5 miles from station, population 700.

The remarks appended to Burghill station apply to this station equally as well.

Baconsburg (154 miles). Population 500; Mecca, 7 miles, population 1,000; Johnson's, 6 miles, population 500; Gustavus, 15 miles, population 500; Williamsfield, 20 miles, population 1,000.

This is called the Mecca oil region, and produces valuable oil in moderate quantities.

Warren (162 miles). Population 4,000; enterprising town; fine water power, furnished by the Mahoning River, which is much used for motive power in mills, &c. &c. Tributary towns—Gustavus, 6 miles, population 600; Bristol, 9 miles, population 500; Farmington, 5 miles, population 600; Southington, 10 miles, population 500; North Jackson, 10 miles, population 800.

Above towns are in Trumbull County, Ohio, population of which is 30,813.

Leavittsburgh (164 miles). Crossing of Cleveland Branch. No station here, but is an important transfer point, both iron and coal passing east and west. Towns on this branch between Leavittsburgh and Cleveland—Braceville, Windham, Garretsville, Mantua, Aurora, Solon.

The above-named towns are the centres of large dairy districts, and large shipments of butter and cheese go from these points to the east and west.

Cleveland (214½ miles). Terminus of the Cleveland Branch of the Atlantic and Great Western Railway; population about 70,000. It is a well laid out town, and large manufacturing interests are represented here, encouraged by the unequalled railway facilities for transportation. The following roads centre at this point:—Cleveland and Toledo Lake Shore Line; Cleveland, Columbus, and Cincinnati, and the Atlantic and Great Western Railways, and the Cleveland and Pittsburgh Railway. Large quantities of iron ore pass through on its way to Youngstown for smelting, thereby affording a lucrative business to the Atlantic and Great Western Railway Company.

Youngstown is an increasing town of 4,000 inhabitants, at the southern end of the Mahoning Branch, and in the centre of the coal fields of Ohio. Here are large iron works, supplied *viâ* the Cleveland Branch, with ore from Lake Superior.

The district is very rich in coal, and the traffic derived from it from Sharon to Cleveland, and elsewhere, cannot but prove a lasting source of revenue to the Company.

For some weeks, however, in consequence of a strike among the coal miners, the traffic has suffered much. The miners belong to a trades' union, and are holding out for higher wages, but being now badly off for money, are expected to resume work in two or three weeks.

Towns tributary to Youngstown are—Sharon, Pa., which has also an outlet by railroad and canal to Erie; New Castle, Lowell, and Mahoning town, are all iron manufacturing towns, the business of which is largely developing. Good coal banks underlie nearly all this region, to which Lake Superior ore is transported for smelting.

Braceville (169 miles). Situated between the main line and Cleveland Branch, population 1,500. Tributary towns—Sellington, 5 miles, population 500; Farmington, 10 miles, population 1,000; Mesopotamia, 15 miles, population 500; Newton Falls, 3 miles, population 1,000; Lordstown and Paris, small places; Windsor, 20 miles, population 800; dairy farms supply chief traffic.

Freedom (179 miles). Small town, but country in the vicinity is densely populated; principal articles of freight are butter and cheese, for New York, Cincinnati, and St. Louis.

Windham (173 miles), population 1,000. Tributary towns—Painesville, 5 miles, population 800; Palmyra 10 miles, population 500; freights, butter and cheese; all the region from Akron, eastward to Grangeville, is a fine grazing country; although small towns, some of them furnish as much as 1,000 tons of cheese and butter per annum; it is desirable freight, higher prices being paid for its transportation than for any other article.

Ravenna (185 miles), population 4,000, in Portage County, population of country, 24,407; crossing of Cleveland and Pittsburgh Railroad. Towns tributary—Rootstown, 4½ miles; Randolph, 12 miles, population 500; Campbellsford, 4 miles, population 600; Streatsburg, 5 miles; Shalersville and Nelson, small towns. The Cleveland and Pittsburgh road is a good connection for the central portion of Atlantic and Great Western Railway.

Kent (192 miles). Lately called Franklin Mills, is a midway station on the line, being 196 miles from Dayton, and in consequence of its situation, an important position for the workshops, &c., of the Company. The premises are built of white sandstone found on the spot, and are substantial and handsome; they consist of two large car sheds, one of which is now used as a machine shop, a 60-horse engine working some valuable machinery. The smith's shop and engine shed with room for eighteen engines, is in a forward state, the latter, when completed, being designed for twice that number. The foundations are laid for a fine machine shop, and a large drying house and paint shop; these, together with a tank for water on the hill adjoing the works, will complete a very perfect system, which cannot but prove of great service to the Company.

Tallmadge (197 miles), small town, population 500; Cuyahoga Falls, 2½ miles, population 1,500.

Akron (202 miles), population 7,000; the most important flour milling point in the State, capacity of mills being 1,500 barrels per day, is situated on the Ohio Canal, and on the Cleveland and Zanesville and Cincinnati Railroad; has the best water power of any town in the State. There are large agricultural implement shops here. Tributary towns—Clapley, 5 miles, population 400; East Liberty, 11 miles, population 500; Union Town, 13 miles, population 800; Manchester, 9 miles, population 500; Middlebury, 2 miles, population 1,000.

New Portage (207 miles). On canal from Cleveland to Portsmouth, from which much business may be secured. The canal traverses the rich and fertile valleys of the Scioto and Muskingum, passing through the cities of Newark, Chillicothe, Circleville, &c. Towns tributary—Richfield, 10 miles, population 2,000; Hinckley, 5 miles, population 1,000; Brunswick, 10 miles, population 1,000; Liverpool, 15 miles, population 3,000; Strongsville, 25 miles, population 2,500; Albion and Yellow Creek, 4 miles, population 600. Large earthenware works at this station.

Wadsworth (215 miles), population 500; Sharon, Western Star, and River Styx, to the north; Doylestown and Clinton to the south; being villages with a population of 500 to 800; diverging from Wadsworth is the Silver Creek branch of the Atlantic and Great Western, a coal road 6 miles long, being the first coal field reached on the line going east from Dayton Mining now 200 tons per diem; two more mines of greater capacity will soon be opened. It is expected to supply the towns on the line south with the coal, which is of the celebrated Chippewa variety, very valuable for gas purposes, situated in Summit County; population 27,400.

Seville (226 miles), population 1,200. Tributary towns—Jackson, 1½ miles, population 500; Medina, 9 miles, population 6,000; Chatham, 8 miles, population 1,000; Lafayette, 7 miles, population 1,200; Lichfield, 13 miles, population 1,500.

Bridgeport (232 miles), population 800; Lodi, 3 miles, population 400; Windsor, 6 miles, population 400.

West Salem (238 miles), population 1,000; situated in Medina County, population 22,700. Tributary towns—Perrysburg, 2½ miles, population 300; Converse, 3 miles, population 800; Homer, 3 miles, population 700.

Polk (244 miles). Population 400. Tributary towns—Troy, 8 miles, population 500; Rousburg, 3 miles, population 600.

Ashland (252 miles), population 3,000; Ashland County, population, 21,693. Product principally wheat. Tributary towns Hayesville, 8 miles, population 1,000; Jeromesville, 8 miles, population 1,000; Orange, 4 miles, population 500; Savannah, 7 miles, population 500.

Digitized by Google

WINDSOR (261 miles). Population 300. Tributary towns—Olivesburg and Miffin, 4 to 6 miles.

MANSFIELD (269 miles). Richland County. Population of town, 5,000; of county, 31,121. The road crosses Fort Wayne Road from Chicago and Sandusky and Newark, with both of which friendly relations exist, connect at this station for Pittsburg and Chicago; Fort Wayne and Chicago Company have agreed to share equally the expense of a new carriage station here.

ONTARIO (277 miles). Population 500.

GALION, Ohio (283 miles). Population 2,500. Crossing of Cleveland, Columbus and Cincinnati Railroad, eastern terminus of Bellefontaine and Indiana Railroad in Crawford County, population 24,165. From here to Marion (distance 21 miles) run side by side with Bellefontine and Indiana Railroad.

CALEDONIA (295 miles). Population 600.

MARION (304 miles). Population, 3,000; county population, 15,891.

BERWICK (310 miles). Population 700. From hence to North Lewisburg, about 30 miles, the country is new and thinly settled. The woods contain very valuable timber. From Marion, east, the country is highly cultivated.

RICHWOOD (318 miles). Population 800. Bryant, 4 miles; Carey, 7 miles; Middletown, 6 miles; 500 to 800 each in population.

NEWTON (328 miles). No town on line; small village 1 mile distant; large amounts of lumber (timber) sent from this station to Dayton and Cincinnati.

NORTH LEWISBURG (338 miles). Population 1,000; Bellefontaine, population 3,000; East Liberty, 12 miles, population 2,000; Woodstock, population 600; Middleburg 6 miles; East Liberty 8½ miles; Maysville 10 miles; Newton 8 miles; Middletown 4 miles; Pickerstown 8 miles; Lanesfield 10 miles. These towns, from 500 to 2,000 inhabitants. Railroad runs through the centre of the county.

MINGO STATION (343 miles). No village here.

TAYLORTOWN (348 miles). No town; small village north of it of 300 inhabitants.

URBANA (352 miles), population 5,000, in Champaigne County, Ohio; population of County 16,591. To this point from Dayton the line runs alongside of the Sandusky, Dayton, and Cincinnati Railroad, and here intersects the line from Indianopolis, Indiana, to Columbus. A fair business is derived from this road. A large live stock trade from the States of Indiana and Illinois will strike here.

TREMONT (360 miles). A small village; population, 300. The road from here to Dayton runs near Mad River. This valley is not excelled for fertility and agricultural resources by any portion of the West.

SPRINGFIELD, CLARK COUNTY (366 miles); population 8,000; a large manufacturing town; milling capacity 130,000 barrels per annum; town is 1½ miles from road; it is a very enterprising place.

SNYDERS (370 miles). No town here.

ENOU (372 miles); population 1,000; town 1 mile from station; population of county 25,445. Road traverses centre of county East and West.

OSBORNE, GREEN COUNTY (378 miles), population 1,200; of county 26,778; town of Fairfield 2 miles, population 1,000; Carlisle 4 miles, population 1,500.

KNEISLEY'S (381 miles). No village, 6½ miles from station; a large mill, capacity 100 barrels flour per diem, and an extensive distillery.

DAYTON, MONTGOMERY COUNTY (387 miles); population of city 22,000, of county, 52,213; is a manufacturing town, largest item of production being flour to the extent of 150,000 to 200,000 barrels per annum; the tonnage shipped in 1864, by statements from books of various railroads to New York, Boston, Philadelphia, and Baltimore, was 24,693 tons; it is the northern terminus of the Cincinnati, Hamilton, and Dayton Railroad 60 miles long; and the eastern terminus of the Dayton and Western Railroad 40 miles; eastern terminus of the Greenville and Miami Railroad 42 miles; western terminus of the Little Miami Railroad 70 miles from Columbus (capital of the State). The southern terminus of the Dayton and Michigan Railroad 140 miles; also of the Sandusky, Dayton, and Cincinnati Railroad 154 miles. Not much trade will be drawn from the North for the Atlantic and Great Western Railway, but a large amount will come from the South and West. A large manufacturing and mercantile jobbing business is carried on here with surrounding country. The road traverses the centre of the county, and connects by the Cincinnati, Hamilton, and Dayton Railroad with Cincinnati, the largest commercial and manufacturing city of the West, having a population of some 200,000.

In the above Report, the population has been chiefly taken from the census report of 1860, since which time it has considerably increased.

"PURITY AND EXCELLENCE OF QUALITY."

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MELAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is es ecially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their est work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their chil ren on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850

THE PATENT KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

Apply to the undersigned, General Engineers, and Manufacturers of

PATENT HUSKING MACHINES FOR COTTON, TURBINES, PUMPS, FANS, SHIP VENTILATORS, MINE VENTILATORS, &c.

THE NORTH MOOR FOUNDRY COMPANY, OLDHAM.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and cels at their London office for Gibraltar, Malta, gypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th, of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley. Cornhill, E.C.

BUSINESS TRANSACTED.

This Company negotiates Loans for Colonial and Foreign Governments;

Co-operates in the Financial arrangements of British and other Railways;

Makes Advances to Corporations, Town Councils, and other Public Bodies;

Negociates Loans for Public Works;

Assists in the introduction of Industrial and Commercial undertakings;

Makes Advances upon approved Stocks, Shares, Bonds, &c.;

Makes temporary Loans upon eligible Freehold and Leasehold Securities.

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, June 15, 1865.

DEBENTURES
ISSUED BY

THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz. :—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years..... 6 per cent. per annum.
— Five years ..... 6½ — —
— Seven years..... 7 — —

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, June 15, 1865.

DEPOSITS
RECEIVED BY

THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

RATES FOR MONEY ON DEPOSIT.

This Company receives money on deposit in sums of £10 and upwards at the undermentioned rates from this day until further notice, viz. :—

At 14 days' notice	3	per cent.	per ann.
At one month's notice.....	3½	—	—
For fixed periods of—			
Not less than 3 months and up to 6 months.....	4	—	—
Beyond 6 and up to 9 months...	4½	—	—
Beyond 9 and up to 12 months...	5	—	—
Beyond 12 and up to 24 months...	5½	—	—

Forms of application can be obtained of the Secretary, to whom all communications must be addressed.

By order of the Court,
ALFRED LOWE, Secretary.
17 and 18 Cornhill, London, June 15, 1865.

Financial	Foreign Funds	Discount
Steamship	Loan	Docks
Iron Works	Gas	Waterworks
Insurance	Telegraph	Hotel
Marine Insurance	Land	Irrigation
Foreign Mines	Cornish Mines	Devon's Mines

And other Public Companies.

Mr PETER WATSON, Stock and Share Dealer, begs to state that every information respecting any of the above Companies may be had on personal application, or by letter, as to purchases and sales, with advice as to the most desirable investment.

From the close proximity of his offices to the Stock Exchange, and also the Mining Exchange, he is enabled to act with promptitude on all orders entrusted to him in the purchase or sale of every description of stocks or shares, at net prices for cash or fortnightly settlements.

Telegraphic messages of customers to buy or sell in any of the above companies punctually attended to, at net prices for cash or half-monthly settlements, at the closest possible market prices of the day.

Twenty years' experience (two in Cornwall and eighteen in London).

BANKERS.

The Alliance Bank and the Union Bank of London.

The present is an unusually favourable period for the investment of capital.

A selected list of railways, banks, financial, foreign funds, steamships, foreign and Cornish and Devon mines, &c., sent on application, with special recommendations as to investments, &c., on the distinct understanding that any business resulting through his information or advice may be done through him.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

SHAREHOLDERS IN FINANCIAL

BUBBLES will do well to immediately Sell (if they can), for when the accounts for the half-year (ending this month) are made up no bona fide profit can be expected; but, in all probability, very "heavy losses" will be the result. The future trading in many will be very precarious and doubtful, hence the advice to sell immediately and avoid further liability. Investors should then re-invest in bona fide, safe, and long-established companies, which are managed for the general body of shareholders, and not for private individuals only. By acting on this advice great profits, instead of heavy losses, may thus be made.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

INVESTMENT OR SPECULATION.

—The present market price of Government (foreign) Bonds, Banks, Steamship, Marine Insurance, &c., will yield the immediate purchaser some five, eight, or twelve per cent. per annum (paid half-yearly on fixed days with the greatest regularity). In addition to the high rate of interest or dividends there is every probability of many of the above having a good rise in market value.—PETER WATSON, Stock and Share Dealer, 79 Old Broad street, London, E.C., can give every information respecting the above, and he is in a position to BUY and SELL at net close market prices of the day.

LAMBERT BROTHERS, WALSALL.

MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

TO GENTLEMEN SEEKING

preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell dark West, N.W.

PURE WATER.—THE LONDON and GENERAL WATER PURIFYING COMPANY (Limited), 15 Strand, SUPPLY their FILTERS on hire in the metropolis and its suburbs, at the following rentals per annum, which include all charges:—

Filter No 1, yielding ½ gallon per minute,				7s 6d.
— No 2,	—	1	—	12s 6d.
— No 3,	—	2	—	£1 0s 0d.
— No 4,	—	4	—	£1 10s 0d.

Applications to be made to the Secretary, at the Offices of the Company, 15 Strand, W.C., where the filter may be seen in operation, one view of which will convince the most sceptical that no existing filters approach them either in simplicity of construction or in perfection of operation. Testimonials from Dr Letheby and other eminent authorties who are using the filter can be had on application.

ABRIDGED PROSPECTUS.

This Company has been established—firstly, for the purchase and working four of the most valuable silver mining properties at Austin, the chief city of the Reese River district of Nevada, California, viz.:—The Silver Star, Sunnyside, Idle Wild, Lizzie Hopkins—possessing altogether 2633 feet of lodes.

And secondly, for the purpose of erecting and working at Austin, Stamp Quartz Mills, with all the necessary appliances, for which there is abundant employment of the most lucrative kind.

It is now admitted by the best authorities on the subject that the Reese River Mines are the richest in silver that have yet been discovered, the average yield per ton being stated on the best authority to be not less than 200 ounces, this being a greater average than the mines of Washoe, California, Mexico, or Peru.

Eleven shafts have been sunk on the several lodes, so that the Company's mines are completely proved and tested.

It is not easy to form an estimate of the enormous profits which are derived from the working of mines in this district, and the directors, therefore, abstain from quoting statistics on the subject. They have, however, satisfied themselves that, apart from the working of the stamping mills, estimated to produce a clear profit of above £3,000 per annum, the development and working of two only of the four mines belonging to the Company will yield in profits annually a sum equal to the whole subscribed capital.

According to the provisional agreement entered into for the purchase of the several properties, it has been arranged that one half of the price, which is £45,000, shall be accepted in paid-up shares of the Company, while of the amount to be paid in cash, the vendor has agreed to leave in the hands of the Directors so much as will provide for interest being paid to the ordinary shareholders for two years from date of allotment, at the rate of 10 per cent. per annum.

There will be no promotion money paid, the necessary outlay for the legal establishment of the Company only being incurred.

The great success of the Washoe Gold and Silver Company, which was established in London last year, is proved by the price at which the shares are now quoted in the market, being at a premium of upwards of 200 per cent. There is every reason to believe that the property acquired by this Company will yield results even more favourable.

Reports as to the value and extent of the properties, with assays of the ores from the various Mines, maps, plans, and every information, may be had on application to the Company's Offices. Copies of the Articles of Association may be seen at the Offices of the Company's solicitors.

As the Share List will be closed in a few days, an early application will be necessary to secure an allotment.

THE AUSTIN CONSOLIDATED SILVER MINES COMPANY (Limited).

123 Fenchurch street, London, 29th June, 1865.

Since the issue of the Prospectus of this Company the following information as to Silver Mining in Austin District has been received by last Mail, and as it is highly important, I hasten to lay it before you:—

"The silver ores in all the mines in the Reese River country increase in richness as they are worked deeper, and when the 'water level' is reached—from 70 to 100 feet deep—the ore yields from 250 dols to 5,000 dols per ton. It will not be necessary to work ore yielding less than 250 dols per ton. A sufficient quantity of ore can be procured to average that amount without difficulty. Several mills are now at work there that have crushed ore for several months in succession, which have averaged from 400 dols to 1,200 dols per ton. This estimate, however, will be based on ore yielding 100 dols in bullion per ton, net, over the cost of mining and reduction."

"In May, 1862, the first silver bearing ledge was discovered in the 'Reese River Mining country,' near the geographical centre of the state of Nevada, where is now built the city of Austin, containing a population of 8,000. During the year 1863 over 3,000 distinct silver bearing ledges were discovered, located on the Reese River range of mountains, in a distance of 100 miles North and South. Over fifty veins have been opened to the depth of 100 feet and over, and every one proved to be a true fissure vein, yielding unusually rich chloride and sulphide of silver ores, singularly free from base metals. The average yield at the mills exceeds 250 dols per ton, and a large portion ranges from 800 dols to 1,500 dols per month."

The Directors meet in a few days to arrange for the closing of the Lists of Application.

WILLIAM DAVIES, Secretary pro tem.

THE LONDON, WINDSOR, AND GREENWICH HOTELS COMPANY (LIMITED).

Incorporated under the Joint Stock Companies Act, 1862, with Limited Liability.

PROSPECTUS.

This Company has been formed for the purpose of acquiring and uniting under one management the following hotels, all of which are now in possession of first class businesses and in receipt of very considerable and remunerative incomes:—

The Trafalgar Tavern, }
The Ship Tavern, }
The Yacht Tavern, } at Greenwich.
The Castle Tavern, }
The White Hart Hotel, } at Windsor.

Radley's Hotel, at Bridge street, Blackfriars; and The St James's Hall, and the extensive Public Rooms and Restaurant attached thereto.

These large and valuable properties present features of a character which give them a special claim to the attention of the public, inasmuch as from the moment that they are acquired by the Company, they will yield a large and highly remunerative return.

The death of Mr Charles Hart, and the failing health of Mr Thos. Quartermaine, the late proprietors of the Trafalgar and the Ship at Greenwich, are the sole reasons for these valuable properties being now disposed of. Both of these gentlemen, while in the occupation respectively of the Trafalgar and Ship Taverns, realised large fortunes in a few years. The Yacht Tavern has been acquired for the purpose of giving increased accommodation to the Trafalgar, which has been found to be much needed.

It is proposed to re-build the premises in Bridge street, Blackfriars, which are wholly inadequate to the great increase of passenger traffic that the vicinity of the terminus of the London, Chatham, and Dover Railway may be expected to produce. This additional accommodation will be even more urgently required when the above-mentioned station becomes, as it very shortly will, the terminus of the Great Northern, the Great Western, the Midland, the South Western, and Metropolitan Railways.

The business of the two Hotels at Windsor will be united, and for that purpose new premises will be constructed upon the site of the White Hart, which stands opposite the principal entrance to Windsor Castle. The new hotel will possess a first-class refreshment-room adjoining the terminus of the Great Western Railway. The Castle Hotel will be turned into shops, for which a large increase of income may be anticipated.

The returns of the St James's Hall and Restaurant, which are at present under different managements (but which will be now united), are about 40,000*l* per annum.

The Trafalgar, at Greenwich is held under a lease of which about 31 years are unexpired, at the annual rent of £460*l*.

The Ship, at Greenwich, is held under a lease of which about 68 years are unexpired, at the annual rent of £500.

The Yacht, at Greenwich, is held under a lease of which 18 years are unexpired, at the annual rent of £100.

The Castle and White Hart Hotels are freehold.

The St James's Hall and Restaurant (and three houses in Regent street, in connection therewith) are held under leases direct from the Crown, for unexpired terms varying from about 50 to 60 years, at aggregate ground rents amounting to about £2,000 a year.

Radley's Hotel and the valuable space of ground adjoining containing about 25,000 square feet, are held under an agreement for a lease of 99 years from Christmas 1864, at the annual rent of £3,500; and it is believed that the ground, not now occupied by the existing Hotel, would readily produce an income nearly sufficient to cover the whole of such rent.

The prices at which the whole of the above properties, including the goodwill of the late proprietors, have been acquired, is the sum of £185,000.

The stock, furniture, and wines, taken over by the Company, will be paid for by valuation in the usual way.

In the undertaking of a similar nature hitherto presented to the public, the greater portion of the capital has been absorbed by the erection of new and expensive buildings, and by the purchase of the furniture, plant, &c., required for the opening of large establishments, and it has also been necessary to create fresh business; but the present project possesses the advantage that all the properties purchased are now in active and highly profitable working, and hence the capital to be expended in building will be laid out only to provide such enlarged accommodation as shall be found absolutely requisite for the demands of the public.

It is estimated that the dividend upon the capital required to be called up, based upon the result of the last three years' working of the different establishments, will amount to a minimum of 15 per cent. per annum, and the vendor from whom the Company purchases, in order to testify his confidence in the undertaking, has agreed to guarantee a minimum dividend of 10 per cent. during a period of five years.

There will be no promotion money paid, and the preliminary expenses will be borne by the vendor.

In consequence of inquiries which have already been made, the Directors have decided also to receive applications for allotments of one-fourth of the capital, viz., 5,000 shares fully paid up. Such shares to bear dividend from the date of payment.

Applications for shares in either of the accompanying forms may be made to the Secretary at the offices of the Company, or to the bankers, brokers, and solicitors. But no application will be entertained unless the deposit of £1 per share on the number applied for has been duly paid to the Company's bankers; in the event of no allotment being made to the applicant, the deposit will be promptly returned in full.

FORM OF APPLICATION FOR SHARES WITH £5 PAID ON ALLOTMENT.

To be retained by the Bankers.

CONVERSION AND UNIFICATION of the INTERNAL DEBTS of the OTTOMAN EMPIRE into BONDS of the GENERAL DEBT, bearing interest at £5 per cent.

The announcement of the day fixed for commencing the Conversion has been delayed, in order to make arrangements to obviate the necessity of sending the original Bonds to Constantinople for verification.

The measures necessary for enabling the Bonds to be verified at the place of conversion are now so far completed that the Contractors are able to announce MONDAY, the 1st of August next, as the day on which the CONVERSION will COMMENCE simultaneously in London, Paris, and Constantinople.

Full details of the operation, with the necessary information for the Bondholders, will be published in a few days.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,

JAMES MACDONALD, General Manager.

GENERAL MANAGER—George E. Hudson, Esq.

TEMPORARY OFFICES—9 Waterloo place, Pall Mall, S.W.

PROSPECTUS.

This Company has been formed for the purpose of undertaking the business of agents and bankers to the army, navy, and civil service, in England, India, and the Colonies.

A new and important feature is the transaction of the agency, banking, and assurance of the navy, the army, and the civil service, by means of a *single* establishment. The arbitrary separation of the agency business of the two branches of the service is founded on no principle of necessity, economy, or convenience, and involves the expense of maintaining two establishments for purposes which can be amply fulfilled by one.

Arrangements have been entered into with an established army and Indian banking and agency firm for the transfer of its business. This will enable the Company, without incurring the large outlay incidental to a new undertaking, at once to commence operations, possessing as it will the nucleus of an extensive business.

The United Service Company will have the advantage of special professional knowlege and experience. The lucrative nature of an agency business is two well known to require exposition. Without entering into details, the known success of existing private establishments is sufficient to warrant confidence that a great and unusual liberality in the dealings of the Company, with its constituents will be not only compatible with, but directly conducive to, the interests of its shareholders.

A third object of the Company is to transact the usual business of Life Assurance in all its branches, and more especially to place within the reach of all members of the services the well-known advantages hitherto secured to members of the Indian services by the recently abolished Civil and Military Funds. This department of the Company will be under the superintendance of Major-General Hannyngton (late President of the Bengal Military fund), with the assistance of Lieutenant-Colonel Oakes; and Samuel Brown, Esq., of the Guardian Life Office (vice-president of the Institute of Actuaries) will be the Actuary. The opening, however, of the business of this branch is deferred until further arrangements have been completed, of which due notice will be given.

The concentration in one establishment, under one roof, and one efficient management, of the several objects of the Company as Bankers, Agents, and Life Assurers, will naturally tend to convenience and economy, and manifestly conduce to the interests of its constituents; while the efficiency of a large and competent staff, controlled by a professional body of Directors, supported by large resources, will enable the Company to carry on its operations, and the business entrusted to it with a promptitude and efficiency not to be attained by several separate establishments. In the filling up of any vacancies in the direction and administration, care will be taken to secure the services of men whose position and antecedents will give confidence to constituents.

These being the objects of the United Service Company (Limited), the Directors confidently invite the support and co-operation of the public generally, and especially of members of the Army, Navy, and Civil Service.

The present objects of the UNITED SERVICE COMPANY (Limited) are therefore:—

1st.—IN THE AGENCY DEPARTMENT—

The Regimental and General Agency of Regiments at home and abroad.
The Agency of Individual Officers, Civil, Military, and Naval.
Making Temporary Advances of Pay to an Officer.
Providing Naval and Military Messes and Officers with Mess Supplies, &c.
Negociating Exchanges, Retirements, &c.
Assisting Officers in the Purchase of Promotion.
Purchasing and Shipping Goods, &c., for Regiments or Officers at home and abroad.
Transacting every Description of Personal and General Agency Business.

2nd—IN THE BANKING DEPARTMENT—

Opening Deposit Accounts generally.
Opening Banking Accounts with Regiments and Naval and Military Officers and Members of the Civil Service.
Drawing and remitting Pay, Pensions, Dividends, Allowances, &c.
Making Advances on Approved Securities.
Effecting Sales and Purchases of British and Foreign Stock and Securities and investing the same.
Drawing Interest on Indian Government and other Securities.
Purchasing Approved Bills drawn against Funds, or against parties in India and the Colonies.
Transacting every description of legitimate Banking business.

Applications for shares, which must be made on the accompanying form, will be received by—

The Bank of England, Western Branch, Burlington gardens, W. (the Bankers of the Company).
The Bank of England, Threadneedle street, and all its country branches.
The Solicitors, Messrs Deane, Chubb, and Saunders, 14 South square, Gray's inn, W.C.
And at the Offices of the Company, 9 Waterloo place, Pall Mall, S.W.

FORM OF APPLICATION FOR SHARES.

To the Directors of the United Service Company (Limited),
9 Waterloo place, Pall Mall, London, S.W.

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of 10s per share, on shares of £10 each in the above Company, I hereby request that you will allot me that number; and I hereby agree to accept such shares, or any smaller number that may be allotted to me; and I agree to execute the articles of association when required, and request that my name be placed on the register of shareholders for the shares so allotted.

THE LONDON FINANCIAL ASSOCIATION, LIMITED,

Offer for Sale by Public Tender

£130,000,

Being the whole of the **A PRIORITY** STOCK of the

KETTERING, THRAPSTON, & HUNTINGDON RAILWAY,

Entitled under powers conferred by the said Company's Acts of Parliament to a perpetual dividend of 5 per Cent. per Annum,

Payable Half-yearly out of the Profits, in preference to the Ordinary Stock, and ranking next to the Company's Debentures.

Interest guaranteed by Messrs Waring, for Three Years, from 1st July, 1865.

By the following Prospectus is will be seen that the interest on the Debentures is £3,780
And on the A Priority Stock 6,500

Being together .....£10,280 annually, and as the line is to be worked by the Midland Company for seven years at 40 per cent., a gross receipt of 17,200*l* per annum will be sufficient to pay interest on the A priority stock as well as on the debentures.

The coal traffic alone is estimated to produce one-third more than the above amount, independent of the ordinary sources of traffic. The A priority stock is therefore most amply secured, and presents an eligible investment for trustees and other parties seeking a security paying a fixed dividend at a good rate.

With the view of removing any doubt as to the dividend, and in order to give ample time for the development of the traffic, Messrs Waring Brothers guarantee for three years the interest on the said priority shares.

Tenders for the whole, or any portion of the above stock, will be received at the offices of the Association, South Sea House, Threadneedle street, up to Tuesday, 11th July, at One o'clock, when the tenders will be publicly opened, and the stock will be allotted to the highest bidders, provided the prices offered are not below the minimum, which will be fixed in the usual manner before the tenders are opened. In case of equality of tenders beyond the amount required, a pro rata distribution on such tenders will be made.

A deposit of £5 per cent. must accompany each tender. The balance to be paid on the 18th of July, when the stock will be placed in the purchaser's name without expense.

South Sea House, Threadneedle street, 1st July, 1865.

KETTERING, THRAPSTON, & HUNTINGDON RAILWAY.

CAPITAL.

Debentures	£75,600
Priority or A Shares	130,000
Deferred or B Shares	100,000
Total	305,600

DIRECTORS.

General Arbuthnot, Woodford House, Thrapston, Chairman.
William Bunce Greenfield, Esq., 59 Porchester terrace, Hyde Park, W., Deputy-Chairman.
Thomas Pain, Esq., 22 Great George street, Westminster, S.W.
Valentine Hill, Esq., Kimbolton, St Neots.

ENGINEER—G. B. Bruce, Esq., Westminster Chambers, Victoria street, S.W.

SOLICITORS—Messrs Hodding Townsend and Co., 3 Princes street, Westminster.

SECRETARY—Arthur Lankester, Esq.

COMPANY'S OFFICES—No. 1 Poet's corner, Westminster, S.W.

This Railway has been constructed in the most substantial manner by Messrs Waring Brothers, within the capital authorised by the Acts of Parliament 25 and 26 Vict., cap. 173, 26 and 27 Vict., cap. 203. It is 26 miles long, running out of the Midland system at Kettering, touching the London and North-Western at Thrapston, and the Great Northern and Great Eastern at Huntingdon, and will be opened on the ensuing 1st of August.

The total share capital is £230,000. Of this, the A shares, amounting to £130,000, are entitled, under powers conferred by the Company's Acts, to a priority in dividend of £5 per cent., in perpetuity, ranking next after the debentures, so that they are substantially preference shares. Messrs Waring Brothers guarantee the interest on the A priority shares for the three years from 1st July, 1865. By the Acts of Parliament the liability of the shareholders is limited to the amount of their subscription in the usual manner. The B or deferred shares receive all the surplus after payment of 5 per cent. to the priority shareholders.

The Railway traverses one of the richest agricultural districts of England, in which also iron-stone and clay of fine quality have recently been developed. It is to be worked under Parliamentary sanction by the Midland Company, who, by agreement with the Great Eastern Company, have powers of running onward from Huntingdon, by St. Ives, to Cambridge, so that a complete and most direct connection will be established between the whole of the Great Eastern system and the manufacturing and mineral midland districts, including Derby, Leicester, Birmingham, Nottingham, Sheffield, and the Northern manufacturing population. A reference to the map will show the importance of the line as a connecting link between the centre and east of England. The Midland Company are to work and maintain the line for 40 per cent. of the gross receipts during seven years, and for 50 per cent. in perpetuity thereafter.

The traffic will obviously, therefore be large. It is believed, indeed, that the transport of coal alone will furnish a remunerative return upon the capital now offered to the public. The greater part of that traffic, now going into the Eastern counties by the circuitous route of Peterboro', must hereafter go via Huntingdon as its shortest and best course. This quantity is estimated at 300,000 tons a year, which, at the rate of three farthings per ton per mile, would yield 24,375*l* gross or 14,625*l* net after payment of working expenses. The net return on coal, therefore, after deduction of 3,780*l*, the debenture interest, would be 10,845*l*. To pay the dividend on the priority shares, only 6,500 (beyond the debenture interest) is required; so that, unless the anticipations of those best qualified to judge are greatly erroneous, there would be from the coal traffic alone a net surplus of about 4,350*l* annually beyond the dividend on the A priority shares.

And if the general traffic from passengers, merchandise, cattle, and iron ore, should realise only a net amount equal to that derived from the coal, the Company would have a clear annual income of £29,000 after deducting working expenses, whilst the first charges for debenture interest and dividend on these shares would absorb £10,300 only.

In short, a gross traffic of only £12 15s per mile per week (£25 per mile being the minimum anticipated by the most competent railway authorities) would suffice to pay debenture interest and a dividend of 5 per cent. on the A priority shares, after deducting working expenses at 40 per cent.

KETTERING, THRAPSTON, and HUNTINGDON RAILWAY COMPANY.

FORM OF TENDER.

To the Directors of the London Financial Association, Limited.

Gentlemen,—I hereby tender for £ of the A Priority Stock of the Kettering, Thrapston, and Huntingdon Railway Company, subject to the conditions contained in your advertisement of , 1865

At per cent. (Price to be inserted here.)

I enclose a deposit of £ , being at the rate of 5 per cent. on the said sum of stock.

THE HOP AND MALT EXCHANGE,

AND

WAREHOUSE COMPANY (LIMITED).

Incorporated under "The Companies' Act, 1862."

CAPITAL, £120,000, in 12,000 SHARES of £10 each.

Deposit £1 per Share on Application; £2 on Allotment. No Call will exceed £2 per Share, or be made at intervals of less than Three Months.

Interest at the rate of 6 per cent. per annum will be paid half-yearly on the Capital paid-up until completion of the Exchange and Warehouses.

DIRECTORS.

Sir Edmund H. K. Lacon, Bart., M.P., Ormesby House, Great Yarmouth.
William Portlock Dadson, Esq., Blackheath, S.E., and Otham, Kent.
Lieut.-Col. A. Dickson, M.P., Carlton Club, S.W., and Croome Castle, County Limerick.
Charles Kemp Dyer, Esq., Lloyds, E.C. (Director of the London and Southwark Insurance Corporation).
George Garraway, Esq. (G. Garraway and Co.), Lime street, E.C. (Director of the English and Scottish Marine Insurance Company).
Edward Lucas, Esq. (Messrs. S. Hayhurst Lucas and Son), Old Corn Exchange, E.C. (Director of the Merchant Shipping Company).
David Ogilvy, Esq., Sydenham, S.E. (Director of the Great Western Railway).
J. G. Tollemache Sinclair, Esq., Travellers' Club, S.W., and Thurso Castle, Caithness (Director of the General Irrigation and Water Supply Company of France).
Edward B. Tweedy, Esq., 2 Langham place, W. (Deputy Chairman of the Falmouth Docks).
Henry D. Gundry, Esq., Symondsbury, Bridport, Dorset (Director of the Bridport Old Brewery Company).

BANKERS.

The London and County Bank, Lombard street, and its Branches.
The National Bank, Old Broad street, and its Branches.
Messrs. Herries, Farquhar, and Co., St. James street.
Brokers—Messrs. Griffith and Burton, 5 Angel court, Throgmorton street, E.C.
Architect—Richard Henry Moore, Esq., 10 Walbrook, E.C., and Old Palace yard, S.
Manager—Thomas Slater, Esq.
Solicitors—Messrs. Thompson and Debenham, Salters' Hall, St. Swithin's lane, E.C.
Auditors—Messrs. Johnstone, Cooper, Wintle, and Evans, Coleman street buildings, E.C.
Consulting Architect—Charles Forster Hayward, Esq., Fellow of the Royal Institute of British Architects, F.S.A., Adam street, Adelphi.
Secretary (*pro tem.*)—Thomas B. Grobecker, Esq.
Temporary Offices—54 Threadneedle street, E.C.

PROSPECTUS.

The general body of merchants—the corn, coal, and other leading mercantile interests, have each their Exchange for the concentration and despatch of business. In this respect the hop and malt trades, embracing large and important interests, are deficient, and a suitable Exchange has become at length an imperative want which this Company proposes to provide.

Warehouse accommodation is at the present time also very inadequate to the wants of the trade. It is proposed, therefore, to construct warehouses of the most suitable kind, adapted not only to the stowage of hops, but also of malt and other produce compatible with the stowage of the former commodity.

For the purpose of carrying out these important objects a very valuable site of freehold land has been secured. It is situate at the corner of High street, Borough, and has a frontage of about 320 feet in the New Southwark street, and contains nearly 26,000 square feet, with a separate entrance into Park street, in the rear, towards the Borough Market.

The Building Frontages in New Southwark street (constructed by the Board of Works at a great expense) have been rapidly absorbed by capitalists and merchants for their own occupation and investment, and many very extensive buildings have been erected and are in progress; whilst the opening of Southwark bridge to public traffic has tended considerably to enhance the value of land in that locality.

The site chosen is without exception the most eligible in the Borough for the purpose of its "Hop and Malt Exchange," being exactly opposite the new premises of the "Hop Planters' Association," and contiguous to the offices of the leading merchants and factors, and the centre of the hop trade operations, and in immediate contiguity with the Borough Branches of the London and County, London and Westminster, and Alliance Banks.

The purchase by the Company is based upon a valuation made by the eminent surveyors, Messrs. Norton and Trist, of 62 Old Broad street.

The Exchange, in architecture, magnitude, and appointment, will be adapted to the extensive requirements of the trade, so as to afford every facility for the transaction of business.

The average annual produce of English-grown hops for the last ten years has been upwards of 300,000 cwts., the greater part of which came to the Borough for sale and distribution. This quantity has considerably increased by the cultivation of a larger acreage owing to the repeal of the Hop Duty, while, from the same cause, a proportionate increase in the importation of foreign hops has arisen.

By the proposed undertaking growers, merchants, dealers, and buyers will have all the advantages of a complete and well-attended market close to the termini of all the railways which pass through the hop-growing districts of Kent, Surrey, and Sussex, and will thus be enabled to avoid the trouble, expense, and loss of time incurred in visiting hop merchants' counting-houses in various parts of the Borough. Ample space will be provided for private and general offices, stowage of stock and samples, and show rooms, together with every requisite for the complete accommodation of tenants and shareholders.

It has been the custom to purchase hops only at certain times of the year, but the importation of foreign hops, the establishment of an open market, and the introduction of malt and barley trades will no doubt change the practice, and render weekly transactions a necessity.

Subscription and refreshment rooms will also be provided; and an eminent firm of refreshment contractors are prepared to rent the latter on satisfactory terms; and it is also proposed to establish a club for the convenience of growers, country dealers, and brewers.

The greater portion of the buildings will be devoted to properly classified fireproof warehouses and offices, especial care being taken in their construction to adapt them for Hop Merchants and Malsters; they will also be suitable for other trades for which the accommodation in the neighbourhood is at present very inadequate; and from these sources alone a revenue will be secured far exceeding the ordinary return on building investments.

Estimates have been prepared with great care, and after making liberal allowances for all contingencies, they show that the income which may reasonably be expected, from these different sources of profit, will be not less than 20 per cent.

Referring to the Corn Exchange, and the value of its shares as compared with the original cost, it appears that the original £100 shares are now worth £1,350, and difficult to obtain even at that price; so that this Company, taking for its model the principle of that establishment, adapting it to the special nature of the commodities for which it is required, and availing itself of the improvements which experience at all times affords, promises to become one of the best investments in the kingdom.

There will be no promotion-money paid, the necessary outlay for the establishment of the Company only being incurred.

In the event of no allotment being made, the deposits will be returned in full. Should a less number of shares be allotted than applied for, the deposit will be appropriated towards the payment on allotment, and the balance, if any, returned to the applicant.

The Articles of Association, agreement for the purchase of the land, and Messrs. Norton and Trist's Report, may be seen at the Solicitors, and at the temporary Offices of the Company.

Forms of application for shares may be obtained at the Offices of the Company, and of the Brokers, Bankers, and Solicitors.

(To be retained by the Bankers.)

FORM OF APPLICATION FOR SHARES.

THE HOP AND MALT EXCHANGE AND WAREHOUSE COMPANY, (LIMITED).

To the Directors of the Hop and Malt Exchange and Warehouse Company, (Limited).

GENTLEMEN.—Having paid into your Bankers the sum of £ being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept the same, or any less number you may allot me, and to become a member of the Company, and to pay the former sum of £2 per share due on allotment thereof and the Calls when due from me. And I authorize you to place my name on the Register of Members for the shares so allotted to me.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE PROBABLE RESULT OF THE ELECTIONS.

VARIOUS statistics float through "well-informed circles" as to the probable effect which the impending elections will have on the division of parties and the structure of the House of Commons. But really well-informed people do not attach much importance to such figures. Conjectural statistics are at once the worst of conjectures and the worst of statistics, and those who can prophesy with confidence the aggregate result of many local skirmishes, must have wonderful faith in the accuracy of their information, or in their capacity for divination. Those who know how much depends on the skilful use of "certain means" at the very last moment will prophesy nothing as to many boroughs.

But we venture to foretell one or two things resting on broad and plain facts, and not to be disturbed by the blunders of Attorney B or the skilfulness of Attorney A. First, we believe that the next Parliament will wholly resemble the late Parliament in its most conspicuous bias—in its utter indisposition to organic change. The Radical party may gain or lose. We are inclined to think they will *rather* lose; but four or five votes more or less are, for practical purposes, wholly immaterial. The weight of the party opposed to sweeping constitutional change is so enormous that a slight addition to it, or a slight diminution of it, will be imperceptible. No one who looks at the addresses of members, or who has tested practically the feeling of constituencies, will for an instant believe that in the Parliament now to be elected, a sweeping constitutional innovation will be more possible than in the last. The maxim we have heard a shrewd observer lay down, "If you want to destroy a Government prepare a "Reform Bill," will be true of the Parliament to come; as of the two or three last Parliaments which are past. Every Reform Bill must hurt "somebody," and that "some-"body" will be earnest against it, and though it may not be possible overtly to destroy the Government, it will be possible quietly and on a different matter to destroy the Government. The opposition to broad democratic doctrines is far more apparent than it ever was before. The present Liberal candidate for Stafford—Alderman Pochin, a type of the business class—puts forward views of the suffrage which all such men would have laughed at five years ago. Nobody in the manufacturing districts or in any district is ready to give the working classes or any other single class predominant or exclusive power.

Secondly. We fear the unintellectual element will be as powerful in Parliament as ever. We do not now speak of the possible election or the possible rejection of various men of the highest culture and attainments who are now addressing various constituencies. We hope they will be successful, though in some cases we cannot expect it. But even if these new intellectual elements enter the House of Commons, the resisting medium, the impenetrable *un*intellectual element, will be as serious as ever. There are three most potent causes which bring into Parliament men often of the greatest respectability, and always of undoubted gravity, but in general defective in advanced culture and legislative originality of mind. First among these is the appetite of certain men of business to get into Parliament for business purposes. It serves the purpose of a man engaged in companies and speculation—very likely legitimate and very profitable—to become a member of Parliament. He gets in that way more of those profitable and legitimate directorships. He sells his membership in the city, and in such years as 1863 and 1864 he may make a good deal of it. Again, there is a vast desire, on the part of new wealth, to obtain the unknown good of social distinction. There is a "kept down" feeling on the part of people who can "buy up" half the world which keeps them down. The possessors of created riches do not as a rule associate on terms of exact equality with those of inherited riches. Perhaps they cannot do so; but they get as near as they can by becoming influential members of Parliament. They attain at least to the exterior of aristocratic society, and they perhaps hardly know that there is an interior still withheld from them. Though there is an end to its effect, there is no social transition to an ordinary man of business, such as he gains at once by being a member of Parliament.

These two causes combined, and perhaps a vague confused ambition from which the most exact men are not exempt, bring into Parliament a great number of new men of business, who, as Mr Bright once said, "look as if they did not quite know "what they came there for," and who do not contribute to the intellectual culture of the House. They have excellent ideas as to their own business to which they have been accustomed, but they have very few, and those bad ideas as to the subtle and new political business to which they have not been accustomed.

Digitized by Google

They know what they *were*, but they hardly understand what they *are*.

There is, indeed, a tendency on the part of young men of business connections and inherited mercantile wealth to try to come into Parliament, which is most valuable. It would be absurd to give any class credit for the peculiar ability which Mr Goschen has exhibited. Within four years he has shown that he can write an excellent book on Political Economy; that he can make admirable speeches, or what is more difficult, attain real and diffused influence in Parliament; that he can, under trying circumstances, most adroitly and skilfully manage a contested election. Such an adjusted combination of various qualities has very rarely been displayed by a man still under thirty-five. Of course, no class, no *number* of men can be expected to do anything like this. But still he is but the best specimen of a great series. If rich young men of high culture, business traditions, and practised ability take to coming into Parliament, it is difficult to see a limit in political life beyond which they cannot go. The Liberals in South Lancashire have shown excellent judgment in bringing forward Mr Henry Thompson, an accomplished young man of this class. His opinions at present are extreme, but where there is real mind, error is momentary, though culture is permanent. There are still but few specimens of this excellent class to break the intellectual monotony of Parliament,—still there is an increasing number, and we should be thankful for it.

Besides the sinister influences on the structure of Parliament which we have enumerated, there is another, the augmenting strength of *local* influences. In the counties this has long been paramount, and is a principal cause of the intellectual inferiority and political subjection of the Tory party. The counties commonly will not choose any one who has not a good estate in the county, and the inevitable result is the long row of respectable but mediocre gentlemen who fill the Opposition benches. If the Tories brought in young men of ability for the counties, the Liberals could scarcely stand before them. Unfortunately, the same local influence is spreading into the constituencies which are the strength of the Liberals in the boroughs. In almost every one there is some one who thinks he "is as good as or better than any one Mr Brand can send down." The man on the spot with little culture is, for election purposes, more efficient than the man from London with much culture.

This weakness in the intellectual constitution of Parliament is always to be regretted, but more than ever to be regretted at the present moment. Our statesmen have now the most difficult of tasks, a *creative* task to perform. The present constitution of Parliament contains great defects which no one denies, but which no one knows how to remedy. The working classes ought to have some power in the State, but neither the whole power or the promise of the whole power. The new wealth of England ought to be more represented and the mouldering towns of the south-west of England ought to be less represented, but at the same time we must not give the electoral sovereignty of the great seats of the new wealth to the poorer classes who crowd there in great numbers, but who have little share in that wealth. We must not lose the class of member the small town brings in, though we cannot hope much longer to retain the small town which brings them. An intellectual Parliament was never more requisite, and a predominantly unintellectual Parliament was never more certain.

As to what many people think the most important question —the effect of the election on the comparative strength of Liberals and Conservatives,—we have no faith, as we have said, in the exact figures which float through clubs and other such places, but we have not much doubt that there will be some moderate increase in the Liberal majority. A year or two ago the Conservatives always said that if there was an election they could turn the Liberals out; now they say "Ah, we shall see the result next week;" their confidence is destroyed and their hesitation is begun. Two great changes have happened. The Roman Catholics have come over to the Liberals, especially in Ireland, and the Conservative reaction, caused partly by Mr Bright's speeches and partly by the American war, has in part died away. The *fright* is passed, and thinking men are no longer scared into Toryism by the tone of democracy. Two years ago, therefore, the Conservatives would have gained on the Liberals, but now the Liberals probably will gain upon them.

LORD WESTBURY'S RETIREMENT.

The House of Commons has done its duty, and Lord Westbury is no longer Chancellor. It expressed a strong conviction—founded on an accumulation of circumstances, as to the general significance of which there really is, and scarcely can be, any difference of opinion—that Lord Westbury was unhappily surrounded by such an atmosphere of jobbery and corruption, and had, in condoning grave offences and in lavishing the public money on unworthy and defaulting recipients, displayed so much laxity of principle or such a fatal facility of temper, that his continued retention of the high office which he filled would be detrimental to the public service. He at once bowed to the decision and retired. Justice having been thus done and public morality thus vindicated, and Parliament and the country having cleared themselves from any suspicion of indulgence towards those disreputable transactions, it is but fair to Lord Westbury to distinguish clearly what his share in them amounted to. In one sense he is much to be pitied; for he has suffered much and has gained absolutely nothing. No one for a moment has even hinted at any participation on his part in illicit gains. No one even suspects that he was in the least degree aware of the corrupt bargaining between his son and Mr Welch, or of the underhand intrigues and manœuvres of Mr Miller:—indeed, it is obvious that considerable pains were taken to keep them from his knowledge. He has, no doubt, bestowed several lucrative posts upon his own relations and connections, but every Chancellor does that, and it is not alleged that Lord Westbury's nominees have been positively or comparatively incompetent. Every place which he gave away became vacant naturally or by the delinquencies of its previous holder: Mr Edmunds, Mr Wilde, and Mr Payne must all have resigned or been dismissed, even if the Lord Chancellor had sternly refused pension, indulgence, or *locus pœnitentiæ*. He might have cashiered them all with perfect justice and filled up the places as he liked;—the only difference would have been that the vacancies might have taken place a few weeks later and have given him somewhat more trouble in the process of vacation. His offences, so far as he is concerned, have been purely gratuitous. They consist in this: that he entertained no such high sense of official purity as to be inclined to visit some flagrant lapses from it with severe punishment or reprobation; and that he gave away pensions to men who had forfeited all claim to them with a reckless disregard of the nation's money, of which he was a trusted guardian; and that by both proceedings he thus lowered the standard of public morals, and almost encouraged defaulters to expect impunity. All this is grave enough; but beyond this the charge against him cannot be pushed.

We heartily congratulate the House of Commons on its vote, and the Government on its defeat. Any other result would have been mischievous in the extreme. To have exonerated the Lord Chancellor would have been almost equivalent to an announcement that official malpractices even when found out would be condoned, and that dismissal could be escaped by timely retirement on inadequate excuses;—at least in all departments connected with the law; and the laxity thus encouraged must sooner or later have spread through all other branches of the Civil Service,—for why a clerk in the Customs or Excise should be severely dealt with for offences for which a barrister is simply pensioned off, no one would be able to explain or to defend. To have done nothing, to have kept silence, even to have adopted the whitewashing resolution proposed by the Lord Advocate, would have made the House of Commons almost a *particeps criminis:* it would have been a sort of proclamation that they took Lord Westbury's lax and lenient views of public duty, and were not inclined to be very vigilant guardians either of the public conscience or the public purse. As for the Ministers, having declined to accept the Lord Chancellor's proferred resignation, they probably had no course but to make the best defence they could for their colleague, to urge that his great services should be set off against his manifest short-comings, and to plead multiplicity of business as an excuse for culpable negligence and careless morality. But it would have been a great misfortune if they had succeeded,—if circumstances should have sent them before the country as apparent defenders or condoners of official misfeasance, and placed their antagonists in the unwonted and advantageous position of upholders of high principle and official purity. It was a great misfortune that they should

Digitized by Google

have had to defend such a case at all; but as matters have turned out, no one will think hardly of them because, in a very difficult conjuncture, they have followed the instincts of gentlemen and the practice of Ministerial life, and stood loyally by a colleague who had got them into a scrape. It is also a matter of much rejoicing that Mr Bouverie's speech and amendment should have come in to rescue the decision of the House from the character of a party vote. The Opposition brought forward their motion, beyond question, as a mere party move,—and a most skilful and well-timed party move it was; but they could not have carried it by their own strength; and it was owing entirely to the votes of a number of the usual supporters of the Government, and to the strong sense of disgust and indignation which pervaded the Liberal ranks, that we are indebted for the recent decision which has redeemed the character of the House and of the country.

We cannot regret the retirement of Lord Westbury, but we do most deeply and sincerely regret, both for his own sake and for the country's, that he should have so acted as to render his retirement necessary. He will be greatly missed. As a legal intellect he has had few if any equals. As a Law Reformer, perhaps no one in recent times has approached him in grasp of mind and sagacity of plan; and as he worked a great deal through others and left to others the details of simplification and arrangement, and as he will no longer be in a position as a private Peer of Parliament to command the services of these *collaborateurs*, we fear that much of his special value to the cause will now be lost. As a man of the world, who took a widely liberal and essentially *lay* view of the great ecclesiastical controversies of the day, he has been useful to a degree which it is not easy to estimate too highly;—and his Bill for the sale of small livings in the gift of the Crown for the sake of improving the pay of other clergymen, by which he surrendered a very considerable amount of the patronage attached to his office, ought not to be forgotten among the list of his good deeds. His great defect, which has proved enough to counterbalance his wonderful intellectual gifts, and to which he may be said ultimately to have fallen a victim—has always been a sort of deep-rooted and insolent cynicism, mental and moral, a profound contempt for the understandings and the sentiments of other men and of the world at large, which no mellowed sagacity and no kindly feeling ever withheld him from manifesting in season and out of season. He was never very successful in making friends, and he has habitually gone out of his way to make enemies. His punishment is a very heavy one. There are few more painful positions in life than that of a man in the prime of mental vigour and conscious of unrivalled powers—a man who loves work, and loves little else—reduced to inaction in the middle of a great career;—and few bitterer reflections than the thought that he owes this fall to his own errors, and to errors by which he has not profited, and which he might so easily have avoided. Let us hope that he will endeavour to redeem these faults by renewed and unflinching devotion to the cause for which he has already done so much. The English people forgive easily and forget soon; and they will pardon much to a man who shall really simplify our intolerably cumbrous and costly system of Law and Justice.

This matter ought not to be allowed to end with the vote of the House of Commons and the resignation of the Lord Chancellor; for the whole system has been proved to be vicious and faulty, and Lord Westbury, though the highest, is not the chief offender. It is certain that pensions ought not to be granted on the fiat of a single man. In other branches of the Civil Service no retiring officer can obtain a superannuation allowance except after the most searching investigation into his character and services and the nature and validity of his medical certificate. Neither Mr Winslow, nor Mr Edmunds, nor Mr Wilde, could by possibility have obtained a pension from the Treasury. In no other branch of the Civil Service, except those under the management of the great law authorities of the realm, would any officer under charge of delinquency ever be permitted to evade disgrace by voluntary resignation. What course ought to be pursued in regard to the various subordinate officers implicated, we do not pretend to be qualified to determine,—whether Mr Harding, Mr Welch, and Mr Bethell ought to be prosecuted for corrupt bargaining and conspiracy; whether Mr Wilde and Mr Winslow should be suffered to retain their pensions which they should never have been suffered to obtain; and whether Mr Miller, whose jobs, committed and meditated, seem to be very great, ought not to be called upon to resign without a pension,—are questions for the Government to consider. But assuredly the affair must not rest here. The public have had a glimpse of the rotten condition of the Bankruptcy Courts and those connected with them, which justify, or appear to justify, the very worst suspicions, and they will not and ought not to be satisfied till the whole subject is sifted to the bottom.

THE MEANING OF THE RECENT CHANGE IN THE AUSTRIAN MINISTRY.

The Emperor of Austria, a statesman whose abilities and character are somewhat unfairly depreciated in this country, is about to try a political experiment of very singular interest. The policy under which his Empire has been administered for the last sixteen years, the policy that is of regarding all the estates of the House of Hapsburg as a whole, one and indivisible, has broken down. It had the approval of the Germans, who hoped by its means to raise themselves into the position of a dominant caste, but was distasteful to the other nationalities included within the Empire, and more especially to the inhabitants of Hungary, who, numbering some twelve millions, and sustained by a strong feeling of patriotism, resolutely refused to amalgamate with the remainder of the Empire. As Hungary, however, could not openly rebel, and the stake, if it could be won, was very great, the Emperor persevered, governed all his territories from Vienna, tried to induce them all to send up deputies to a common Parliament, and called to his Cabinet M. von Schmerling, a statesman devoted to constitutional government and the unity of the State. Under this gentleman, a Parliament attended only by German, Bohemian, and Gallician deputies was brought into working order—such order that it has this session compelled the Court to commence serious reductions—and the remaining kingdoms have been retained in a discontented but passive subjection. The system, however, could only be worked through an immense army, most of it wasted in internal garrisons, and a civil service overloaded with paid officials, the gentry being untrustworthy, and the expenses increased on the revenue till members of the Chamber of Peers began to admit that bankruptcy was at hand; till the Cabinet allowed that taxation had reached its limit; and till "extraordinary "expedients" were required merely to meet the interest on the debt. It became necessary to make a change of system, and the Emperor after long consideration has apparently resolved to try a singular experiment, to establish a representative Government in each State, with himself as federal head. The Reichsrath it would seem is not to be abolished, but to legislate only for the provinces which sit in it, and the Hungarian Diet is to be revived. As the Hungarians have announced that they will not abnegate their own independence, there can be no common chamber at the head of all, and the really national work must be performed by the common Sovereign assisted it may be by a council, but not controlled by one. In other words the Emperor is trying to establish a Federal Government, with a Sovereign instead of a Congress for its *nexus* and general head.

At first sight it does not appear impossible that such an experiment should succeed. There has, it is true, been no example of it in Europe since the German Empire became a phrase; but one can conceive of the American President working on for many years without a Congress, but with a President seated for life and possessed of the whole executive power. There is no doubt moreover that such a Sovereign, if absolute, could govern all his States without any serious difficulty, yet administer each in accordance with its national feeling, for this has been done many times in Austria itself, and the addition of Parliaments does not appear greatly to complicate matters. Why should not two States quite independent of each other form a strict offensive and defensive alliance under a common head? This first view, however, will, we suspect, be found fallacious. A Parliament, or Reichsrath, or Diet, or other representative body, to be of any use at all, must be in some kind of accord, more or less close, with the Executive Government, and it is nearly impossible for two or three such bodies long to remain so with the same executive chief. They are certain to have different tendencies, interests, and ideas, and as the Sovereign cannot respond equally to all he is sure, sooner or later, to come into collision with those which he re-

Digitized by Google

gards least. England and Scotland, for instance, differed as to the dynasty, England and Ireland as to the limits of local and imperial jurisdiction, and in each case it was found necessary, if peace was to be preserved, to abolish the separate representation. A Sovereign may indeed legislate for one State on principles differing from those on which he relies in another, but he can hardly be equally successful in inducing local Parliaments to move upon the same path. For instance, the Reichsrath desires the system of strict protection, while the Hungarian Diet is all for free trade. Each will expect its Sovereign to assist it in obtaining its end, and which way is he to incline? Supposing him impartial each will have its own, but then will the Reichsrath consent to remit the most stringent precautions along the German frontier, or the Hungarian Diet exert itself to put a stop to smuggling by land. Clearly they would be most inconsistent if they did, and here at once will be a perpermanent source of bitterness. The Emperor, if absolute, could no doubt either force the system of the stronger on the weaker, or devise a compromise, or even administer two opposing systems, but no Parliament ruling only part of the Empire can do any one of the three. Then as to foreign policy, it is highly probable Hungary and the German States would take utterly different views of the Eastern question, Hungary being willing to spend and be spent in the effort to acquire the mouths of the Danube, while the German States would dread that achievement as placing the pivot of Austrian power outside Germany. If each representative body were really free we should see the Diet voting supplies which the Reichsrath refused, and the Government, pressed by all the obligations which weigh upon a great Empire, yet wielding only one-half its strength. In the Italian quarrel the cases would be exactly reversed, the Germans sincerely believing that the possession of Venetia is essential to Germany, and the Hungarians being bound by sympathy and by honour to let the Venetians go. Then there is the whole question, so interesting to every Hapsburg, of influence in the Germanic Confederation, the Hungarians neither wanting it nor wishing for it, the Germans deeming it incomparably the first object of imperial policy. How are these things to be reconciled even if there are only two Diets, if the smaller States, that is, are sunk in one or other of the greater divisions? while, if they are not so sunk, the difficulty of course is immensely increased. The natural tendency will be to avoid conflict by exaggerating monarchical power; and in matters of foreign policy and of conscription this may be possible, but there remains the fundamental question of finance. On this point monarchical power is never sufficient to itself,—why, it would take a volume to explain. It is, however, a matter of fact that the strongest despots in Europe or Asia are, when compared with Parliaments, feeble tax-gatherers, that Napoleon cannot impose new taxes, and that the Russian treasury is in perpetual want of money. On this point, therefore, the two representative bodies must be left alone, and on this point they are almost certain to clash,—clash so severely as to make an Imperial unity of strength, and of policy all but impossible.

Still the experiment will, it seems evident, be once more tried, for the new Premier of Austria, Count Belcredi, is understood to be a Federalist, and the Emperor has overthrown a Ministry in order to leave himself free to conciliate the Hungarians. They ask as a preliminary that their constitution should be recognised, and that involves the recognition of independence. As the Government has shown no intention of suppressing the Reichsrath, two bodies there must be, and the only doubt is the possibility of placing a free Parliament above both. To that the Hungarians say they will not consent, and if after the Diet has met they adhere to that resolution, the Emperor will be compelled to try the novel and difficult experiment of governing half a dozen free States without any common link other than his prerogative.

WESTMINSTER AND MR MILL.

We do not wonder to find Mr Mill saying in his able speech on Wednesday night, that it will be personally a great sacrifice to him, after just obtaining his release from the public business of the India Office, to devote the new leisure he has thus obtained for thought and study to the busy life and short-lived interests of Parliamentary discussions. We think those who know Mr Mill's writings the best will be the last to make up their minds that the exchange will even be a certain gain to the public,—not certainly because Mr Mill's mind is not full of valuable political material, but because it is so full. If we had to consider no other question than this,—whether Mr Mill's time will be employed to the same advantage in studying the details of political life and contributing to the wisdom of Parliament directly, as it would be employed in instructing the thinkers alone, through the medium of the press, we should not be at once prepared with an answer. It does not need a great thinker to apply the thoughts to which he has given currency to the legislation of the nation; but it does need one to give currency to thoughts which determine the future conditions of political problems at all. If we merely ask how the maximum of intellectual, perhaps even of political, teaching is to be got out of Mr Mill, we do not doubt that it would be by leaving him undisturbed in the leisure which he has so recently gained and already so brilliantly used. But that is not really the main point to be decided. What we hope to gain by Mr Mill's election for Westminster is not perhaps the maximum of benefit which his intellect is capable of rendering to the public, but the setting of a new example to the greater constituencies—the example of returning to Parliament men eminent for political originality and depth of thought, without regard either to local influence, wealth, or party zeal. No doubt this is, to some extent, a modification of our representative system. Few Westminster men—not even those who admire Mr Mill most profoundly—will think of him as their *representative*. What Mr Mill will enter the House, if he does enter it, to do, is to represent no one but himself; and it is that he may represent himself, and not them, that thoughtful men are now voting for him. As Professor Masson said the other day, in proposing him to the meeting, if he differed from Mr Mill in 49 questions out of every 50, he should still vote for him, because he thought that Mr Mill's presence in Parliament would add more to the deliberative wisdom of that body than the presence of any man who should advocate his own creed in every one of the fifty questions. And this is, no doubt, the true ground on which to return Mr Mill. But it is clearly an attempt to introduce a real reform in Parliament without any organic change by introducing a new habit of thought into some of the constituencies, and persuading them now and then to vote, not for the man who will most nearly represent their own principles, but for the man who will contribute most to clear up the true principles of political action. Hitherto, though wise men have always resisted the theory of delegation, and always maintained that a representative should be left really free to deliberate on the practical application of his own principles with his colleagues in the Legislature, yet every one has supposed that a constituency ought to be perfectly satisfied of its representative's substantial agreement in principle with the majority of the electors. Without that, clearly we might get a very able and thoughtful House of Commons, but we should not get a very complete copy of the country's mind. Without that, we might have a thoughtful Government, but certainly not *self*-government. And no doubt, for the most part, it is quite right that a constituency should agree substantially in opinion with the men whom it sends to Parliament to speak for it. Indeed, the tendency, especially among the advanced Liberals, has been far too strong in the opposite direction,—the direction of turning the representative into a mere mouthpiece of the electors, and making him simply register their convictions, instead of freely deliberating on his own. This is a far worse evil in the opposite direction than a failure in the *representative* function of Parliament through reposing too great a trust in individual powers, for its tendency is to divorce the *reason* for a vote from the vote itself, to overrule reasonable objections in the mind of a delegate by the force of that popular authority which may not have been founded in reason at all but only in prejudice.

Now, it is clear enough, that if this latter tendency of thought is spreading, as we have reason to think it is, the greatest silent reform we could possibly effect would be to leaven Parliament with a little really deep and really independent political thought that is not absolutely bound down to meet the views of any constituency, in the person of distinguished men, who may be at liberty to express, and who may have courage to express their own honest views, however novel and individual, on all subjects that come before them The return of such men to our Legislature may or may no

Digitized by Google

increase its representative accuracy. Independent minds of this kind, as we may see in Mr Mill's case, will on some subjects represent the otherwise unheard and non-electoral classes better than any of the representatives of existing constituencies, simply because such independent and unfettered minds are predisposed to look beyond the range of views familiar to electors, and to sift, so far as they can, the opinions which have gained as yet the fewest Parliamentary spokesmen. Mr Mill certainly would be about the ablest representative the working class could get for some of their characteristic views, their preference for co-operative labour, their belief in the use of organised trade societies, their sympathy with the free labour of the Northern States in the struggle with the slave-owners of the South. On all these subjects Mr Mill, though he should be returned by constituents, all of whom differed from him "in forty-nine questions out of every fifty," would *happen* to represent the non-electors, and so to increase the real representative efficiency of Parliament, by virtue of his very failure to represent his own constituency. But then the reason he would happen to do so would be simply that he had travelled wider in his intellectual voyages than most other members, and had considered more closely opinions with which, as not congenial to their political sphere, they had not troubled themselves.

It would undoubtedly be a very great silent reform in itself, if we could establish an honourable rivalry amidst the big overgrown metropolitan boroughs, in the effort to return distinguished men who would contribute something to the general intellectual stock of Parliamentary ideas, rather than minutely represent the electors' views. Parliament has hitherto been far too deficient in thought of this calibre. Some really eminent man must sacrifice his leisure and opportunities of study to lead the way, for without an eminent man, no constituency will ever set the example. But if Westminster ever returns Mr Mill and reaps the credit of his lucid and thoughtful speeches in Parliament,—it is very likely that though, as regards Mr Mill's own labours, the public may be the loser, they will reap an immeasurable gain in the new field of choice open to such constituencies through their assimilation of the new idea that they would do better to choose a great political thinker and return him in full political independence to Parliament, whether he quite reflects their principles or not, than to look out exclusively for men who will spend time upon their local affairs and will register their political votes in accordance with the wish of the majority.

The only danger in selecting this class of self-representatives for Parliament, would be lest the constituencies should go too far afield and choose eminent men at random, whether eminent for political wisdom or not. At all events there is no danger of this with Mr Mill. He satisfies all the conditions of such a choice. He is beyond the day in which he lives, in all departments of thought which are especially needful in modern political life. No department of thought has recently influenced Parliament so much as political economy, and Mr Mill is the most accomplished economist and the most popular exponent of economical truths in England. Again, the old narrow school of political economy has run out to the end of its tether, and we want men who can see its shortcomings as well as its great services. Again, Mr Mill's is the name to which every one immediately refers to do both, for he has shown that he understands the limits of the old economic theory, and the directions in which the new one needs extension. On the literature of the Reform question no man has thought more deeply or written more lucidly. On the limits of the rights of society over individuals, which are now constantly discussed both in discussing the question of compulsory education, of punishment, and of the Maine liquor law, Mr Mill is the one political authority in England. On the meaning of the principle of non-intervention, again, he has spoken more clearly and consistently than the ablest of our statesmen. There is no one great political question of recent years to which Mr Mill has not contributed fresh light, and therefore we say he is certainly the true candidate to tempt the great Parliamentary constituencies into a change of policy,—into giving us a few celebrated men in the House of Commons who are neither delegates nor even representatives, but new deliberative powers advocating the views they have themselves worked out, not because they are popular, but simply because they are true. If Westminster returns Mr Mill, as we trust it may, in preference to Mr W. H. Smith, whose great boast it seems to be that he believes in nothing particular,—it may be the beginning of wholesome rivalry in a policy likely to produce better results in Parliament than even the best conceived Reform Bill.

Agriculture.

BRITISH AND FOREIGN GAME-PRESERVING.

BATTUES.

MODERN game-preserving is essentially a barbarism. It is no longer sport or the means of sport, such as formed the amusement of English landowners of the last century. Besides, it is wholly unsuited to the state of rural property and rural society in England or Scotland. The whole system of modern game-preserving, with its battues and sales to the poulterer, is an adaptation from the continent. It is utterly un-English, and is as puerile as it is brutal.

The chief difference between a British battue and a continental one is, that here hares, rabbits, and pheasants are driven by beaters across the area of vision of a battue-shooter, while in the continental battue the game commonly consists of deer, boars, and such larger game animals. On the continent the scene of the battue is some vast forest or tract of enclosed or wholly wild land, which has been devoted by the proprietor exclusively to the object of preserving his game. And though we may marvel at the taste which induces men of station and education to perform literally the office of butchers, it must be admitted they have the strict right to devote their land to the providing for them their blood-shedding field-days. And something of this kind is being attempted in Scotland, where deer forests have so largely been substituted for sheep, as sheep had previously been substituted for men. In this country, however, the game preserved for the battue is not reared by the game-preserver on land in his own possession, but on land which he has let to tenant-farmers, who have to pay his rent and make their livelihood by means of their own capital.

The English or Scotch battue, besides being a barbarous anachronism, is provided, by means of gross—in many cases dishonest—wrong to the occupiers of the land. We know, it is said, farmers have themselves only to blame for taking farms on which the game is reserved to the landlord, and we have frequently and strongly urged that argument on the attention of the agricultural community. But the modern or continental system of game-preserving has grown up in this country gradually, and during the last thirty years our whole agricultural system has been so anomalous and transitional, that in the struggle and competition for farms, farmers have not fully understood what they subject themselves to by taking a game farm, and when they have done so they commonly find it too late to retrieve the error. It is no light thing to go into a farm and get out of it again. Such an operation can never be effected without a considerable loss of capital, and in general the farmer, especially the farmer who has taken a farm on a game-tainted estate, has no capital to spare. Thus he goes on hoping against hope, until his substance has been drained into the poulterer's shop, and he has himself emigrated or sunk into the class of labourers.

In Scotland, however, the farmers are awakening to the necessity of exerting themselves on the game question, and of making their views tell upon the forthcoming elections. We recently mentioned a meeting of the farmers of Kincardineshire to discuss the Game Laws in connection with the next election for that county, and in the report of an adjourned meeting we find some statements made in a plain and practical way, which place the modern battue system in a striking and very odious light. As would be expected by any one acquainted with farmers, they tried to suggest various palliatives, and knowing how tenacious landlords are as to their game rights, talked more of such changes in the law as would enable a farmer to recover compensation for game damage, than of any sounder or more complete alteration. Thus, Mr Greig said, "the great matter for our consideration is to get compensation speedily for damages by game.....to make such amendment [of the Game Laws] that we might easily get compensation without a deal of litigation." But, then, supposing a law for compensating farmers for damage done by their landlords' game to be got from a Parliament of landowners—a strong hypothesis—how are such damages to be ascertained?

Mr Allan said, "Its very difficult for a man to come and say what is the damage to a farm, when that [the growing corn] is eaten from the length of your forefinger till its hairst-length. No one can see what is the real damage." Then Mr Greig suggested they might be allowed "one-half [of the rent]," to which Mr Allan replied, "a half is too little for the rack-rent." Then they fell to talking of the increase of the evil of game-preserving during the last few years, and Mr Adamson said, "formerly proprietors did not sell the game, but gave it to tenants or their friends, which greatly modified the grievance of which they (the tenants) now complained; when the landlord sold the game, they made a deal of money by it." Mr Taylor thus stated the facts as to a farm "Drumtochty," which had been several times before referred to. "Mr Thom, the tenant, often applied for compensation for damage

Digitized by Google

from his landlord, but was refused. It was ultimately agreed that he should be recompensed according to valuation. The rent of the farm was 400*l*, the estimated damage the first year was 220*l*..... The next year the damage was 150*l*, and year after year it was valued, and decreased very considerably, but was never less than 50*l* a year till the end of the lease in 1849." Mr Greig spoke of his own losses by game on the same estate, and Mr Taylor gave the following as the subsequent history of "Drumtochty" farm :—"The farm was advertised, and the present tenant came from a district of the country where there was no game-preserving, and offered for the farm. The landlord assured him he would have no ground for complaint, as the game would be kept down to 'a reasonable extent,' or something of that kind. The man was assured he would not have much game. He signed the lease that he would have no claim against the landlord, and now he might possibly be eaten up 'stoup and roup.'" Then, Mr Anderson referred again to what is the real difficulty in the way of ascertaining the amount of game damage, saying, "he did not believe any man could tell what damage was done by game, for the most damage was done after the crops were briering, by picking off the green blades. He did not believe the farmers looked to this, but it was a fact, and the hens [pheasants and grouse] would eat it off, for they would have meat if it was there. Could any man appraise that? Was it possible?" Again, as to winged game, Mr Alexander said "that in the neighbourhood of large preserves—such as Arbuthnott, Drumtochty, and Powis, where the pheasants were as numerous as crows—the tenants suffered as much from these as from hares and rabbits." They also complained that the Game Law should be administered by the landowning magistrates, all more or less interested in game-preserving. "If," said Mr Greig, "we were in the hands of the Sheriffs, we would be all right." Mr Reid, an occupier on the Powis estate, had sustained damages capable of being estimated to the extent of 200*l* per annum for several years, his farm being 425 acres. Turn now from the British to the German game preserve and battue. A correspondent of the *North British Agriculturist*—"An Eye-witness,"—describes a battue he saw in a royal forest in Bavaria some years since. The forest covers "an immense tract of land, and is plentifully stocked with red deer, roe deer, fallow deer, and wild boar." There were about 100 persons invited and admitted as spectators. The "sportsmen" were dressed in Tyrolese costume, each "attended by one or more jagers, with one or more guns, and a most alarming supply of powder and shot, or rather bullets, as rifles alone are used on these occasions." On the arrival of the King, a scene as sickening ensued as that African battue described by Dr Livingstone :—

"Close to where we had been standing there was a large enclosure—it is difficult to say from memory exactly how large it was, but the impression on my mind is that it was about 300 yards long, by 200 broad, perhaps not quite so much ; and it was formed by some strong kind of canvas, stretched along rows of stout poles, and was about nine feet high. Within this space were congregated the victims selected beforehand for the day's bag. At a distance of about thirty yards from one end of this enclosure there stood a row of huts, and into these huts the sportsmen were ushered—the King, of course, occupying the best and most commanding position at one end of the line, and his brother at the other, and the spectators stood close behind. As soon as all were placed, the proceedings commenced. The yells and cries of the beaters were soon succeeded by the crashing and trampling of the miscellaneous herd of animals who darted along the edge of the enclosure until they came into the fatal space between the guns and the boundary ; and as they tore past—a compact mass of deer (red, roe, and fallow) and terrible-looking boars—some three hundred in all, the guns opened a merciless and deadly fire into the thick of them ; and at that distance, and with the mark before them, every shot told. In the space of half a minute they were past, leaving the ground, however, thickly strewn with the dying and the dead. Round they were driven another time, to pass again through the fiery ordeal. The scene was something frightful, and resembled a butcher's shamble rather than an arena of true sport. The ground was littered with bodies and streaming with blood, whilst the piteous moans of the wounded deer, and the savage yells of the disabled and furious boars, filled the air. The unfortunate animals were allowed no peace ; the beaters pursued them closely, and forced them time after time in front of the guns, each time the crowd becoming thinner and thinner. The *progress of the sport was most monotonous*, and so it continued for an hour and a half. At the end of this time the number of animals was reduced to no more than a dozen, and these, maddened and desperate, could not be driven round within the fatal line as before, save where some poor brute was singled out and almost pushed in front of the guns, and had to run the gauntlet of the whole row of them ; but there was no chance of escape from them. When this small remnant had been reduced to less than half, orders were given for a cessation of the butchery—for I will no longer degrade the name of sport by coupling it with such atrocities."

A large proportion of these animals were only wounded, and the keepers went round after the "sport" was over, cutting the throats of the deer, and stabbing the wounded boars, which last defended themselves vigorously. There were 300 animals thus slain, and "the markets were plentifully supplied with venison for a week or two, for with German thrift the King makes his sport pay." The Bavarian King, however, has this advantage over the British game-preserver,—his game is honestly his own, and has not been fed on his tenants' crops.

Literature.

LIFE WITH THE ESQUIMAUX. The Narrative of Captain Charles Francis Hall. From the 29th of May, 1860, to the 13th of September, 1862. Sampson Low, Son, and Marston, 14 Ludgate hill.

"THE Esquimaux"—writes Dr Hayes at that crisis of his daring but unfortunate "Arctic Boat Journey," in which, with eight companions, without food, fuel, or shelter, ice-locked in the north water of Baffin's Bay, he "desponded at the thought of wintering in such a place and under such circumstances,"—"The Esquimaux lived somewhere and somehow we knew, but where or how we did not know nor could we imagine." To the Esquimaux he and his crew owed the preservation of their lives at last, but months of fearful suffering might have been avoided if they had known more about the natives of the desolate regions on which they were cast. This knowledge Captain Hall in a measure supplies. His experience is not very long nor quite so conclusive as a sanguine disposition leads him to believe, but it is genuine, purchased by his own exertions, and at no little risk. He has proved, not merely that it is possible for a white man to live among the Esquimaux, for that has never been doubted, but for him to live in health and tolerable comfort; he has also shown us how to do it. The picture is not exactly enticing. Snow huts crowded to suffocation by half-naked feasters upon raw walrus flesh and seal's blood heated in iron pots of more than doubtful cleanliness, and served up in bowls nicely polished by the tongues of hungry dogs, or scarcely less unsavoury Innuit women ;—a common bed of dressed skins spread on a snow floor where a "warm-blooded" Innuit on either side keeps the guest from the bitter cold of Arctic nights, are not the comforts civilised life prepares one to appreciate ; but, compared with the dank, dark, and deathly-cold hut where Dr Hayes and his comrades waited for their slow sure end, these Esquimaux houses are abodes of comfort and enjoyment.

To a contented, cheerful, accommodating temper like Captain Hall's, the simple animal pleasures of Esquimaux life are not wholly distasteful. "Recording my own experience of 'igloo' life at this time," he writes, "I may here say, that having spent twenty nights in a snow house I enjoyed it exceedingly. *Now*, as I look back at the past, I find no reason to utter anything different. I was as happy as circumstances would permit, even with Innuits only for my companions. Life has charms everywhere, I must confess that Innuit life possesses those charms to a great degree for me." He found the warmed-up seal's blood ambrosia and nectar; black whale skin is delicious; a seal is good eating throughout; and walrus flesh very tolerable. Captain Hall is not squeamish,—being at Rome he does as they do at Rome. He does not cry out against the customs, or rail at the want of cleanliness of his hosts, but enters so fully into their difficulties, and sympathises so heartily with their enjoyments, that his readers must be well cased in the French polish of refinement against the simple impulses of humanity if they are to avoid catching the infection of his enthusiasm. For our own part before we had reached the end of these two entertaining volumes, we found ourselves taking a lively interest in the capture of each particular seal which was to turn starvation and darkness into life, warmth, and good fare, and which, after nights and days of cold and hungry watchfulness, is brought back in triumph by the patient and skilful hunter. It would be difficult to find a merrier or more light-hearted set of people than the Esquimaux, or a more hospitable. The kindness of the women towards their guest was invariable, that of the men failed only when he wished to trench upon the birthright of this people, their freedom to do what they please and to go where they will. This lawlessness is the dark side of the Innuit character. In fiercer tempers it breaks out into acts of violence that makes a residence among them not altogether safe. At one time Captain Hall doubted if his life was worth much ; but, on the whole, they are a mild-tempered race, and, though callous to suffering, not a cruel one. So well content was our author with his former experience that he has again ventured himself on the same hardships and hazards in a renewed effort to ascertain more fully the fate of the lost crews of Sir John Franklin's last expedition.

It was a bold idea in one man to constitute himself an expedition on a search which has baffled the efforts of experienced navigators in well-manned and provisioned ships. A few pounds of pemmican and preserved meats, some instruments, a strongly built boat (that was wrecked immediately on his arrival at Frobisher's Bay), and an Esquimaux interpreter, were all the apparatus Captain Hall possessed. What were his antecedents, or how the desire for this especial enterprise arose in his mind, he does not tell us. Indeed we learn little from these volumes of their writer, beyond what they unconsciously reveal—the honesty,

Digitized by Google

the simplicity, the genuine kindness of heart, the courage, and the persevering energy of the man. He appears to have brooded for some years over a mystery at which his heart "felt sore" till, on the return to England of the "Fox" with its sad and only partially conclusive revelations, the suppressed desire broke out into a determination to attempt its solution on his own account. "Though no civilised persons knew the truth," he tells us in his introduction "it was clear to me that the Esquimaux knew it, only it required peculiar tact and much time to induce them to make it known." "In one word, it seemed to me as if I had been called—if I may so speak—to try to do the work." His plan was this. To inure himself to Esquimaux life, to learn their language, to gain their confidence, and then to travel among them, or under their escort, through the lands of Boothia, Victoria, and King William's Island, questioning all the natives he came across, and searching minutely for further vestiges, but especially for what he yet hoped to discover, some of the lost crews among the wandering tribes of those regions of extra Arctic desolation.

Thus far he has not, by this first expedition, done much towards his great work; but he has at least laid a good foundation. He has shown his ability to gain the confidence of the natives by the traditions he has already gathered from among them, and these traditions, while they have no direct bearing upon his enterprise, yet yield additional hope for its final success.

The Esquimaux are, it appears, like all savage tribes who possess the rudiments of civilisation, careful in the transmission from parent to child of the events of past times and the legends of their forefathers. Captain Hall gathered from many individuals vague hints of some long past expeditions on the part of Kodlunas (or white men) to the Innuit land, —at last one very old woman repeated to him that she had been told when a child, how Kodlunas came in ships, first two, then two or three, then many, very many ships; how five Innuits were killed and two kidnapped by the Kodlunas, who after this third visit came no more; how five white men captured by Innuits built after a time a boat with sails and departing were never seen again (Frobisher reports these men as killed by the natives). Captain Hall was shown the trench in which the boat was built; the place where the masts were put in; the spot where stood the fort erected by the miners for their defence and shelter; and some places where under a growth of moss and willow of some inches in thickness he found tons of coal; bricks too were scattered about, and pieces of iron were found. His delight and gratitude at these discoveries are great; greater indeed than would seem warranted if it were not for the further conclusions to which the sight of these relics leads him. If such minute and correct particulars have been handed down among the Esquimaux for three centuries, what may not be expected on an oral examination of the tribes in the more western lands into events of not quite twenty years standing if conducted with skill and patience. Hopes of a more definite kind are certainly encouraged by the facts of this first essay, and we heartily wish good luck to that on which Captain Hall is now embarked. Single-minded devotion such as his deserves its reward.

A side but not unimportant issue of this two years spent by Captain Hall in the neighbourhood of Frobisher's Straits is the geographical researches into which it led him. He has sailed in an Innuit boat, manned by a somewhat rebellious Innuit crew, round the northern and western shores of these presumed straits, and has marked out their boundaries. Frobisher's Straits must in future be known as Frobisher's Bay. By slow degrees we are acquiring the true features of the northern Arctic zone. Captain Hall has added an item to their delineation. It is curious that he found the Esquimaux of great assistance in drawing up his maps. They drew for him the outline of the coast with singular facility and exactness.

The Esquimaux are a dying race. Both tradition and the ruins of deserted settlements assert that they once thickly peopled the lands over which they now wander in scattered and yearly lessening bands. Formerly they built their huts of stone; now skin tents in summer and snow igloos in winter are more fitted to the wants of a wandering and decaying people. There are traces of the rule of chieftains in the old times; now "there is absolutely no political organisation amongst them." Their angekos (or priests) have the influence that cunning will always gain over superstition, but they have no authority nor defined position. "Their theological belief is not easily obtained in an intelligible form." A semi-civilised Innuit woman told Captain Hall "My people think this way: all Innuits who have been good go to Koodleparmiung (or Heaven)—all who have been kind to the poor and hungry, all who have been happy while living on this earth." Clearly the Innuits do not believe in the doctrine of compensation. "Any one who has been killed by an accident, or who has committed suicide, certainly goes to the happy place. All Innuits who have been unkind to one another—all who have been unhappy while on this earth, will go to Adleparmeun. If an Innuit kill another because he is mad at him he will certainly go to Adleparmeun." They believe in one Supreme Being; but the real object of their religious rites is his daughter! "She is supposed to have created all things having life, animal or vegetable. She is also regarded as the protecting divinity of the Innuit people." The Innuits themselves are the perfected work of the Great Being after his "prentis hand" had been tried on the white man. They have no marriage ceremony. A man is allowed to have as many wives as he chooses; but with them, as with the lower orders in Turkey, the difficulty of maintaining them limits the number effectually. Two wives are useful to a good hunter in dressing his skins with their teeth, preparing his blubber oil, and making his ample wardrobe of reindeer furs; but he must be either remarkably successful in the chase, or very improvident, who ventures on more than two. Children are rare among them, and are treated with great indulgence. Wives are in all respects slaves to their husbands, though, owing to the general mildness of the Innuit character, well treated on the whole. If one chances to offend, a favourite method of reproof on the husband's part is to harpoon her from behind. When sick she is treated with kindness, but if death appears to be inevitable the woman is walled up alive in a snow hut and left to die alone. One of the most striking scenes in Captain Hall's Esquimaux experience is that in which he broke into one of these living tombs and watched beside the dying and deserted woman.

Here is the attire of an Innuit belle. "The breeches reach below the knees and are fastened with a string drawn tightly round the waist."....."The jacket is round, with no opening in front or behind, but it is slipped on and off over the head. It is close fitting but not tight. It comes as low as the hips and has sleeves reaching to the wrists." It has a long tail reaching nearly to the ground. "In one of my visits to Sampson, I noticed that his wife's jacket was trimmed thus: Across the neck was a fringe of beads—eighty pendants of red, blue, black, and white glass beads, forty beads in each string. Bowls of Britannia metal, teaspoons and table-spoons were on the flap hanging in front. A row of elongated lead shot ran round the border of the tail. Six pairs of Federal copper cents of various dates were pendant down the middle of the tail, and a huge brass bell of an old-fashioned clock was at the top of the row of cents."

Trimmings would seem to be as much in vogue among the Innuit women as among the élite of fashionable life. Captain Hall must have regarded this wonderful specimen of native taste and ingenuity as a proof of the adaptability of the race for civilisation, or he would hardly have troubled himself to count the beads in each string. This minuteness is characteristic of the writer; if it sometimes wearies the reader, it, on the other hand, forces upon him a more distinct idea of the places and people described than is always gathered from more artistic works of travel. This effect is also much aided by the numerous drawings with which these volumes are illustrated. In spite of a certain slowness of mind and uncouthness of style, Captain Hall has made his narrative as pleasant as it is instructive.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 6th inst. The return for the previous week is added:—

DEBTOR.	July 6, 1865 f c		June 29, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,044,776 2	.....	7,044,776 2
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14
New reserve	4,000,000 0	.....	4,000,000 0
Notes in circulation and at the branches	859,170,675 0	.....	804,508,125 0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	8,719,290 13	.....	8,113,266 57
Treasury account	140,407,830 35	.....	170,506,294 26
Accounts current at Paris	188,902,.92 52	.....	187,151,770 3
Ditto in the provinces	32,517,695 0	.....	31,275,975 0
Dividends payable	9,984,875 75	.....	14,818,509 75
Various discounts	1,224,595 57	.....	522,887 12
Re-discounts	1,427,622 17	.....	1,427,623 17
Surplus of receipts not distributed	752,993 36	.....	752,993 36
Sundries	27,025,961 2	.....	9,886,943 15

The demand for discounts at the Bank has happily been more considerable, and there is an improvement in that item compared with last week of 32,000,000f. The stock of coin and bullion is, however, very formidable, and 8,000,000f more than it was last week. The circulation of notes it will be seen has increased considerably, and there is a slight improvement in the deposits.

The tone of the Bourse is much better, and the tendency is upwards. Even the first Mexican loan has improved, but the second is not in favour. The following are the quotations, several of them it will be seen are ex-dividend :—

	June 29.	July 6.

The Emperor of the French has had printed the observations he made on Algeria, and the measures he proposes for that colony; but the *brochure* has only been communicated to a limited number of eminent personages, and to them in confidence. Nevertheless, I can inform you that it proposes the abolition of all customs duties in Algeria; the establishment in each province of a bank authorised to issue notes to double the amount of its metallic reserve; the transfer from the State to private industry of the carrying of mails and Government stores by sea; the manner in which the 100,000,000f to be raised through a company for public works shall be spent; the encouragement of colonisation; the reduction of the army, and a large employment of natives for military purposes. The plans of His Majesty are in accordance with economic principles, and it is to be hoped that for the sake of Algeria and of France they will be promptly carried into execution.

As the Emperor has resolved on abolishing Customs duties in Algeria, I would respectfully ask why he does not do the same in France? The question, I know, will appear perfectly extravagant to the routine financiers of this country; but look at the figures. In the budget of 1865, Customs duties on different sorts of goods are put down at 72,000,000f; on colonial sugar at 35,000,000f; on foreign sugar at 11,500,000f; and on exports at less than 500,000f—total, 119,000,000f. In the budget of 1866, the import and export duties on different sorts of merchandise are estimated at 65,600,000f, on sugar at 103,400,000f—total, 169,00,000f. These sums, it will be admitted, are comparatively insignificant in a budget of receipts which exceeds 2,000,000,000f, and they are considerably reduced, 12 or 15 per cent. at the least, by the expense of collection. They might, therefore, be abolished without occasioning more than a slight perturbation in the finances, and M. Fould's astonishing ingenuity in inventing expedients would promptly find a remedy for that inconvenience. The abolition would of course give an extraordinary impetus to all branches of trade, and would promote the material prosperity of the people to an extent never yet witnessed; and that extension of trade and prosperity would, before long, permanently augment the revenue. The Emperor has gained renown for himself, and done vast service to the country, by imitating England in her commercial reforms; he could gain great renown, and do still greater service, by decreeing a reform which England herself has not yet ventured even to contemplate.

The Corps Legislatif has passed a bill authorising the City of Paris to raise a new loan of 250,000,000f for the execution of various improvements, chiefly in the suburbs, in the space of five years. The bill was opposed on the ground that as the Municipality alleged in its last report that it had a surplus revenue of about 35,000,000f, the works in question might be executed by means of it on extending the time to eight or ten years. But the advocates of the city were obliged to admit that the surplus is "engaged" for different purposes;—in plain English, exists only on paper. How and when the loan is to be raised are not settled by the bill, but it is understood that both the Credit Mobilier and the Comptoir d'Escompte are anxious to be intrusted with the issue of it. The Societe Generale will probably also be an applicant, either alone or in conjunction with the Comptoir. It is not impossible, however, that the city authorities, in order to avoid the payment of heavy commissions, will prefer to make the issue themselves as they have done on previous occasions. The belief is that a lottery will be attached to the loans, and I have heard that some intention exists of making the prizes new houses built by the Immobiliere Company. Notwithstanding the glut of money which now prevails, the abstraction from the circulation of so large a sum as 250,000,000f for works, in addition to the demand for railways, may, it is thought, be productive of inconvenience,—in case commerce and speculation should become more active.

The Legislature has adopted a bill sanctioning the convention relative to Algeria, concluded between the Government and a company headed by M. Fremy and M. Talabot. This convention, as your readers are aware, provides that the company shall encourage all sorts of commercial enterprises in Algeria; that it shall lend 100,000,000f, payable in six yearly instalments, to the Government, to be disbursed in public works; that it shall receive a concession of a large extent of land, at a low rent, and of all the mines it can find. The bill was opposed by M. Buffet, at one time Minister of Commerce, with arguments which were both strong and in such a matter new; and he, besides, complained that for 100,000,000f the Government will have to pay 5¼ per cent., whereas it could easily borrow at 4½. On the latter point he was told that the stamp and other duties, and the rent which the Government will have to pay, will reduce the rate to 4 70 per cent.

A bill relative to the projected Universal Exhibition of 1867 has passed the Chamber. The expense of the exhibition is calculated at 20,000,000f; and of that sum the Government is to contribute 6,000,000f, the City of Paris 6.000,000f, and the rest has been guaranteed by private persons. The Exhibition Palace is to be built in the Champ de Mars.

The Budget of 1866, after undergoing the ordeal of the Corps Legislatif, stands thus :—

	Expenses. francs.	Receipts. francs.	Excess of Receipts. francs.
Ordinary budget	1,699,901,837	1,698,333,490	1,568,347
Special budget (that for local purposes)	233,085,318	233,085,318	...
Extraordinary budget	151,805,011	149,718,800	2,086,211
Total	2,084,792,166	2,081,137,608	3,654,558

In English money, — Expenses, 83,391,686*l*; receipts, 83,245,504*l*; surplus, 146,182*l*. But before the end of 1866, these figures will undergo considerable modification. In the Senate, *apropos* to the Budget, a senator drew attention to the fact that France, with 400,000 men under arms, disburses 102,000,000f less than England with 170,000. He omitted to state that in France military service being compulsory, the soldiers receive scarcely any pay; whereas in England, that service being voluntary, necessarily costs dear.

The first drawing of the lottery of the new Mexican loan took place on Monday, and as was to be expected among such a lottery-loving people as the French, it excited great interest. The principal prize of 500,000f (20,000*l*), was won by the holder of bond No. 16,444; and two 100,000f prizes by those of Nos. 495,293 and 39,817. There were also four 50,000f, and sixty 10,000f prizes drawn; and, in addition, a number of bonds subscribed at 340f, were indicated to be paid off at 500f.

A treaty of commerce and navigation between France and Mecklenberg-Schwerin has been promulgated. It is the same as those between France and other German States, and like them is to last for twelve years.

The statement of the *Finance*, noticed in my last, that the Agra and Masterman's Bank, of which a branch has been established here, had purchased a quantity of building ground at Marseilles from the Immobiliere Company, has excited considerable attention. The *Semaine Financiere*, however, affirms, on what appears to be authority, that the "said bank has not purchased any ground at Marseilles." Your contemporary, however, says that "it is possible the bank has been charged to make a payment for some Englishman engaged in a transaction relative to the ground of that Company, and it is possible also that a certain Mr Masterman, of Marseilles, has been mixed up in the negotiations relative thereto."

The report of the Seville-Xeres and Cadiz Railway Company states that in 1864 the working of the line produced 19,899,351 reals, which were 2,367,475 more than in 1863; but that, nevertheless, it was under the necessity of not making any distribution on its shares.

According to Customs returns, just issued, the value of goods imported for consumption in the first five months of the present year was 997,754,000f; same period of 1864, 195,190,000f; of 1863, 911,226,000f: and the value of goods of French production exported was in the former period, 1,140,470,000f; in the second, 1,208,429,000f; and in the third, 996,269,000f. The precious metals are not included in these figures, and they stand as follow :—

	Imports. First five months of 1865. francs	First five months of 1864. francs	First five months of 1863. francs
Gold—Bullion	29,055,957	51,735,645	47,263,800
Coin	167,799,531	146,631,195	157,977,516

The imports of the first five months of this year, turned into English money, were 12,074,810*l*; and the exports, 6,408,283*l*.

In a meeting of the shareholders of the Italian Company of the Meridional Railways recently held at Turin, the dividend of 1864 was fixed at 13f 50c, subject to the approbation of the Government; and the sale of the domains belonging to the company, which were conceded to it by law, and which are estimated to be worth 10,000,000f, was authorised.

The report of the North of Spain Railway Company shows that in 1864 the receipts, after deducting working expenses and other charges, were only 8,942,983f. This sum was insufficient to pay the interest on bonds, which amounted to 10,526,000f. The directors accordingly resolved not to pay the July coupon. In the construction of the company's lines 339,417,803f were disbursed up to the 31st December last; and it is calculated that a further outlay of 358,388,000f is necessary. The company owes 24,000,000f to the Spanish Credit Mobilier. But the Cortes have passed a law authorising it to make a new issue of debentures, and the Government is earnestly called on to do something for it. The shares of the company were done to-day at 156f 25c, and they have been lower in the course of the past week. Their nominal value is 500f.

The shareholders of the Saragossa to Pampeluna Railway have have held a meeting, although one took place in January last. The report announced the completion of the section from Irurzun to Alsasua, and stated that on the lines already opened for traffic, the receipts for passengers compared with 1863 had declined nearly 4½ per cent., and those for goods had increased by nearly 5½. The meeting authorised the Board of Directors to raise the loans it may consider necessary, either by issue of bonds or otherwise.

The market report is as follows :—

Flour.—At *Paris*, yesterday, the quotations ranged from 43f to 47f 50c the 157 kilogs, according to quality. Six marks, current month, were offered at 48f 25c, and taken at 47f; for August, 47f 75c. Type Paris, the 101 kilogs, 28f 50c.

Wheat.—At *Paris*, yesterday, holders demanded an advance of 50c to 55c, but did not obtain it. Choice white was 25f 50c to 27f the sack of 120 kilogs; choice red, 26f to 26f 50c; first qualities, 25f 50c; and current sorts, 25f.

Cotton.—The sales at *Havre*, in the week ending Friday, were 7,314 bales, and the arrivals 6,281. The stock was estimated at 46,300. The closing quotations were 5f higher for Brazil, and 2f lower for Madras and Coconada. Low New Orleans was consequently 245f the 50 kilogs; good ordinary qualities in Broach, 160f; in Tinnevelly, 150f; Madras, 160f; China, 140f; Egypt, 240f. This week, the market has been very calm, though holders have been willing to sell. Yesterday, New Orleans was 235f; Jumel, 200f; Madras for delivery, 135f.

Coffee.—At *Havre*, in the week ending Friday, the demand was regular. 700 sacks Hayti, 79f the 50 kilogs, in bond, indifferent quality; 100 Cape, 85f; 51 Leogane, 84f; 800 Gonaives, 88f; 1,350 Rio, not washed, disposable and in the port, 73f to 84f; 411 for delivery, 77f 50c; 3,300 Santos for delivery, 78f, floating conditions; 2,028 La Guayra for delivery, at prices not stated, but supposed to be 93f; 362 Malabar, for delivery, 98f for native and 108f plantation. By auction, some lots of different sorts of damaged were sold. The arrivals exceeded 11,700 sacks. This week Rio, 71f to 86f in bond; La Guayra, for delivery, 91f to 107f. By auction, some different sorts of damaged. At *Nantes*, last week, 800 sacks Guadaloupe habitant, and 2,028 Porto Cabello, at prices not stated; some Reunion feve pointue, 140f the 50 kilogs duty paid. This week, Porto Cabello at prices kept secret. At *Bordeaux*, last week, 1,050 sacks Mysore for delivery, 118f, and 3,112 Winard, 122f; 322 sacks Mysore, and 100 Rio washed and 425 not washed, at prices not stated; 400 Mysore, 118f; Rio not washed, 134f; 54 Rio not washed, 84f; 300 La Guayra grage, 107f. This week, Rio 84f; Bahia, 86f; Mysore, 118f, and at prices not stated. At *Marseilles*, last week, 3,750 sacks Port-au-Prince, at prices not stated; 1,700 Porto Rico, 97f 50c to 100f. By auction, some lots of different sorts of damaged were sold. This week, Rio ordinary, 70f 50c.

Sugar.—The sales at *Havre*, in the week ending Friday, were 600 casks French West India, disposable, 49f 50c to 50f the 50 kilogs, bonne quatrieme, duty paid; 200 ditto, for delivery, 49f to 49f 50c; some usine, 60f to 66f; 600 Havana, 30f 50c to 31f, No. 12, in bond; 1,600, for delivery, 31f to 31f 50c. The arrivals were insignificant. This week, French West India, 40f, bonne quatrieme; usine, 56f; Havana, 31f 50c, No. 12. At *Nantes*, last week, business was active, but prices did not obtain the advance that had been expected. 400 sacks Reunion, low, 50f; 1,000 ditto, 52f 50c, bonne quatrieme; 1,138 Mayotte, common, 41f; 655, 42f 50c; some Guadaloupe, for delivery, 49f, bonne quatrieme; usine, 59f 50c; 1,787 casks Havana, 31f 62½c floating conditions; and a cargo of muscovado expected, 26f 50c, bonne quatrieme. This week, Guadaloupe usine, 57f duty paid. At *Bordeaux*, last week, some French West India, 48f 50c; and usine, 57f 50c to 61f 50c. This week, French West India, 41f 50c; usine, 59f and 59f 50c. At *Marseilles*, last week, 200 casks French West India, 29f, bonne quatrieme of Havre; 3,300 casks, for delivery by English ship, 30f, No. 12. This week, French West India, 29f; Cienfuegos, by Spanish ship, 26f, bonne quatrieme of Havre; Havana, 29f 25c, No. 12.

Indigo.—Business was calm at *Havre* in the week ending Friday 13 chests Bengal new, 80c to 87c above the estimates; 4 Kurpah, at prices kept secret; 4 Madras, 3f 50c the half-kilogramme. The arrivals were only 9 serons from England. No sales have been made this week. At *Bordeaux*, last week, 18 chests Bengal, 4 Kurpah, at established prices. This week, some Madras at prices not stated.

Hides.—The sales at *Havre*, in the week ending Friday, were 122 Buenos Ayres salted ox, 43f 50c the 50 kilogs; 1,200 Monte Video salted saladeros ox, 60f; 1,150 ditto cow, light, 44f; 80 Rio Grande salted ox, 56f; 1,130 Rio Janeiro salted ox, 51f; cow, 41f; 252 ditto ox, damaged, 48f; 1,665 Valparaiso drysalted cow, 66f 50c; 750 horse, Monte Video salted, 43f 50c. The arrivals were about 20,000. This week, Monte Video salted ox, 59f and 60f; ditto dry, cow, 82f; Buenos Ayres salted cow, prices kept secret; and ox salted, light, 50f; Rio Grande salted ox, 56f; Nassau, salted, 40f 50c.

Wool.—The demand at *Havre*, in the week ending Friday, was good. 300 bales La Plata unwashed, 1f 40c to 2f 40c the kilog; 52 ditto washed, 2f 75c; 9 Rio Grande unwashed, 2f 10c. The arrivals exceeded 1,000 bales. This week, Monte Video unwashed, 2f 15c; and per 100 kilogs, 195f; sheepskin, 2f 50c. Some sales of damaged by auction.

Tallow.—At *Havre*, in the week ending Friday, the demand was active and prices improved. 87 pipes La Plata disposable, 50f to 50f 25c the 50 kilogs; 82 ditto old, 49f to 49f 25c; 225 pipes and 250 half-pipes for delivery, 50f 25c to 51f. The arrivals were 140 casks. This week, La Plata for delivery, 51f, 50f 75c, and 50f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 106f 20c.

Spirits.—At *Paris*, yesterday, 3-6, first quality, disposable, 57f to 58f the hectolitre.

Correspondence.

AGRA AND MASTERMAN'S BANK.

TO THE EDITOR OF THE ECONOMIST.

Sir,—I am directed by the court of directors to acquaint you that the statements contained in the Economist paper, of the 17th and 24th ultimo, that this bank intended to open a branch at Marseilles, and had purchased a large tract of building ground at that port, and was in negotiation for more, are entirely unfounded; and I am to request that you will either contradict these reports or publish this letter in your next issue.—Your obedient servant,

L. Balfour, General Manager.

Nicholas lane, Lombard street, July 4, 1865.

[The statement in our issue of the 24th, of which our correspondent complains, was expressly given by our French correspondent on the authority of a French journal which he quoted by name, and not upon his own authority.—Ed. Econ.]

COMMERCIAL AND MISCELLANEOUS NEWS.

Mr J. R. Scott, the Registrar of the London Coal Market, has published the following statistics of the imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during June, 1865:—

Imports.

By Sea.	Ships.		Tons.
Newcastle	189	...	100,162
Seaham.....	61	...	15,157
Sunderland	156	...	64,780
Middlesborough	25	...	8,108
Hartlepool	131	...	36,930
Blyth.....	3	...	847
Scotch	7	...	1,538
Welch	18	...	7,200
Yorkshire.....	19	...	1,904
Duff	...	...	...
Small coal	3	...	1,819
Cinders.....	7	...	576
Culm.....	...	...	...
Total.....	619	...	239,021

By Railway and Canal.	Tons cwt
London and North-Western...	73,547 4
Great Northern	57,189 0
Great Western	16,914 0
Midland	9,503 14
Great Eastern.....	31,659 9
South-Western	3,292 17
London, Chatham, & Dover	1,332 12
London, Tilbury, & Southend	...
South-Eastern	601 7
Grand Junction Canal	840 10
Total.....	195,180 13

	Ships.	Tons.
Sea-borne.—Imports during June, 1864	675	246,220
Recapitulation.		
1st of January to 30th of June, 1865	4,099	1,628,984
Ditto ditto 1864	4,359	1,604,762
Increase	... .	24,222
Decrease.	259	...

	Tons. Cwt.
Railway and Canal.—Imports during June, 1864	159,147 2
Recapitulation.	
1st of January to 30th of June, 1865	1,337,724 3

Ditto by rail beyond districts.....	21	
Ditto by canal and inland navigation	274	
		1,950
4. Sea-borne coal brought into port and exported in same ships		220
Total quantity of coal conveyed beyond limits of coal duty district during June, 1865		58,208
Ditto, 1864.....		59,375

Messrs Spackman and Sons have issued a statement of the new companies brought forward during the first half of the present year. The subjoined table, extracted from it, shows the number in each particular

Digitized by Google

department introduced last year, and from Jan. 1 to June 30, 1865, as well as the amount of authorised capital :—

Companies.	Year 1864.		Half-year 1865.	
	No. of Cos.	Capital Authorised.	No. of Cos.	Capital Authorised.
		£		£
Banking	19	25,600,000	6	8,000,000
Financial and Discount	26	38,150,000	6	4,200,000
Manufacturing and Trading	78	38,195,000	62	13,870,000
Building and Investment			20	6,355,000
Railways	10	12,510,000	9	11,512,000
Insurance	11	9,200,000	4	2,250,000
Shipping	21	14,800,600	9	3,820,000
Hotel	22	1,900,000	4	650,000
Mining	41	4,189,500	27	2,190,000
Gas	6	1,280,000	4	1,775,000
Miscellaneous	48	9,973,000	9	1,480,000
	282	155,847,500	160	56,302,000

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending May 27, 1865, compared with the previous month :—

	April 29, 1865.	May 27, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	21051570	21251548	199973	...
Private Banks	3040531	3000546	...	39985
Joint Stock Banks	2895910	2847871	...	48039
Total in England	26988011	27099965	111954	...
Scotland	4151156	4596951	445795	...
Ireland	5858097	5930449	72352	...
United Kingdom	36997264	37627365	630101	...

And, as compared with the month ending the 28th of May, 1864, the above returns show a decrease of 34,740*l* in the circulation of notes in England, and an increase of 168,652*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,188,545*l*, the English joint stock banks are below their fixed issue 378,486*l*,—total below fixed issue in England 1,567,031*l*: the Scotch banks are above their fixed issue 1,847,680*l*; the Irish banks are below their fixed issue 424,045*l*. The average stock of bullion held by the Bank of England in both departments during the month ending May 27 was 14,966,314*l*, being a decrease of 14,090*l* as compared with the previous month, and an increase of 1,931,093*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month :—Gold and silver held by the Scotch banks, 2,495,198*l*; gold and silver held by the Irish banks, 2,104,816*l*; total 4,600,014*l*; being an increase of 157,948*l* as compared with the previous return, and an increase of 203,450*l* when compared with the corresponding period last year.

A report of the money market, dated Calcutta, June 2, says :—Government Securities—A few transactions have been made for remittances to England, but rates show no improvement. Fours are 88-14 rs to 89 rs; Fives, 101-12 rs to 102 rs; Fives and half, 108-12 rs 109 rs. There is little change to report in money matters. The Bank of Bengal has made no alteration in the rates of interest and discount; and, in the Bazar, advances are easily obtainable at low rates. But, notwithstanding the cheapness of money, business continues very much depressed, owing to the smallness of the demands from home, and the absence of all speculation on this side, coupled with the belief that we have not yet seen the worst of the crisis in Bombay. Exchange has fallen to below par, and a very limited extent of business has been done for the mail, in bank bills, at rates from 2 to 1-11⅞; first class credits may be quoted 2 0 1-16 to 1 11 15-16; documents, 2-0¼.

Annexed are the returns of the Bank of Bengal for the weeks ending May 9 and May 16 :—

Liabilities.	May 9.		May 16.

Cash and currency notes at head office and branches	3,281,807	...	3,543,617
	6,178,540	...	6,389,377

Messrs Clason and Co., writing from Bombay on the 8th ult. in reference to the money market, state :—During the fortnight several European houses suspended payment, which has increased the general distrust on all sides. Amongst their number is one of the oldest firms of Bombay, who enjoyed the most extensive credit for many years. The temporary suspension of a rich native banking house, after an establishment of above 250 years, increased the panic, and for several days business was entirely paralysed. Our banks maintain their attitude of reserve, or show at least very little disposition to operate or to succour. Certain indications go to prove that many natives who refuse to pay and declare themselves ruined are retaining large sums, and it is generally believed that there is much money in the Bazaar, but that the natives will nevertheless repudiate their debts. Shares of all descriptions continue quite unsaleable, and according to accounts published in the papers, the majority of "Financial Associations" latterly formed will be obliged to wind up, which in most instances will result in a total loss for the shareholders.

The following notification was published in the Calcutta *Gazette* of the 18th of May :—"Notice is hereby given that the Lieutenant-Governor of Bengal, under the authority conferred on him by Section 179, Act VI. of 1863, has this day approved and established the following revised valuations for the articles mentioned; and the said respective values shall from this date be the valuations of the said articles for the assessment of Customs duty thereon at the ports of this Presidency until further notice:—Jute, per bale of 300 lbs, 10 rs; ditto, cuttings, per bale of 925 lbs, 1r; sugar, per maund, 5 rs; silk, per seer, 10 rs; silk, Chussum and Cocoon, per maund, 33 rs; hides, cow, per corge, 20 rs; ditto, buffalo, 35 rs; tea, per lb, 8 as; coffee, per cwt, 25 rs.

Subjoined is Messrs Sharp and Co.'s bullion circular, dated Hong Kong, May 13 :—Gold—The imports during the fortnight are $650,000 value; and the total exported, including shipments per Emue on the 29th April, and excluding those going forward to-morrow, is $530,000. Silver—We have received about $170,000, and of this, about $150,000 have been shipped away. Dollar Currency—Amounts inwards, $660,000; the reverse, $260,000. The value of money generally may be said to range from 5 to 8 per cent., according to time and character of security. Short discounts 5, and mortgages 8 per cent. Exchange—There has again been a gradual decline during the fortnight, a great deficiency being observable in the supply of first-class commercial paper; the remittances, therefore, are mainly composed of bank drafts. The rupee rate, however, has not been similarly affected. Closing Quotations—On London, 6 months' sight, 4s 4½d; on ditto, 3 months' sight, 4s 3¾d; on Calcutta, 3 days' sight, 216½ rs; on Bombay, 3 days' sight, 217 rs; on Shanghai, demand, 72¼ tls; on ditto, 30 days' sight, 73 tls; on ditto, 60 days' sight, 73½ tls; on Japan, 30 days' sight, 2 per cent. dis.; on Singapore, 15 days' sight, par; on Amoy, 15 days' sight, ½ per cent. dis.; Bar silver, 10½ per cent. prem.; Sycee, 8½ per cent. prem.; Mexicans, ½ per cent. prem.; gold leaf, $22.92½ per tael; gold bar, California, $22.90 per tael, equivalent to 100 touch; ditto Peking, 98 touch, $22.90 per tael weight; American double eagles, $18.25 each; sovereigns, English, $4.60 each; ditto Sydney, $4.55 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 8 per cent. prem.; Union Dock shares, 15 per cent. prem.

The shipments of gold from Melbourne from Jan. 1 to April 11, amounted to 449,317 ounces, of which 51,008 ounces were the production of the New Zealand fields. The shipments during the corresponding period of last year, were 426,484 oz of Victorian gold, and 75,536 oz from New Zealand vessels, giving a total of 502,020 oz.

Subjoined is a report of the Albany lumber market for the week ending June 19 :—Receipts have been large. The assortment in market is now complete. Receipts for season to date :—Boards and scantlings, 22,843,193 feet; shingles, 3,305 M; staves, 2,810,230 lbs.

Annexed are the traffic returns of some of the American railways for May :—

	Miles open.	1865. dols.	1864. dols.	Increase. dols.	Decr dols.
Atlantic and Great Western	322	460,442*	214,679	245,763	...
Erie	797	1,339,279	1,072,293	266,986	...
Hudson River	144	351,759	281,759	70,000	...
Marietta and Cincinnati	283	73,842	83,964	...	10,122
Milwaukee and Prarie du Chien	235	146,943	186,747	...	39,804

* With occasional trains to Dayton.

The imports of the precious metals during the week ending July 5, current year, were :—Gold, 572,579*l*—silver, 278,495*l*. The exports were :—Gold, 110,852*l*—silver, 86,042*l*.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,717,616	Securities	33,726,456
Public Deposits	9,343,667	Coin and Bullion	16,073,259
Private Deposits	14,443,335		
	46,509,618		49,799,715

Dated the 6th July 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,290,097*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£1,140,031
A DECREASE of Public Deposits of	1,129,317
An INCREASE of Other Deposits of	719,147
A DECREASE of Government Securities of	80,147
An INCREASE of Other Securities of	1,193,503
A DECREASE of Bullion of	334,407
An INCREASE of Rest of	59,088
A DECREASE of Reserve of	1,429,527

The above return exhibits the usual alterations at the close of the half-year. The heavy Government disbursements have caused a considerable decline in the public deposits. At the same time the temporary pressure in the money market has caused a large increase in other securities, and thus the reserve has been considerably diminished. The decrease in the bullion is partly due to the withdrawals of coin for the general election.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,500,190	£ 22,504,490	£ 22,038,478	£ 21,890,068	£ 22,717,616
Public deposits	6,852,350	5,429,939	5,593,834	9,489,130	9,343,667
Other deposits	12,686,891	17,199,715	18,595,718	13,471,415	14,443,335
Government securities	13,757,224	10,952,679	11,046,888	11,122,125	10,339,878
Other securities	13,326,806	20,238,233	23,503,448	23,067,467	23,229,578
Reserve of notes & coin	11,101,316	9,889,877	8,094,089	7,200,034	8,502,294
Coin and bullion	17,584,066	17,055,537	14,824,969	13,930,809	16,073,259
Bank rate of discount	3½ p. c.	2½ p. c.	4 p. c.	6 p. c.	3 p. c.
Price of Consols	91¼	92⅝	92¼	90⅛ xd	90½ xd
Average price of wheat	76s 1d	56s 7d	46s 11d	40s 9d	41s 6d
Exchange on Paris (short)	25 5 12½	25 25 32½	25 20 27½	25 17½ 22½	25 15 22½
— Amsterdam ditto	11 17½ 18	11 15⅝ 16¼	11 16 16⅛	11 17⅛ 17⅛	11 17⅜ 18¼
— Hamburg (3 months)	13 7⅛ 7⅝	13 8⅛ 8¼	13 7⅝ 8⅜	13 8⅛ 8⅝	13 9⅛ 10⅛

In the corresponding week of 1855, the newspaper stamp had been abolished. News had arrived of the death of Lord Raglan. The new French loan for 30,000,000*l* had been announced. The Emperor of the French had opened the Legislative Chambers. The demand for money was good, but terms were easier.

In 1862, considerable speculation was taking place in cotton, the stock having fallen to 200,000 bales, against 1,200,000 in the previous year.

In 1863, the French Government had ordained the removal of many of the restrictions by which the banking trade had been hampered. The issue of shares in the Hudson's Bay Company, which had been remodelled, had taken place under the auspices of the International Financial Society.

In 1864, the Danes had suffered a defeat at Flensburg, with a loss of 1,000 prisoners; and had been forced to retreat from Alsen. The Austrians had taken possession of the island of Fohr. The Russians were making great naval preparations at Cronstadt. News had been received of the continued successes of the French arms in Algeria. Advices from New Zealand had announced the repulse of the British troops in an attack on Galopa. In America, General Grant had been repulsed in an attack on the Confederate works, with a loss of about 8,000 men.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 741,915*l*; in 1862, a deficiency of 3,038,518*l*; in 1863, a deficiency of 4,907,730*l*; and in 1864, a deficiency of 9,596,052*l*. In 1865, the deficiency is 8,786,243*l*.

DISCOUNT AND MONEY MARKET.—The discount market has been rather unsettled during the week, partly from the demand to meet the payments on the 4th of the month, and partly from the disturbing effect of the approaching general election. The rate for the best short bills has, however, been a fraction below the Bank minimum, and there was no alteration to-day, although a withdrawal of gold from the Bank, and the fear of further commercial disasters, caused an uneasy feeling. Compared with last week, however, the tendency is decidedly downward, the following being the current rates for bills of various periods to run:—

30 to 60 days	2⅞ per cent.
3 months	3 per cent.
4 months	3¼ per cent.
6 months—Bank bills	3¾ per cent.
6 months—Trade ditto	4 ½ per cent.

On the Stock Exchange advances on Government securities were in request in the morning at 3 per cent., but loans were subsequently offered at 2 to 2½ per cent.

Annexed are the rates of interest allowed on deposit:—

Joint Stock Banks	*2 per cent.
Discount houses at call	2 per cent.
Do. with seven days' notice	2½ per cent.
Do. fourteen days	2⅓ per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*.

There were no bullion transactions at the Bank yesterday. To-day, 130,000*l* in sovereigns was withdrawn for Brazil, and 5,000*l* for Egypt. The former is a comparatively exceptional operation.

The biddings for 250,000*l* Government bills on India took place at the Bank of England on Wednesday. The proportions allowed were:—To Calcutta, 174,100*l*; to Madras, 35,000*l*; and to Bombay, 66,000*l*. The minimum prices were, 1s 10½d on Calcutta and Madras, and 1s 10⅝d on Bombay. Tenders on Calcutta and Madras at and above 1s 11⅛d, and on Bombay, at and above 2s, will receive in full.

The return of the Bank of France for the week presents the following changes:—

INCREASE.	£
Cash	333,000
Commercial bills	1,266,000
Advances	106,000
Notes	2,266,000
Current accounts	120,000
DECREASE.	
Treasury balance	1,200,000

Annexed are the rates of discount in the principal cities of the continent, showing no material variation. At Paris, however, there is rather more demand, owing to the disbursements on the close of the quarter.

Hamburg	...	2⅔
St Petersburg	6	6 ½

ENGLISH GOVERNMENT FUNDS.—There has again been complete inactivity in the stock markets, but prices have been firm, the completion of the settlement this week having shown that *bona fide* purchases have latterly prevailed to a greater extent than had been anticipated. The favourable weather also, and expectation of an abundant harvest, have in addition inspired confidence. At the same time there is an entire absence of any discouraging political features. Consols for money, which closed last Friday at 90 to 90⅛, left off this evening at 90⅛ to 90¼. For the account, the last price was 90¼ to 90⅜. At one period a further fractional rise had been experienced, but it was not maintained. Reduced and New Three per Cents. were quoted 89½; and India Five per Cents, 104½ to 104⅝.

Exchequer bills are quiet at par to 4s premium, and India bonds at 17s to 21s premium.

FOREIGN STOCKS.—The transactions in the foreign market have been even less than in the last week, and the various movements have been generally unimportant. In some descriptions a partial improvement has taken place, especially Turkish (except the new scrip), Egyptian, and Russian. On the other hand, Mexican and Spanish Passive and Certificates have been decidedly heavy, particularly the former, from sales on French account. A fall has likewise occurred in the Venezuelan 1862 loan. Turkish scrip is dull, at 3 discount. The Confederate loan is a trifle better, at 7½ to 8½. United States Five-twenties left off at 71¾ to 72¼.

The last price from Paris this evening, of French 3 per Cent. rentes, was 56f 92c, showing a rise of ⅜ per cent. over last week, but a decline of nearly like amount compared with yesterday.

Railways and other Shares.—The transactions in these securities have been insignificant, and, owing to the absence of business, prices are occasionally lower. Great Western has especially fallen, chiefly from the discouragement caused by the late accidents, which, it is feared, must more or less affect the dividend. London and North-Western, North-Eastern descriptions, and Metropolitan have also been flat. On the other hand, there has been a further recovery in South-Eastern, and Midland has likewise improved. After the official close to-day, prices were generally supported, with less firmness.

In the colonial market Indian guaranteed stocks have advanced. Great Western of Canada shares are also higher, but Grand Trunk stock remains without alteration.

Foreign railway securities have mostly improved, the principal exception on the adverse side being South Austrian and Lombardo-Venetian.

Financial and bank shares have been rather dull. International Financial are a fraction lower, at 1¼ to ⅜ premium, notwithstanding the satisfactory character of the late meeting.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

Railway Dividends.—The report of the directors of the Victoria Station and Pimlico Railway Company recommends a dividend for the past half-year at the rate of 6½ per cent. per annum.

At the annual meeting of the Dutch-Rhenish Railway Company, held at Utrecht on the 30th ult., the directors were empowered to distribute to the proprietors a dividend of 11s 11d per 16*l* share, and of 14s 11d per 20*l* share, making with the provisional dividend, a total of 26s 5d on the former, and of 33s on the latter shares, for the year ended April 30th, 1865.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals during the past week have slightly declined in amount, more especially from America. The demand is still sufficiently active to absorb nearly all the amounts to hand, and the Bank has only received about 110,000*l* in fine bars, and 10,000*l* in soverigns. On the other hand, the sum of 30,000*l* in sovereigns has been withdrawn for shipment to the East. The La Plata has brought 40,420*l* from the Brazils; the Africa has brought 14,000*l* from Boston; the City of London has brought 20,000*l* from New York; the Germania has brought 3,000*l* from New York; the Glasgow has brought 13,000*l* from New York; the Celeano has brought 14,000*l* from Otago.

Silver.—The market for fine silver is in a most unsettled state. The fine bars brought by the Seine were sold at 60½d per oz standard; there are none now, however, to be had at that price, and should a demand for India arise, as the late rise in rate of the Government drafts would lead us to expect, it is not unlikely that a recovery in price to 60¾d per oz standard would be witnessed. The Pera has taken 12,000*l* to China.

Mexican Dollars.—The Pera took about 6,000*l* to China and the Straits. Our market is now quiet, with buyers at 59¼d per oz.

Exchange on India for drafts by the banks, at 60 days' sight, may be quoted 1s 11¼d to 1s 11¾d for Calcutta and Madras, an 1s 11½d to 2s for Bombay. The Council drafts were disposed of yesterday; applicants at 1s 11⅝d on Calcutta and Madras, and on Bombay at 2s, receiving in full.

Indian Government loan notes are precisely the same as this day week, and may be quoted 108 to 110 for 5½ per Cents., 101 to 103 for 5 per Cents., and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅛d to 5s 0⅜d per oz std, last price, nearest; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 4s 11¼d, per oz, nearest; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

Foreign Exchanges.—There has been no material alteration in the rates this week.

Failures and Mercantile Embarrassments.—Messrs F. Osterroth and Co., merchants, and rag, paper, and ultramarine agents, have stopped payment. The amount of their liabilities has not transpired, but it is expected that the liquidation will prove favourable.

The failures has been announced of Messrs John Bell and Co., East India merchants, of London, with branches at Manchester and Bombay. The total liabilities amount to about 380,000*l*. A satisfactory liquidation is anticipated.

Messrs C. J. Nasmyth and Co., East India merchants, have stopped payment. The liabilities are estimated at about 65,000*l*, and the prospects of the liquidation are considered uncertain.

Creditors of the Kent and Surrey Gas Company (Limited) are required to send the particulars of their claims to the official liquidator by the 18th inst.

An extraordinary meeting of the London and Westminster Assurance Corporation (Limited) is called for the 11th inst., to confirm the resolutions for a voluntary winding-up.

A petition for the winding-up of the Cleveland Iron Company (Limited) is to be heard before the Master of the Rolls to-morrow, the 8th inst.

Vice-Chancellor Kindersley has appointed the 13th inst. to make a call of 2*l* 10s per share on the contributories of the Irish West Coast Railway Company.

Formal notice is given that a petition for the winding-up of the British and South American Steam Navigation Company (Limited) is to be heard before Vice-Chancellor Wood on the 15th inst.

An adjourned meeting of the creditors of Messrs Buchanan, Hamilton and Co., of Glasgow, in the East India and China trades, was held on Wednesday, when it was decided to accept a composition of 12s 6d in the pound.

Creditors of the Madrid Bank (Limited) are required to send the particulars of their claims to the official liquidator by the 7th August, the 6th November having been appointed for adjudicating upon them.

Digitized by Google

The failure of Messrs Scott, Bell, and Co., in the East Indian trade, has been announced. The estimated amount of direct liabilities is stated at about 800,000*l*. The assets are said to be considerable, and it is anticipated that the firm will ultimately be enabled to discharge their engagements in full.

PUBLIC COMPANIES.—The first general meeting of the Valentia Slate Slab Company (Limited) was held on Saturday last, when a dividend of 10 per cent. on the paid-up capital was declared.

Interest at the rate of 5 per cent. per annum is to be payable on the 10th inst., on the paid-up capital of the English and Scottish Marine Insurance Company (Limited).

At the meeting of the Indian Carrying Company, held on Wednesday, an interim dividend of 6 per cent. per annum was declared, and the directors were authorised to increase the capital by an issue of 25,000 new shares.

The directors of the Dagenham (Thames) Dock Company have given notice that interest up to the 30th ult., at the rate of 6 per cent. per annum, as in terms of the prospectus, will be paid on and after the 13th inst.

The meeting of the International Financial Society was held on Tuesday last, when a statement of accounts was presented. The proceedings were of a formal nature; the issue of the directors' report being deferred till the annual meeting January next.

At the meeting of the Colonial Bank held on Wednesday, the net profit for the half-year was stated at 39,638*l*, and a dividend was declared at the rate of 6 per cent. for the half-year.

At the annual general court of proprietors of the Atlas Insurance Company, held on the 5th instant, a dividend of 15s per share, free of income tax, was declared.

At a meeting of the shareholders of the Delhi Bank Corporation, it was unanimously resolved that the bank shall be designated "The Delhi and London Bank (Limited.)"

An *ad interim* dividend of 6 per cent. has been declared by the Upper Assam Tea Company (Limited).

The directors of the West India and Pacific Steamship Company (Limited) have notified that they have resolved to pay an interim dividend of 10s per share, on the 25th inst., to all shareholders whose names are on the register at this date.

A general meeting of the shareholders of Cramer and Company (Limited) took place on Wednesday, when an *ad interim* dividend at the rate of 10 per cent. per annum, free of income tax, was declared.

At the general meeting of the Westminster Brewery Company (Limited), an interim dividend at the rate of 8 per cent. per annum was declared.

The directors of the Union Bank of Australia have resolved upon a dividend of 2*l* 5s per share, being at the rate of 9 per cent. for the half-year.

Mr Thomas Bantock (Messrs Bantock and Co., Wolverhampton) has joined the board of the Parkfield Iron Company (Limited). The shares are at 2¾ to 3¼ prem.

A prospectus has been issued of the General Estates Company, with a capital of 250,000*l* in 20*l* shares. The leading object of the directors of the undertaking is to acquire and improve land for building purposes in the neighbourhood of London. It is also proposed to make advances to contractors and builders. The first issue will consist of 6,250 shares.

A company has been started for the purpose of purchasing the blacking business and works of Warren, Russell and Co., Westminster. It is to be called Warren's Blacking Company, and to possess a capital of 100,000*l* in 10*l* shares, the first issue being 6,000 shares. The purchase price of the business and premises is 15,000*l*.

The London and Colonial Company—capital 360,000*l*, in 100*l* shares—has been established for purchasing and carrying on the business of the Crescent Brewery, Burton-on-Trent. In addition to a considerable brewery business, this Company, which was started in 1859, has carried on the trade of hop merchants, and has paid a dividend of 12½ per cent. for several years.

Another company, entitled the Nottingham Joint Stock Bank, with a capital of 1,000,000*l*, in 20,000 shares of 50*l* each, has been introduced by the Birmingham Financial Company. The population and trade of Nottingham having considerably increased since the establishment of the last bank thirty years since, the directors hope to be able to secure a profitable business in a comparatively short period of time. It is not intended to call up more than 25*l* per share.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428½ per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 110⅛ per cent. At this rate there is a small profit on the importation of gold from the United States.

The Commercial Times.

CORN IMPORTED AND EXPORTED.

An Account showing the Quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the Quantities of British and Foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended July 1, 1865.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended July 1, 1865:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	52,540 6	41 6
Barley	514 5	27 6
Oats	2,382 1	23 2

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the favourable weather for the growing crops, the trade for wheat at Mark lane, to-day, ruled quiet. All good and fine qualities, both as regards English and foreign produce, were firm in price; but in the value of inferior samples, there was a slight tendency to depression. Barley steadily supported previous rates. Oats- the supply on offer being abundant—moved off slowly, at a decline in prices from Monday of 6d per quarter. Beans and peas sold at fully late prices. A fair business was transacted in flour, at full currencies. This week's imports amount to 20,430 quarters of wheat, 19,240 barley, 52,710 oats, 520 sacks and 1,800 barrels of flour.

At Liverpool, this morning, wheat sold slowly at Tuesday's currency. American flour was rather dearer. The market for maize was steady at late rates. At Wakefield, the wheat trade, on the whole, was steady at previous quotations.

There has been a quieter feeling in the Liverpool cotton market this week. The imports have been larger than for some weeks past; and in the absence of a general demand, with a more varied selection of cotton on offer, prices have receded ¼d since Friday last. The removal of trade restrictions by President Johnson, coupled with the prospect of a speedy importation of cotton from the States, has also exercised an unfavourable influence. To-day the market is again better, and the decline seems, for the moment, checked, cotton in New York being quoted at 47 cents.

We have received letters from Bombay to the 8th ult. For the fortnight prior to that date the amount of business transacted in cotton was very moderate; but the receipt of more favourable news respecting the state of trade in England was productive of rather more firmness, and a slight advance took place in the value of superior descriptions of produce. Dhollera sold at 241 to 264 rs; Oomrawuttee, 205 to 211 rs; ditto Akote, 221 to 230 rs; Broach, 203 to 213 rs; and Hingenghaut, at 217 rupees per candy. We extract the following tables, which show the prices of cotton current at latest postal date, as well as the exports from Jan. 1 to June 8, from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, June 8.

1858	153,697	11,993	8,758	...	32,073	206,521

Business in Manchester goods at Bombay during the month of May was somewhat restricted. The continued derangement of the money market operated unfavourably; but as compared with the preceding month, the transactions were on a more extensive scale. The following prices of grey shirtings are from Messrs. Rennie, Scovell, and Co.'s circular:—

No	Inches.		lbs	oz	s	d
13	39	14 by 11	6	0	7	10½
18½	39	14 14	7	0	10	2
24	39	16 15	8	0	11	11

41	45	14 10½	7	0	9	9½
45	44	14 12½	8	0	11	6
49	44 to 45	16 16	9	8	13	7
57	50	16 17	10	6	14	10½

At Calcutta, from May 8 to May 22, the demand for cotton was moderately active, on rather higher terms. The market was well supplied.

From Tinnevelly we learn that the cotton trade was firm, at 103 rupees per candy.

The cotton trade at Madras from May 12 to May 26, ruled inactive. Prices, however, were firm, and a slight improvement took place. Western produce was quoted at 8½d per lb. The stock of cotton was estimated at about 12,000 bales.

At Colombo on the 3rd ult. the price of *new* cotton for delivery in two months was 110 rupees. At Tuticorin, the quotation according to latest advices was 103 rupees per candy.

For cotton at Shanghai, during the fortnight ending May 5, there was a fair demand. Fine Koong-pek was quoted at 15, and fair Shanghai at 14.50 taels per picul. The shipments since Oct. 1 stood thus:—

To—	1863-4. bales of 400 lbs.	1864-5. bales of 400 lbs.
Great Britain	94,176	48,626
Coast ports	67,283	31,473
Total	161,459	80,099

Only a moderate business has been transacted in the markets for colonial and foreign grocery produce this week. Raw sugar, however, has commanded more attention, and certain qualities

Digitized by Google

have changed hands at an advance in price of 6d per cwt. Tea, coffee, cocoa, and rice have sold at about last Friday's currency. In the rum market, there has been a fair amount of activity, and brandy—owing to more favourable advices from Australia—has exhibited rather more firmness, but without leading to any change in the quotations. The value of most other articles is without material alteration from Friday last. Last week, duty was paid in London on 1,176,504 lbs of tea, whilst the export for the week ending June 29 was 571,238 lbs, making a total of 1,748,442 lbs, against 1,235,672 lbs last year.

Letters from Mauritius state that about 120,000 tons of last season's crop of sugar had been shipped, leaving about 10,000 tons in warehouse. The accounts respecting the new crop were favourable, the estimate being 140,000 tons. The subjoined table shows the extent and destination of the shipments of sugar from August 1 to June 1, in each of the last three seasons:—

The coffee trade at Colombo during the fortnight ending June 3 was very quiet. The supplies of produce on sale were small, and very little change took place in prices. Plantation qualities were quoted at 12s 3d to 12s 6d per bushel; native ditto, unpicked, 43s; ditto picked and dried, 49s 6d per cwt. The annexed statement of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

Advices from the rice ports of British Burmah report continued activity in the demand for rice for shipment to the Straits and China. To those quarters the exports for the first four months of the present year exhibit a very large increase as compared with the same period in 1864, whilst the shipments to Europe show a falling off of somewhat similar extent; consequently the total exports of produce from those ports for the present year are without material variation in quantity from last year. It is stated that at the close of the season the shipments from Akyab, Rangoon, and Moulmein to Europe will show a decline from last season of 95,000 tons—the estimate being 153,000 tons, against 248,000 tons last year.

The English wool trade has been much quieter. Long-stapled qualities are tolerably firm in price; but a fall of about ½d per lb has taken place in most other descriptions. Hemp is steady, and the market for flax continues very firm.

COMPARATIVE STATEMENT of HEMP, FLAX, and JUTE on hand in London, on July 1, 1863, 1864, and 1865, Dealers' Stock included.

In reference to the state of the leather trade last month, Messrs Powell and Co. observe:—The transactions in leather have been limited; at its commencement a little more activity was apparent than had been shown previously, but during the latter portion of the month the demand has fallen off. In raw goods the sales are of an average extent, with very little change in prices.

As regards the state of the tobacco trade, last month, Messrs Grant, Hodgson, and Co. observe:—We have no change to report in the character of the market since the 1st instant; transactions have continued on a very limited scale, and with scarcely an exception for immediate requirements. The small sales effected, which are not deserving enumeration, have been principally confined to fine and selected qualities, and for which holders have declined submitting to any concessions; we have therefore resumed our previous quotations. For middling and ordinary sorts, very few sales have been made, but in those effected, prices were slightly in favour of buyers. The month's business for exportation has been very limited; some small lots of common and ordinary were taken at reduced rates. Imports—697 hhds. Deliveries—787 hhds, against 850 hhds in the corresponding month of last year. Stock—19,792 hhds, against 15,958 hhds in 1864, 17,313 hhds in 1863, 21,152 hhds in 1862, 19,407 hhds in 1861, and 15,495 hhds in 1860.

Oils and tallow have been rather quiet. Linseed oil has realised 32s 6d; foreign, refined rape, 46s; fine palm, 37s 6d; and St Petersburg Y. C. tallow, 41s 6d to 41s 9d per cwt, on the spot.

Very little change took place in the value of cotton at New York during the week ending June 24. The demand for cotton goods ruled quiet, and, owing chiefly to the high prices demanded,

Digitized by Google

a very moderate business was transacted in all descriptions: the supply on offer both at New York and other places was small. In the trade for woollen goods, there was a great want of activity; nevertheless, the quotations ruled firm. Silk goods continued in good demand at extreme rates; low-priced black qualities were very scarce, and were worth $1.50 to $1.55. In the various markets for grocery and other produce, there was a fair amount of animation, and previous quotations, in nearly all instances, were well supported. For money, there was very little demand: the best short paper was quoted at 6 to 7; ditto, 3 to 4 months, 6½ to 7½ per cent. Gold fluctuated in value from 137¾ to 142, closing at the latter quotation. The stock of bullion in the banks on the 17th ult. was 3,336,200*l*; and the balance in the Sub-Treasury, 8,569,200*l*. The export of specie, for the week ending June 17, was 402,000*l*, making a total since Jan. 1 of 5,4[illegible]2,360*l*, against 3,986,200*l* last year, and 4,349,870*l* in 1862. Later intelligence from New York states that the value of middling Upland cotton was 46 to 47 cents per lb, and the premium on gold 40⅜ per cent.

THE COTTON TRADE.

LIVERPOOL—July 7.

Cotton was in fair demand in the early part of the week, but during the last three days the business has been limited, and though holders have not generally pressed their stocks for sale, prices have given way, and the market closed heavily yesterday afternoon. Sea Island is in good request at full prices. American is in fair demand, but irregular in price, and some qualities are quoted ½d to 1d below last week. Brazil commanded rather higher rates early in the week, but since has been offered freely, and closed at a decline of about ½d per lb. In Egyptian, great irregularity has prevailed in fair qualities, which, after an advance of ½d per lb in the beginning of the week, closed ½d below former quotations. Smyrna is quoted ½d to 1d per lb lower. East India has fully participated in the general decline, the quotations of ordinary descriptions closing at a reduction of 1d, and the better grades ½d to 1d per lb from last week. In China and Japan, a fair business has been transacted, but prices are reduced ½d per lb.

To arrive, a few transactions have been reported from day to day at prices varying according to the tone of the general market. The latest quotations were yesterday for Pernam, first quality, ex quay, 18d; at sea, 17¾d and 17½d; Maceio, fair average, ship named, 17d; Dhollerah, fair new merchants, June sailing, 13d; Broach, fair new merchants, June sailing, 12½d.

The sales of the week amount to 31,520 bales, including 6,740 on speculation, and 6,870 declared for export, leaving 17,910 bales to the trade. The actual export this week is not deducted from the stock, as it was not included in the stock declared on the 30th ultimo. To-day the market, upon the advices per Scotia, opens with an improved demand, especially for long-stapled descriptions, which are ½d to ¾d dearer, and the sales amount to fully 10,000 bales.

LONDON—July 7.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market has been extremely quiet throughout the week, but as holders generally are firm, and have not pressed sales, only a very moderate business has been transacted, at prices in favour of buyers. Tinnivelly and Western Madras has declined ½d to ¾d, China ¼d, Scinde and Bengal ¾d per lb. The sales in cotton to arrive have been about 1,000 bales, at a decline of ½d to 1d per lb.

NEW YORK—June 24.

The cotton trade in the early part of the week was dull, on rather easier terms; but the market has since become firmer, and prices, to-day, are without change from Saturday last, middling Upland produce being quoted at 41 cents per lb. The sales are about 8,300 bales. Nearly 3,000 bales of cotton have been offered at public sale. The arrivals comprise 4,841 bales, chiefly from

Digitized by Google

New Orleans and by railway, thus raising the supply received since Sept. 1 to 241,188 bales. The prices current are as follows:

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a fair average business doing in goods this week both for home use and export. Prices have therefore been well supported. The iron trade may be considered steady. The demand for coals has fallen off to some extent.

Manchester, July 6.—The stagnation reported at the close of last week has continued to increase, and prices, as a rule, have become more irregular, and sellers more anxious. The majority of spinners are still under engagements, but where engagements are ending, several instances have been reported of reductions being offered of even 4d per lb from the rates of last Tuesday week. However, manufacturers are obliged to be cautious, from the almost utter impossibility of selling their productions, and but for the sake of keeping hands together many places would now be closing. The home trade has been quiet in view of the approaching elections. India buyers have been out of the market from apprehensions of failures, and other classes have done nothing from fears of lower prices generally.

Comparative Statement of the Cotton Trade.

Bradford.—The quietness in the wool trade has increased, and there is a general holding off from buying. The effect upon prices has been a fall of about ½d per lb. The demand for yarns has become most limited. Twofolds are still in good request and firm. There is a good deal of flatness also in pieces. Continental merchants are placing some good orders for lenos for next spring.

Leeds.—The purchases were chiefly small quantities of plain and ordinary cloths, with a sprinkling of various kinds of winter fabrics. The sale of the latter would probably be greater were the weather less hot. The export houses are mostly doing a good business for the season.

Huddersfield.—A few selections from unions, low woollens, and middle-priced fancy trouserings have been made by buyers from several continental firms, but the market generally has presented a somewhat dull appearance. Prices keep firm.

Rochdale.—The fancy department was scarcely ever in a more brisk condition, and manufacturers are pressed on all hands not only to complete current orders with all speed, but to undertake fresh contracts for short-time delivery. The Yorkshire trade keeps dull, and manufacturers have such prices to pay for both wool and cotton that they cannot make anything marketable at the prices which buyers are willing to give.

Leicester.—The hosiery trade is healthy, and there has been a satisfactory amount of business doing in most classes of goods. No stocks are being created, manufacturers being careful to make only what is required. Yarns are high in price, and the market continues firm. Wools are quoted at extreme rates.

Nottingham.—There is no improvement in the demand for goods for the home market, and the shipping trade is more quiet. Foreign buyers do not operate largely, and manufacturers finish only what is ordered.

Cardiff.—An average quantity of house coal is sent coastwise, and the inland demand is exceedingly small. Coke commands a moderate sale. The patent fuel works of the district are fairly employed.

Sheffield.—The cutlery manufacturers continue to do a moderate business with the United States, and prospects are rather improving than otherwise. There is no noticeable change in the other markets.

Wolverhampton.—The orders to hand for manufactured iron are of smaller amount, which applies to the trade with the Continent as well as the home market. The hardware trades of this district are quiet, the chief exception being in articles connected with railways, for which the demand is good, and tubes, which are in good request.

Birmingham.—The trade of this town remains flat, but there is no approach to depression, and at most of the manufactories they are working full time.

Belfast.—The demand for linens continues very animated, at advancing rates. Yarns continue steady, and prices remain firm.

Dundee.—Our flax market has continued firm, but business has been somewhat checked by the unexpected news of a decline in the Riga market. There has been rather more doing in good and medium qualities of jute at about former prices. The yarn market is steady. There is a good demand for linens.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, June 24.—The receipts of flour having continued good, and the stock of most descriptions having accumulated to some extent, the flour trade has ruled heavy, and prices have further declined. In wheat, however, rather more business has been done for export, and, on the whole, the quotations have been steadily supported. Corn has changed hands steadily, both for home use and export, at full prices. The following are the prices current:—Flour—State, superfine brands, $5.50 to $6.70; State, extra brands, $6.15; State, choice brands, $6.20 to $6.40; Ohio, common brands, $6.60 to $6.80; Ohio, fancy brands, $6 85 to $6.90; Ohio, good and choice extra brands, $6.95 to $8.15; Michigan, Indiana, Wisconsin, &c., $5.50 to $6.40; Genesee, extra brands, $6.50 to $9; Missouri, $8 to $11.50; Canada, common, $6.50 to $6.56; Canada, good to choice extra, $6.40 to $8.15 per barrel. Wheat—Choice amber Milwaukee, $1.40 to $1.41; amber Michigan, $1.70 to $1.75; white Michigan, $2.05. Corn—Western, mixed, 80c to 90c per bushel.

Exports of Grain, &c., from New York from June 1 to June 24.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat at our market, this week, coastwise and by land carriage, have been again very moderate. The show of samples has therefore been small; nevertheless, all kinds have changed hands slowly, at about stationary prices. The imports of foreign wheat having been on the increase, the stands have been better supplied than for some time past. Good and fine qualities have sold slowly, but at full quotations. In other kinds, next to nothing has been doing, at late rates. English barley has changed hands steadily at full currencies, but foreign parcels have been lower, but neglected. Malt has been in good supply, and fair request, on former terms. Owing to heavy importations from abroad, oats have moved off slowly, at 6d per quarter less money. Both beans and peas have realised extreme rates. The demand for flour has been far from active.

The following table shows the quantities of grain, &c., received and imported into London during the second quarter of the present year: as regards English produce, the arrivals by land carriage are confined to those by the Great Eastern, Great Northern, and South-Eastern Railways:—

	Wheat.	Barley.	Oats.	Beans.	Peas.	Flour.	
	qrs	qrs	qrs	qrs	qrs	sacks	brls
English	68124	16213	7360	5997	1650	205886	...

— 1862	298154	184793	449818	42641	1864	139870	144784

The country markets have been dull for wheat; nevertheless, very little change has taken place in prices.

On the continent there has been a fair sale for wheat and most other kinds of produce, at full prices. In America wheat and flour continue very dear. The annexed report in reference to the crops has reached us from New York:—

"The season is now sufficiently advanced for us to judge of the growing crops and form an estimate of the coming harvests. Taking for our data the appearance of the cereals in this vicinity, the reports of our exchanges from nearly all the States and the Canadas, and the monthly statement of the Department of Agriculture for May, we conclude that the labour of the husbandmen will be crowned with most bountiful results. The grain crop, which last season was valued at 365,707,074 dolls, promises to be still more prolific during the present year—indeed, in this State, Pennsylvania, Ohio, Indiana, Illinois, and New Hampshire, there has not been, it is said, so large a yield in a decade of years. There was the average amount of winter crops sown last fall, and in all the States except Delaware, Missouri, and Minnesota, wheat is looking much better than usual at this season of the year. Thousands of bushels of the crop of 1864 lie waiting in Western storehouses for transportation coastward, while in the far West, at St Paul and other points, it is said to be a drug in the market at fifty cents a bushel, owing to the bright prospects of the coming harvest. Winter rye also looks better in every State except Delaware and Minnesota. The same is true of winter barley, with the exception of Maine, Massachusetts, Connecticut, Maryland, Pennsylvania, Illinois, Minnesota, Kansas, and West Virginia; and in all these last mentioned States the crop promises an average yield with the exception of Connecticut, New Jersey, Pennsylvania, Illinois, Minnesota, and West Virginia. In every one of the States save Maine, Maryland, and Connecticut, there was less of wheat, rye, and barley, winter-killed than usual. In these three States barley suffered to some extent from the frost."

In Scotland, the various markets have been scantily supplied with produce, in which only moderate sales have been effected, at about stationary prices.

The demand for wheat in Ireland has fallen off. In the quotations, however, very little business has taken place. Spring corn has ruled steady.

The supply of English wheat on sale at Mark lane to-day was very moderate. The trade, however, was slow: nevertheless, selected wheats steadily supported Monday's currency. Foreign wheat was in but moderate request at late rates. Barley ruled firm at full quotations; but in the value of oats, owing to the abundant supply in the stands, a slight reduction, say of about 6d per quarter, took place. Beans and peas sold at fully late prices. Flour was in fair demand at full currencies.

Mr George Dornbush reports the arrival of 81 cargoes of grain, and a decline in the value of wheat of 6d to 1s per quarter. All other produce has ruled in favour of buyers. Cotton-seed has sold at 7*l* 12s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened with an active demand which has since continued, and many descriptions have advanced 6d to 1s per cwt. Numerous floating cargoes of foreign have sold for the United Kingdom and several for exportation. The refiners have bought freely, and there is some speculative demand. Of West India 2,965 casks had sold to yesterday (Thursday), including the various parcels by auction: Barbadoes, 29s to 35s 6d; crystallised Berbice, 35s to 40s per cwt. The stock in London is nearly the same as last year's at the same date, viz., 87,450 tons. There has been an increase in the home deliveries of 16,800 tons, and those for export show an excess of 9,750 tons over 1864.

Mauritius.—4,482 bags offered on Tuesday, sold as follows: brown, 26s to 30s; soft grey, 31s to 32s; grainy and crystallised 35s to 37s 6d; 11s 8d duty, 38s 6d to 39s per cwt.

Bengal.—607 bags Gurpatta date sold readily at 30s 6d to 31s 6d for low to middling yellow. A parcel of low soft brown is reported privately at 26s 6d; and 600 bags Gurpatta date, at 32s.

Madras.—575 bags date sorts sold at 25s 6d to 28s 6d per cwt.

Foreign.—956 casks 270 barrels Porto Rico sold at higher prices, for grocery samples, from 35s 6d to 39s 6d, and the lower qualities at 32s 6d to 35s. Privately, 650 casks Cuba are reported, chiefly at 32s. Eight floating cargoes of Cuba have sold for the Unittd Kingdom at 21s 6d to 22s 6d; two of brown Bahia, at 21s 6d; three of Havana, No. 13, at 26s; No. 11½ to 12, at 25s 3d to 25s 6d. For exportation, three of Havana, viz., two for near ports: No. 13½ to 14, at 26s 6d to 26s 9d. One, No. 13½ to 14, at 26s 6d for Gothenburg. 50,000 bags clayed Manilla, at 29s 6d to 30s. 8,000 bags muscovado, at 27s. 1,300 bags low brown Siam, at 24s per cwt.

Refined.—There is a better demand, and the low qualities of dry goods command 42s 6d to 42s 9d per cwt.

MOLASSES.—Antigua has sold to the extent of 180 puncheons, at 16s 3d to 16s 6d per cwt.

RUM.—Common qualities of West India are dearer: good Demerara, in puncheons, 1s 7d to 1s 8d: pale Leewards, 1s 7d. A considerable quantity of old Penang in second hands reported at 1s 4½d to 1s 5d per proof gallon.

COCOA.—The market has been quiet.

COFFEE.—There have been several arrivals from Ceylon. The market is at present rather barely supplied. Some few small parcels of Jamaica obtained extreme rates. Other kinds are steady, with large deliveries for export. 97 casks 1,031 bags native Ceylon found buyers: good to fine ordinary, 69s to 70s. 894 bags Singapore sold at 54s 6d to 67s. 311 bags Cochin: pale at 76s to 76s 6d per cwt.

TEA.—The market has not shown any alteration by private contract, very large public sales being held. These commenced on Tuesday, the quantity printed being 40,779 packages, more than three-fourths "without reserve." Prices ruled irregular, and in some instances rather lower. Up to yesterday (Thursday) afternoon 20,521 packages had sold, all without reserve. Common broken and dusty leaf congou, 7¾d to 9¾d; common to fair red and black leaf congou, 11¼d to 1s 5¼d. Common Shanghai and Foo Chow green declined 1d to 2d per lb.

RICE.—There has been less inquiry this week, but the market remains firm. Some business is reported in white Bengal on previous terms. A floating cargo of Necrancie Arracan has sold at 10s 3d for a near port, or 10s 9d per cwt for the United Kingdom. Transactions in soft grain descriptions on the spot are very limited. The stock of white Bengal is only 1,300 tons.

IMPORTS AND DELIVERIES OF RICE to July 1, with STOCKS on hand.

SAGO.—700 boxes small medium and small grain sold at 19s to 19s 6d per cwt, being slightly cheaper.

SPICES.—Black pepper is steady, and 3,400 bags sold at and after the sale: fair brownish Penang, at 3d; Singapore, 3⅛d to 3¼d. Pimento continues firm with an upwaad tendency. A small parcel good, by auction, sold at 2⅞d to 3d. 32 cases brown nutmegs sold on previous

Digitized by Google

terms, from 11d to 1s 7d with fine bold at 3s 8d. 10 cases mace were taken in at 10d to 1s 3d per lb. A steady demand prevails for Jamaica ginger, 120 barrels selling at 61s to 78s. 551 bags rough Bengal were partly realised at 24s 6d to 25s. 80 boxes Cassia buds sold from 9*l* 15s to 10*l* 15s per cwt.

SALTPETRE remains lower. 1,190 bags Bombay, offered by auction, were taken in and since sold at 21s 6d, refraction 33 to 23½. 187 bags Bengal, refraction 4½, at 24s 6d cash. 2,600 bags, privately, 7 to 3, at 24s 6d to 25s, according to conditions.

IMPORTS and DELIVERIES of SALTPETRE to July 1, with STOCKS on hand.

BARK, &c.—Current prices: English, per load of 45 cwt delivered, in London, 16*l* 10s to 17*l* 15s; ditto Coppice, 16*l* 10s to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 0s to 7*l* 0s; ditto Coppice, 6*l* 10s to 7*l* 10s; French, 0*l* to 0*l*; Mimosa, chopped, 10*l* to 11*l* 10s; ditto, ground, 11*l* 10s to 13*l*; ditto, long, 8*l* to 10*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto, Sardinian, 8*l* 10s to 9*l* 10s; Valonia, Smyrna, 17*l* to 20*l* 0s; ditto, Camata, 17*l* to 20*l* 0s; ditto, Morea, 13*l* 0s to 17*l* 10s; Divi Divi, 10*l* to 13*l* 10s; Myrabolans, 12*l* to 14*l* 10s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 21*l* 5s to 22*l* 0s; ditto, free cubes, 27*l* to 28*l*; ditto, Cutch, 24*l* 0s to 25*l* 10s per ton.

SHELLAC remains quiet at last week's decline.

DRYSALTERY goods are quiet.

MANILLA HEMP has been firm, and the present stock of 4,650 tons is smaller than usual. The demand, however, is not active, and 1,675 bales, offered by auction, were chiefly taken in at 30*l* 10s to 32*l* per ton.

JUTE.—On Wednesday 14,318 bales brought to public sale went off without material change in prices, fully three-fourths of the above quantity being sold, besides several parcels by private contract. The range of quotations was 10*l* to 21*l* 15s per ton.

METALS.—Some changes of interest have occurred in the market. Copper has been reduced 4*l* per ton for British, and the smelters have lowered the price of English tin 3*l* per ton. Foreign quiet. Straits last sold at 92*l* to 92*l* 10s. Banca 95*l* per ton. Scotch pig iron may be quoted inactive, at 55s per ton cash mixed numbers. The stock of spelter is now 7,120 tons against 11,900 tons last year. Market firm, and the last sale on the spot 22*l* 5s per ton.

OILS.—Fish oils are steady. East India has sold freely at 30*l* per tun. Rape oil firm; foreign refined quoted 46*l*. Several arrivals of palm oil render the demand less active. Fine is worth 37*l*. Cocoa-nut has not sold so freely as of late; Cochin, 44s 6d to 45s; Ceylon, 48s. Linseed oil is rather lower, selling at 32s 6d per cwt on the spot.

LINSEED has been steady; Calcutta 57s on the spot. 3,000 tons have been sold to arrive at 58s per quarter.

TURPENTINE.—French spirits offer at 51s 6d per cwt.

TALLOW.—The market is inactive, closing rather lower, viz., 1st sort Petersburg Y. C. on the spot, 41s 6d; last three months, 42s 6d; January to March, 1866, at 43s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, July 3, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues firm, and the sales to-day passed off well, various parcels of West India finding buyers. 4,663 bags Mauritius were sold at fully previous quotations, and 1,051 bags Gurpatta date Bengal at 32s 6d to 33s. The week's business in West India amounts to 5,020 casks. A floating cargo of Havana has sold, No. 10½ to 11, at 25s; one of brown Bahia at 21s 4½d per cwt., both for the United Kingdom.

COFFEE.—208 casks plantation Ceylon sold at about previous rates; also 90 casks 543 bags native. 122 bales mixed long berry Mocha realised 92s 6d to 93s per cwt.

COCOA.—426 bags Trinidad, offered by auction, sold at 70s 6d to 78s. 176 bags Grenada at 51s 6d to 58s per cwt.

GINGER.—139 barrels Jamaica, offered by auction, partly sold at 8*l* 9s to 7*l* 15s per cwt.

TEA.—At the market to-day red leaf congou declined ½d to 1d per lb. 7,723 packages sold, all without reserve, leaving 7,800 packages for next Monday.

RICE.—3,000 bags soft grain sold at 9s 3d to 10s per cwt.

OIL.—392 casks low Manilla cocoa-nut, offered by auction, were bought in.

TALLOW.—508 casks Australian sold at 3d to 6d decline; good beef, 39s 6d; mutton, 41s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains unaltered. Dutch crushed very steady, with a little more inquiry.

GREEN FRUIT.—Market quiet, and stock of all kinds reduced to a small compass. Some small parcels of Sicilian lemons, sold by Keeling and Hunt at public sale, went at an advance of 3s to 5s per package. Barcelona advanced in price, with prospect of further improvement. Para in moderate demand.

DRY FRUIT.—A dull heavy market for all fruit. Low currants at 18s only in demand. Raisins again lower, though the stock is in very few hands, and remarkably small.

COLONIAL WOOL.—No change to report.

FLAX.—Market very firm.

HEMP.—Market firm, and a full average business doing, with less disposition to sell for forward delivery.

SILK.—Business very quiet. Prices firm, but scarcely any inquiry.

TOBACCO.—A slightly improved demand has been experienced for good and fine home trade descriptions, and sales effected at full quotations. Fine spinning qualities of old imports have commanded extreme rates, and holders have declined making any concessions.

METALS.—We record very little variation, but if anything, a little more business doing, as yet, however, without speculation. Copper keeps steady at late quotations. Tin is firm, and makers well supplied with orders. Tin, reduced in nominal quotations of English by 3*l* per ton, on 5th instant, with quiet market. Spelter rather firmer, and 30s advance in zinc. Lead still inanimate. Tin plates in steady demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	43	3
Melted stuff	33	6
Rough ditto	18	6
Greaves	18	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, July 3.—The total imports of foreign stock into London, last week, amounted to 20,395 head. In the corresponding week in 1864 we received 12,154; in 1863, 7,323; in 1862, 9,140; in 1861, 9,592; in 1860, 11,806; and in 1859, 5,939, head.

There was a large supply of foreign stock on offer here to-day chiefly in middling condition. Amongst it were 1,300 beasts from Tonning. Some of the Dutch beasts realised 4s 8d per 8 lbs. The arrivals of stock fresh up from our own grazing districts were very moderate. For good and prime beasts the demand ruled steady, and in some instances the quotations had an upward tendency. Otherwise the beef trade was dull at about last Monday's currency. The best Scots and crosses realised 5s per 8 lbs. A few very superior Scots sold at 5s 2d per 8 lbs. The show of English sheep was very limited, about a moiety of the total supply being derived from abroad, but in fair average condition. Downs half-breds, Lincolns, and Leicesters moved off steadily on rather higher terms. Inferior sheep were a slow inquiry at late rates, the top figure was 6s per 8 lbs. Lambs, the supply of which was moderate, sold slowly at from 6s to 7s 4d per 8 lbs. We had a steady sale for calves, at slightly enhanced rates. The top quotation was 5s 2d per 8 lbs. Pigs changed hands slowly, yet prices were supported.

SUPPLIES.

	July 4, 1864.	July 3, 1865.
Beasts.....	4730	5610
Sheep and lambs.....	27640	25990
Calves	410	324
Pigs...	470	320

THURSDAY, July 6.—There was a full average supply of beasts on offer in our market to-day. Prime Scots, &c., moved off freely at prices fully equal to Monday. Otherwise, the beef trade was inactive at late rates. The show of sheep was tolerably good. Downs and half-breds were very firm. Inferior sheep were inactive at late rates. Lambs were in good request at from 6s to 7s 4d per 8 lbs. The supply was moderate. We were well supplied with calves, which changed hands slowly on former terms. The pork trade was heavy. In milch cows, very little was doing.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, July 7.—The accounts from nearly all parts of the plantations are favourable. The demand for hops rules inactive. The supply of produce on offer being small, holders are unwilling to make any concession in price, and the quotations are unaltered from Monday. Mid and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, 100s to 140s; Yearlings, 100s to 130s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 7.—Our market has been rather quiet this week, but all current descriptions continue firm in price, as stocks of them are limited.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 7.—Market thinly attended. Wheat at Tuesday's rates. Flour, American, scarce and a turn in favour of holders. Indian corn in moderate request at late rates. Oats and oatmeal steady.

The Gazette.

TUESDAY, July 4.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 24th of June, on 11,961 miles, to 707,980*l*, and for the corresponding week of last year, on 11,605 miles, to 671,195*l*, showing an increase of 356 miles and of 36,785*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,422 miles, to 577,736*l*, and for the corresponding week of 1864, on 8,167 miles, to 550,218*l*, showing an increase of 255 miles and an increase of 27,518*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 3.—In the share market to-day there was an inconsiderable amount of business, not a single transaction having occurred in British mines, which closed with several instances of decline in the nominal quotations; but English and colonial railways were disposed to firmness, and the other descriptions were without appreciable change of tone. Of the English lines, Great Eastern, Metropolitan, North-Eastern (Leeds), and ditto (York) improved ¼ each, ditto (Berwick), Lancashire and Yorkshire, and Midland ¼ each, West Hartlepool (A stock) 1, and South-Eastern a further ¼; and Great Western further declined ¾. In colonial, Great Indian Peninsula, Scinde, Delhi (stock), Punjaub, and Great Western of Canada (5½ per cent. bonds) advanced ½ each, ditto (6 per cent.) 1, and ditto (shares of both descriptions) a further ⅛ each; and Atlantic and St Lawrence relapsed 1.

TUESDAY, July 4.—In the share market to-day, although the transactions were again few, the movements in the closing prices indicated continued firmness in English and Indian railways, as well as to a less extent in foreign railways and mines, while the banks were rather inclined to weakness, and the other descriptions showed average steadiness. Of the English lines, Chatham (Metropolitan extension A stock) advanced 2½, North-Western ½, Great Eastern (East Anglian) ½, ditto (ordinary) and Metropolitan a further ½ each, and West Hartlepool (A stock) a further 1; North-Eastern (York) relapsed ½, and Great Western further declined ½. In colonial, Madras (4¾ per cent.) and ditto (4½ per cent.) improved 1 each, ditto (5 per cent.), Great Southern of India (5 per cent.), and Bombay and Central India ½ each, Buffalo and Lake Huron ⅜, and Scinde, Delhi (stock), and Punjaub a further ½ each. In foreign, Bahia advanced ½, and Dutch-Rhenish and Lombardo-Venetian ⅛ each, and West Flanders receded ⅛. In American, Illinois Central (shares) further improved ¾. In British mines, East Carn Brea recovered ½; Nangiles improved 1½, and Great Wheal Vor ½; and Grenville, Marke Valley, and South Condurrow declined ¼ each.

WEDNESDAY, July 5.—In the share market to-day continued dulness prevailed, and the English railways closed with a slight average disposition to weakness; the French railways were, however, firmer, and the other descriptions were not materially altered in tone. Of the English lines, Caledonian improved ½; Great Northern (A stock) and North-Eastern (Leeds) declined 1 each, ditto (Berwick) ½, ditto (York) a further 1, and Great Western a further ½, and Metropolitan District (paid-up) remain at 105 to 107, and ditto (10*l*) at 5 to 6 premium. In colonial, no change was recorded. In foreign, Eastern of France, Northern of France, and Paris and Orleans improved ½ each, Namur and Liege and Sambre and Meuse (preference) ¼ each, Great Luxembourg ⅛, and Dutch-Rhenish a further ⅜. In American, Erie shares (paid-up) advanced ¾, and Illinois Central (shares) further ¾. In British mines, Great South Tolgus improved ¼. In foreign mines, St John del Rey further improved 2; and Washoe Gold (of both descriptions) relapsed ½ each.

THURSDAY, July 6.—In the share market to-day English railways again closed with a weaker tendency, but Indian were generally firmer; in the other descriptions there was no material average change. Of the English lines Bristol and Exeter advanced 1, and South-Western and Metropolitan District ½ each; Caledonian relapsed ½; and Metropolitan declined 1½; Great Eastern, Chatham, North-Western, and Manchester, Sheffield, &c., ½ each. In American, Virginia (6 per cent.) advanced ½. In British mines, Drakewalls and Great Laxey receded ¼ and ½ respectively.

FRIDAY, July 7.—The transactions in the railway market were limited, and the tone was dull. Great Northern original and A stocks declined ½ per cent., London and North-Western and Midland ¼, and Lancashire and Yorkshire ⅛. Indian, Canadian, and foreign railway shares ruled inactive.

NATIONAL BANK OF SCOTLAND

(Established 1825.)
Incorporated by Royal Charter 1831.

An OFFICE of the Bank has been OPENED at No. 21 FINCH LANE, E.C.

W. J. DUNCAN, Manager.
July 8, 1865. JAMES MILLN, Agent.

THE BANK OF BRITISH NORTH AMERICA

—Incorporated by Royal Charter; Paid-up Capital, One Million Sterling—GRANTS LETTERS of CREDIT on its Branches in Canada, Nova Scotia, and New Brunswick; on its Branch in Victoria, Vancouver's Island; and its Agents in New York and San Francisco, payable on presentation, free of charge.

Also purchases or forwards for collection Bills on America and Coupons for dividends on American Stocks, and undertakes the purchase and sale of stock and other money business in the British provinces and the United States.—By order of the Court,

C. M'NAB, Secretary.

7 St Helen's place, London.

ASIATIC BANKING CORPORATION.

Incorporated by Royal Charter.
Authorised Capital, £2,000,000.
Paid-up Capital, £500,000.
Head Office, No. 4 Lombard street.

Agencies and branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange, payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c., and undertake the safe custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

COMMERCIAL BANK CORPORATION of INDIA and the EAST.

Incorporated by Royal Charter.
Capital £1,000,000 (one million sterling), with power to increase to £2,000,000.
Head Office, 64 Moorgate street, London, E.C.

Branches and Agencies at Bombay, Calcutta, Foochow, Hankow, Hong Kong, Shanghae, Singapore, and Yokohama.

The Bank negotiates and collects bills and grants drafts on its branches and agencies as above. It acts as the agent of parties connected with the East in transmitting funds, and in making investments in Indian and other public securities, effecting also the sale thereof either at home or abroad. It undertakes their safe custody and the receipt of interest or dividends thereon, and receives pay, pensions, and other moneys for remittance through the Bank or otherwise.

The Bank also receives money on deposit at rates of interest proportioned to the length of the notice of withdrawal agreed to be given, the terms of which may be ascertained on inquiry.

Office hours 10 to 4 Saturdays 10 to 2.

THE EAST INDIA BANK.

Incorporated with unlimited liability, under Act XIX. of 1857, of the Legislative Council of India.
Capital £625,000 (all paid up), in 25,000 shares of £25 each.
(With power to increase.)
Head Office—Bombay.
Branch Offices—Calcutta and London.
LONDON BANKERS.
National Bank of Scotland, 21 Finch lane.

The Bank undertakes the agency of parties having business in India, grants drafts, negotiates and collects bills, payable at the above places.

The purchase and sale are effected of Indian Government securities, bank and other shares, as also the receipt of interest and dividends.

It also undertakes the safe custody of securities, bank and other shares, and when required will remit the interest and dividends on the same when they are paid.

Any information regarding terms of business may be ascertained by applying at this office.

R. MACNEIL, Manager.

London office, 12 Leadenhall street.

THE BANK OF HINDUSTAN, CHINA, and JAPAN (Limited),

1 Bank buildings, Lothbury, London.
Capital, £4,000,000.
Paid and to be called up, £1,000,000.
BANKERS.
The Bank of England.
The National Bank. | The Alliance Bank (Limited).

Branches and Agencies at Bombay, Calcutta, Colombo, Kandy, Hong Kong, Shanghae, Yokohama, Singapore, Point de Galle, Manilla, Foo-chow, Ningpo, Hankow, and Kiu-Kiang.

Deposits received at ten days' notice, on the usual terms and for fixed periods, at rates subject to special agreement.

Drafts issued and Bills negotiated payable in India, China, &c.

Circular Notes and Letters of Credit, payable throughout Europe, are also issued, for the convenience of travellers per overland route.

The purchase and sale of Indian and other securities, and the safe custody of the same, undertaken. Dividends, pay, pensions, interest, or other moneys realised, and the registry of Indian Government loan notes effected, so that the interest may be paid in England. Every other description of Banking and Agency business in connection with India, China, &c., conducted on the most favourable terms.

J. OUSELEY, General Manager.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 600,000l.
LETTERS OF CREDIT ON THE BRANCHES at
ADELAIDE,
MELBOURNE, and
SYDNEY,
are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection. DEPOSITS received at rates and for periods which may be learned on inquiry at the office.—By order of the Court, HENRY MOULES, Secretary.

73 Cornhill, E.C.

UNION BANK OF AUSTRALIA,

38 Old Broad street, London, E.C.

Nottingham Joint Stock Bank (Limited), Low Pavement, Nottingham.
The Birmingham Financial Company (Limited), Waterloo street, Birmingham.

PROSPECTUS.

Upwards of thirty years have elapsed since the establishment of a new bank in Nottingham. During that period the population of the town and neighbourhood has more than doubled. The value of property, taking the assessment as a basis, has more than trebled, and the wealth and trading operations of the district have increased in a still greater ratio.

It has long occasioned surprise that no additional banking accommodation has been provided, to develop the resources of this important seat of manufacturing industry.

The general adoption of the principle of limited liability, and the immunity thereby secured from the risks inseparably associated with companies established upon the principle of unlimited liability, have given an impetus to the formation of new joint stock banks. Many of these establishment have achieved an amount of success which proves that, where they have been guided by a sound and liberal policy, they have proved to be a most attractive investment; the shares command high premiums, and are eagerly sought after by the public.

One instance may be quoted, the circumstances of which are analogous to the facts stated with regard to Nottingham. The Birmingham Joint Stock Bank commenced business in 1862. The present market value of the shares, upon which £10 has been paid, is £37, and the guarantee fund, according to the last official return, exceeds £130,000.

Some time since, the Birmingham Financial Company were invited to co-operate in the establishment of the proposed Nottingham Joint Stock Bank. The subject has received the anxious consideration of that Company, who have now associated themselves with the gentlemen whose names appear on this prospectus, and many others of high standing in London. The project is now submitted to the public by the Financial Company, who believe that its success is already absolutely secured.

The capital has been fixed at £1,000,000, in 20,000 shares of £50 each, one-half to be first issued, the residue to be allotted at such times and in such manner as the Directors think best for the interests of the bank. It is not intended to call up a greater amount than £25 per share, so that ultimately there will be an uncalled capital of £500,000, available to meet the engagements of the Company.

The articles of association will stipulate that no dividend beyond 5 per cent. per annum will be paid until a guarantee fund has been created, out of profits, amounting to at least one-fifth of the paid-up capital.

Most eligible and central freehold premises, recently occupied by Mr Joseph Whitaker, in Low pavement, Nottingham, have been secured.

Arrangements are being made to commence immediate operations. The Directors hope very soon to be in a position to announce the appointment of a Manager, well qualified to occupy a position of so much importance.

In the allotment of shares, preference will be given to those who can introduce business to the Bank, and also to those who are able to advance its interests. In the event of no allotment being made, deposits will be returned in full.

Applications for shares to be made upon the form annexed, accompanied with the requisite deposit, to be forwarded to the offices of the Birmingham Financial Company, Waterloo street, Birmingham, or the offices of the Bank, Low pavement, Nottingham.

Prospectuses and forms of application may be had from the brokers and solicitors.

All communications to be addressed to Mr Henry Allbutt, Secretary, Birmingham Financial Company, Waterloo street, Birmingham.

NOTTINGHAM JOINT STOCK BANK (LIMITED).
FORM OF APPLICATION FOR SHARES.
To be retained at the offices.

To the Provisional Committee of the Nottingham Joint Stock Bank (Limited).

Gentlemen,—Having paid the sum of as a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me, to pay the amount due on allotment, and to sign the articles of association of the Company, when required, and I authorise you to insert my name on the register of shareholders for the number of shares allotted to me.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

IMPERIAL MERCANTILE CREDIT ASSOCIATION (LIMITED).

DEBENTURES ISSUED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz. :—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years.....	6	per cent.	per annum.
— Five years	6½	—	—
— Seven years.....	7	—	—

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, June 15, 1865.

STOCK EXCHANGE SECURITIES.

Railways	Banks	English Funds
Financial	Foreign Funds	Discount
Steamship	Loan	Docks
Iron Works	Gas	Waterworks
Insurance	Telegraph	Hotel
Marine Insurance	Land	Irrigation
Foreign Mines	Cornish Mines	Devon's Mines

And other Public Companies.

Mr PETER WATSON, Stock and Share Dealer, begs to state that every information respecting any of the above Companies may be had on personal application, or by letter, as to purchases and sales, with advice as to the most desirable investment.

From the close proximity of his offices to the Stock Exchange, and also the Mining Exchange, he is enabled to act with promptitude on all orders entrusted to him in the purchase or sale of every description of stocks or shares, at net prices for cash or fortnightly settlements.

Telegraphic messages of customers to buy or sell in any of the above companies punctually attended to, at net prices for cash or half-monthly settlements, at the closest possible market prices of the day.

Twenty years' experience (two in Cornwall and eighteen in London).

BANKERS.

The Alliance Bank and the Union Bank of London.

The present is an unusually favourable period for the investment of capital.

A selected list of railways, banks, financial, foreign funds, steamships, foreign and Cornish and Devon mines, &c., sent on application, with special recommendations as to investments, &c., on the distinct understanding that any business resulting through his information or advice may be done through him.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

SHAREHOLDERS IN FINANCIAL

BUBBLES will do well to immediately Sell (if they can), for when the accounts for the half-year (ending this month) are made up no bona fide profit can be expected; but, in all probability, very "heavy losses" will be the result. The future trading in many will be very precarious and doubtful, hence the advice to sell immediately and avoid further liability. Investors should then re-invest in bona fide, safe, and long-established companies, which are managed for the general body of shareholders, and not for private individuals only. By acting on this advice great profits, instead of heavy losses, may thus be made.

PETER WATSON, Stock and Share Dealer,
79 Old Broad street, London, E.C.

INVESTMENT OR SPECULATION.

—The present market price of Government (foreign) Bonds, Banks, Steamship, Marine Insurance, &c., will yield the immediate purchaser some five, eight, or twelve per cent. per annum (paid half-yearly on fixed days with the greatest regularity). In addition to the high rate of interest or dividends there is every probability of many of the above having a good rise in market value.—PETER WATSON, Stock and Share Dealer, 79 Old Broad street, London, E.C., can give every information respecting the above, and he is in a position to BUY and SELL at net close market prices of the day.

GENERAL CREDIT AND FINANCE COMPANY OF LONDON (Limited).

Notice is hereby given, that on and after Monday, the 3rd July, the business of the Company will be carried on at No. 27 Austinfriars, E.C., during the rebuilding of the present offices.

THE LONDON, WINDSOR, AND GREENWICH HOTELS COMPANY (Limited).

The last day for receiving Applications for Shares in this Company will be TUESDAY next, the 11th inst., for London, and THURSDAY, the 13th inst., for the country.—By order,

GEORGE LESLIE, Secretary.

29 Nicholas lane, July 5, 1865.

SIX PER CENT. SECURED ON FREEHOLD PROPERTY in LONDON.

The Directors of the INNS of COURT HOTEL COMPANY (Limited) are issuing the remainder of the Company's 6 per cent. Mortgage Debentures.

These bonds, secured as a first charge on the entire hotel property (estimated as worth not under £120,000), are issued for 3, 5, or 7 years with coupons attached for payment of interest half-yearly, and investors have the option of paying in full or by three instalments.

The Company cannot borrow more than £80,000.

H. T. L. BEWLEY, Secretary.

Offices of the Company, 63 Lincoln's inn fields,
July, 1865.

THE MERCHANT SHIPPING COMPANY, Limited.

Notice is hereby given, that the First Ordinary General Meeting of the Shareholders in this Company, will be held at the London Tavern, Bishopsgate street, in the City of London, on Friday, the 28th day of July instant, at Two o'clock in the afternoon precisely, to receive the Report of the Directors and Statement of Accounts, to declare a dividend, and for general purposes.

Immediately after the general business has been transacted, the meeting will be made Special, for the purpose of considering the Articles of Association, and passing a special Resolution or Resolutions for the alteration or repeal of Article No. 84, and of sections 3, 8, and 9 of Article No. 97; and for the alteration or amendment of Article No. 114, by adding thereto the following words, "always excepting the Shares of the Company."

The Share Transfer Books will be closed from Friday the 14th, until Friday the 28th instant, both days inclusive.—By order of the Directors,

ALFRED WALLEN, Secretary.

60 Gracechurch street, London, July 5, 1865.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

JULY, 1865.
PLYMOUTH MEETING.

PROGRAMME.—

WEDNESDAY, THURSDAY, FRIDAY, and SATURDAY, JULY 12, 13, 14, and 15th.

Trial of Field Implements on Woodford Farm, Plympton St Mary. Distance by rail or road 3½ miles from the Show-Yard.

The Show-Ground is at Pennycomequick, about one mile from the Railway Stations of Plymouth and Devonport.

SATURDAY, JULY 15th.

The Implement-Yard open from 9. a.m. till 6 p.m.; admission 5s each person.

MONDAY, JULY 17th.

Cattle-Yard open from Eight in the morning, at which hour the Judges will commence inspecting the Live Stock, and making their awards.

The Implement-Yard open from Eight in the morning.

Admission — Members free; Non-Members, Five shillings.

The Show-Yards will be closed at Six in the Evening.

TUESDAY.

Public Dinner, in a Pavilion near the Hoe, at Six p.m. Tickets 10s each.

TUESDAY and WEDNESDAY, JULY 18 and 19.

The General Show of Cattle, Horses, Sheep, Pigs, and Implements, open to the Public from Eight o'clock in the morning till Six in the evening. Admission—Members free; non-members, 2s 6d each person.

THURSDAY and FRIDAY, JULY 20 and 21.

The General Show of Cattle, Horses, Sheep, Pigs, and Implements, open to the Public from Six o'clock in the morning till Six in the evening. Admission—Members free; non-members, 1s each person.

FRIDAY, JULY 21.

General Meeting of the Members in the Show-Yard at Ten o'clock.—By order,

H. HALL DARE, Secretary.

12 Hanover square, London, W.

"PURITY AND EXCELLENCE OF QUALITY."

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their est work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

THE PATENT KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

SECRETARY—Mr Henry Norrish.

Offices—24 Bucklersbury, London, E.C.

The object of this Company is to purchase, carry on, and extend the old-established and well-known business, founded by the late Robert Warren, about the year 1804, in blacking, ink, &c., &c., for many years carried on under the title of WARREN, RUSSELL, and CO., late at 30 Strand, and now at Regent Works, Westminster.

The profits made by the original proprietors of the three leading firms in this trade, viz., Messrs Day and Martin; Robert Warren, afterwards Warren, Russell, and Co.; and Mr Everett, were enormous. The principals in each of these firms having realised very large fortunes, since Mr Charles Day commenced the manufacture of blacking, in 1801. [Vide, Reports of the Juries to Her Majesty's Commissioners for the Exhibition of 1851, Class 29, Page 630-631].

The leading articles manufactured in this establishment, viz., Liquid, Paste, and Harness Blacking, Writing and Copying Inks, Brunswick and Berlin Blacks, Washing Crystal, Black Lead, &c., are of daily domestic consumption, and unlimited demand, not only for the home market, but for the colonial and foreign trade, and the business in all its branches can be easily and speedily increased to a very large extent by the employment of adequate capital.

The Directors have satisfied themselves that the reasons of the withdrawal of original Capital are of a private nature, and in no way connected with the value of the Business as an Investment.

The Directors point with satisfaction to the important fact, that the Government Contracts for the Army are generally successfully competed for by the present Firm.

The calculation on undoubted data of the prime cost of ingredients used in the manufacture, the working expenses, cost of management, &c., and the selling prices to the trade, allowing for liberal commissions, discounts, &c., has satisfied the Directors that a dividend not easily obtainable in any ordinary investment will be realised by this Company.

The lease of the premises, held under the Dean and Chapter of Westminster, will be made over to the Company, the nominal rent being 1s per annum; and upon the payment of a small fine every fourteen years, the lease will be renewable for ever, thereby rendering it almost equivalent to freehold. This very valuable property, the goodwill of the business (including the important special recipes of the manufacture), stock-in-trade, plant, &c., will be assigned to the Company by the present proprietor for the very moderate sum of £15,000, two-thirds of which will be taken in shares of the Company.

The Company will have the advantage of the services of the present proprietor, who has agreed to act as Manager (with a seat at the Board), on moderate terms, and of the existing staff at the works, some of whom have been engaged in the firm for upwards of 40 years.

If a less number of shares are allotted to any applicant than have been subscribed for, the balance of the deposit will be retained towards the payment due on allotment.

Prospectuses and forms of application for shares can be obtained of the bankers, brokers, solicitor, or secretary of the Company.

A portion of the shares have been applied for and allotted.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London bridge."

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

THE

ITALIAN COMPANY OF MERIDIONAL RAILWAYS.

REPORT

Presented by the Board of Directors at the Extraordinary General Meeting held on the 25th of February, 1865.

THE expectations which we stated to you at the last general meeting, on the 12th October, 1864, under the reserve then imposed on us by our position, have just been realized.

Having willingly yielded to the desire expressed by the Government on several occasions to consider in concert certain modifications of the network of lines belonging to the Company, with a view to the permanent re-arrangement, in groups, of the whole system of Italian railways, we have concluded and stipulated with it a Convention, dated the 28th November last, which greatly modifies the first concession of the 21st August, 1862.

In conformity with Art. 32 of the Statutes, we called the present meeting, to ask your approbation of what we have done.

When we fixed on this day for the extraordinary meeting, there was every reason to believe that the discussion on the Convention would be over, and that the Legislature would at the present moment be prepared to sanction what the Ministry had signed.

But if we have to regret our inability to examine the Convention with you until it shall have received the legislative sanction, we still have the satisfaction to announce that by means of certain modifications, the Board of Directors is at present in accord with the Ministry on all the questions. This encourages us to hope that there is no longer any serious difficulty to prevent the acceptance of the Convention as we now lay it before you, requesting your serious attention to the rapid analysis we are about to give of the more important stipulations which it contains.

In the first place, we have to speak of the changes made in the composition of the Company's network, and of the financial consequences to which those changes may give rise. This will lead us to speak of the liquidation of the accounts.

In the second place, we shall examine the new formula of the guarantee, and will conclude our report by a concise summary of the secondary stipulations, less important, it is true, but still of sufficient moment for us to lay them before you.

According to the concession of the 21st August, 1862, the Company's network consisted of 1,364 kilometres, of which 147 are in Lombardy and 1,217 in the southern provinces. The main line of the Adriatic from Ancona to Otranto was put in communication with Naples by the Conza and Salerno line, and the Ceprano line. The distance from Naples to the southern part of these lines was 220 kilometres, measured from Foggia by Conza, whilst the northern part was 368 kilometres, measured from Pescara by Ceprano.

This combination presented the inconvenience of leaving outside the provinces of Molise and Benevento, and of following for the junction of Naples with Foggia and Pescara two lines which not only were rather long, but also attended with enormous working expenses. These inconveniences would no longer exist under the new combination, which would suppress the Foggia-Eboli and Popoli-Ceprano branches, and substitute in their stead the line from Naples to Foggia, by Caserta and Benevento, with a branch to Vermoli by Velese and Campobasso; and consequently the distance from Foggia to Naples, reduced by the new line to 180 kilometres, is diminished by 40 kilometres, and that from Naples to Pescara is also diminished by 77 kilometres, being only 291 instead of 368 kilometres.

The object of the Government in proposing the new convention was also to take a line across the Abruzzi, and this end will be gained by the deviation at Popoli of the projected line by Ceprano, and by its new direction *viâ* Aquila and Rieti towards the line which has been conceded to the Roman Railways Company on the other slope of the Apennines, which line, by Ceprano and Avezzano, ends at Verni.

By this combination the whole line of the Adriatic slope below Pescara will be placed in communication with the Abruzzi and with Rome by the Aquila, Rieti, and Verni line.

Owing to these changes the Company's network will be increased by 135 kilometres, which is the exact difference between the 451 kilometres added and 316 kilometres suppressed.

In addition the Government cedes to our Company the line from Bologna to Ancona with a branch to Ravenna, already open and belonging to the Roman Railways Company, the length of which line is 247 kilometres. The total length of the Company's network will therefore be increased from 1,364 to 1,746 kilometres, of which 147 kilometres are in Lombardy and 1,599 on the Adriatic coast and in the interior of the southern provinces. The effect of the new combination will therefore be to diminish the distance separating the principal points of the network, to connect by rail all the principal towns of the provinces of Aquila, Campobasso, and Benevento, which in the first concession had been entirely left aside, but it will compel the Company to make three passages across the Apennines instead of two.

As for the outlay required for the construction of the new lines, the surveys and estimates of the Company's engineers, though not yet absolutely complete, justify us in hoping that it will not exceed 117,260,000f including interest while the works are in progress.

Deducting from this amount the sum of 91,600,000f, which would have been required for the abandoned lines from Foggia to Eboli, and from Popoli to Ceprano, we find that the new network will increase the outlay of the Company by 25,660,000f to which must be added for the rolling stock required for the additional 135 kilometres a sum of 2,700,000f.

We shall therefore require a further capital of 28,360,000f for the construction and working of the new lines, that is, for each of the 135 kilometres of new lines 210,000f, which is the average cost per kilometre of the rest of the network.

This calculation has been made on the supposition that the cost of the 451 kilometres of new lines would be 260,000f per kilometre, which is considered sufficient to finish them; but as for the 316 kilometres of the lines abandoned by the Company would have cost nearly 300,000f per kilometre, it follows that, though the new concession requires three passages over the Apennines instead of two, as by the first convention, the general average price will not exceed 210,000f per kilometre, on which are based the financial estimates made by the Company to fix the cost of construction on the basis of the 29,000f of receipts guaranteed by the State.

We hope that this sum will be assured to us by the new combination of the sliding scale, so that the new arrangement will cause no change in the financial basis of the Company's organization.

But there is another category of expenses of which we have not yet spoken, and which are enumerated in the last part of Art. 17 of the new Convention in the following terms:—

"As a compensation for the damage caused to the Company by the suppression of the sections from Foggia to Eboli, and from Popoli to Ceprano; for the works, purchases, and surveys effected for those two sections; for the cancelling of contracts, and indemnities of all kinds to contractors for the said sections; for the cession which the Company will make to the Government of the permanent way executed between Foggia and Candela, which becomes the property of the State; for the complementary works of the two lines from Bologna to Ancona, and from Castel-Bolognese in Art. 14; lastly, for all the accessory expenditure attending the making and working of the three new lines conceded to the Company from Foggia to Naples by Benevento, from Vermoli to the junction of the said line by Campobasso, and from Pescara to Rieti by Aquila, there shall be granted, &c., &c."

In order to meet all the above-mentioned charges the Company, after innumerable researches made in common with the Government Commissioners, had agreed with the latter to fix the indemnity at 1,000f per kilometre for the whole of the Company's network, excepting the Lombard lines; but this sum, after long objections on our part, we were obliged to reduce to 500f.

We hope that this difference may be compensated, if not entirely at least in part, by economies in the expense of construction. But even in case this hope should not be realized, the Company will still have obtained the incontestable advantage of being able, by means of this concession, to liquidate its old accounts with the Government—an advantage which will not, perhaps, be an equivalent for the sacrifices imposed, but which will assuredly exercise a great and favourable influence on the future of the Company. In fact, gentlemen, you are well aware that our Company, though it has not yet completed the balance-sheet of 1863, and is preparing shortly to close that of 1864, has never been able to obtain from the Government a settlement of its accounts. The Government, quoting the provisions of Art. 9 of the conditions of the first concession, which determines the penalties to be paid by the Company in case of delay in opening its lines, in accordance with Art. 2 of the deed of concession, and Art. 12 of the said conditions fixing the amount of the guarantee to be kept back in case the goods service should not be organized on all the parts of the line open for working, pretended that the Company had not opened its lines within the time fixed, and that consequently there was reason for enforcing the penalties prescribed in Art. 9 above mentioned.

With regard to the service of slow trains, though the Company

Digitized by Google

had already organized it on all the lines from the day of opening them for passengers, the Government nevertheless was only willing to pay the amount of guarantee due for the service of fast trains, on the ground that certain complementary works had not been completed.

To justify itself for not having been able to open the lines within the time fixed by the conditions the Company objected the conviction which it naturally held, that the Government, when itself was executing the works, might have prosecuted them with greater activity than it really did, and the delay thus caused placed the Company in the material impossibility of completing them within the too limited time fixed by the conditions.

These considerations set your Board of Directors at ease as to the final issue of its differences with the Government, but they would have given rise to interminable discussions, which it was in the Company's interest to avoid.

As to the questions still pending with regard to the goods service being open at the same time as that for passengers, the Company could have no doubt of a favourable result, because by producing the table of receipts it will be easy to prove that it has done whatever was possible to meet the intentions of the Government and the requirements of the public, and that it has succeeded as far as the commercial conditions of the countries traversed by the railways permitted.

All these valid arguments adduced by the Company would not have sufficed, however, to hasten the liquidation of its accounts; and we therefore think we have promoted the Company's interests by accepting, as a means of solving this question, Art. 9 of the new Convention, couched in the following terms:—

"The guarantee stipulated by the original Convention is reduced to two-thirds only on all the lines hitherto opened for the first three months of their working, because during that time the goods service has not been effected in a complete manner, and at the same time as the passenger service."

But this did not suffice. The provisions contained in the original concession relative to the Crown lands granted as a subvention to the Company had always been interpreted in a sense unfavourable to it. For this reason it has now been agreed that the Company shall be able, by attending the sales, or by means of private contracts, to effect the purchase of such lands for a sum equivalent to the amount of the subvention granted to it.

Moreover, the delegates of the Company availed themselves of the opportunity of these new transactions to determine the text and spirit of Art. 9 of the conditions annexed to the Convention of the 21st August, 1862, in order to avoid all future difficulties in its application. It has consequently been decided that henceforth the diminution of the guarantee for eventual delays in the opening of the Company's lines shall be applied in proportion to the length of the delay, and only for those sections where the delay may occur. It has likewise been admitted that the time allowed for the opening of the different sections, by the concession of 21st August, 1862, was absolutely too short to complete them, and consequently, in Art. 7 of the new Convention other terms have been fixed with common accord, within which we can feel certain of completing the lines of the old concession which are still in course of execution. As for the lines of the new concession, the periods fixed for their completion are reasonable, and the Company can, from this moment, engage to accept them without any fear of being exposed to the penalties enounced n Art. 8 of the new concession.

But, if the Government has favoured the interests of the Company by adopting a conciliatory course with regard to the settlement of its accounts, the Company, on its side, in accepting by Art. 11 the liquidation of its debt towards the Government, and by binding itself to satisfy the claims within a month, has done a good service in return.

The origin of this debt goes as far back as the time of the first concession, when the Government, on giving up to the Company the works executed on the lines conceded, became creditor for the expenditure made in excess of the ten millions which were granted to the Company as a subvention. This surplus of expenditure has not been paid because the Company has always thought that the Government ought to be a party in the lawsuits it has had to defend against the contractors who had treated with the Government for the construction of the said lines.

If the Company now relinquishes these rights, and takes upon itself the whole cost of the actions brought by the contractors, it does so in return for the conciliatory spirit shown during the negotiations which preceded the conclusion of the new treaty.

The above statement must have convinced you, gentlemen, that your Board of Directors attached no little importance to the removal of the difficulties which had arisen with the Government as to the interpretation of the Convention of 21st August, 1862, and that they have not hesitated to attain that end, even at the cost of some pecuniary sacrifice, as just explained.

The state of our past relations with the Government was prejudicial to the interests of the Company, without being advantageous to the State, because the Company, as we have already said, had at its disposal abundant evidence proving the utter impossibility of satisfying the conditions of the contract, which evidence it would have produced in a court of law, in case all means of conciliation had failed.

Having thus spoken of the modifications made in the Company's network by the new concession, and of the liquidation of the accounts, we must now give some explanation relative to one of the most important provisions of the new contract, viz., that which concerns the suppression of the fixed guarantee of 29,000f per kilometre, and the substitution in its stead of a guarantee on a sliding scale as indicated in Art. 17.

According to the terms of this article, the Company will receive during the space of four years, viz., from 1st January, 1865, to 31st December, 1868, a fixed subvention of 22,000f for each kilometre of the lines worked, whatever the effective receipts may be.

From the 1st January, 1869, the subvention will be reduced to 20,000f per kilometre, until the average gross receipts of the Company's lines shall have reached 7,000f. This limit having been exceeded, half the excess shall go to the Government, and shall be substracted from the fixed subvention. This shall continue until the receipts and subvention together reach the sum of 31,000f per kilometre. When this happens, the whole of the surplus shall go to the Government as a diminution of the subvention, until its complete extinction.

If owing to the increased produce of the lines the subvention should become extinct, the excess of the produce beyond the amount guaranteed shall go to the Government, to be employed in the first instance in the extinction of the interest of the sums paid to the Company in virtue of the guarantee, and forming an anticipation yielding four per cent, and afterwards of the capital.

This means, in other words, that for the first four years the Company shall have a fixed subvention of 22,000f, and shall obtain its 29,000f, or more or less, according as the lines produce 7,000f, or more or less than that sum.

After the lapse of this first term the maximum subvention shall be 20,000f per kilometre, with power for the Company to take for its own profit the receipts below 7,000f per kilometre. Above that sum the receipts are to be divided equally between the Company and the State, so that the Company will not obtain its 29,000f until the average receipts of its lines shall reach 11,000f per kilometre.

Lastly, the Company will reach the highest returns allowed it, viz., 31,000f, when the average receipts of its lines shall be 15,000f per kilometre above that sum; all excess will go to the State.

To form an accurate judgment on these stipulations we require data respecting the possible development of the lines far more complete than we have been able to obtain, so that in our estimates we are obliged to proceed by induction and analogy from what passes on other lines already worked under conditions similar to those of the Company.

Before entering further into this matter, gentlemen, we feel bound to state that the system of a fixed guarantee stipulated in the Convention of the 21st of August, 1862, was open to reproaches which were not unfounded, because it placed the Company in a very difficult position towards the Government.

However earnest its efforts to develope the movement on its lines, as they were in direct opposition with its material interests, it could not prevent the Government agents from entertaining doubts as to the sincerity of its acts, and to its firm resolution to apply the provisions of the Act of concession in the general interest, as was its duty.

Your Board of Directors has no doubt that all the difficulties raised by the Government whenever the liquidation of accounts was proposed either would not have presented themselves, or would have been easily overcome, provided the article which fixed the kilometric guarantee had been conceived in a sense to leave the Company an interest, which would have been an inducement for exertion to increase the amount of its receipts.

This conviction decided us to devise, in concert with the Government, a formula of guarantee on a sliding scale, which without differing much from that already fixed by the first Convention, might leave sufficient latitude to allow the Company to develope the movement of its lines without loss, and even with some advantage.

The question being propounded in these terms necessarily suggested a form of guarantee analogous to that which has been adopted. This explains why the Company desired for greater safety that the fixed subvention should not descend below 20,000f. until the receipts exceeded 7,000f., and why the Government on its side fixed at 31,000f the maximum returns which the Company could receive by adding together the State subvention and the receipts of its lines.

The new formula of guarantee comprises two very distinct periods. The first is that of works and expenditure, during which the Company will have not only to make the lines, but also to provide the rolling stock, and meet the various expenses always attending the opening of new lines. And as these expenses are always heavy, and can never be compensated by corresponding receipts, it would naturally follow that the Company, placed in the impossibility of developing its traffic during the period of construction, while its lines are incomplete, would have to ask the Government for a subvention not much inferior, when increased by the receipts, to the 29,000f granted by the first concession.

These reasons were so evident that the Government was easily convinced, and the first part of the formula of guarantee was therefore inserted in the new convention.

Digitized by Google

The first four years of the working having elapsed, the subvention is to be reduced to 20,000f, and the Company will attain the 29,000f per kilometre assured by the Convention of 21st August, 1862, when the average receipts of its lines are 11,000f at least.

Although this sum is much higher than the receipts we at present obtain from the lines already opened, experience justifies the hope that when the junctions of the lines shall have been effected, when the populations shall have been roused to that activity which is always the consequence of easy communication; when the Government, in accord with the towns, shall have developed trade, our Company may, if not immediately, at least in a short time, attain that degree of prosperity which is the necessary condition for the success of its enterprise.

After having examined the principal provisions of the new concession, we will pass rapidly in review the stipulations of secondary importance. The principal of these is the obligation imposed on us to work at cost price the branches of the lines conceded to the Company which may have been constructed by the Government, the provinces, or the towns. The only inconvenience which could result to the Company from this article of the concession was the dangerous competition which those branches, joining with other lines, might make to the Company's network. This case has been provided for, and should it occur, the Company will be relieved from the engagement of working them at cost price.

Having reduced the engagements contracted by the Company to these proportions, we have thought proper to accede to the desire of the Government, feeling certain that the development of the traffic on the small branches cannot fail to contribute to the increase of the general movement on the Company's network.

However, for the section from Foggia to Candela, which is almost finished, and which forms a part of the abandoned line from Foggia to Eboli, the conditions stipulated by the Company are slightly different. On consideration of an annual premium of 125,000f, enough to clear the expenditure made by the Company for opening it to the public, the Company undertakes to work it, and the receipts are to be placed to its exclusive benefit to the amount of 7,000f.

All excess of receipts beyond that sum will go to the Government, that is, it will be deducted from the annual payment made to the Company for finishing the line. This stipulation also, though not very advantageous to the Company, will not, on the other hand, be onerous, as it is arranged that the working shall be in proportion to the traffic on the line.

After this stipulation we have to notice Art. 28, in virtue of which, as soon as the line from Eboli to Potenza shall be finished, in continuation of the Calabro-Sicilian lines, the Company will be bound to allow the use of its line from Naples to Eboli by the trains of the above-named lines, and also to grant the common use of its station at Naples on payment of an indemnity. In this case the Government will also have the right to compel the Company to cede to the Calabro-Sicilian Company the working of the line in question, on conditions to be determined by private contract or by arbitration. This stipulation cannot injuriously affect the Company's interests. Should the case occur, the Company will arrange so as to conciliate its interests with those of the Calabro-Sicilian Company, with which it will have to deal.

Passing over several obligations imposed on the Company, chiefly regarding the rules to be followed in constructing the lines and its relations with the other companies, we will call attention to Art. 20 of the new convention, by which, as you will see, it is stipulated that the Government guarantees directly, and to the sum of 15,000f per kilometre, the interest and sinking fund of the bonds issued or to be issued, until the amount of the subvention shall exceed the sum above stated.

This stipulation will be very advantageous for the Company, because the direct guarantee given by the State for the interest of the bonds will render them more easily negotiable, and enhance the price of emission.

Having thus explained as concisely as possible the principal conditions of the new convention, we feel bound to state, gentlemen, that before concluding it we well weighed its advantages and inconveniences, and in now proposing it to you for your approbation, we are convinced that its provisions, by at once regulating the relations between the Company and the Government, and facilitating the execution of the Company's engagements, will contribute to secure the future success of your enterprise.

At our next meeting we intend to speak at greater length on the financial situation of the Company, but as we are now assembled, we hope that you will not object to hear a few words on the progress of the works.

Although the winter season has impeded our constructions, our engines have nevertheless been able, within the last few days, to run along the whole line from Trani to Brindisi, which is 154 kilometres in length.

On the 26th of this month the regular service will be opened as far as Bari, and we venture to hope that in March next, or at latest in the beginning of April, we shall be ready to go on as far Brindisi, which will allow us to run, without a break, a length of 561 kilometres, the distance between Ancona and Brindisi.

However, these results, which are highly gratifying to your Board of Directors, have been deranged during the last few days by the inroads of the sea and the overflowing of several torrents, which have damaged the line of the Osenta, especially between Ortona and Vasto. It has been found necessary to suspend the service, but measures immediately taken to repair the injury will enable us to re-open the line almost entirely by the 26th of the present month.

As for the Lombard line, the surveys are finished and the works have been begun throughout the section from Voghera to Pavia, including the bridge over the Po at Mezzanaconti. We should have been glad to announce a commencement of the works also on other points of the line, but certain difficulties raised by the Government about the mode of executing the line in the neighbourhood of fortresses have hitherto delayed its execution. These difficulties, however, will soon disappear, and we hope that in a few months the whole line of Lombardy will be in course of construction.

This summary statement will suffice, gentlemen, to give you an idea of the energy displayed by your Board of Directors in the accomplishment of their duties. They impatiently await the result of the discussion in the Parliament, in order to commence the works throughout the whole new network, and to conduct them with the energy required to complete them within the times fixed by the new convention. By this means the desires of the Southern Provinces will be accomplished, and our Company will not only have fulfilled its engagements, but will also have rendered a great service to its country.

SIX PER CENT. NEW ZEALAND DEBENTURES at 85.

The Otago Government Bonds previously offered at 90, may now be obtained at this reduced price. A limited amount only for Sale.—Apply to the South Australian Banking Company, 54 Old Broad street, London, E.C.

PHILADELPHIA AND ERIE RAILROAD SIX PER CENT. STERLING BONDS, guaranteed by the Pennsylvania Railroad Company, and principal and interest payable in London at the counting-house of their agents, Messrs T. Wiggin and Co.

These bonds are part of a first mortgage of 5,000,000 dollars secured on the Philadelphia and Erie Railroad, which is now open for traffic over its entire length of 288 miles, subject only to a prior mortgage of 1,000,000 dollars on a small portion of it.

In addition to the security of the Philadelphia and Erie Railroad, the Pennsylvania Railroad Company has agreed to pay the principal of these bonds at par, when they mature, and also the interest warrants as they fall due, at their agency in London; and the bonds are endorsed with this agreement under the seal of the said Company, and the signatures of its President and Treasurer.

The bonds are for £200 each. The interest is payable 1st April and October, and the principal in March, 1881.

The price of these bonds is now 77½ per cent., or £155 for £200 bond, with interest from 1st April.

Applications to be made either to Messrs T. Wiggin and Co., at their counting-house, 15 Old Jewry Chambers; or to

FOSTER and BRAITHWAITE, Brokers, 27 Austinfriars, E.C.

June 27th, 1865.

LAMBERT BROTHERS, WALSALL.

MANUFACTURERS OF GAS TUBES AND FITTINGS.

LAP WELDED BOILER TUBES.

ITALIAN COMPANY OF THE MERIDIONAL RAILWAYS.

The shareholders are informed that by decision of the Board of Directors, calls are made on shares:—

1. Of the seventh tenth (fifth call) or 50 francs (£2) per share to be paid from the 1st to the 5th August next.

2. Of the eighth tenth (sixth call) or 50 francs per share to be paid from the 1st to the 5th September.

3. Of the ninth tenth (seventh call) or 50 francs per share from the 1st to the 5th October.

4. Of the last tenth (eighth call) or 50 francs per share from the 1st to the 5th November.

A distribution of 15f 50c per share having been approved of by the Government, this sum will be received on account of the seventh tenth, which will reduce the amount to be paid to 36f 50c.

Calls in arrear are liable to pay interest from the 5th August, 5th September, 5th October, and 5th November (Art. 11 of the Statutes).

The calls are to be paid:—

At Paris, to the Société Generale de Credit Industriel et Commercial.

At Turin, at the Central Office of the Company.

At Milan, to M. Jules Belinzaghie.

At Florence, to the Tuscan Bank of Credit for the Industry and Commerce of Italy.

At Leghorn, to Messrs A. Bastogi and Son.

At Genoa, to the General Bank.

At Naples, to the National Bank.

At Palermo, to M. J. V. Florio.

At Messina, to M. P. G. Sidredi.

At London, to Messrs Baring Brothers and Co.

At the moment of payment the provisional certificates of shares must be deposited, accompanied by a signed declaration. The receipt of the payment effected will be acknowledged in them, and they can afterwards be withdrawn. The attention of the shareholders is called to Articles 11 and 12 of the statutes of the Company.

(Signed) BONA, Director-General.

Turin, 23rd June, 1865.

MUSICAL BOXES, by Nicole Freres. A Selection of Two Hundred Lists of the newest descriptions. Æolian Harps vibrating with the slightest breeze, 12s to 26s. Keith Prowse, and Co., 48 Cheapside.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.
BRIGHTON	At 6 Marine Parade.
LIVERPOOL	At Cook street.
MANCHESTER	At Ducie place.
LEEDS	At Commercial buildings.
BIRMINGHAM	At Upper Temple street.
DERBY	At the London road.
LEICESTER	At 52 Granby street.
WOLVERHAMPTON	At Exchange street.
SHEFFIELD	At Exchange buildings.
NOTTINGHAM	At Maypole yard
CHESTERFIELD	At the Low Pavement.
STOKE-UPON-TRENT	At Wharf street.
DUDLEY	At Burnt Tree.
WORCESTER	At the Cross.
BATH	At 5 Edgar buildings.
SOUTH WALES	At King street, Bristol.
DUBLIN	At Crampton quay.
CORK	At Cook street.
EDINBURGH	At 47 North bridge. At 11 Union street lane.
GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE MONEY MARKET.

Money is for the moment "harder," as the technical but not very agreeable phrase goes. The augmentation in its value depends, we apprehend, mainly on a few withdrawals of gold for foreign markets, or some further withdrawals for election purposes, and the usual payments at the close of the quarter and the dividends. It is very difficult to say if there is any *bona fide* increase in the trade demand for money. There may be a little increase, but, if so, it is very little.

As to future prospects, it seems certain that our store of bullion is so ample that we cannot expect much augmentation in the value of money from any moderate demands on it.

	£
The stock of bullion in the Bank of England is	15,534,466
— — — France	19,947,352
	35,481,818

whilst last year at this time the corresponding accumulation was—

	£
Bank of England	13,701,112
— France	11,060,908
	24,762,020

With such a great stock of bullion in the two banks, we may consider ourselves safe against *much* change from a *bullion* demand. When trade revives, capital will be largely called for, but of that as yet there are few signs.

OVEREND, GURNEY, AND CO. (LIMITED).

Every one who knew Lombard street but a few years ago will well remember many grave old gentlemen who hated Joint Stock Companies and believed them to be, "on the whole, "disreputable," but who spoke of "Overend's" with a curious solemnity and almost under their breath. "Overend's" was the best they could think of; a "Company" was the worst they could think of. If they could be revived and told that "Overend's" had become a Company, they would feel at once that the world in which we live is not the world in which they lived.

Some vestige of these old ideas still lingers, but among those who are guided in their notions and their conduct rather by present facts than by past facts, the step which Messrs Overend have taken is generally approved of. Some of our cotemporaries seem not to like to state the grounds of this approbation plainly, but we see no reason why what is said in all well-informed quarters should not be written clearly. Credit institutions of first-rate magnitude *owe* their credit to their being discussed distinctly.

First. Everybody approves of the change, because now that Overend's is a Limited Company, it will be essential to publish an account of the nature of their business. For many years it has been matter of public notoriety that this firm transacted business not at all in general of an illegitimate or unprofitable character, but still of a sort different from those conducted by bill-brokers "pure and simple." Mr Chapman, in a well known case, was reported to have said that he lent certain parties money upon "some shells." If he had wished to injure the credit of the house, he could not have contrived a more picturesque phrase. All the country bankers in England began to ask, "Is our money put out in shells or not?" Of course it is well known that a great proportion of Messrs Overend's is of an ordinary and excellent character; it is *certain* that they give capital bills as a security, showing that they really have a splendid and most safe business. Still we have heard many people with *real* money say that they should like to know the proportion between the pure bill-broking business of Messrs Overend, and the *extra* and accessory business which their large superfluous means had led them also to undertake. *Now* we shall know this. It will be incumbent on the new Company to publish such an account as will tell the shareholders and the public the principal points of its business,—and the main point of all for a shareholder is this—Is my money lent on trade bills as a bill-broker lends it, or is it lent on contractors' bills as a finance company lends it, or it is lent on produce or warrants? All these ways of lending money are good at proper rates and in their way, only it should be clear which way. A concern which does one kind of business is different altogether from that which does the other sorts. A private firm *cannot* tell the public what it does, but a public Company which lends on its credit should and must. The prospectus states that "the Directors will give their "zealous attention to the cultivation of business of a first-"class character only," and it is said that the Company intend only to do pure bill-broking business in future, and should the published accounts distinctly show that such is the case, the confidence of the public will be very greatly augmented.

Secondly. There is no doubt that the best part of the management of the old concern is secured to the new concern. We will not say anything unfavourable of any one, but we only speak the admitted conclusions of Lombard street

Digitized by Google

when we say that the continuing partners,—the practical managers, as we apprehend, of all the detail of the new concern—are men with whom every one would delight to do business. The name of Mr John Henry Gurney is a guarantee of solid wealth, and that of the other continuing partners for sound and careful management, when they are left to themselves, and can act without disturbance as they like.

Therefore we entirely approve of the step which this great firm have taken, and sincerely hope it will be the means of handing down to posterity the historical name of "Overend." It is not without value to have hereditary names in the money market as well as in politics. They are stimulants to industry and incentives to preservative caution.

There is one consideration, however, which it is our duty to point out, because it applies in a multitude of cases, and it is only by drawing attention to it in a conspicuous case of this sort that we can hope to get it attended to. The *new* partners in companies of this sort, the partners who were not in the old firm, undertake a great responsibility. A certain sum is paid for the good-will of the business. It is for the new partners to see that this is the right sum. They are the only persons who can see it. The old partners are the sellers. They cannot be expected to reduce against themselves the price of the business they part with to the exact price which is about fit and proper. The eventual buyer is the public, which, on the faith of certain names, subscribes its money and receives its shares. The persons who bear those names are, therefore, trustees for the public, and they must be careful to see that the interests of those who rely on them suffer no harm. We see no objection at all to the sum paid for Messrs Overend's business; according to the floating rumours which circulate it is little, but we have no means of really judging—we have not seen, and the public has not seen, the interior. It is the incoming director on whom the responsibility rests, and to whom the public will look hereafter.

Nor is this the whole, though it is the main part of their responsibility. There is a statement in the prospectus that the "vendors guarantee the Company against any loss on the "capital and liabilities transferred." In the case of a bank such guarantees have often led to much misconception and dispute. You guarantee an overdrawn account of 2,000*l*, and, by payments in, that account is liquidated, though, by contemporaneous payments out, the debt remains what it was. In law the old loan has ceased, and a new loan has begun. But for real business purposes, the account still remains what it was. The debtor would not have paid his money in, unless there was an implied agreement that he could when he wished again draw that money out. We will not undertake to say that in a discount company the liabilities are so changeable as in a bank; we apprehend they are not so. But we cite this case to prove the delicacy of the situation, for there are many cases analogous to it. The incoming directors are trustees for the public for the full benefit of this guarantee, as against the old partners who sell their property by means of it.

As to the success of the undertaking as a Company, it is obvious from the share list that no kind of speculation presents greater diversity of fortune than discount companies. We have—

	Paid.	Selling Price.
Discount Corporation.....	20	11¾
Joint Stock Discount Company.....	10	9
National Discount Company	5	16¼

while the London Discount Company, which started some years since with fair anticipations, has now been wound up. It is, therefore, possible for a Discount Company to be a very good thing, and possible for it also to be a very bad thing. The success depends on two causes:—First, what amount of other people's money the Company can get hold of; and next, what use they make of it. As to the amount of money which Overend's have left with them, no one knows anything. The Governor of the Bank said in 1857:—"Can you state to the Committee, in general terms, what is the amount of such deposits in the hands of individual houses?—I have no means of speaking decidedly; but we know that one broker had 4,000,000*l*; another, 3,500,000*l*; and a third we supposed to have above 8,000,000*l*. I speak of deposits with brokers." And the 8,000,000*l* was doubtless "Overend's," though whether the Governor's supposition was correct or whether their means have increased or diminished since that time, we cannot tell. Larger figures, though without any authority, float at random in the market. Anyhow, Overend's must have much money left with them; and doubtless all of it will remain under the new firm as under the old. The house is not weakened but strengthened by what has occurred. As to the management, there ought to be, and must be, great traditional knowledge and skill in a concern which has been so very profitable so very long, and where such vast sums have gradually been made.

THE METROPOLITAN ELECTIONS.

THE first result of the recent elections for the metropolis will not be good, for it will be a great increase in the clamour for a simple reduction in the franchise. The persons who effectively resist that experiment belong almost exclusively to the class of educated Liberals, men who can look before and behind, who have studied the consequences of transferring power in countries other than England, and who see clearly the one point which Radicals are so apt to miss, that an organic concession once accepted by the masses can never be recalled. It could not, even in France, where the Emperor, with all his legal power and all his moral ascendancy, would shake his throne if he tried to meddle with universal suffrage. This class has, before all things, a preference for intellectual merit, a desire to see the electors choose strong men, a fairness towards such men which very often overrides its dislike to individuals, as in the case of Lord Stanley, or to reactionary opinions, as in that of the Orange member for Belfast. It has, consequently, been greatly soothed by the result of the recent London elections, which has seated in Parliament no less than eight men, Mr Mill, Mr Goschen, Mr Crawford, Baron Rothschild, Mr Torrens, Mr Hughes, Mr Layard, and Sir Charles Bright, whose primary claim on the constituencies is not a mirror-like reflection of their opinions. If, it is argued, constituencies really voting by household suffrage will elect men like these, men of the highest cultivation, and in one case of *purely* intellectual rank, if sixteen thousand ten-pounders will carry a man like Mr Goschen to the head of the poll, and twenty-two thousand elect Mr Hughes solely upon his probable merits, and twelve thousand seat the first of philosophers without a bribe or a canvass in the face of a most formidable opponent, and of the haughty reiteration of his own disagreeable crotchets, what need to dread constituencies of ten thousand? We, they think, for our objects could not have better men, and it is nearly certain that those men, Mr Goschen perhaps excepted, would have been rejected by the very boroughs we have been so anxious to preserve. We do not say they will say as much as this, but they are perceptibly soothed, more doubtful than they were of the wisdom of restriction, less inclined to threaten a separation from their radical allies. And, indeed, we can hardly wonder at the change of feeling. The election of Mr Mill under the circumstances, with an opponent who seemed so popular and was so rich, with the *Record* fulminating the only religious charge, except Catholicism, which ever makes much difference in England, and the Victuallers' Association wild with rage at the contempt felt for its influence, was one of the most creditable things ever done by ten-pounders. It was a distinct act of homage to intellect performed in the teeth of the worshippers' own prejudices, and when an elector can respect intellect displayed against his own views, he has certainly attained a cultivation after which it is hard to hesitate about trusting him with power. On the other hand, the Radicals are sure to make the most of the excellent weapon placed in their hands, to ask if members who distrust workmen are afraid of a dozen "Tom Browns," or whether the little constituencies will ever send up a Mill, or if a county town can be trusted to choose out of the world an intellectual loan-monger? Those questions will not be so very easy to answer, for an illustration goes a great way with Englishmen, and half the battle is won when we can show that an experiment has been tried, and has worked exceedingly well. We shall not be surprised to hear the elections worked to better advantage than even the Lancashire famine; and it is well worth while to inquire how far they can be held to be a fair illustration of the safety of extended suffrage.

We are inclined to deny it at least in the way in which an extended suffrage is at present understood. Those elections may be, and we think are, fair arguments for large consti-

Digitized by Google

tuencies, but they have no bearing whatever upon the mere extension of small ones, upon plans for example like that contained in Mr Baines' Bill. To prove the contrary, the Reformers must prove that the circumstances of other constituencies are identical with those which exist in London, and this is in our judgment impossible. The specialty of a metropolitan borough is that it is not a borough at all, not an entity, not a city with traditions or history of its own. It is a representative district filled with persons gathered from all corners of the Empire, belonging to all grades, having no interests in common, no local person except the ground landlord to look up to, no connection with each other except one almost purely intellectual. Such boroughs, therefore, fall usually in times devoid of excitement into the hands of a caucus or coterie of persons who give a good deal of time and money to the acquisition of influence. Sometimes this is a vestry, sometimes an old committee, sometimes a registration association, but it is always really in the hands of two or three men usually very adroit in manipulating local feeling, but otherwise quite incompetent to act as Grand Electors. These men never choose *great* representatives, and indeed distrust them—firstly, because such candidates are always independent in mind, and secondly, we fear, because they do not see the necessity of making up all deficiencies by a profuse expenditure of money. Occasionally, however, it happens that through these heaps of electors passes an intellectual shock, which, ideas being their sole *nexus*, creates as it were spontaneously a new caucus. A great man presents himself, and the electors, who have no particular ties to anybody, who are too rich to bribe and too many to be intimidated, who are in fact only hampered by want of a common bond, find it in his reputation; or there is a great question afloat, and then they find it in that; or there is a feeling reduced into words by nobody knows whom, that the borough requires to be illustrated, and then they find it in that. In any case the common bond is an idea, which, there being no local interests, or local notabilities, or local fears to stand in the way, gets the mastery of the electors, who again, like all other men ruled by an idea external to themselves, act for the moment unselfishly, and act well. They do this all the more readily if, like the Londoners, they are the inhabitants of a metropolitan city very close to the seat of Government, accustomed to watch public men, habitual readers of a press which is imperial in its ends, influenced above all by those great traditions which hang about every capital, which allow the poorest of Romans to step out with the bearing of men who are something on earth, make Parisian rag-pickers feel a reflection on Paris an insult to themselves, and induce London costermongers to mob the Horse Guards, if the English flag has been trailed. A Londoner when he votes thinks of Parliament, cannot help thinking of it, for he sees members go in and out, and hears the big bell, and sees the Victoria Tower, but an Orkney islander thinks mainly of the islanders, and the dreadful loss it would be to lose a free right of cutting peat. Can any one of these circumstances be claimed for the boroughs outside the metropolitan district? Manchester, Liverpool, Glasgow, and Dublin are doubtless very great cities, but then they are cities, entities, filled with a population which has common interests, antipathies, hopes, and objects of worship. If the suffrage in them were universal, they would still be corporate bodies, able to feel keenly about a local Water Bill, to yield to a local tradition, to reverence greatly a local family or person. The electors would not obey an idea a bit the more for being the more numerous, but rather the less, because the number would just suffice to prevent any real discussion. Take, for example, the case of Nottingham. Sir R. Clifton, the gentleman just elected by the electors of that borough, is considered by the kind of Liberal who reads the ECONOMIST, for many reasons, a rather discreditable representative. Nottingham does not think so at all. Her population is a whole, and has been accustomed for ages to believe that a Clifton, if decently popular, has claims upon its affection, and if the suffrage in Nottingham were universal, Sir Robert Clifton's chance of success would not be diminished, but only increased. So with every borough in the Kingdom. In some, it is local celebrity; in others, a particular interest; in many, a traditionary shibboleth; in all, something which would militate against the choice of a candidate like, say Mr Mill, upon imperial grounds. The constituency once made enormous, would need, like the enormous constituencies of London, to find some nexus, some bond of cohesion, and would find it as London this time has *not* done in some local person or circumstance or prejudice which had nothing whatever to do with the character of Parliament. Of course, as the borough diminished, these influences would increase till, in the very small ones, a reduced franchise would only destroy the last hope of independence.

Moreover, it must not be forgotten that the London constituencies are exempted by circumstances to a very singular degree both from bribery and intimidation. No member can offer anything, except an idea, to Lambeth which Lambeth could not get if in earnest just as well without him, no trade can dominate Westminster, no man or small combination of men menace the City of London. Individual bribery would tax even great fortunes rather too heavily, and individual intimidation has exceedingly little result. How many of those things could be said of the majority of county towns? Most of them even now are kept decent mainly by the fact that as everybody in the electoral circle knows everybody else, his father, his brothers, and his history, a vote given for a bribe would be a good deal too conspicuous. But imagine this security taken away, and the real power to rest in the hands of a class too numerous for this mutual discipline, yet not too numerous to be bought up by the vast fortunes every day rising around us. There would be literally no security against the plutocracy, and the towns would be brought under influence just as completely as some few counties are now. The metropolitan boroughs are not, because their population is at once too vast and too disconnected, but in places like Ipswich we should have numbers just sufficient to give the impunity of obscurity to evil, yet not beyond the reach of a millionaire, and liable, even more than the present constituency, to pressure from the local dictator. To make the example of London unanswerable, some other borough must show that is equally vast, equally disorganised, and equally likely to be swayed by a disinterested idea.

MR HUTT AT GATESHEAD.

THE commercial negotiations between England and Austria have not yet arrived at any satisfactory conclusion, but Mr Hutt's speech to the electors at Gateshead appears to give promise of something better than for some weeks past there has been any reason to expect. The English members of the financial Commission of investigation probably took at first a somewhat too hopeful view of their chances of success, and underestimated the immense force of that conservative resistance to all motion which is in Austria still predominant. Mr Somerset Beaumont,—by whose rejection we regret to observe that Newcastle-on-Tyne has foolishly lost a very able and energetic member, one who was doing far more for the interests of his constituents while negotiating at Vienna, than he could possibly have done if he had been transacting local Newcastle business at St Stephen's,—no doubt interpreted the ministerial assent of the Austrian Ministers to sound financial principles as meaning far more in practical effect than it really did. At least Mr Hutt tells us that he found the very man who called for the International Commission, the Baron von Kalchberg himself, entirely opposed to all fundamental reform,—every reform, in short, likely to result in substantial commercial intercourse between England and Austria. He took, therefore, a very bold line, which might have broken off everything and created a sore feeling between the two countries as well, but that perhaps he had sufficient reasons for believing it might prove rather a new starting point for more hopeful negotiations than a finale to the uphill course he had hitherto been pursuing. When sick of investigating what his Austrian colleagues did not mean to have investigated beyond a certain point, sick of pressing for data which it would have been inconvenient for the timid German financiers, who only wanted a half result, to give, he went at length to the Minister for Foreign Affairs, Baron Mensdorff Pouilly, and told him in effect that the International Commission had been called for under false pretences; that it was not so constituted as to do its work thoroughly, and was not taking the course that its English members had a right to expect it would take after the invitation they had received; that if the Minister could not assure him that the policy would be changed and the appointment of the Commission substantially justified, he would break up the Commission, return instantly to London, and "throw upon the Austrian Government the "odium of having contracted honourable engagements which "they had never intended to fulfil, and thus offered a

Digitized by Google

"gratuitous affront to a powerful and friendly nation." No doubt that was put a little stronger than it otherwise would have been, from a conviction that the representation was in itself pleasing to Baron Mensdorff. The Baron's answer showed that it was not unpleasing to him, that it gave him an opportunity he was not sorry to have. He replied "that England had a grievance; that Austria was "personally engaged to carry out the inquiry in a loyal spirit, "and to press it home to some practical result"; but he added that a delay was needful before justice could be done to England, that if the sittings of the Commission were suspended for two months, at the expiration of that time Mr Hutt should find that Austria had taken steps to fulfil all her engagements. Thereupon followed the ministerial crisis of which we have lately heard, the fall of Herr von Schmerling's Government, and the *retention* of Baron Mensdorff on the Ministry of Foreign Affairs. This looks, says Mr Hutt, very like a preparation for the fulfilment of the pledge given him by the Minister. And probably this would be so, if Mr Hutt's somewhat imprudent publication in England of his "strong" policy towards Austria does not neutralise all the effect which as a diplomatic step it appears to have had. It is quite one thing to take a high-handed course, and another to boast elsewhere, and in public, of the effect it has produced.

Unquestionably the crisis in Austria has taken place on the Hungarian question, the question of a centralised Government, and implies concession to the Hungarians. Von Schmerling was the head of the Liberal German party in favour of centralised Government, and not particularly favourable to free trade. The truth is, that the Germans of Austria contain the strongest Protectionists in the Austrian dominions; because amongst them alone are to be found a large number of manufacturers with considerable capital sunk in productive processes for which they fear the influence of competition. Hungary, and indeed most of the outlying provinces, on the other hand, being chiefly agricultural countries, producing corn and wine, and both at a very trivial cost, are all in favour of free commerce with the rest of the world, which would mean, for them, exchanging their corn and wine for English and French manufactures that they can buy only in this way. Hence it does not seem improbable that Baron Mensdorff, wishing to influence the Emperor to concessions to Hungary, and opposed by his German Liberal colleagues, has used this strong language of the English Commissioner to strengthen his position with the Emperor. He has pointed out probably that the double difficulty under which the Austrians now labour is the Hungarian disaffection and the helpless finance of the Empire, and that to an effectual settlement of both difficulties the German Liberal party is the great obstacle. He has, perhaps, added to these considerations the great imprudence of offending England at a time when Austria is so little blessed with warm allies, and the three considerations may have jointly overcome the Emperor's disinclination to yield anything on the question of centralisation.

Of course this *rationale* of the recent crisis may be mere conjecture. It may be that the Hungarian question, and that alone, has brought it about, and that Baron Mensdorff has been calculating hastily and sanguinely in hoping to inaugurate a new and thorough-going financial reform at the very moment when the German party in the Reichsrath is called upon to surrender its views as to the Hungarian Constitution. It is quite possible that the one change will take place without the other, or at least very much before the other, and that the promise to Mr Hutt may never be fulfilled. But for Mr Hutt's imprudent publication of his high language, we should, however, incline to hope better things. It is at all events certain, as we have pointed out before, that the revision of the tariff hitherto decided on would do little or nothing for Anglo-Austrian commerce, and that we have therefore lost nothing important by the crisis even if we have not gained much. We may still hope perhaps that Mr Hutt's bold stroke may prove to have been for the best, and that the new Austrian Ministry when fairly constituted will be as willing to concede much to the Hungarian views on the tariff, as they will probably be to concede something to the Hungarian view of the powers of the Diet and the illegality of the Central Constitution. The great danger is that the German party may be strong enough to beat the Emperor on one point of the new policy in compensation, as it were, for being beaten on the other. Still we will hope for the best. If the English Commission is ever invited to return again to Vienna, we may feel quite sure that it will be invited there with more prospect of effectual financial reform than has ever yet been warranted in the eyes of calm observers. If it is not, we fear it will be due to Mr Hutt's imprudence in showing his hand so rashly to his Gateshead constituency.

Agriculture.

CROPS AND PROSPECTS.

NEVER has there been a plainer illustration of the uncertainty of farmers' prospects than the circumstances of the current agricultural year. After a winter unusually long and singularly inclement and interruptive, there occurred during April and the early part of May a genial temperature with a seasonable supply of rain, which produced an outburst of vegetation rarely seen in this country. Where the wheat had not lost plant, from the alternations of frost and thaw during the winter, or from wire-worm in the spring (as occurred to some extent, especially on the lighter soils), it made a more rapid and vigorous progress than we ever recollect. This was markedly so on the strong and well-drained loams in fair condition. And these wheats maintain their high position to the present time, the straw being unusually strong, and the ear large and well corned. If there be no hailstorms, such as we had last Saturday in various parts of the country, we expect to hear of some very large yields of wheat at the coming harvest. Yet, though the season must be regarded as a favourable one for wheat, there are such extensive tracts of light land, and poorly cultivated land, on which, either from defective plant or want of rain during the latter part of May and nearly the whole of June, the wheat is thin, that we doubt whether what is called an average crop will be gathered this year. The wheat markets, low though they are, indicate, by a somewhat firmer tone, the prevalence of some such views in the trade. Oats were sown late, have come up but indifferently, and, taking the country through, are inferior and unpromising. What we should have done for oats without foreign importations, seems difficult to conceive. Barley is better than oats, but by no means good. Beans came up and have flowered well; and though complaints are made in some quarters that they are not corning so well as expected, we believe that there will be fully average bean crops.

But perhaps the crops which have most signally failed to realise the early promise of the spring are the grass crops. A good crop of hay is the exception, and is only to be found on very good land, or moist land, or under otherwise exceptional circumstances. Upon ordinary meadow land the hay crops have been bad, and in the Midland districts they have been left standing (considering the forward season) so long that there is now a great deal of hay in the fields, which has been exposed to the heavy rains of the last fortnight, and cannot be of very high quality. Grazing pastures have proved better than mowing grass land, though they had become very bare and very dry when the late rains commenced.

It is impossible to go through the fine land and manageable soils of the Midland counties without being struck with the extent to which opportunities are wasted by poor farming and the absence of landlords' most necessary improvements. You inquire the causes, and are told the old, old story,—the tenants have insufficient capital, their tenures are precarious, they are yearly tenants; the landlords are game-preservers, they won't grant leases, they can't or won't do the permanent improvements, which none but the proprietor can do with a fair hope of profit; their estates are mortgaged or entailed or both, and they cannot or will not expend money to improve them. We look around, seeing what is the state of fine tracts in these Midland counties, seeing also of what much better things they are capable, and say is this always to be so? Is the capital required to fertilise these lands for ever to be repelled from it? The practical replies supplied by the actual system of management on the large estates is by no means encouraging, for under existing conditions the wonder is, not that the farming is so bad, but that the land is farmed at all. Whether the landed property will ever be made as productive as it ought to be in the hands of the present owners may be a question. But commercial principle and commercial action are, perhaps slowly, forcing their way into land management. This is not through the agency of the great landowners, they seem quite ignorant and helpless. They appear to be quite unconscious of the mine of wealth they might possess if intelligence and capital were applied to their estates. They stand in a sort of trance—economically speaking—while the world moves around and beyond them. They would seem to desire to repel capital rather than to attract it, where some of their tenants would gladly improve their farms could they safely do so; while too many of their tenants seem well content to sink into that lethargy recommended by the example of their landlords.

Yet a glimpse of better things comes from the great towns. The traders and manufacturers of Birmingham and other thriving towns are buying, improving, and farming land for themselves. Many of them are renting farms on leases where they can get proprietors to grant rational leases, and they pay far higher rent, and raise far greater produce than the regular farmers who pre-

Digitized by Google

ceded them as tenants. This is hopeful. Here we obtain a higher standard of land management as well as of farming, which perhaps will by and by tell upon the old landlords. Or must there be a breaking up and redistribution of the large estates before our land has justice done to it? Who can tell? It is certain that the great mass of our English landlords are neglecting and misusing the finest inheritance men ever possessed.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 13th inst. The return for the previous week is added :—

DEBTOR.

The bank return of this week is chiefly remarkable for presenting the important decline of 32,939,000f in the deposits. In the coin and bullion there is a diminution of 22,669,000f, and in the circulation of notes an increase of 25,220,000f, both of which, in a considerable degree, are owing to those large withdrawals. The discounts are not satisfactory; they are only 2,615,000f more than last week.

The Bourse the day before yesterday rose considerably in consequence of a report telegraphed from London, and repeated from Berlin, Cologne, and Brussels, that a Congress was to be held, and that the great powers had agreed on a general disarmament. Nobody believed the report, but it served the purpose of speculators for a rise. The next day it was naturally followed by a reaction. To-day the market has been much agitated, and once again an unfavourable view is taken of its prospects. The quotations, indefinitive, however, stand to-day higher than last Thursday. They are as follow :—

The election of Mr Stuart Mill for Westminster has afforded great pleasure to all persons here who take interest in economic science. And it is regretted that thus far he is the only distinguished economist who has been sent to Parliament. The French say that as economic principles now largely influence the national policy of England, she ought to have many of her best economists in the Legislature.

The city of Paris has had communications with eminent capitalists and with representatives of credit companies on the subject of the new loan of 250,000,000f, which it is about to raise. As, however, the terms they have proposed are rather onerous, it is thought likely that the city will prefer to have recourse to a public subscription, as on preceding occasions. It might, indeed, employ both systems,—let the public subscribe as much as they will and give the remainder to one or more bankers. The loan is to be represented by bonds of 500f issued at 450f, and bearing only 20f interest. But a lottery will be attached to it, and in order to tempt the public the drawings thereof are to take place every three months, instead of every six months as with existing loans.

It has been reported during the last few days that the long-projected conversion of the first Mexican loan (that of 1864) will take place before long. I believe the report is not without foundation, though I find there is a reluctance to state the precise date and terms on which the operation will be effected. The reasons for this reserve are no doubt good and sufficient.

The Mexican Financial Commission advertises that it is prepared to pay without delay, instead of on the 2d of October, as originally fixed, the bonds of the Lottery loan (1864) taken from the wheel in the recent drawing. Discount of 4 per cent. is, however, to be charged for the accommodation.

The last accounts which have reached the Government from Mexico are to the 11th June. They state that the Ministry of Finance had been reorganised, and that in addition to the ordinary financial matters, the administration of domains and of the mint had been placed under its authority. The decimal system had been adopted for weights and measures and for money. The piastre had been retained at its former value, but instead of being divided into eight silver reals, it had been divided into centimes, and coins of 5, 10, 25, and 50 centimes were to be struck. The old ounces or quadruples of 16 piastres were to be replaced by gold pieces of 1, 5, 10, and 20 piastres. The works of the railway were progressing rapidly; the first iron bridge ever seen in Mexico had been finished at Medellin, and the English Railway Company had commenced the construction of a mole at Vera Cruz.

The suggestion made in my last that as the Emperor (according to his pamphlet) has resolved on abolishing Customs duties in Algeria, he might abolish them in France also, seeing that they form a not very important branch of the revenue, and are detrimental to commerce, and manufactures, and general prosperity,—the suggestion has obtained more attention than I should have imagined, considering that it is far ahead of the ideas which gain general acceptance here. The *Gironde*, of Bordeaux, thus speaks of it, and Bordeaux, you know, takes greater interest in economic questions than any other town of France:—"The English journalist is right on some points:—we doubt, however, that the Customs will be abolished. It is not certain that it would be advantageous to the general interests to sweep away this sort of impost and replace it by another. The example of England deserves to be taken into serious consideration; our neighbours are, it will be admitted, able masters in the science of taxation, and in what aids the prosperity of commerce. They, however, do not hesitate to demand from Customs the greater part of the revenue of the public Treasury; they get from this more than 500,000,000f a year, and they must see that to abolish an impost in order to create another is a delicate operation which does not always succeed in practice, however seducing it may be in theory. Let us add that the abolition of Customs would cause to the Treasury of France sacrifices superior to those which the ECONOMIST indicates; if, for example, the duties on sugar from beyond seas were abolished, native beetroot sugar must also be relieved from duty. We are, nevertheless, in principle, partisans of the abolition of Customs, but we wish that that measure should be the result not of the creation of new taxes, but of economies which would permit the Minister of Finance no longer to require 2,000,000,000f per annum to provide for the public expenses."

That England gets 500,000,000f a year from Customs is no reason why France should retain Customs, when they only produce her in a much larger budget from 120,000,000f to 160,000,000f. Besides, the Customs in England are so arranged as, notwithstanding their productiveness, to weigh lightly on the people; whereas those of France are oppressive and mischievous. Moreover, it is not impossible that England may, before many years shall have passed away, see fit to get rid of this mode of taxation. Of course, if Customs were abolished in France, it would not be easy to maintain the duty on beetroot sugar (though I think the *Gironde* is mistaken in assuming that the abolition of one would perforce lead to the abolition of the other), and it is quite certain that various other taxes which are an indirect consequence of the Customs system would also have to go too; certain it is that the obnoxious internal Customs or octrois could not stand. The beetroot and other taxes do not, however, add very largely to the aforesaid 120,000,000f or 160,000,000f; and as to the octrois, they do not concern the Government. On the whole, the abolition of Customs in France may be regarded without shrinking, even by timid financiers, since the void it would make in the budget would not be large, and, as I said last week, that void could easily

Digitized by Google

be filled up temporarily by such an able minister as M. Fould, whilst the revenue that would be gained by setting industry entirely free would in a few years be greater far than that which the Customs ever gave. But, notwithstanding this, there is no present likelihood that any French Minister will propose such a measure. If, however, the Emperor's attention were turned to the matter he might do so, for the reason that, as experience has proved, that the Customs system which is good for one country is good for all, the reform he is about to decree in Algeria, could not fail to be advantageous to France.

With respect to the incident of the Agra and Masterman's Bank, I find, on inquiry, that what gave rise to the report that the Bank was speculating in building ground at Marseilles, was that it was charged to make a payment of 2,000,000f, or thereabouts, for some English capitalists who have bought a considerable quantity of ground at Marseilles from the Immobiliere Company. Mr Goschen is, I am told, one of the purchasers.

The Minister of Commerce, in a circular to the Chamber of Commerce, has warned traders that at Leghorn a band of swindlers are getting goods by using the same names as those of respectable houses. In Italy, he adds, there are many people of the same name, so that it is easy for cheats to deceive foreigners. He recommends French firms not to execute orders for Leghorn without consulting the French Consul in that city.

The treaty of commerce and navigation between France and Holland, which was for some time in negotiation, has at last been signed. The text of it has not been published, but in all material points it is understood to be the same as that between England and France.

The Sugar Convention, which, after long and difficult negotiations, was concluded in November last between Great Britain, Belgium, France, and Holland, has been ratified and promulgated. It establishes a uniform system of treating sugars as regards drawback, when exported after being refined. In consequence of it, France and Belgium have abolished the surcharges they imposed on the import of each other's refined beetroot.

The quantity of beetroot sugar made in France from the beginning of the present season on the 1st September to the end of May was, including stock in hand, 163,992 tons; and after deducting what was taken for consumption and export, and sent to entrepots and distilleries, there remained in the manufactories 12,507 tons of finished and 11,008 of unfinished sugar. In the entrepots there were besides 21,952 tons. The quantity made was 39,697 tons more than in the corresponding period of last year.

The deplorable state of the North of Spain Railway, owing to the expense of construction having largely exceeded the calculations of the Government engineers, caused all railways in Spain to be regarded with great disfavour for a time. But reflection is beginning to convince the public that at least one of the Spanish companies, that of the Saragossa and Alicant lines, is, to use a French expression, an "excellent affair." Of these lines, 1,105 kilometres out of 1,430 are at work. The whole will be completed this year, and the expense of the whole, at the charge of the Company, will be 326,000,000f. Now gross receipts of 25,000f the kilometre will suffice to pay the interest and sinking fund of the bonds, and to give 6 per cent. to the shares representing that capital. In 1864 the gross receipts were 21,000f; and as the lines were then unfinished, as the cotton industry of Catalonia was at a standstill, as there were for six months inundations in Valencia, and as the harvest was bad, it is evident that 25,000f can safely be calculated on when the lines shall be finished, and when circumstances shall be better. Indeed, the revenue will assuredly not stop at that figure. Another "great fact" to be taken into account in treating of the Saragossa and Alicant Railways is, that Baron de Rothschild has a large interest in them, and, as the French well know, he never abandons his affairs, and they all eventually turn out well.

Messrs Arles Dufour and Co., of Lyons, in their last circular on the silk trade, say:—"The fears of a bad crop, which for several months exercised influence on our transactions, and which in spite of the resistance of consumers caused a rise in our prices, are too well confirmed. For Europe, the silk crop of 1865 may be considered as the most disastrous which has had to be deplored since the commencement of the malady." They state that consequently the season begins with prices from 20 to 30 per cent. higher than those of the corresponding period of last year; but they declare that producers would do well to take into account the possibility of a marked reduction in consumption on account of high prices and the probability that the import of China and Japan silk may be much greater than that of last year—perhaps even double.

A report on the operations of the Savings Bank of Paris which has just been published, shows that the deposits made in 1864 was 20,650,159f, and the withdrawals 21,263,221f. The sums due to depositors of the Bank on the 31st Dec. last were 47,416,806f; at the corresponding date of 1863 they were 49,412,804f. Thus, the Savings Bank is less in favour than it was; but this is not surprising, considering the numerous facilities for investing money at a higher rate of interest than the Bank gives which are now presented to the thrifty.

COMMERCIAL AND MISCELLANEOUS NEWS.

Subjoined is a portion of an official statement, recently issued, showing the extent of the coinage of the English Mint in each of the last two years:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 12th day of July, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,211,150	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,561,150
		Silver Bullion	...
	29,211,150		29,211,150

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,393,909
Rest	3,428,340	Other Securities	21,161,005
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,590,233	Notes	6,818,205
Other Deposits	16,229,245	Gold and Silver Coin	973,316
Seven Day and other Bills	550,617		
	39,351,435		39,351,435

THE OLD FORM,

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,943,562	Securities	31,656,914
Public Deposits	4,590,233	Coin and Bullion	15,534,466
Private Deposits	16,229,245		
	43,763,040		47,191,380

Dated the 13th July 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,428,340*l*, as stated in the above account under the head REST.

Digitized by Google

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£223,946
A DECREASE of Public Deposits of	4,758,434
An INCREASE of Other Deposits of	1,785,510
A DECREASE of Government Securities of	969
A DECREASE of Other Securities of	2,068 573
A DECREASE of Bullion of	538,793
An INCREASE of Rest of	138,243
A DECREASE of Reserve of	710,773

The payments for the half-yearly dividends has had the usual effect of materially reducing the public deposits. On the other hand, the amount of private securities has decreased, and that of the private deposits has increased. The most important feature is the further decline of 710,773*l* in the reserve. The amount of the stock of coin and bullion had been reduced by withdrawals to the extent of 538,793*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 22,033,082	£ 23,085,409	£ 22,194,996	£ 22,161,001	£ 22,943,562
Public deposits	2,811,014	5,223,980	4,948,458	4,683,803	4,590,233
Other deposits	15 048,548	17,063,830	16,381,914	15,082,746	16,229,245
Government securities	13,656,190	10,952,679	11,046,888	11,172,125	10,398,909
Other securities	12,881,833	19,892,679	20,908,633	20,368,384	21,161,005

Coin and bullion	17,328,896	17,671,890	14,749,876	13,701,112	15,534,466
Bank rate of discount	3½ p. c.	2½ p. c.	4 p. c.	6 p. c.	3 p. c.
Price of Consols	91⅞	93	93	91⅛	90⅛ xd
Average price of wheat	75s 11d	57s 0d	46s 11d	41s 9d	42s 5d
Exchange on Paris(short)	25 2½ 10	25 17½ 25	25 25 30	25 17½ 22½	25 15 22½
— Amsterdam ditto	11 16⅝ 17½	11 15 15½	11 16 16½	11 17½ 17⅝	11 17½ 18½
— Hamburg(3months)	13 7 7½	13 7⅞ 8¼	13 8¼ 8½	13 8⅛ 8¾	13 9⅜ 10

In the corresponding week of 1855, the great influx of Chinese into the Australian colonies had excited comment and some concern among the colonists. Commercial advices from America were more favourable. The harvest prospects in France were of a cheering character. The money market was easy.

In 1862, the large arrivals of gold in London had swelled the stock of bullion held by the Bank, and the abundance of money had led to the reduction of the discount rate from 3 to 2½ per cent.

In 1863, a bill had been brought before Parliament to authorise the issue of Indian 5 per Cent. Certificates to bearer. The Confederate American forces had invaded the Federal States, and were approaching Washington.

In 1864, at the request of the King, the whole of the Danish Ministry had resigned. Despatches had been forwarded by the Danish Government to the Courts of Vienna and Berlin, containing proposals for the suspension of hostilities. The Persian Government had sanctioned the Russo-Persian Railway concession. The questions pending between France and Morocco had been satisfactorily settled. In America, General Sherman had been repulsed in Georgia, with heavy loss. Mr Fessenden had been appointed as successor to Mr Chase. The rate of discount at Turin had been raised to 7 per cent. In London the demand for discount was moderate. The Confederate loan had risen to 70 on the advices received from America.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 2,166,710*l*; in 1862, a deficiency of 2,829,049*l*; in 1863, a deficiency of 4,526,719*l*; and in 1864, a deficiency of 5,285,638*l*. In 1865, the deficiency is 4,931,760*l*.

DISCOUNT AND MONEY MARKET.—The Bank returns published in London and Paris have served to excite an additional degree of interest in the money market this week. Gold has been withdrawn from the Bank, but it is asserted that the operations are exceptional, some perturbation being caused by the elections and by internal demand for harvest purposes. In France the advances usual on account of the oil and silk crops are said to have affected the Bank return, which has also been drawn on to some extent for the instalment just paid on the Italian loan. Prognostications are uttered as to the harvest returns, but it is early to speculate on these, and fair expectation may be held that they will not be unfavourable. The effects of the opening of the American ports are yet to be ascertained, but the European demand for American securities has increased, and the importation of gold to this country is in consequence partially arrested. There has been to-day a fair amount of activity in the discount market, and the applications at the Bank have been numerous. The terms are, however, unaltered for paper having different periods to run.

30 to 60 days	2⅞ per cent.
3 months	3 per cent.
4 months	3¼ per cent.
6 months—Bank bills	4 per cent.
6 months—Trade ditto	4 ½ per cent.

In the Stock Exchange money for short periods on Government securities, has commanded from 2 to 2½ per cent. Annexed are the rates of interest allowed on deposits :—

Joint Stock Banks	*2 per cent.
Discount houses at call	2 per cent.
Do. with seven days' notice	2¼ per cent.
Do. fourteen days	2½ per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*.

Bullion.—60,000*l* in sovereigns has been withdrawn for export to Egypt. The Tasmania, from the West Indies, has arrived with 234,000*l* in specie.

The following are the rates of discount current in the chief continental cities. The only alteration this week is at Hamburg, where an advance of ½ per cent. has taken place. In Paris, the rate is steady, at 2¾ to 3 per cent.

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾ 3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4½ 5
Brussels	3	3
Madrid	9	...
Hamburg	...	3
St Petersburg	6	6½

The Bank of France returns just published gives the following results on a comparison with that issued last week :—

	£
INCREASE.	
Commercial bills	104,000
Advances	5,000
Notes	1,010,000
Treasury balance	960,000
Current accounts	1,320,000
DECREASE.	
Cash in hand	910,000

ENGLISH GOVERNMENT FUNDS.—There is little variation in the price, and the amount of business transactions is extremely limited. Markets have been steady to-day, and the closing quotations show a trifling improvement over those of the previous day. Consols, 90⅛ to 90¼ for account, and 89⅞ to 90 for money; New 3 per Cent. and Reduced, 89⅜ to 89½; India 5 per Cent., 104½ to 104¾.

Exchequer bills (of both sorts) par to 4s prem. India bonds, 16s to 21s.

FOREIGN STOCKS.—Business has been very restricted. The speculative stocks are, perhaps, a trifle firmer at the close of the day, owing to the completion of the settlement, but there is very little disposition to enter into new transactions. Spanish stocks have recovered slightly from the late decline, and Mexican 3 per Cents. are a trifle higher. Turkish securities mostly continue firm, and a market is by degrees being created for the new 5 per Cent. stock, notwithstanding the indifferent character of the security afforded to it by the Ottoman Government. Subjoined are the closing prices of stocks dealt in to-day :—7 per Cent. Danubian Principalities, 78. 7 per Cent. Egyptian, 97¾; ditto, second issue, 97; 1864, 94¼. 3 per Cent. Mexican, 24⅛. 5 per Cent. Moorish (Imperial), 97½. 3 per Cent. Portuguese, 47⅝. 5 per Cent. Russian, 1862, 92; ditto, 1864, 94¾. 3 per Cent. Spanish, 48¼; ditto Passive, 29¼. 6 per Cent. Turkish, 1862, 72½; ditto, 100*l* bonds, 72¼; 5 per Cent. ditto, 1865, 44¾. Italian 5 per Cents., 63¾ to 64¼.

The closing price of French 3 per Cent. rentes is telegraphed this evening at 67.85 for money, and 67.82 for account in August.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

	Money xd Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills.

RAILWAY AND OTHER SHARES.—The increased demand for money, notwithstanding the large supply, has occasioned a gloomier feeling in the railway markets; and as the takes of some of the leading lines are hardly enough to afford an immediate prospect of higher dividend returns, a few sales have been made, with the effect of slightly reducing prices. Business, however, as in the other markets, is very limited. Caledonian stock is 1½ per cent. lower; Great Northern "A" stock ½ per cent. higher; Lancashire and Yorkshire ¼ per cent. lower; London and Blackwall 1 per cent. higher; Metropolitan 1 per cent. higher; and Midland ¼ per cent. higher. South-Eastern also ¼ per cent. higher.

Indian guaranteed stock are rather firmer, and the prices of most of the colonial securities are firm.

American 5-20 bonds have been dull, but owing to the increasing disposition to purchase for investment, and the orders to hand to-day close firm at 71¾ to 72.

The dealings in the financial and miscellaneous share markets have been chiefly in the shares of the new companies, London Sewage closing at 1⅝ to 1⅞ prem., and Overend, Gurney, and Co. at 2 premium.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—There was very little change, but the tendency in bills on Paris for Hamburg was upward.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our last circular have been very limited, being only 6,000*l*, per the Scotia, from New York; 11,000*l*, per the City of New York, from New York; 2,000*l*, per the Bremen, from New York; and 4,990*l* from the Mediterranean. The Douro for the Brazils took 159,990*l* in sovereigns. About 232,000*l* in bars and 145,000 sovereigns, have been withdrawn from the Bank during the last week. The shipments from Marseilles by the Messageries steamers are 72,000*l* to Alexandria, and 5,000*l* to the Mauritius.

Silver.—The price for silver has somewhat advanced during the last few days, and sales have been effected at 60¾d per oz standard. The shipments are 8,000*l*, per the Douro, to the Brazils, and 50,796*l*, per the Euxine, to Bombay, this last-named shipment being the only amount of importance despatched to Bombay since the 12th of March.

Mexican Dollars.—We have no alteration to report this week. Sales have, however, been effected at our last quotations, viz., 59¼d per oz.

Exchange on India for drafts by the banks, may be quoted 1s 11¼d to 1s 11⅜d for bills at 60 days' sight, on Calcutta and Madras, and 1s 11½d to 2s for Bombay.

India Government loan notes are rather dearer so far as the 5½ per per Cents are concerned, we quote them 109 to 111; 5 per Cents. being as before 101 to 103, and 4 per Cents. 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d per oz std, last price, nearest; ditto, containing 5 grs gold, 0s 0d per oz std; Mexican dollars, 4s 11¼d, per oz; 5-franc pieces, 4s 11½d to 4s 11⅝d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The amount of Government bills on India for which tenders will be received at the Bank of England on Wednesday next, the 19th instant, is 250,000*l*.

RAILWAY DIVIDENDS.—The Turin and Savona Railway Company have advertised the half-yearly interest at the rate of 6 per cent. per annum on the shares, due 8th August. The eighth call of 2*l* per share, making 18*l* paid, is to be paid by the 1st August.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The bills have been returned of Messrs Watson, Bogle, and Co., shipping merchants, of Manchester, a firm connected with Messrs Scott, Bell, and Co., whose stoppage was recently announced.

Messrs J. Samuel and Son, East India merchants, have suspended payment. The liabilities are stated to be moderate.

A meeting of the creditors of Messrs John T. Bell and Co., of London, took place on Monday last. The uncovered liabilities were estimated at 34,998*l*. Resolutions were passed adjourning the meeting for further information from Bombay. Mr Bell, in conjunction with the accountants and two of the creditors, is to continue the liquidation.

Creditors of the International Racecourse Society (Limited) are required to send the particulars of their claims to Mr C. F. Kemp, the official liquidator, by the 8th August, the Master of the Rolls having appointed the 6th November for adjudicating upon them.

Vice-Chancellor Wood proposes on the 25th instant to make a call of 2*l* per share on the contributories of the South Lady Bertha Copper Mining Company,

On Monday last there were some proceedings in the Bankruptcy Court in the case of Messrs John and Thomas Hall Gladstone, merchants, whose liabilities amount to about 700,000*l*, while the assets are not expected to produce 150,000*l*.

Creditors of the Constantinople and Alexandria Hotels Company (Limited) are required to send the particulars of their claims to Mr George Scott, the official liquidator, by the 1st October, the 3rd November having been appointed by the Master of the Rolls for adjudicating upon them.

PUBLIC COMPANIES.—A dividend of 5 per cent. has been declared by the London and Southwark Insurance Corporation, payable on August 1.

At the meeting of the Union Bank of Australia, held on Monday last, the accounts showed a total of 113,882*l* 5s 3d available for distribution, out of which a dividend of 2*l* 5s was declared for the half-year, free of income tax.

The directors of the Warrant Finance Company have announced an interim dividend of 5*l* per cent. per annum for for the half-year ended the 30th ultimo, that being the maximum amount allowed by the articles of association.

At the meeting of the English and Foreign Credit Company, held on Monday last, a dividend of 7s 1d per share was declared, free of income tax, being at the rate of 10 per cent. per annum.

The directors of the Lion Brewery Company (Limited) have declared a half-yearly dividend at the rate of 10 per cent. per annum, payable on the 1st August. This is after paying the guaranteed interest at the rate of 6 per cent. per annum on the company's perpetual preference stock.

At the meeting of the Union Bank, held on Wednesday last, the directors' report, which was adopted, showed net profits for the six months amounting to 144,879*l*, making, with 61,375*l* brought forward, a total of 206,225*l*. A divi-

Digitized by Google

dend and bonus, equal together to 30 per cent. per annum, were declared, and the balance, 21,255*l*, carried forward to new account.

The report of the Imperial Bank (Limited), to be presented at the meeting on the 17th inst., has been published. The directors recommend a dividend at the rate of 8 per cent. per annum, free of income tax. After payment of all bank charges, and allowances for bad and doubtful debts, there remains a balance of 6,897*l* 18s 2d.

The directors of the London and St Katharine Docks Company are about to recommend, at the approaching general meeting, a dividend of two per cent., free of income tax, on the capital stock for the half-year ended the 30th June last.

The directors of the London Financial Association (Limited) have issued their report, in anticipation of the meeting to be held on the 17th inst. After deducting expenses of every kind, there remains a total of 108,943*l* to the credit of profit and loss. A dividend and bonus, equal to 15 per cent. per annum, free of income tax, are recommended, absorbing about 45,000*l*. A balance of 62,660*l* will be carried forward to next half-year.

At the half-yearly meeting of the directors of the Thames and Mersey Marine Insurance Company (Limited), held on Thursday, an interim dividend of 10 per cent. per annum and a bonus of 5 per cent. were declared, being together equal to 20 per cent. per annum for the half-year ended 30th June.

At the meeting of the Imperial Mercantile Credit Association, held on the 13th inst., a dividend was declared at the rate of 20 per cent. per annum, the directors' report being unanimously adopted.

The directors of the London, Italian, and Adriatic Steam Navigation Company have decided on distributing among the shareholders an interim dividend at the rate of 5 per cent. per annum, for the half-year ended 30th June last.

At the half-yearly meeting of the directors of the Thames and Mersey Marine Insurance Company (Limited), held in London to-day, an interim dividend at the rate of 10 per cent. per annum, and a bonus of 5 per cent. were declared, free of income tax, being together at the rate of 20 per cent. per annum for the half-year ending 30th June.

We are requested to state that the business of the Crescent Brewery has, since 1859, been under the management of the London and Colonial Company, and that several opportunities having recently presented themselves for undertaking more general business, the present shares and debentures are offered to the public.

The Metropolis Sewage and Essex Reclamation Company has been started for the purpose of utilising the sewage of the Northern side of the Metropolis, the concession of which has been granted to Messrs Napier and Hope on condition of payment of 50,000*l* in fully paid-up shares, and a small per centage of the net profits. The capital of the undertaking is 2,100,000*l* in 21,000 scrip certificates of 100*l* each, to be hereafter converted into shares of 10*l* each. Several arrangements have been entered into between the directors and the Metropolitan Board of Works, which will be found fully detailed in the prospectus. The directors have entered into a contract for the construction of a main conduit from the reservoir of the main drainage works at Barking Creek to Foulness Sands, beyond Shoeburyness; they propose that the sewage conveyed by this conduit shall irrigate the land through which it passes, and that the surplus remaining shall be employed for rendering the above-mentioned sands fit for the cultivation of food. The cost of this part of the undertaking will be 1,853,448*l*. The prospectus states:—After deduction of the annual charge for 'money borrowed,' and of the 'working and establishment expenses,' the net profit shall be applied—"1st. In payment of interest at 5 per cent. per annum on the share capital. 2nd. In payment in equal moieties to the shareholders and the Metropolitan Board of the further profits up to 15 per cent. 3rd. In division of profits exceeding 15 per cent., and up to 25 per cent. between the shareholders and the Metropolitan Board, in the proportion of one-fourth to the former, and three-fourths to the latter. 4th. After 25 per cent., the division again to become equal. The share capital of the company derives the advantage of the entire capital, approaching three millions sterling, expended by the Board on the North side of the Thames, for the collection of the sewage at the point of its delivery to the company."

General Exchange Bank was quoted at 1¾ to 2¼.

The shares of the Railway Credit Company (Limited) are at 1 to 2 prem.

The shares of the General Estates Company (Limited) are at 3 to 3½ prem.

The share list of the Parkfield Iron Company (Limited) will be closed for London on the 18th, and for the country on the 21st. The shares are at 2½ to 2¾ prem.

The closing of the subscription list to the Dalbeattie and Kirkconnel Granite Company is postponed till the 22nd inst. for London, and the 25th for the country.

MISCELLANEOUS.—The Imperial Ottoman Bank have received advices from their Bucharest branch of the receipt of the usual monthly instalment of 6,700*l*, on account of the interest and sinking fund of the Limited Danubian Principalities Loan.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428½ per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109½ to 110¾ per cent. At this rate there is scarcely any profit on the importation of gold from the United States.

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria cap. 14:—

Corresponding week in	Quantities Sold.			Average Prices.		
	Wheat.	Barley.	Oats.	Wheat.	Barley.	Oats.

Wheat	56,954	5	42	5
Barley	577	3	28	4
Oats	1,904	3	22	7

COMMERCIAL EPITOME.

FRIDAY NIGHT.

A very moderate supply of English wheat was on sale at Mark lane to-day. Sales, however, progressed slowly both in red and white qualities; nevertheless, Monday's currency was well supported. In foreign wheat, a limited business was transacted, at late rates. For barley, the trade was quiet, and prices had a downward tendency. Oats—of which there was a large supply on offer—met a slow sale, at a decline in prices of 6d per quarter. Beans and peas were dull, on rather easier terms. There was a fair demand for flour at full currencies. Several parcels of *new* rapeseed were on offer, fine qualities of which sold at 86s per quarter. This week's imports amount to 25,230 quarters of wheat; 7,150 of barley; 52,460 oats; and 50 sacks of flour.

Both at Liverpool and Wakefield this morning, the corn trade was very quiet. In prices, however, no material change took place.

The Liverpool cotton market opened this week with a much better tone, prices advancing ⅛d to ¼d on some descriptions on the low sales of Thursday, but this activity was not maintained. The total sales of the week amount to 45,230 bales, of which spinners have taken 26,970 bales, speculators, 7,850 bales, and exporters, 10,680 bales. To-day there is a better feeling, the sales amount to 10,000 bales, with firmer rates.

The cotton trade at Alexandria on the 5th inst. was very quiet, at 17d per lb for fair open-ginned produce.

Several statements have been received from America this week showing the estimated quantity of cotton at present in the Southern States. They vary considerably as to the supply on hand, but agree as to the limited extent of the present year's crop, which it is estimated will not exceed 350,000 bales, 250,000 bales of which are set down as the probable production of the States of Louisiana, Mississippi, Texas, and Alabama. The supply of old cotton on hand is estimated at one million of bales, but whether this is above or below the mark is at present not satisfactorily ascertained. The supplies, however, at several of the Southern ports have recently considerably increased, the arrivals at New Orleans for the week ending June 10, having amounted to 11,819 bales.

No material change has taken place in the value of colonial and foreign grocery produce at Mincing lane this week. The markets, generally speaking, have ruled quiet, the business transacted in most articles having been confined to the immediate wants of buyers, at about last week's currency. Sugar, coffee, and rice, however, are decidedly firm, but as regards tea, a slight fall in value has taken place. In the dry fruit market the chief feature to remark is the sale of raisins from the Cape of Good Hope, at 32s and 33s per cwt for fine qualities.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to June 30, 1864 and 1865, with STOCK on hand on July 1, 1864 and 1865.

ESTIMATED STOCK of TEA in the UNITED KINGDOM.

	July 1, 1863.	July 1, 1864.	July 1, 1865.
London ..... lbs	80,118,000	92,472,000	94,629,000
Liverpool	2,112,000	1,784,000	1,591,000
All other ports estimated at	10,000,000	8,000,000	7,780,000
	92,230,000	102,256,000	104,000,000

At the date of our latest advices from the rice ports of British Birmah, the rice season was approaching its termination. The following statement is an estimate of the total shipments from each port, and as nearly the whole of the crop had arrived and had been shipped or was on shipboard, may reliably be considered as the extent of the season's exports. A comparison is made with the shipments last year:—

From—	Europe and America. tons.	Straits and China. tons.	Elsewhere. tons.
Rangoon	36,238	139,888	11,667
Akyab	68,878	31,229	...
Bassein	14,296	10,241	...
Total	119,412	181,358	11,667
Further shipments during season (estimated).....	20,000	16,000	...
Total	139,412	197,358	11,667

TOTAL SHIPMENTS of RICE in 1864.

From—	Europe and America. tons.	Straits and China. tons.	Elsewhere. tons.
Rangoon	87,617	90,276	17,010
Akyak	99,940	22,000	...
Bassein	46,186	11,500	...
Total	233,743	123,776	17,010

The following table, from Messrs Jackson and Till's circular, shows the quantities of rice afloat to Europe on the 1st inst, compared with the same period last year:—

	1865. tons.	1864. tons.
From Calcutta	2,284	8,440
Madras	112	146
Rangoon	32,998	40,251
Akyab	67,836	87,652
Bassein	19,406	21,591
Moulmein	580	2,500
Java	1,680	2,824
Totals	124,896	163,404

In the rum market, there has been considerable activity, and prices have advanced 1d to 2d per gallon. Demerara qualities have been especially in request. Brandy is steady, at full quotations. The shipments of port wine from Oporto for the six months ending June 30, 1865, were 17,805 pipes, against 18,270 pipes; of sherry from Cadiz, 24,421 butts, against 40,419 butts during the same period last year.

The English wool trade is decidedly heavy, and a further decline has taken place in prices. Colonial wool in the private contract market is in limited request, at late rates. The arrivals for the next public sales, which will commence on the 17th proximo, amount to 104,624 bales, consisting of 32,962 bales from Sydney; 14,554 Port Philip; 10,477 Van Diemen's Land; 4,116 Adelaide; 31,109 New Zealand; 336 Swan River; and 11,070 bales from the Cape of Good Hope. At Liverpool, the next series of sales will be opened on the 26th inst., the supply of East India produce to be brought forward being about 14,000 bales.

The quarterly public sales of East India indigo were commenced on Monday. The declarations were 11,336 chests in the A catalogue, and 1,045 in the B—total 12,381 chests, of which 720 were not printed or withdrawn, leaving the quantity to be brought forward 11,661 chests, consisting of 6,621 chests Bengal, Tirhoot, &c., 1,047 Oude and Plant Oude, 1,131 Kurpah, 1,420 Madras, 132 Bengal figs, 118 Moultan figs, 69 Manilla, 1,123 sundries, including B catalogue. The sales opened with considerable activity as regards good and fine shipping qualities, and prices advanced 2d to 3d per lb. To-day, however, the biddings have ruled inactive, and the above improvement has not been supported. The quotations are now, in some instances, 3d per lb higher than at last sales for good and fine parcels, but for inferior qualities they show a fall of 3d to 4d per lb as compared with the same period. Of the total quantity which has, up to this evening, passed the hammer, viz., 5,307 chests, 1,860 chests have been withdrawn; 650 bought in; leaving 2,797 chests sold. Last lot, 5,307.

In the metal trade there has been a great want of activity, and although very few changes of importance have taken place, the tendency, in most instances, has been in an unfavourable direction. Scotch pig-iron is quoted at 54s 9d cash, mixed numbers; and spelter at 22*l* to 22*l* 5s per ton, on the spot.

The quarterly meetings of the iron-masters have been held at Birmingham and Wolverhampton this week. The attendance of the trade was unusually small, and very little business was transacted in any description of finished iron. No alteration, however, was made in prices. The pig-iron trade was tolerably active.

Both for oils and tallow, the demand has ruled inactive, and prices are somewhat easier. Linseed oil is quoted at 32s 3d; and St Petersburg Y.C. tallow at 41s 3d to 41s 6d per cwt on the spot.

Considerable business was transacted in cotton at New York during the week, ending July 1, at enhanced quotations. The trade for cotton goods, owing to the limited supply on offer, and the great scarcity in the Southern States, was very firm, and several descriptions changed hands at higher prices. Wool and woollen goods steadily supported previous rates. Silk goods were scarce, and fully as dear. In the market for imported grocery produce, there had been a fair amount of activity, and prices ruled firm. Breadstuffs further declined in value, notwithstanding that the export trade continued to improve. The market for naval stores was tolerably active, and moderate supplies were on offer. Spirits of turpentine were quoted at $1.35 to $1.37½ per 280 lbs. The receipts and exports from Jan. 1 to June 30, were as follows:—

RECEIPTS.

	1865 bbls	1864 bbls	1863 bbls
Turpentine	2,014	403	1,298
Spirits of turpentine	4,715	4,044	3,668
Rosin	32,818	6,995	5,265
Tar	5,058	16,577	8,984

EXPORTS.

	1865. bbls	1864. bbls	1863. bbls
Turpentine	...	69	...
Spirits of Turpentine	759	254	646
Rosin	3,140	904	3,680
Tar	7,771	538	4,844

In petroleum very little was doing, and prices were rather lower; crude was quoted at 35 cents. The total export from the United States, from Jan. 1 to June 24, was 4,842,023 gallons, against 11,978,503 gallons last year; and 17,416,432 gallons in 1863. Financially, few changes of importance took place. The leading alteration was in the gold market, the premium having at one period declined to 38 per cent., subsequently advancing, however, to 41 per cent. For money, there was very little demand: the best short-dated paper was quoted at 6 to 7; 3 to 4 months' do., 6½ to 7½ per cent. The figures of the returns of the banks, for the week ending June 24, stood thus:—Loans, 42,718,050*l*; specie, 3,181,260*l*; circulation, 1,157,820*l*; deposits, 37,501,800*l*; legal tenders, 11,712,120*l*. The balance in the Sub-Treasury on the 24th ult. was 9,564,370*l*. The exports of specie, for the week ending the 24th ult., were 193,520*l*. The foreign imports of dry goods for the same week were valued at 368,040*l*; against 359,010*l* last year; and 146,230*l* in 1863—of general merchandise, 655,690*l*; against 940,750*l* last year; and 243,520*l* in 1863; the total of dry goods and general merchandise imported from Jan. 1 to June 24, being 15,144,830*l*; against 24,999,990*l* during the corresponding period last year, and 17,500,620*l* in 1863.

The shipments of specie from San Francisco for the first five months of the current year were 1,340,710*l* less than during the same period in 1864. The amount forwarded this year to all quarters amounted to 3,728,960*l*, whilst in the corresponding period in 1864 the quantity shipped was 5,069,770*l*.

THE COTTON TRADE.

LIVERPOOL—JULY 14.

The advance in cotton, noticed on Friday morning, caused by receipt of the advices per the Scotia, was followed by a very quiet market on Saturday, and subsequently throughout the week the attention of all parties has been so much occupied by the elections that the business has been limited, and prices closed in most instances with a partial decline from last week's quotations. Of Sea Island the choice has been largely increased by recent arrivals from New York, but the demand is good at previous rates. American has been in good demand, but closed fully ¼d below last week. In Brazil a fair amount of business has been done, but after a rally of about ½d on Friday, prices closed with last week's quotations barely supported. Egyptian advanced about 1d per lb on Friday, but declined slightly each day since until yesterday; when the demand improved, and prices closed steadily about ¼d above last week for fair open and 1d for fine. Smyrna is firm at full prices. For East India the demand has been limited, and the the supply being increased by recent arrivals, prices have given way about ¼d per lb in some descriptions. In China and Japan the current qualities command full prices, while the better descriptions are rather dearer.

To arrive, several transactions have been reported during the week, and the last quotations were on the 12th for Paraiba, 1st quality, ship named, 17¾—Egyptian, open, fair, shipping or shipped 17½, and yesterday Dhollerah, fair new merchants, May sailing 12⅝, and early June sailing 12¾.

The sales of the week amount to 45,230 bales, including 7,580 on speculation, and 10,680 declared for export, leaving 26,970 bales to the trade. The sales to-day will probably amount to about 8,000 bales; the market steady at the above quotations.

LONDON—July 14.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—On Friday there was a good demand, and an advance of ¼d to ½d was obtained. Since then the market has been very quiet, with little business done, and the advance has been mostly lost. Prices, however, are rather irregular.

NEW YORK—July 1.

The cotton market closes quietly at a reduction of about 2 cents per lb from the highest prices of the week. In the early part of the week the trade was somewhat active, and middling Upland produce realised 46 cents; but the quotation for that description of cotton is now 44 cents per lb. About 17,000 bales have been disposed of. The arrivals comprise 7,559 bales, of which 3,058 bales are from New Orleans, and 1,779 bales by railroad. This additional supply raises the import for the present season to 248,767 bales. The following are the prices now current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

MARKETS IN THE MANUFACTURING DISTRICTS

There has been about an average business doing in goods in the leading markets, both for home use and export, at steady prices. The demand for iron has fallen off, and the quotations have not been supported. Coals have changed hands slowly.

Manchester, July 13.—The elections have quite taken away all attention from business. Prices have remained nominally unaltered, but in reality slightly in favour of the buyer. The recent failures in the India trade disturb confidence in that department. All other branches remain simply quiet, hanging in suspense on what may be reported of the stock of cotton in America.

Bradford.—Buyers of wool are quite indisposed to operate beyond their requirements, which are very limited, and the aggregate of transactions is accordingly small. Down wools and half-breds are not much affected in price, but bright wools may be bought at 1½d per lb less than the highest prices recently made. Business in yarns is very restricted, and almost confined to purchases for immediate consumption. The piece market is quieter.

Leeds.—The trade in the warehouses is moderately active, and several of the export houses are busy in fulfilling orders for autumn and winter goods. The country clothiers, as well as the larger manufacturers, are in full employment. Altogether the position and the prospects of the woollen cloth trade of this town and the surrounding districts is cheerful. Wool, yarn, and goods alike keep steady.

Digitized by Google

ROCHDALE.—The flannel market has been rather inactive. The manufacturers of plain goods are well employed, and those of fancy goods are very busy. Prices are very firm. The better kinds of Yorkshire goods meet with a fair demand, but for the lower qualities there is a slow sale. There is an average business doing in the wool trade and late prices are well maintained.

LEICESTER.—The hosiery trade is healthy. Worsted yarns are firm and high in price, spinners confining their productions to immediate requirements. Wools are quiet, and less firm. Stocks of hosiery are exceedingly light.

NOTTINGHAM.—Cotton mechlins are selling, but other sorts of cotton goods are not much inquired after. Black silk laces sell tolerably well, and there has been a little more doing in narrow edgings. The silk mechlin trade is rather quiet. The hosiery trade continues in a very satisfactory state.

CARDIFF.—The dulness of the steam coal trade for several weeks is being gradually replaced by more activity, and it is not improbable that the exports for July will show a considerable increase over the corresponding month of last year. Merchants have received a good number of orders during the last ten days, and the inquiry from the Mediterranean markets is better.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 1.—Although the export demand for wheat and flour has somewhat improved, the trade continues in a most inactive state, and prices have further declined. The receipts during the week have been 87,000 barrels of flour, 392,000 bushels of wheat, and 302,000 bushels of corn. In the value of the last mentioned article, a fall has also taken place. The rates current are as follows:—Flour—State, superfine brands, $5 to $5.35; State, extra brands, $5.70 to $5.75; State, choice brands, $5.80 to $6; Ohio, common brands, $6.35 to $6.50; Ohio, fancy brands, $6.55 to $6.60; Ohio, good and choice extra brands, $6.65 to $7.65; Michigan, Indiana, Wisconsin, &c., $5 to $5 95; Genesee, extra brands, $6 to $8.50; Missouri, $7.50 to $10.75; Canada, common, $5.75 to $5.90; Canada, good to choice extra, $5.95 to $7.70 per barrel. Wheat—Chicago spring, $1.25 to $1.30; winter red Western, $1.35 to $1.42; choice amber Michigan, $1.47; amber Milwaukee, $1.29 to $1.32. Corn—Unsound, 69c to 74c; sound mixed Western, 75c to 78c; white Western, 77c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, coastwise and by land-carriage, having been on a limited scale, the show of samples has continued trifling. The demand for all kinds, however, has ruled inactive, at about last week's currency. The imports of foreign wheat have been tolerably good. Really fine parcels have sold at full quotations. In other descriptions sales have progressed slowly, at barely stationary prices. There has been only a limited inquiry for barley, at about previous rates. The show of samples has not increased. Malt has come freely to hand, and most kinds have realised full quotations. The imports of oats having been tolerably good, the oat trade has been inactive, at the late decline in value. Both beans and peas have commanded extreme rates, with very limited quantities on offer. Both English and foreign flour has moved off slowly, on former terms.

The following table shows the extent of the exports of grain, &c., from London last quarter, compared with 1864 and 1863:—

EXPORTS of GRAIN, &c.

	1863. Second Quarter.	1864. Second Quarter.	1865. Second Quarter.
Wheat qrs	12,814	859	835
Barley	716	459	...
Malt	30	...	...
Oats	918	3,540	200
Rye	65	102	700
Beans	10	4	...
Peas	...	...	...
Tares	65	1,542	15
Linseed	15,291	39,744	36,423
Rapeseed	11,235	40,396	41,968
Maize	1,603	443	...
Sundry	...	...	...
Flour cwts	4,890	10,122	945

In all parts of England the crops are rapidly progressing towards maturity. The wheats promise a full average yield, but the growth of barley, oats, beans, and peas is expected to turn out somewhat deficient. Potatoes are looking remarkably well.

The continental markets have been steady for wheat at full prices. In spring corn a firm business has been passing. The shipments of breadstuffs from America have slightly increased.

The Scotch markets have been scantily supplied with wheat, which has changed hands slowly, at full prices. In the value of all other produce, very little change has taken place.

In Ireland, the corn trade generally has been in a sluggish state, at about stationary prices.

The supply of English wheat on sale at Mark lane, to-day, was very moderate, yet the trade was slow. Monday's currency, however, was well supported. In foreign wheat, a limited retail business was transacted, at late rates. Barley was dull, and prices had a drooping tendency. Oats—of which there was an abundant supply on offer—moved off slowly, at a decline in prices of 6d per quarter. Beans and peas were in slow request, on rather easier terms. The flour trade was steady at late rates.

Mr George Dornbush reports the arrival off coast of 29 cargoes of grain, and an improved demand for wheat, at extreme quotations. Maize has advanced 6d to 1s per quarter. In the value of other produce very little change has taken place. Cotton-seed has realised 7*l* 7s 6d per ton.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened with less animation, but prices remain steady in most instances, and a full amount of business is reported in floating cargoes. Up to yesterday 1,600 casks West India had changed hands, including a portion sold by auction. Barbadoes, 30s to 36s 6d; Jamaica, 30s to 34s per cwt. Grocery Porto Rico obtains extreme quotations. The imports into London were 8,050 tons less to the present date, and the deliveries for home use now show an increase of 17,100 tons; those for export an excess of 9,840 tons. The stock is 87,755 tons, or nearly the same as in 1864.

Mauritius.—225 bags dark soft brown went at 28s.

Bengal.—914 bags, offered by auction, went as follows: brown, 29s; bright grainy yellow, 36s per cwt.

Penang.—3 822 bags rather more than half sold at 30s 6d to 33s per cwt.

Natal.—272 bags sold at 28s to 32s 6d.

Foreign.—150 boxes Cuba florettes, offered by auction, part sold at 38s 6d. 975 casks 175 barrels Porto Rico partly sold at 31s to 38s 6d; one lot fine at 39s 6d per cwt. Six floating cargoes of Cuba have sold for the United Kingdom at 22s to 22s 3d. One of Havana for a near port, No. 13 to 13½, at 26s 6d. 4,000 bags muscovado Manilla at 27s per cwt.

Refined has not shown any material change, the transactions being of very moderate extent.

MOLASSES.—35 puncheons Demerara and St Vincent have sold at 16s per cwt.

RUM.—Higher prices have again been paid, and there is now a limited supply. Demerara has sold at 1s 8½d to 1s 10d. 180 puncheons Trinidad of old landing, at 1s 6d. 160 casks Mauritius at 1s 7½d per proof gallon.

COCOA.—232 bags Trinidad, offered by auction, were chiefly bought in at 68s to 70s. 120 bags Dominica sold at 48s to 48s 6d. 240 bags Grenada sold at 50s to 56s 6d; fine, 58s to 70s 6d. 123 bags Surinam part sold at 75s to 79s 6d per cwt.

Digitized by Google

COFFEE.—The increased quantity of plantation Ceylon brought to public sale has gone off steadily; 552 casks 450 barrels and bags selling at 81s to 90s 6d for rather small berry to fine. 54 casks 1,152 bags native realised 68s to 70s, according to quality. Large supplies of both descriptions from the recent arrivals will shortly be offered. Of 1,343 bags Singapore, the great part sold at 57s 6d to 73s. 2,012 bags Rio were bought in at 61s to 63s. 120 packages Mocha sold: small berry, 99s; mixed long berry, 93s 6d to 94s. 587 bags fine Mysore obtained 102s to 104s. 377 bags Guatemala, 74s to 74s 6d per cwt.

TEA.—The public sales of China teas were brought to a conclusion on Monday, when several breaks of common to fine red and black leaf congou obtained 11d to 1s 5½d per lb. 34,474 packages sold out of 40,780 packages in the catalogues, the bulk of this quantity printed "without reserve." Packages Assam and Indian tea offered yesterday, realised full prices. By private contract the business is chiefly restricted to green teas from the recent arrivals.

RICE.—There have not been any sales of importance effected by private contract. At auction, 915 bags Java were taken in at 17s. 3,000 bags Necrancie Arracan withdrawn at 9s 9d, 3d less being bid. Privately, a few parcels of soft grain have sold at 8s 9d to 10s per cwt.

IMPORTS and DELIVERIES of RICE to July 8, with STOCKS on hand.

	1865.	1864.	1863	1862.
Imports ..... tons	23240	28350	21850	50230

SAGO.—1,186 boxes sold at previous rates: small, 19s 6d to 20s; medium, 20s to 20s 6d; bold grain, 21s 6d to 23s 6d per cwt.

SPICES.—A few orders have been executed in black Penang pepper by private contract on fully previous terms. At auction the sound portion of 1,008 bags Singapore sold at 3¼d. 170 bags Tellicherry at 3⅞d to 3⅝d. 420 bags Malabar pepper of old import were taken in. 15 cases Penang cloves were taken in at 1s 2d. 1 case bold brown nutmegs sold at 3s 4d per lb. 43 barrels low Jamaica ginger sold at 56s to 60s. 335 cases Cochin, &c., sold from 62s to 73s. A few small sales have been made in cassia lignea privately, at some advance: second pile, 83s to 84s per cwt.

SALTPETRE.—The last sale of Bengal was at 25s per cwt, refraction 6 per cent., but the market remains very dull.

IMPORTS and DELIVERIES of SALTPETRE to July 8, with STOCKS on hand.

	1865	1864	1863	1862

DRYSALTERY GOODS.—Some inquiry still prevails for safflower, but nothing of interest has transpired in other articles.

METALS.—A better demand prevails for spelter, at rather higher quotations, viz. 22*l* 10s to 22*l* 15s for common plates on the spot. Foreign tin continues dull, and Straits has sold during the week at 90*l* to 91*l*. Lead remains quiet. Copper is inactive, and the shipments to Bombay have of late fallen off considerably. Scotch pig iron has been dull: mixed numbers, 54s 6d cash. A fair inquiry still exists both for rails and merchant bars, and prices appear tolerably well supported. Staffordshire kinds have not undergone any change. Swedes bars of Indian assortment have been sold at 11*l* 5s to 11*l* 10s per ton.

JUTE.—On Wednesday 11,000 bales went off with spirit at 10s to 20s advance; low to fine, 10*l* 15s to 23*l* per ton. Several contracts have been made by private contract.

MANILLA HEMP.—More inquiry prevails at Liverpool, but this market is rather quiet.

OILS.—There has been more inquiry for sperm at 90*l* per tun. Rape firm, and brown higher. Foreign, 43s to 43s 6d. Refined quoted 46s 6d to 47s. English lower in proportion. Linseed oil has declined, but closes rather firmer, at 32s 3d on the spot. A good deal of business has been done in Ceylon cocoa-nut at 43s. Fine palm steady at 36s 9d to 37s per cwt.

TALLOW.—The market is devoid of animation. This morning 1st sort Petersburg Y.C. may be quoted 41s 3d to 41s 6d; for delivery in the last three months, 42s 3d to 42s 6d; January to March, 1866, 43s 3d per cwt.

PARTICULARS of TALLOW.—Monday, July 10, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—A better demand prevails, and the crystallised and Barbadoes offered by auction to-day went rather dearer. 4,752 bags Mauritius were partly disposed of: crystallised, 35s to 37s. Soft qualities chiefly bought in. 537 bags low brown East India sold at 25s to 26s 6d. A floating cargo of brown Bahia has sold for the United Kingdom, at 22s. Two of Havana, 12½ to 13, 25s 9d to 26s 4½d; one for a near port; white at 27s 9d, part at 22s. The week's business in West India amounts to 3,050 casks.

COFFEE.—216 casks 130 barrels and bags plantation, by auction, sold at easier rates for the lower qualities.

INDIAN TEA SALES.—Second Day—The sales were concluded to-day, and have again passed heavily at about the prices of yesterday. 1,072 packages found buyers, 377 being withdrawn.

OIL.—383 casks palm, by auction, part sold at 37s per cwt for fine.

TALLOW.—209 casks South American offered by auction were withdrawn. 450 smaller packages sold at 41s 3d; 149 casks other kinds, including Sydney, at 38s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is rather higher for the week, a moderate business doing in most descriptions of goods. In Dutch crushed higher prices were asked for forward delivery.

GREEN FRUIT.—Market bare of lemons, which realise a high price. Some parcels of Naples and Sicily, sold by Keeling and Hunt, went at an advance of 10s per package. More inquiry for Barcelona nuts, the probability of a further improvement in price inducing buyers to take stock, but holders are unwilling to sell at present. West India pine apples have a fair sale at moderate prices.

DRY FRUIT.—No alteration to report.

ENGLISH WOOL.—Market very quiet, prices drooping.

COLONIAL WOOL.—Prices firm, at late quotations; very little business doing.

FLAX.—Market firm.

HEMP.—Market firm, and a fair business doing.

TOBACCO.—The market for American tobacco has presented no change, and sales have continued limited, and for immediate wants. In other growths considerable business has been transacted, at steady and firm prices.

TIMBER.—The import has generally commenced from the Baltic and British America. Baltic fir timber remains extremely low in price, and the building demand is not as active as usual at this period. For Canadian pine timber, as well as oak, elm, and masts, there is the same absence of trade as manifest for months past, the ship-building trade being so uncertain in the use of wood. Pine deals and spruce deals form the chief business, both articles having been scarce. Baltic deals and battens have fair sale at low prices. Staves for coopers' use are not very saleable, the Bosnian excepted. Of Indian teak the stock remains very large, the occasional sales and continued deliveries keep the market active.

LEATHER AND HIDES.—The leather trade of the past week has shown a slight improvement in extent without change in prices. At Leadenhall, on Tuesday, the supply of fresh goods was small, and the demand also was limited.

METALS.—Our market has shown very little variation. Copper is quoted rather firmer because the smelters and manufacturers have combined to make a uniform scale of prices, but buyers have not come forward more readily. Iron keeps steady generally, although Scotch pig has receded fully 6d per ton. Tin has drooped considerably without buyers coming in to operate. Spelter is buoyant. Lead rather more inquired for. Tin plates steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	43	0
Melted stuff	33	6
Rough ditto	18	6
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, July 10.—The total imports of foreign stock into London last week, amounted to 17,053 head. In the corresponding week in 1864 we received 10,250; in 1863, 14,133; in 1862, 7,977; in 1861, 10,082; in 1860, 12,239; and in 1859, 9,059, head.

SUPPLIES.

	July 10, 1864.	July 10, 1865.
Beasts	5 60	5020
Sheep and lambs	26890	27380
Calves	372	470
Pigs	410	320

THURSDAY, July 13.—Our market to-day was fairly supplied with beasts as to number, but their general character was inferior. Prime Scots, &c., were in request at full prices. Otherwise the beef trade was heavy, at barely Monday's currency. Sheep, the show of which was moderate, changed hands slowly on former terms. The top figure was 6s per 8 lbs. We had a steady sale for calves at previous quotations. The demand for pigs was heavy; whilst milch cows were a dull inquiry, at from 14*l* to 20*l* each.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8	to 4	0	Prime Southdown sheep	5	10	to 6	8

Veal	3	8	4	10	Small pork	4	8	5	0

Lambs, 5s 0d to 6s 4d.

HOP MARKET.

BOROUGH, Friday, July 14.—The accounts from most parts of the plantations continue favourable. Our market is still scantily supplied with produce, the trade for which, though far from active, rules firm, at full currencies. Mid and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, 100s to 140s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 14.—Fair supplies of home-grown potatoes are on sale at these markets. For most qualities there is a steady demand at the annexed quotations:—Shaws, 3s 6d to 4s 6d; Regents, 4s 9d to 7s; Jersey, 3s to 5s per cwt.

Digitized by Google

HAY MARKETS.

THURSDAY, June 13.—Limited supplies of hay and straw are on sale, and the trade is firmer, on higher terms.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Old hay	90 to 130	95 to 135	90 to 130
New hay	100 to 110	100 to 115	100 to 110
Old clover	100 to 150	105 to 155	100 to 150
New ditto	100 to 120	105 to 125	100 to 120
Straw	28 to 33	30 to 36	28 to 33

COAL MARKET.

FRIDAY, July 14.—Wallsend—Haswell, 19s; East Hartlepool, 19s; Stewart's, 19s; Byron, 18s; Hetton Lyons, 17s; Kelloe, 18s; Eden Main, 17s 9d; Russell's Hetton, 18s 3d; Tunstall, 17s 6d; Whitwell, 15s 6d. Byas's Bebside West Hartley, 17s 3d; Cowpen Hartley, 17s 3d; Hastings' Hartley, 17s 3d; Holywell Main, 17s; Wylam Moor, 16s 6d. Ships at market, 35; sold, 10; gas contracts, &c., 24—34; unsold, 1; ships at sea, 70.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 14.—The elections have more or less interfered with business this week, but the few transactions that have taken place are at steady prices. The next public sales here, the third series of the year, will commence on the 26th inst. The East India wools to be brought forward are expected to be about 14,000 bales.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 14.—The market very thinly attended. Business in all articles is so limited that there is no change since Tuesday.

The Gazette.

TUESDAY, July 11.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 1st of July, on 11,961 miles, to 708,694*l*, and for the corresponding week of last year, on 11,605 miles, to 678,293*l*, showing an increase of 356 miles and of 30,401*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,422 miles, to 576,439*l*, and for the corresponding week of 1864, on 8,167 miles, to 551,604*l*, showing an increase of 255 miles and an increase of 24,735*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 10.—In the share market to-day dulness was the prevailing feature, which affected with a tendency to flatness English and colonial railways and miscellaneous shares, but there was no material change of tone in the other descriptions. Of the English lines, North-Eastern (Berwick) recovered ½, North London advanced 1, Great Western relapsed ¼, and Caledonian declined 1, Metropolitan District (paid-up) ½, and Lancashire and Yorkshire, Manchester, Sheffield, &c., Midland, and South-Eastern ¼ each. In colonial, Eastern Bengal improved ½, and Indus Steam Flotilla declined 1½, Great Indian Peninsula ½, and Great Western of Canada ⅛. In foreign, Lombardo-Venetian recovered ⅛. In American, Virginia (6 per cent.) recovered ½, and United States (5-20) further declined ½, and Erie shares (paid up) ¼. In British mines, East Bassett advanced 3, and West Seton declined 5, East Lovell 1, and South Condurrow ¼.

TUESDAY, July 11.—In the share market to-day there was no recovery from the recent dulness, and the banks, American securities, and British closed with a weaker appearance, but the other descriptions were unaltered in tone. In English railways, Lancashire and Yorkshire recovered ¼, Metropolitan improved ½, and Great Northern receded 1, and Manchester, Sheffield, &c., a further ¼. In colonial, Great Western of Canada recovered ⅛, East Indian receded ½, and Eastern Bengal relapsed ½. In foreign, Lombardo-Venetian relapsed ⅛. In America, Virginia (6 per cent.) relapsed ½, and Illinois Central shares declined ½, and Erie shares (paid up) a further ¼. In British mines, East Bassett further advanced 2; and New Seton declined 5, Wheal Seton declined 2½, Great Laxey ½, and Chiverton ¼.

WEDNESDAY, July 12.—In the share market to-day the transactions were very few, but English and foreign railways bore a firm appearance at the close; British mines were weaker, and the other descriptions were almost unaltered. Of the English lines, Great Northern recovered ½, ditto (A stock), Midland, North-Eastern (Berwick), and ditto (York) advanced ½ each, and North-Western and South-Eastern ¼ each; and North British (Edinburgh, Perth, &c.) declined ½. In colonial, Grand Trunk of Canada (4th preference), and ditto (deferred) advanced ½ each, Great Western of Canada (new) ⅛, and ditto (paid up) a further ⅛, and Great Southern of India (5 per cent.) declined 1, and Eastern Bengal a further ½. In foreign, Lombardo-Venetian recovered ¼, Eastern of France, Northern of France, and Paris and Mediterranean improved ½ each, and Great Luxembourg declined ⅛. In American, Erie shares (paid up) recovered ½, United States (5-20) advanced ½, and Illinois Central shares further receded ¼. In British mines, Devon Great Consols declined 10, Stray Park 1, and East Carn Brea ¼.

THURSDAY, JULY 13.—In the share market to-day, being preparation-day for the account in the middle of the month, the majority of the transactions were for the account, and in the English and Indian railways and American securities the prices at the close wore an appearance of firmness, but in the other descriptions there was again no material alteration. Of the English lines, Blackwall and West Hartlepool Harbour advanced 1 each, Great Eastern (East Anglian) and North Eastern (Leeds) ½ each, Lancashire and Yorkshire ½, Great Northern a further ½, and North-Western a further ¼; and Great Western declined 1, and Metropolitan Extension ⅛. In colonial, Great Indian Peninsula, Punjaub, and East Indian improved ½ each, and ditto (J. extension) ¼. In foreign the only movement was a rise of ¼ in Antwerp and Rotterdam. In American, United States (5-20) improved ½, and Erie shares (paid up) a further 1. In mines, a decline of ½ in Vancouver Coal was the only change recorded.

FRIDAY, July 14.—In the railway market to-day the dealers are almost exclusively engaged in the settlement of the fortnightly account, and little other business was transacted. The tone generally was rather dull.

OVEREND, GURNEY, & COMPANY
(Limited).

(Incorporated under the Companies Act, 1862.)

Capital £5,000,000, in 100,000 Shares of £50 each,
Of which it is not intended to call up more than £15 per share.

Deposit on application, £2 per share; £5 per share on allotment; £4 per share on the 15th September, and the same on the 15th November.

DIRECTORS.

Henry Edmund Gurney, Esq., 65 Lombard street.
John Henry Gurney, Esq., 9 St James's square, and Catton Hall, Norwich.
Robert Birkbeck, Esq., 65 Lombard street.
Henry Ford Barclay, Esq., Monkhams, Woodford, Essex.
Thomas A. Gibb, Esq. (Messrs T. A. Gibb and Co.), 72 Old Broad street.
Harry G. Gordon, Esq., Chairman of the Oriental Bank Corporation.
William Rennie, Esq. (Messrs Cavan, Lubbock, and Co.), 16 Leadenhall street.

BANKERS.

Bank of England.
Messrs Barclay, Bevan, Tritton, Twells, and Co., 54 Lombard street.

BROKERS.

Messrs Sheppards, Pelly, and Alcard, 28 Threadneedle street.

SOLICITORS.

Messrs Young, Jones, Vallings, and Roberts, St Mildred's court, E.C.

Offices—65 Lombard street.

Temporary Offices for Allotment and the Registration of Shares—51 Lombard street.

The Company is formed for the purpose of carrying into effect an arrangement which has been made for the purchase from Messrs Overend, Gurney, and Company, of their long-established business as Bill Brokers and Money Dealers, and of the premises in which the business is conducted; the consideration for the good-will being £500,000, one-half being paid in cash and the remainder in shares of the Company, with £15 per share credited thereon—terms which, in the opinion of the Directors, cannot fail to ensure a highly remunerative return to the shareholders.

The business will be handed over to the new Company on the 1st August next, the vendors guaranteeing the Company against any loss on the assets and liabilities transferred.

Three of the members of the present firm have consented to join the Board of the new Company, in which they will also retain a large pecuniary interest. Two of them (Mr Henry Edmund Gurney and Mr Robert Birkbeck) will also occupy the position of Managing Directors, and undertake the general conduct of the business.

The ordinary business of the Company will, under this arrangement, be carried on as heretofore, with the advantage of the co-operation of the Board of Directors, who also propose to retain the valuable services of the existing staff of the present establishment.

The Directors will give their zealous attention to the cultivation of business of a first-class character only, it being their conviction that they will thus most effectually promote the prosperity of the Company and the permanent interest of the shareholders.

Copies of the Company's memorandum and articles of association, as well as of the deed of covenant in relation to the transfer of the business, can be inspected at the offices of the Solicitors of the Company.

Applications for shares must be accompanied by the payment of a deposit of £2 per share, which will be received by Messrs Barclay, Bevan, Tritton, Twells, and Company, 54 Lombard street. In the event of no allotment being made, the deposit will be returned in full; should a less number of shares be allotted than are applied for, the deposit will, so far as required, be appropriated towards the payment due upon allotment.

Prospectuses and forms of application for shares may be obtained at the Brokers, or the temporary offices of the Company.

London, July 12, 1865.

To be retained by the Bankers.

OVEREND, GURNEY, and COMPANY (Limited).

To the Directors of Overend, Gurney, and Company (Limited).

Gentlemen,—Having paid £ to your bankers, I request that you will allot me shares in Overend, Gurney, and Company Limited; and I hereby agree to accept such shares, or any less number that may be allotted to me, and to pay the calls thereon, subject to the provisions of the Companies Act 1862, and of the Articles of Association.

Name in full.....
Address.....
Occupation, if any.....
Usual signature.....
Date.....

The above form, when filled up, is to be left with the bankers in payment of the deposit.

IMPORTANT ANNOUNCEMENT.—
JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

FURTHER ISSUE OF SHARES.
ABRIDGED PROSPECTUS.

THE LONDON AND COLONIAL
COMPANY (Limited).
BREWERY: BURTON-ON-TRENT.
Established 1859.

Capital £360,000, in 3,600 shares of £100 each, of which 821 shares are already held, and of the remainder 1,779 ordinary shares are now offered to the public, leaving 1,000 shares for future disposal.

Deposit on application £2 per share, and on allotment £8. Calls not to exceed £10 per share, to be made at intervals of not less than three months. It is not expected that more than £50 each on these shares will be called up.

The Company are also prepared to receive applications for debentures not exceeding £35,000, redeemable in seven years, with interest warrants attached, payable half-yearly, at 6 per cent. per annum, to bearer, such debentures to be exchangeable at the holder's option during that period for fully paid up shares at par.

DIRECTORS.

Robert Tooth, Esq., J.P. | Fred. Thos. Elworthy, Esq.
John W. McLaren, Esq. | E. Wingfield Guilding, Esq.
Samuel Armitage, Esq. | W. J. Nash, Esq.

GENERAL MANAGER.
Mr John Spong, Blackheath.
SECRETARY (pro tem.).—Mr Spong.

BROKERS.
Messrs Sewell Brothers, 15 Copthall court, London, E.C.

SOLICITORS.
Messrs Gregory, Rowcliffe, and Rowcliffe, 1 Bedford row, London.

AUDITORS.
Messrs Ladbury, Collison, and Viney, Public Accountants, London.

BANKERS.
The London Joint Stock Bank, Princes street.

Registered Office.—70 Great Tower street, London.

The past working of the Company has resulted in a uniform dividend of 12½ per cent. per annum, paid to its shareholders each year, to 24th June, 1864, and in an accumulation of undivided assets at present amounting to £80,281 1s 3d, as shown by the balance sheet.

For this amount of undivided surplus, the present shareholders, instead of withdrawing it, are content, after payment of the ordinary dividend for the past year, to receive the balance represented by similar debentures to those now offered to the public.

Full prospectuses and forms of application for shares may be obtained at the brokers', the solicitors', or at the Company's office.

Buckland, at 4 and 9.—New Lecture by J. L. King, Esq., on Galibert's "Appareils Respirateurs."—Pictorial Novelty and Originality, the Holy places at Mecca and Medina contrasted with those at Bethlehem and Jerusalem, with two new Ghost Scenes (J. H. Pepper and H. Dircks joint inventors).—Open from 12 to 5, and 7 to 10. Admission to the whole, 1s.

TEETH AND PAINLESS
DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

BORWICK'S BAKING POWDER,
recommended by the Analyst to the LANCET and Author of "Adulterations Detected," for making
DIGESTIVE BREAD
without yeast, and for rendering Puddings and Pastry light and wholesome. Sold everywhere.

"PURITY AND EXCELLENCE OF QUALITY."

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MELAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850

THE PATENT KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

Apply to the undersigned, General Engineers, and Manufacturers of

PATENT HUSKING MACHINES FOR COTTON, TURBINES, PUMPS, FANS, SHIP VENTILATORS, MINE VENTILATORS, &c.

THE NORTH MOOR FOUNDRY COMPANY, OLDHAM.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

SALOM'S NEW OPERA AND FIELD GLASS.

—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

Just published, 1s. Illustrated, Second Edition.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

"The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

London: Tweedie, 337 Strand.

PRICE 6d EACH VOLUME.
Preparing for Publication,

THE YOUNG MAN'S LIBRARY OF USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BECAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

J. OUSELEY, General Manager.

THIRTY-FOURTH REPORT OF

THE UNION BANK OF LONDON.

P. Northall Laurie, Esq., Governor.
James Farquhar, Esq., Deputy-Governor.
DIRECTORS.

Charles Lyall, Esq.	Samuel Beale, Esq., M.P.
John Chapman, Esq.	Fleetwood P. Wilson, Esq.
Archibald Boyd, Esq.	John Gilchrist, Esq.
John Scott, Esq.	William Scholefield, Esq., M.P.
Leo Schuster, Esq.	
Sir John Musgrove, Bart., Alderman.	William W. Scrimgeour, Esq.
Harry George Gordon, Esq.	

At a General Meeting of the proprietors, held at the London Tavern, Bishopsgate street, on Wednesday, the 12th of July, 1865,
P. NORTHALL LAURIE, Esq., Governor, in the Chair,
The following report was read:—

The Directors have much satisfaction in reporting that the net profits of the bank for the six months ending 30th June last, after payment of all charges (including the sum of £113,895 19s 6d for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, are £144,879 8s 11d, which, with £61,375 19s 1d brought forward from 31st December last, amount to £206,255 8s.

The Directors now declare a dividend at the rate of 15 per cent. per annum, and a bonus of 7½ per cent. on the paid-up capital, being together at the rate of 30 per cent. per annum for the last six months, clear of income tax.

After payment of the dividend and bonus, amounting together to £180,000, and appropriating £5,000 to the buildings investment account, there will remain an unappropriated balance of £21,255 8s to be carried forward to a new profit and loss account.

In the course of the past half-year, Thomas Augustus Gibb, Esq., felt himself obliged, from impaired health, to tender the resignation of his seat as a Director; and the Directors feel assured that the proprietors will hear with great satisfaction that, in pursuance of the provisions of the Deed of Settlement, they have filled that vacancy by electing Mr Scrimgeour a Director of the bank.

It was with great pleasure the Directors learnt that their offer would be accepted by Mr Scrimgeour, as a recognition of their strong personal regard for a valued friend and officer; and they feel assured that the proprietary will, with equal pleasure, confirm an election which, in some degree, marks their approbation of twenty-six years of arduous service, characterised by ability, zeal, and disinterestedness which cannot be exceeded.

The following Directors retire by rotation, under the provisions of the deed of settlement, viz.:—
Archibald Boyd, Esq.,
Charles Lyall, Esq., and
Peter Northall Laurie, Esq.,
who, being eligible, offer themselves, and are recommended by the Court of Directors for re-election.
London, 11th July, 1865.

THE UNION BANK OF LONDON.
For the half-year ending June 30, 1865.

	206,255	8	0

The Governor then declared a dividend for the past half-year at the rate of 15 per cent. per annum, and a bonus of 7½ per cent., clear of income tax.

It was resolved unanimously—

That the report now read be adopted, printed, and circulated among the proprietors.

That Archibald Boyd, Esq., be re-elected a Director of the bank.

That Charles Lyall, Esq., be re-elected a Director of the bank.

That Peter Northall Laurie, Esq., be re-elected a Director of the bank.

That the best thanks of the meeting be given to the Governor, the Deputy-Governor, and the Directors, for the very able and judicious manner in which they have conducted the affairs of the bank during the past half-year.

That Mr Scrimgeour be requested to sit for his portrait, as a mark of the approbation of the proprietors of his long and faithful services, and that it be referred to the Court of Directors to carry this resolution into effect.

That the thanks of the meeting be given to Mr J. A. Barton, the General Manager; Mr Ingpen, the Manager of the Regent street branch; Mr St Barbe, the Manager of the Charing cross branch; Mr Beattie, the Manager of the Temple bar branch; and to the Assistant Secretary, for the zealous and efficient manner in which they have discharged their several duties.

(Signed) P. NORTHALL LAURIE, Governor.

That the thanks of the meeting be given to P. Northall Laurie, Esq., the Governor, for his courteous and able conduct in the chair

(Signed) JAMES FARQUHAR, Deputy Governor.

Extracted from the minutes.
W. O. BEVILLE, Assistant Secretary.

N.B.—The dividend and bonus will be payable on and after Thursday, the 26th instant.

BANK.

79 Lombard street, London: Admiralitat-strasse, Hamburg.

PROSPECTUS.

The bank has acquired the Banking, Bullion, and Exchange business of the late London, Hamburg, and Continental Exchange Bank, by which it has secured an extensive and profitable connection, embracing a large number of current and deposit accounts and foreign agencies.

Under the agreement for taking over the premises, business, goodwill, and assets of the London, Hamburg, and Continental Exchange Bank, the shareholders in that bank are entitled to subscribe for ten thousand shares in the General Exchange Bank (Limited), credited with £8 per share, being an exchange of two £50 shares, £8 paid, for one £100 share, £25 paid. Should the assets of the former bank not realise the sum to be credited, the deficiency to be made up by such shareholders.

In addition to the existing arrangements, negotiations are in progress for amalgamating other banks with this Company, and a concession is promised by a foreign Government which will carry with it important banking privileges.

The bank has since the issue of the original prospectus concluded arrangements for the purchase of the old and highly respectable banking business of Messrs Sciciuna and Sons, of Malta, as also that of Messrs Borg and Co., of Alexandria.

The exchange and bullion department of a banking business is well known to be most lucrative, and in this particular branch the bank, from its extensive existing connections, possesses important advantages.

The Directors have secured the services, as manager, of F. Dixon-Hartland, Esq., a gentleman of considerable banking experience.

The articles of association and agreements may be inspected at the offices of the solicitors of the bank.

Applications for shares to be made to the Secretary, at the Bank, No. 79 Lombard street; to the brokers; to the London and County Bank; or the Imperial Bank.

GENERAL EXCHANGE BANK

(Limited).

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED on SATURDAY NEXT, July 22nd, for London, and on Monday, July 24th, for the Country.—By order of the Board, THOMAS BRADLEY, Secretary.

July 15th, 1865.

DEBENTURES ISSUED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz. :—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years	6	per cent.	per annum.
— Five years	6½	—	—
— Seven years	7	—	—

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, June 15, 1865.

SOLICITORS.

Messrs Ashurst, Morris, and Co., and Messrs Edwards and Co.

Second Report of the Directors submitted to the ordinary general meeting of proprietors at the London Tavern, on Thursday, the 13th July, 1865,

P. D. HADOW, Esq., in the chair.

The Directors have the satisfaction of submitting the annexed statement of accounts, made up to the conclusion of the past half-year, from which it will be seen that, after discharging all expenses of the establishment and providing for rebate of interest on loans and bills not yet matured, writing off all losses, and making ample provision for every contingency, there remains for disposal the sum of £103,975 1s 8d.

This amount the Directors recommend to be appropriated as follows:—

	£	s	d
To dividend of 10s per share, or 20 per cent. per annum, free of income tax	50,000	0	0
To income tax	833	6	8
To balance of profits unappropriated	53,141	15	0
	£103,975	1	8

The operations of the amalgamated Company have now extended over a period of thirteen months. The amount of profits distributed in January last, added to that now exhibited, shows a total of £153,975 1s 8d. The Directors consider they are justified in congratulating the proprietors upon a result which, bearing in mind the difficulties which almost invariably attend new undertakings, and the exceptionally unfavourable condition of all monetary affairs during a considerable portion of the time, cannot be regarded as otherwise than satisfactory for the past, and encouraging for the future.—By order,

W. C. WINTERBOTTOM, Secretary.
8th July, 1865.

We have compared the above statements with the books of the Association, and examined the securities, and hereby certify to their correctness.

C. J. H. ALLEN, } Auditors.
JOHN WEISE, }

London, July 5, 1865.

The following resolutions were carried unanimously:—

1. "That the report and accounts now read be received and adopted."

2. "That a dividend of 10s per share, free of income tax, be declared, and that the same be payable on and after the 20th instant."

3. "In pursuance of a notice forwarded to each proprietor, it is hereby determined that the following clause be substituted for the 6th of the present Articles of Association of this Company:—

"The Directors may from time to time make calls upon the members in respect of all moneys unpaid on all shares, as the Directors may think fit, provided that no call shall exceed the sum of £5 per share, or be made payable within less time than three months after the payment of the previous calls and provided, also, that twenty-one days' notice at least is given of each call. And every member shall be liable to pay the amount of calls so made, to the persons, and at the times and places, appointed by the Directors, which said persons, times, and places, shall be notified in the notices to be sent to each member."

4. "That an Extraordinary General Meeting to confirm the same be held at the offices of the Association, on Thursday, the 27th instant, at Twelve at noon precisely."

5. "That the best thanks of this meeting be given to the chairman and directors for their able management of the Company's affairs."

6. "That the thanks of this meeting be hereby offered to Mr Barker, Mr Sandeman, and the other officers of the Association, for the zeal and ability with which they have discharged the duties of their respective offices."

P. D. HADOW, Chairman.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley. Cornhill, E.C.

SIX PER CENT. SECURED ON FREEHOLD PROPERTY in LONDON.

The Directors of the INNS of COURT HOTEL COMPANY (Limited) are issuing the remainder of the Company's 6 per cent. Mortgage Debentures.

These bonds, secured as a first charge on the entire hotel property (estimated as worth not under £120,000), are issued for 3, 5, or 7 years with coupons attached for payment of interest half-yearly, and investors have the option of paying in full or by three instalments.

The Company cannot borrow more than £80,000.

H. T. L. BEWLEY, Secretary.

PROSPECTUS.

In introducing the General Estates Company, Limited, to the public, it is with a view to acquiring and developing (by means of sub-division or improvement) all descriptions of landed property in or near London, and creating ground rents by judicious advances to respectable contractors or builders, under certificates of the Company's Surveyor, and generally to carry out all those matters in connection with land which the Directors may deem to be of a profitable character.

It is generally known that investments of this description when carefully made, even in private hands and with limited means, are usually very remunerative, but the real value of such enterprises are best understood from the results of some of the recently formed companies for similar purposes, one having lately declared a dividend of 20 per cent. out of realised profits.

With a view to successfully commencing operations, the Directors have entered into provisional agreements for immediately purchasing six properties, on such advantageous terms that they are at once in receipt of a very considerable income, irrespective of the greatly increased profits to be derived from the further development of these estates.

The subjoined report of Messrs Leifchild and Cheffins, the well-known surveyors, will show that the Directors have been careful not to enter into provisional contracts without the assistance of professional advice, and they are sanguine that from these arrangements alone a dividend of at least 10 per cent. can be paid out of actual profits at an early date.

A fair proportion of shares having already been privately subscribed for, the remainder are now offered to the public, and the Directors believe that this undertaking contains considerable elements of commercial success.

No promotion money will be paid for establishing the Company; the actual amount incidental to its formation being the only expense incurred.

The articles of association are ready, and can be inspected on application at the offices of the solicitors.

All applications for shares must be made in the form annexed to the prospectus, accompanied by the deposit of £1 per share; but in the event of no allotment being made, the amount so paid will be returned without deduction.

Prospectuses, with forms of application for shares, can be had of the bankers and brokers, and of the secretary, at the Company's offices.

To the Chairman and Directors of the General Estates Company, Limited.

Report upon Freehold and Leasehold Estates in the City of London, and in the County of Surrey.

The properties in the City comprise several blocks of offices, chambers, and warehouses, in excellent situations, near the Bank, the Exchange, and the principal marts of commerce.

Most of them have been recently rebuilt, and they combine in themselves all the modern requirements of business, with ample light, complete ventilation, and the utmost facility of access. They are all let (except one property which is not yet completed), and produce at present an annual rental of considerable amount, with a sure addition when the offices above alluded to are finished and let, and many offers to rent have been already received. It is believed that the present rental will be considerably increased at the termination of the present short tenancies.

The estates in Surrey are in a healthy and popular neighbourhood, and possess the great advantage of ready and frequent access by railway to the City and West End.

One of them is laid out for building purposes of the first-class, and is progressing very satisfactorily; roads have been formed, and sewers made, several houses have been already built, and many others are in course of erection. A rent arising from ground rents has already accrued, and is gradually increasing. This property is held on a long term, at a peppercorn rent.

The next estate, and nearer London, is not yet developed; but as it is freehold, in a fine situation, and will connect by a broad road running through it (a popular suburban park), with a leading thoroughfare, it is anticipated that houses of a moderate rental (say £60) will be rapidly built and speedily occupied, and that the freehold ground rents that will accrue when the design is fully carried out, will produce an ample return for the capital invested in this promising estate.

LEIFCHILD and CHEFFINS,

The object of this Company is to purchase, carry on, and extend the old-established and well-known business, founded by the late Robert Warren, about the year 1804, in blacking, ink, &c., &c., for many years carried on under the title of WARREN, RUSSELL, and CO., late at 30 Strand, and now at Regent Works, Westminster.

The profits made by the original proprietors of the three leading firms in this trade, viz., Messrs Day and Martin; Robert Warren, afterwards Warren, Russell, and Co.; and Mr Everett, were enormous. The principals in each of these firms having realised very large fortunes, since Mr Charles Day commenced the manufacture of blacking, in 1801. [Vide, Reports of the Juries to Her Majesty's Commissioners for the Exhibition of 1851, Class 29, Page 630-631].

Prospectuses and forms of application for shares can be obtained of the bankers, brokers, solicitor, or secretary of the Company.

A portion of the shares have been subscribed privately and allotted.

ITALIAN COMPANY OF MERIDIONAL RAILWAYS.

REPORT

Presented by the Board of Directors to the General Meeting of Shareholders, held at Turin, on the 14th of June, 1865.

GENTLEMEN,—The account of our management for the year 1864 will be presented to you in the same order as was adopted in our preceding report. We will first show the progress of our works, and afterwards submit to you the financial situation of the Company.

After presenting the accounts of the year, and the liquidations effected with the Government, we will lay before you the general liquidation of the year, and at the same time announce the dividend which the Board of Directors has to propose for distribution, in virtue of the powers accorded to it by the statutes of the Company.

We will afterwards present the estimated balance-sheet for 1865, and will avail ourselves of the opportunity to explain what financial resources we shall require to vigorously prosecute the surveys and construction of the new lines.

CHAPTER I.

SURVEYS, WORKS, AND EXPENSES OF FIRST ESTABLISHMENT.

The surveys and works have been carried on with great activity during the past year, and of this you have a striking proof in the important sections recently opened. From Ancona to Brindisi, and from Bari to Gioja, that is, an extent of 610 kilometres, the locomotive can pass without interruption on our Adriatic slope, and we hope to complete the works so as to reach Lecce in the course of the year, when but little will be wanting to finish the line as far as Otranto. But if the desire to arrive at Brindisi and give new life to that splendid port has determined us to organize and prosecute with energy our works on the Adriatic coast, we have not forgotten, on the other hand, to do everything in our power to complete the surveys of the passes of the Apennines, justly appreciating all the interest and importance of a direct junction of our Adriatic line with Naples. But, as you are aware, we have been hindered by the convention of November last, which compelled us to modify the direction of our works on account of the changes it made in our lines.

In the last extraordinary meeting on the 25th of February, we detailed the consequences of that convention, and we have but little to add to the statements then made.

We shall, however, take the liberty of returning to that subject in the latter part of this report; and will now proceed to show the state of our works at the end of December last, beginning with the Adriatic lines.

SECTION I.

ANCONA—FOGGIA.—326 kilometres,

You know, gentlemen, that on this line of 326 kilometres, a first section of 146 kilometres, from Ancona to Pescara, was opened for working on the 18th of May, 1863; a second section of 21 kilometres was also opened on the 15th of September, in the same year. Lastly, by extraordinary works executed without any greater outlay, we were able, on the 9th of November following, to open the whole section from Ancona to Foggia.

You have heard that, owing to violent storms which occurred soon after the opening, the line was interrupted at the provisional deviation of Acquaviva. This circumstance determined us to await the completion of the works for consolidating the tunnel bearing that name, instead of immediately reconstructing that deviation.

These works, being actively prosecuted, were finished in a few months, and at the close of April last year we were able definitively to open to the public the entire section from Ancona to Foggia.

As already stated at our last meeting, the construction of the Ancona and Foggia section had been confided by the Government to three different contractors. On the promulgation of the law of 21st August, 1862, in virtue of which that section was comprised in our concession, we were obliged, in order to take the place of the Government in its engagements with the contractors, to sign with those of St. Benedetto to Foggia new conventions, the interpretation of which, after some time, had to be submitted to arbitration. It was likewise found necessary to decide by the same means similar disputes which arose between the Company and the contractors for the section from Ancona to St. Benedetto. The arbitrators have not yet given their decisions, but we hope the issue will be favourable to the interests of the Company. Meanwhile, as we have retaken possession of our lines under reservation of all our rights, we are working unremittingly not only to complete the works for securing and strengthening the permanent way and works of art, especially along the sections included between Ortona and Vasto, but also to repair the damage done by the rains in February last to the bridges of Tordino, the Sangro, the Mora, and to replace by definitive bridges the temporary ones over the Fortare and the Asinella.

To expedite these works we have adopted even here, without any increase of expenditure, the use of iron bridges and foundations on the atmospheric system.

As to our present position with regard to our contractors, we have taken measures to obtain a judgment one way or other with regard to the real causes of the damage suffered by the works of art above mentioned, in consequence of which we were obliged to suspend for a time the service between Ortona and Vasto.

Meanwhile all our efforts tend to one end, that of giving a durable basis to this section of our lines, and we are confident of doing so by means of the important works which are now in course of execution. With regard to stations, we have had during the past year to build those comprised between St. Benedetto and Foggia.

For present use we have erected provisional wooden buildings, and at the same time have prepared the plans for the definitive stations for which contracts have been signed since the beginning of the year, and are now being executed throughout the line from Benedetto to Foggia. At the Foggia station, however, we have been content for the moment with building two houses, one for engines, the other for carriages and trucks, and we shall continue to use the temporary wooden station until the trace of the new line which is to run to Foggia shall be determined, and the importance of the station ascertained with relation to the extent of the traffic that will fall to its share from the Company's new network.

	lire	c
The outlay in 1864 on the section from Ancona to Foggia was	9,240,130	47
Outlay up to 31st December, 1863	65,101,431	16
Total outlay to 31st December, 1864	75,341,561	63

SECTION II.

FOGGIA—MONOPOLI, 163 kilometres.—FOGGIA—CONNA, 91 kilometres.

The works of the Foggia-Monopoli section commenced in 1863, have been energetically prosecuted during 1864, so that we were able to open for working a first section of 84 kilometres from Foggia to Trani, on the 11th of August, 1864; a second section of 42 kilometres from Trani to Bari on the 26th of February, 1865, and the third and last section, of 37 kilometres, from Bari to Monopoli, on the 29th April, 1865. This last section, as well as the continuation to Brindisi, was formally opened by the Royal Princes on the 24th of May last. The wooden station buildings are still used, but the definitive constructions, which were approved in November, 1864, are now being erected. The buildings still required for the goods service at certain stations on the Bari-Monopoli section are also in progress, and the complementary works of the permanent way, as well as the guards' houses, are being completed.

As for the line from Foggia to Conza, the plans for the first section, from Foggia to Candela, 39 kilometres in length, approved on the 30th December, 1863, were commenced with the firm resolution to have it ready for opening in the first months of the present year. Now we are only waiting the completion of the negotiations arising from the convention for the maintenance of this section, and meanwhile our contractors are repairing the damage done to some of the works of art.

As to the section from Candela to Conza, the plans not having been approved by the Government, nothing has yet been done.

We will complete our statement respecting these two sections by informing you that the outlay on them in 1864, amounted to	lire	c
	18,614,692	85
Outlay up to 31st December, 1863	2,900,418	09
Total to 31st December, 1864	21,515,110	94

SECTION III.

MONOPOLI—BRINDISI, 70 kilometres.—BRINDISI—OTRANTO, 86 kilometres.—BARI-TARANTO, 115 kilometres.

The section from Monopoli to Brindisi which, as already stated, was formerly opened on the 24th of May last by their Royal Highnesses the Prince of Piedmont, as representative of the King, and the Duke of Aosta, was opened definitively for the public on the 29th April.

In this section we are still engaged in terminating certain works of secondary importance for the organization of the goods service. On the line from Brindisi to Otranto, the first section from Brindisi to Lecce, of 38 kilometres, is in course of construction, and we hope to see it finished before the close of the year, though the plans were not approved till the 2nd of January last. For the second section, from Lecce to Otranto, we presented the plans to the Government on the 4th January, 1864, but the

Digitized by Google

demands from different towns to have the line pass near them have been so pressing and urgent, that the Government was long in coming to a decision, and has only communicated it to us within the last few days. Lastly, on the line from Bari to Taranto, the first section, from Bari to Gioja, 53 kilometres in length, was terminated within the space of a year from the day the plans were approved, and its formal opening took place on the 25th of May last. On this section, as well as others, the complementary works required for the goods service are being actively prosecuted, so as to be finished within the delay fixed by the new concession. At the same time we have made the arrangements necessary for the erection of the definitive stations.

As for the second section, from Gioja to Taranto, the execution of the works has been impeded by the difficulty of determining the trace of the portion which is to be used in common by us and by the Calabro-Sicilian lines, and also of planning the approaches to the station and port of Taranto. We trust, however, that ere long this difficulty will be overcome, and that we shall soon be able to continue the line from Gioja to Taranto.

	lire	c
The outlay on the construction of these three sections for 1864 is	8,992,769	98
Outlay up to 31st December, 1863	1,199,602	25
	10,992,372	23

Section IV.

Conza—Eboli—Castellamare—Naples, kilometres 136.

The section from Conza to Vietri, on the Mediterranean slope, was intended to complete the communications between Foggia and Naples *viâ* Conza.

The Convention of 28th November, 1864, having suppressed the Conza line, the Company necessarily limited its works to the section comprised between Eboli and Vietri. The first section of this line, from Eboli to Pastena, was, as you well know, opened for circulation on the 14th of June, 1863.

We still have to finish the section from Pastena to Vietri, on which the works are in active progress.

This section comprises the passage through the town of Salerno, where there is a tunnel 502 metres in length. Earth-slips in the most difficult part of the works have delayed the completion of this tunnel. However, the bridge over the Irno is finished, the station at Salerno in course of erection, so that we shall be able to run along the whole line from Eboli to Naples in the course of the year.

The outlay for constructing the line from Conza to Naples, both for the part abandoned and that from Eboli to Naples, was:—

	lire	c
In 1864	3,662,880	94
Outlay up to 31st December, 1863, including the purchase of the line, Naples—Pietri—Castellamare	19,121,553	81
Total to 31st December, 1864	22,784,434	75

Section V.

Central Station at Naples,

The erection of the central station at Naples is proceeding, under the direction of the Roman Railways Company, aided by our professional staff. In consequence of certain proposals made to modify the original plan, the works advanced but slowly in the beginning of 1864, at which time the Government definitively approved the plans now being executed.

There is reason to believe that owing to the construction of the Benevente line, just voted by the Parliament, and which ends at the central station at Naples, further modifications of the general plan will probably be necessary. But as these modifications cannot, in any case, affect the plan of the principal edifice, and will only have an influence on the development of the lines of rails and secondary buildings, we think that the works may be continued regularly without any further delay until their completion.

	lire	c
The outlay for the building in 1864 has amounted to	412,157	59
Outlay up to 31st December, 1863	2,552	22
Total to 31st December, 1864	414,709	81

Section VI.

Workshops at Naples.

In our last year's Report we stated that we had voted a sum of 1,500,000 lire to commence the buildings, and purchase the machinery necessary for the workshops which, in conformity with Art. 11 of the deed of concession, the Company is bound to establish at Naples for the manufacture of the rolling stock required to work its lines.

The plan of this establishment was already prepared, and only awaited approval.

The Company, in order to be in a position to carry the plan into execution without loss of time, had taken steps at Naples for the purchase of the ground, and had applied to the most eminent manufacturers of England and Belgium for a supply of all the machinery and tools which would be necessary to complete the organization of the workshops.

Meanwhile there was established at Naples the National Company of Mechanical Trades, which combined the two well-known houses of Petrarca and Granili, and we thought proper to accept the offers of this Company, which proposed to undertake, in our place, the execution of Art. 11 of the deed of concession.

The negotiations which followed ended in a definitive treaty, after the order of the day of the Parliament, which expressed the opinion that the Company must be considered as having satisfied Art. II. of the deed of concession, if it caused its rolling stock to be manufactured at Naples. Our treaty with the National Company has been drawn up with all the precaution required by its importance. By its means we shall have given new life to two establishments which have deserved well of the country, and whilst we leave to others the care of constructing our rolling stock, we shall more beneficially prosecute the principal object of our Company, which is, above everything else, to promptly finish our works, and afterwards develope the traffic of the important network conceded to us.

Section VII.

Ordinary Road from Valva to Bisaccia.

The accounts relative to the execution of this road, which, according to the deed of concession, was to be made at the common expense of the Company and of the State, are still in course of liquidation. On the 31st December, 1864, the Company had expended a sum of 1,051,631 lire 57c in a certain number of drafts delivered at the request of the Government. This sum, however, is far in excess of that which ought to fall on the Company, and consequently we believe that when the accounts are settled, it will be considerably reduced.

Section VIII.

Voghera—Pavia—24 kilometres.—Pavia—Cremona—Brescia—123 kilometres.

A first approbation of the projected line from Voghera to Pavia was given on the 28th of April, 1864. That was sufficient to enable us to award the contract for building the bridge over the Po to Gouin and Co., who, of all those who tendered for the work, offered the greatest advantages. Further surveys having, however, proved the advisability of slightly changing the site of the bridge, in order to give it a more normal direction with regard to the course of the river in that locality, we were obliged to suspend the preliminaries necessary for the awarding of the contract for the construction of the permanent way until that point was settled.

By a subsequent decree of the 28th of October last, the Ministry having at last decided on the definitive trace of the line, the preparatory works of the bridge were begun, and another contractor undertook the making of the permanent way. At the present moment the foundations of three of the nine piers composing the bridge have reached the height of twenty-one metres above the summer level of the river. For the six other piers, and the two abutments, the metal coffers, with their platforms, are ready, and they will be sunk into their places, each in due succession. As soon as the three piles which are most advanced shall have reached the proper height, the girders will be placed, and for this purpose the temporary bridges required for the works are now being made.

The regularity with which this great work has been hitherto conducted, and the energy displayed by the engineers, justify the hope that this, the greatest undertaking of the kind yet conceived in Italy, will be completed and ready for service within a year from this day.

We have still to terminate the surveys of the embankment works for the defence of the bridge and the railway. For these works the Company will act in concert with the State, since the public administration, as well as the townships, are to bear part of the expense, on account of the advantages conferred on them thereby.

Our object is to concert our efforts, so that the embankments may be finished simultaneously with the bridge and the permanent way, at least for the portion which will serve to protect both against floods.

The construction of the permanent way, and of the works of art on the rest of the section from Voghera to Pavia, is regularly advancing, and we hope that it will be completed in January next, that is, within the time fixed by the forfeit clause. As for the line from Pavia to Brescia, the two sections, Pavia, St Christina, and Codogno-Cremona, were contracted for during April and May last, and the were commenced on different points. Two other sections, those from St Christina to Cajalpusterleago, and from Olureneta to the Mella torrent, will soon be awarded to the contractors, and in this manner we shall gradually proceed for all the other sections on the Brescia.

The only difficulties preventing us from immediately beginning the works on the sections contracted for proceed from the military engineers, respecting the trace of the line in the environs of the fortresses of Pavia and Pizzighettone.

After several interviews, we are on the point of coming to an understanding on the choice of a track, and of a profil which will satisfy the military exigencies, and which we shall substitute for those which were originally accepted.

We must add that the treaties with the contractors hitherto made extend also to the erection of station buildings and houses for the guards, owing to which arrangement we secure greater regularity in the works, and an additional certainty of being able to finish them within the time fixed by the conditions.

Total to 31st December, 1864	342,821	18

Section IX.

Pescara—Ceprano—228 kilometres.

In the course of the past year the Company has done nothing on the Pescara-Ceprano line, the plans for which, though presented to the Minister in 1863, have not yet been approved. The modifications made in the network conceded by the law of the 14th May have especially affected this line by the suppression of its most important portion, for which reason it is useless henceforth to speak of it. As to the section from Pescara to Popoli, which the new convention has retained, and which forms part of the new line conceded from Pescara to Rieti *viâ* Aquila, we shall treat of it when we lay before you the surveys in progress for the new lines of our network. The outlay made remains the same as last year, plus the interest, which raises it to a total of 33,470 lire 34 cent.

Section X.

Plant in Use—Warehouse, Stores, Workshops.

Schedule No. 2 contains an account of the old and new plant in use and in course of construction, on the 31st December, 1864.

The value of the plant in use for working, for hauling, and for the different workshops, on the 31st December, 1864, was estimated at—

	lire	c
For the Mediterranean line	1,619,101	50
For the Adriatic	1,263,634	71
Making a total of	2,882,736	21

(as shown in schedule No. 4).

The cost of materials, and divers articles in the workshops, on the 31st December, 1864, was as follows:—

	lire	c
In the workshops on the Mediterranean line	141,181	14
In those on the Adriatic line	16,349	59
	157,530	73

The stock of materials existing in the storehouses on the 31st December, 1864, was:—

	lire	c
In the storehouses from Ancona to Foggia	1,560,724	39
In those of Naples	264,864	02
In divers others	814,483	07
The payments made for stores being worked up or in course of reception amounted to	3,787,568	03
Total	6,487,639	51

CHAPTER II.

Working.

The receipts from working were during the past year:—

	lire	c
For the Adriatic lines	1,880,177	58
And for the Mediterranean	1,609,933	29

These amounts, divided by the average number of kilometres worked in 1864, give the following sums per kilometre:—

	lire	c
For the Adriatic lines	6,110	66
For the Mediterranean	21,124	16

which, as compared with those of the preceding year, viz.:—

For the Adriatic lines	6,595	34
And for the Mediterranean	20,044	55

show a decrease in the receipts per kilometre of 484 lire 68c for the former, and of 920 lire 39c for the latter.

These results need not lead to unfavourable anticipations of the future because they were expected. In fact, it must not be forgotten that, of the Adriatic lines, the only parts worked in 1863 was the Ancona-Pescara-Ortona section, whereas in 1864, the very long section from Ortona to Foggia and Trani was opened through a country less thickly populated than that along the Ancona and Ortona section. Moreover, the population disseminated between Ancona and the Tronto have always had and still have frequent relations with Ancona, whereas beyond the Tronto the inhabitants deal with the provincial chief towns, several of which are not even connected with the railway by good ordinary roads. Besides, the population of this district still remains, from long habit, in connection with Naples.

We must therefore consider part of the Adriatic lines as intended for distant traffic rather than local, and we should consequently modify our tariffs to bring them in harmony with the commercial wants of the country, and with those of great international traffic, which modifications we have already begun to make for the productions of the soil. Special trains will also be organised between Brindisi and Bologna in correspondence with the steamboats which ply between Brindisi and the Levant ports *viâ* Alexandria. We are happy to inform you that a first trial will be made on the 15th of next month.

By this means we hope that ere long the Indian mail will take our Adriatic line, which is the most direct and speedy route to London.

The general movement will also be considerably increased when we shall have terminated the Benevento line, which will extend to the Adriatic lines the influence of so large a city as Naples.

Already the opening of the sections Trani-Brindisi and Bari-Gioja, which unite the populous districts of the Terra di Bari and the Terra d'Otranto, will doubtless increase the receipts, so that we may now safely predict that the average per kilometre during the current year will exceed that of 1864.

On the Mediterranean line the diminution of the receipts in 1864 as compared with 1863 was easily foreseen.

In fact, in 1863, we worked the section from Pastena to Eboli during six months only, whilst the section of Naples, Vietri, Castellamare, far more productive, was worked for eight months in the same year.

In 1864, on the contrary, the first as well as the second section were worked from the 1st of January to the 31st of December, and consequently it was natural that on account of the difference of time during which the two sections were worked in each of those two years, the average receipts of 1863 should exceed those of 1864.

However, as the passage through Salerno will soon be finished, and will establish a direct communication with the section of Eboli, Salerno, and Naples, an increase may soon be expected in the receipts, and consequently an augmentation of the kilometre average on the whole line from Naples to Eboli.

The expenses of working in 1864 were:—

	lire	c
For the Adriatic lines	1,707,706	12
For the Mediterranean	1,417,135	28

These sums divided by the number of kilometres worked give for each:—

On the Adriatic lines	5,450	12
For the Mediterranean	13,964	19

In 1863 these figures were:—

For the Adriatic lines	8,058	45
For the Mediterranean	16,263	61

The year 1864 therefore shows a considerable economy, viz.:—

For the Adriatic lines	2,608	29
For the Mediterranean	2,299	46

These results are almost entirely due to the general expenses of central administration and of working, which have not only been diminished in 1864, as concerns the working, but have been spread over a much greater number of kilometres than in the year 1863.

A progressive diminution in this category of expenses, though less considerable, will be assured for several years, in proportion as the new sections shall be opened for circulation.

Meanwhile, it is our duty to declare that in keeping the expenses within the strict limits we have indicated, we have been powerfully aided by the co-operation and intelligent measures of the direction at Foggia, and the sub-direction at Naples.

CHAPTER III.

Financial Situation.

The sums realised up to the 31st December, 1864, were:—

		lire	c
1. Instalments paid on shares		59,212,750	00
2. Divers loans:—			
Bonds, series A	55,000,000		
Ditto — B	40,000,000		
On account of Bayard line	3,899,700	99,528,700	00
3. Subvention from the State in works		10,000,000	00
Total		168,741,450	00
Cost of first establishment up to 31st December, 1864. (including the 10,000,000 of subvention in works.)		142,628,875	88
Funds in hand, 1st January, 1865		26,112,574	12

Consisting as follows:—

	lire	
Of divers credits	901,187	36
Of funds disposable	25,211,386	76

By adding to the above:—

1. Balances due, as in schedule No 4	83,719,786	51
2. Profit from funds invested, estimated at	500,000	00
We have at our disposal for the year 1865, assets amounting to	110,332,360	63

If you now examine the presumptive balance-sheet here communicated, you will find that the estimated expenditure for the continuation of the works during 1865 amounts to only 104,456,448 lire 33c. Among the assets is included the sum of millions 40 of instalments still to be paid by the shareholders.

From these data you may perceive, gentlemen, that we are in a position to provide for all the expenditure of the year, even while vigorously prosecuting the works by means of the instalments on shares, without being under the necessity of issuing more bonds.

Among the propositions which we shall this day submit for your approval, in conformity with the order of the day, there is also a demand to authorize us to sell to the value of 10 millions of the public lands which make part of the subvention granted to the Company by the State, in virtue of Art. 20 of the deed of concession.

This faculty conferred by our statutes will enable you to increase our disposable assets, and to prevent the necessity of raising money on bonds, provided we can take advantage of it promptly.

Digitized by Google

CHAPTER IV.

General Liquidation of the Year.

The general liquidation of the year 1864 presented on the 31st December the following assets:—

	lire	c
1. Reserve fund of 1863	68,782	94
2. Balance to credit of 1863	1,077,597	90
3. Receipts from working Adriatic lines	1,880,177	58
4. Do. from Mediterranean line	1,609,933	29
5. Sundry receipts (schedule No. 12)	13,299	05
6. Balance of guarantee due from the Government up to 31st December, 1864 (after deducting the receipts of the lines)	7,752,841	13
Total of assets	12,402,631	89

Deducting from this sum the liabilities belonging to the liquidation of 1864:—

	lire	c	
1. Interest belonging to the balance-sheet of 1864 to be carried to account	4,815,079	36	
2. Expenses of working the Adriatic lines	1,707,706	12	
Schedule 5:—			
3. Expenses of working the Mediterranean lines	1,117,135	28	
Schedule 12:—			
4. Lost on exchanges, on payments made abroad in 1864	33,419	29	
5. Profit and loss	297	02	
6. Sinking fund of cost of establishment	4,794	32	
Total of liabilities			7,678,431 39
Balance to credit of the liquidation of the years 1863 and 1864			4,724,200 50

From this balance of profit, which we have obtained by effecting the liquidation in accordance with Article 15 of the convention of 21st August, 1862, must be deducted the sum which, in virtue of Article 9 of the convention of 28th November last, the Company is bound to retrench from the amount of guarantee due to it from the Government for the year 1864, on the ground that the goods service has not been effected at the same time as that of passengers on the lines opened to the public. This sum having been definitively liquidated by the Government for

	lire	c
	1,041,583	33
The balance to credit of the liquidation for the years 1863 and 1864, is	3,682,617	17

Deducting from this:—

	lire	c	
1. The reserve fund at 6 per cent. as by the statutes (including the reserve fund for the year 1863), say	220,957	03	
2. A special reserve fund of	761,660	14	
Total			982,617 17
There remains			2,700,000 00

which the Board of Directors, in virtue of the powers vested in them by the statutes, proposes to place at the disposal of the shareholders, at the rate of 13 lire 50c dividend per share, if approved by the Government, with which there only remains one question to be solved with respect to the day from which the guarantee is due for the line of Castellamare ceded by M. Bayard.

The dividend which will be distributed to you consists of the liquidations of the two years 1863 and 1864, and dividing it in proportion to the profits liquidated in the two above years, it will give you for 1863 a return on the paid-up capital of 6.83 per cent., and of 8.67 per cent. for 1864, interest included.

In future years we shall be able to distribute larger profits, but for some time yet, and till the constructions are completed, we must increase the special reserve fund in addition to that which the statutes impose. This fund, which we have this year begun to form, is to remain at the disposal of the Board of Directors, to be used if necessary, in any case, to ameliorate the position and credit of the Company.

CHAPTER V.

Ratification of the Modifications and Additions made to the Convention, approved by the General Meeting of the 25th February, 1865.

After explaining the results of our management during the year 1864, following the order indicated by the order of the day, we have now to ask you to ratify the modifications and additions made in the convention which you approved in the extraordinary meeting of the 25th of February last, and with that view we consider you as now assembled in an extraordinary meeting.

The propositions we have to submit to you are two in number.

The first relates to Art. 16 of the convention of 28th November, which says that the subventions mentioned in Arts. 19 and 20 of the convention approved by the law of 21st August, 1862, made an integral part of the social capital, and consequently the Company could raise, by means of bonds, double the determinate social capital.

Not having thought proper, however, to make any changes, even in form, in the primitive concession, unless there might be absolute reasons for so doing, the above-mentioned Art. 16, in accord with the Government, has been formulated in the same terms and in the same spirit as Art. 8 of the concession, and stands definitively as follows:—

"The Company is authorized to realize the social capital required for fulfilling the engagements made in this present convention, one-third in shares and two-thirds in bonds."

The second proposition which we have to submit to you is scarcely a modification, but rather a supplement to the new convention, couched in the following terms:—

"The supervision exercised by the supreme administration until the annual receipts attain the amount necessary to discharge the Government from the payment of kilometric subvention shall go to the extent of ascertaining whether the service is regularly performed by an efficient staff at all the stations and along the line; and, in case of need, the suppreme administration may, after notice to the Company, order the additions, or changes in the staff, the modifications in the service regulations and in the tariffs which may be found necessary with a view to increasing the traffic and augmenting the receipts."

This addition having been admitted by the other Companies receiving subventions from the Government, we, in our turn, could not refuse to accept it. However, as its object is to favour, not only a greater movement, but also greater receipts, it is evident that this provision can only be applied in such a manner as to promote the real interests of the Company.

Lastly, to Art. 5 of the law of 14th May, 1865, which sanctions our convention, a clause has been added to the effect that "in case, owing to ulterior developments of the network of railways, it should be found necessary to construct the two lines of Popoli-Avezzano and Conza, and that the Southern Railways Company should be indisposed to exercise its right of preference, that Company, or any other which may have purchased its lines, shall be bound, for a proper compensation, to cede to the Government or to the Companies authorized by it, the right of passage, and of using the stations from Foggia to Candela, and from Naples to Conturs, from Pescara to Popoli, and from Avezzano to Ceprano."

This clause is so reasonable and just in itself that we could not object to it. Should it take effect, the amount of compensation to which we should be entitled would be settled between ourselves and the companies by private contract, in proportion to the services rendered.

From what we have stated above we are of opinion that the new supplementary provisions which modify the convention already approved by you have not made any essential change therein; we therefore hope that you will ratify it, by accepting in their integrity the new conditions of our Company, as they now stand in virtue of the law of 14th May last, so far as concerns our concession.

CHAPTER VI.

Recapitulation and Conclusion.

The account we have given above requires no explanation to prove to you the progressive and regular development of our undertaking. However, in briefly recapitulating them, we think it useful to remind you at the same time of the results obtained during the past year, so far as regards the new conditions imposed by the law of 14th May last, in order that you may be able to judge of our management, and of the future prospects of our Company.

As we stated at our last meeting, the important modifications made in our concession by the law above mentioned are two in number. The first concerns the composition of the network; the second, the system of guarantee. A third result, very important for us, is, that we have got rid of all the difficulties attending the disputes about the guarantees due from the Government for the years already past.

This question, as it then stood, whatever reason we had to hope for a favourable result, would have involved us in long negotiations with the Government, the immediate effect of which would have been prejudicial to the Company.

Now, on the contrary, the rules to be followed in the settlement of our accounts having been determined by law, we are in a position to announce to you the definitive liquidation of the guarantees for the years 1863 and 1864, and to declare a remunerating dividend on the capital engaged in the enterprise, in virtue of the powers vested in us by the statutes.

In examining the liquidation account which we have distributed, you will find that the balances left over from the years elapsed, after deducting the reserve prescribed by the statutes and the amount of the dividend, has been applied for the creation of a special fund for unforeseen emergencies.

We are persuaded that you will appreciate the prudent motives which suggested such a measure, for you will doubtless admit that, though we are in a position to develop the works with the utmost zeal and energy, though our resources are secured for the whole of this year and part of next without any necessity for a loan, it is nevertheless a rule of prudent administration to have in reserve funds ready to meet not only any extraordinary requirements of the service, but also those which may arise during the period of construction through which we are now passing. This fund, increasing from year to year, as we have every reason to believe, will enable us not only to choose the most favourable occasions

Digitized by Google

for our financial operations, but also to make them under the most advantageous conditions.

And since we have spoken of what may hereafter be wanted to finish our constructions, we will give a summary enumeration of the principal modifications made in the composition of our network.

But we must first note that several lines having been suppressed, owing to the new convention, indemnities have been demanded by the contractors on that account. These demands will be examined, and if we cannot come to an understanding the questions must be referred to the tribunals.

According to the original concession, the Company's network comprised 1,364 kilometres, of which 147 were in Lombardy, and 1,217 in the Southern provinces.

At present the total length is 1,746 kilometres, of which 147 are in Lombardy, and 1,599 on the Adriatic coast and in the Southern provinces.

Of the 382 kilometres additional, we have in full work the 249 kilometres of the Bologna-Ancona-Ravenna line, and the remaining 135 have yet to be made.

With the new network we shall therefore have 941 kilometres working and 805 kilometres in course of construction.

At the end of this year, when the passage through Salerno, 7 kilometres in length, shall have been completed, and the coast line extended to Lecce, we shall have added 45 kilometres more to the length at work. In 1866 we shall arrive at Taranto and Otranto, and shall finish the Lombard lines with several sections in the Apennines, viz., that from Naples to Benevento, from Foggia to Bovino, from Termoli to Campobasso, and from Pescara to Chiesi, making together a length of nearly 450 kilometres; so that at the close of 1866 we shall only have to finish 310 kilometres of line, and shall have 1,436 kilometres working.

To realize this programme our engineers have already several times gone over the three passes of Aquila, Benevento, and Campobasso, in order to compare on the spot the general surveys which served as bases in concluding the new convention, at the same time making the modifications which more careful studies showed to be advisable.

The section from Naples to Benevento having been better surveyed even before the convention, we are able, on account of the facility of the ground and discussions which took place as to the choice of different tracks, to announce to you that, notwithstanding the short time since the promulgation of the new law of concession we have already presented, for the approbation of the Ministry, the general plan of the first section from Naples to Caserta, and before long we shall be able to present that of the second section from Caserta to Benevento, so that by commencing the works immediately after the plans have been approved, we shall soon have little left to execute except the passes through the Apennines already mentioned.

Gentlemen, we have the honour,

1. To present for your approbation the accounts of 1864 and the estimated balance-sheet for 1865.

2. The Board of Directors having concluded to distribute a dividend of 13 lire 50c per share, requests the meeting to declare it definitively.

We also have the honour:—

3. To request your ratification of the modifications made in the convention of 28th November, 1864, as indicated in Chapter V. of this report.

4. To request that you will please to grant the Board the authorization to sell the State lands conceded to the Company for the value of 10 millions by the law of concession.

5. Further, in virtue of Art. 41 of the statutes there would be this year a renewal of one-third of the Board; but the members of the present Board having decided to persist in their declaration, made in the general meeting of 25th February, 1865, of leaving the shareholders full liberty of electing the whole Board in this present general meeting, you are now called on to choose the twenty-one members forming your Board.

6. Lastly, you are called on to choose three examiners of the accounts and two deputy-examiners, according to Art. 32 of the statutes.

DELIBERATIONS OF THE MEETING.

Shares deposited, 104,994; entitled to 2,473 votes.

Shareholders present at the meeting, 243; representing 92,210 shares, with 2,171 votes.

The meeting, unanimously:

1. Approves the accounts of 1864, and the estimated balance-sheet of 1865;

2. Fixes definitively the dividend proposed by the Board of 13 lire 50 cent per share, subject to the approval of the Government;

3. Ratifies the modifications of the convention of 28th November, 1864, as indicated in Chapter V. of this Report;

4. Authorizes the Board to sell the State lands granted to the Company to the amount of 10 millions by the law of concession;

After this, by a very great majority and by ballot,

5. Appoints as members of the Board:

Baron Bettino Ricasoli, Chevalier Rodolfo Audinot, Count Pietro Bastogi, M. Franceso Oneto, M. Luigi Spinelli, Chevalier Antonio Rossi, Commander Carlo Bombrini, Chevalier Orsini (Advocate), Chevalier Corsi (Advocate), Chevalier Domenico Balduine, Count Pietro Beltrami, Chevalier Bartolomeo Cini, Chevalier Vincenzo Denina, Commander Giacomo Lacaita, Chevalier Tecchio (Advocate), Chevalier Felice Genero, Chevalier Trezzi (Advocate), Chevalier Giulio Belinghazi, Chevalier Israel Guastalla, Chevalier Antonio Allievi, M. Pietro Brambillo;

6. Examiners of balance-sheet:

Baron Sabino Leonino;

Chevalier Branchini, Director of the Silk and Discount Bank;

Chevalier Fontana, Director of the National Bank;

Deputy-examiners:

Giorgio Maurogordato;

Moisè Valensin.

THE MIDLAND GREAT WESTERN RAILWAY OF IRELAND COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive Loans on Debentures, for 3, 5, or 7 years, at 4½ per cent., to replace Loans falling due.

Applications to be made to the undersigned.—By order,

HENRY BEAUSIRE, Secretary.

Broadstone station, Dublin, 7th July, 1865.

ATLANTIC & GREAT WESTERN RAILWAY.

NOTICE TO BONDHOLDERS.

In conformity with the terms on which the Second Mortgage Bonds of the Pennsylvania and New York sections of this Railway were issued to the public, the FIRST ANNUAL DRAWING of 4 per cent. on the gross amount of these Bonds, took place at the office of Messrs E. F. Satterthwaite and Co., in presence of the undersigned notary, when the following Bonds were drawn:—

PENNSYLVANIA DIVISION.

38 Bonds of 1,000 dols each.

5	106	200	339	510	652	776	873
11	138	210	405	516	727	783	884
16	169	239	468	519	735	804	913
36	187	284	476	528	760	810	946
39	198	283	480	624	765		

20 Bonds of 100 dols each.

954	1003	1166	1200	1262	1363	1407	1433
982	1039	1179	1237	1333	1392	1425	1448
1001	1054	1198	1249				

NEW YORK DIVISION.

16 Bonds of 1,000 dols each.

29	100	121	137	268	242	319	390
94	119	135	166	227	311	332	395

24 Bonds of 500 dols each.

1433	1454	1509	1554	1582	1623	1731	1785
1435	1499	1548	1564	1593	1686	1735	1838
1448	1500	1549	1565	1607	1698	1736	1577

40 Bonds of 100 dols each.

Present—W. GRAIN, Notary Public,

London, July 6, 1865. 31 Threadneedle street.

SEVEN PER CENT. DEBENTURES.

—THE DIRECTORS of the BUENOS AYRES GREAT SOUTHERN RAILWAY COMPANY (Limited), are prepared to Issue the Unappropriated Balance of

£100,000 OF THEIR SEVEN PER CENT. BONDS, (forming a portion of the Original Capital of the Company, on which the Buenos Ayres Government guarantee 7 per cent.), for a term of three years. Interest payable half-yearly, at

Messrs GLYN, MILLS, CURRIE, and CO.'S, 67 Lombard street.

Applications to be made to

W. HADFIELD, Secretary.

3 East India avenue, Leadenhall street, E.C.

THE RAILWAY CREDIT

COMPANY (Limited).—Incorporated with Limited Liability under the Companies Acts 1862. Capital £2,000,000, in 40,000 shares of £50 each. (With power to increase.) First issue 20,000 shares, of which it is expected only £10 will be required to be called up. Deposit on application £1 per share; on allotment £2 per share, and £2 per share one month after allotment. Calls not to exceed £2 10s per share at intervals of not less than three calendar months.

BANKERS.

London and Westminster Bank; Union Bank of Manchester; Birmingham Banking Company.

BROKERS.

London—Francis Burnand, Esq., County chambers, 14 Cornhill.

Manchester—Messrs Hoyland and Prince, Exchange buildings.

Birmingham—W. J. Scott, Esq., Waterloo street.

Temporary Offices—9 Finsbury place, South, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed to carry out, among others, the following objects—

To facilitate the formation or execution of railways and other public works.

To provide the contractors for such works with a medium for securing prompt and effectual support to their undertakings.

To lessen the disappointments and delays often met with by contractors and others in obtaining prompt advances on railway and other securities.

Prospectuses and forms of application for shares may be had of the Secretary, the Solicitor, the Auditors, the Brokers, and at the temporary offices of the Company, where also the Memorandum and Articles of Association may be inspected.

EAST INDIAN RAILWAY COMPANY.

This Company requires STORES of the following kinds. Particulars may be obtained by application at the Company's offices, Alderman's walk, New Broad street.

No. 1. Iron Tubing, &c.
2. Metals, Fire Box Plates, and Tubing.
3. Tools, &c.
4. Carriage Ironwork and Trimmings.
5. Locks and Hinges.
6. Nails.
7. Wood Screws.
8. Leather, &c.
9. Paints, &c.
10. Glass and Lamp Fittings.
11. Planking.
12. Lamp Wicks.

Tenders, which must include all charges for packing and delivery, free alongside, in any dock, or on any wharf, or in any part of the stream in the ports of London or Liverpool, are to be delivered to the undersigned, on or before 12 o'clock at noon on Thursday, the 27th instant. Tenders must be endorsed "Tenders for Stores, &c." The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, July 6, 1865.

THOMAS TURTON AND SONS,

Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City

Paris Warehouse, 10 Rue du Grand, Chantier.

New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE VALUE OF MONEY.

There is no doubt that the value of money is about to rise, though it is not so easy to say why it should rise. The signs of a change are clear:—first, the rate in the open market is fully up to and above the Bank rate, so that an unusual number of persons are driven thither for discount; secondly, there is a demand for gold for the Continent, and the exchange houses are in the discount market to get that gold; thirdly, ordinary trade seems to be a little more brisk, though it is difficult to be sure how much of the apparent increase is due to the exact demand, and to the natural wish of many persons to discount their bills before the value of money rises as they expect.

The elections and the approaching harvest have contributed a little to the present peculiar state of Lombard street, but the main explanation of it will be found by recurring to the cardinal consideration to which we have so often adverted. We have often shown at tedious length that the new Companies and the new engagements which they have undertaken, form a new drain on our money market; that we have undertaken almost a new trade of lending, in addition to the old trade of buying and selling. It would appear that some operations of that sort are at work now. We do not allude to any special one of magnitude, but rather to the sum and total effect of many minor ones. Money has been cheap for a long time, and naturally all persons who have foreign 'commitments,' as the barbarous phrase goes, are anxious to make hay while the sun shines. Before many days are over, we are confident the Bank of England will take care that the rate of interest affords no unnecessary encouragement to foreign investments.

OXFORD AND MR GLADSTONE.

Forty years ago Mr Canning said, in a speech on Catholic Emancipation, "I was warned when the question first crossed "my path that I must relinquish the most cherished object of "my life—the representation of the University of Oxford. I made "my choice. The occasion is past. I will speak of it no more." Oxford has been curiously consistent. When Mr Canning so spoke, her voice in Parliament was a peculiar voice. It was a conspicuous advantage,—a "blue ribbon" in the speech of those aristocratic days, when visible symbols had a meaning, that the mere largeness of the cultivated world prevent their having now. To sit then for Oxford gave then of itself an unequalled prestige both in the House and out of it. The political world of that day, mostly educated at two Universities, recognised in the most fascinating and aristocratic of these Universities an inherent charm. All this is now gone. Parliament has been reformed, and a race of men educated "nowhere," as would have been said once, but quite able intellectually to hold their own, throng the lower House. And Oxford has herself to blame. It is she that has dissolved the charm which she inherited. The new race of members were deeply susceptible of cultivated influence, or why did Mr Gladstone's words so fascinate Liverpool and Manchester? But Oxford will choose her worst men and will not choose her best. The cause lies deep in her teaching and that of the public schools. She gives, as Eton gives, a splendid teaching to the few, and a contemptible teaching to the many. Consequently, the products of of her teaching in no way represent her teachers. The mass of men who, for the sake of orders, or for any other reason, take a common degree, no more represent Oxford than a common Eton fag represented the knowledge of Dr. Hawtrey. You cannot make a good University constituency where the necessary attainments of a graduate represent a feeble and irregular culture. To create great men is not enough; Oxford has quite done her share of that in this generation. To cite but one case, she has trained both Newman and Jowett, the greatest leader of Anglican anti-liberalism and the greatest leader of Anglican liberalism which the age has produced. But Oxford has produced (as we have heard a tutor regret) a "stupid average," and it is this average which rules the poll. It is this average which excluded Mr Canning, which rejected Sir R. Peel, which rejected Mr Gladstone,—which, in a word, refused to elect the three statesmen who were in their generations the best products of her teaching, and who were alike in this—that they each at least tried to combine the true Conservatism and the true Liberalism—the inheritance of the past and the necessities of the present. Everybody understands the errors of their fathers, but it is not every Oxford man who sees that in rejecting Mr Gladstone he has repeated the error of those who rejected Sir R. Peel and excluded Mr Canning.

It is better, however, for England that Oxford has decided as she has. It is of great importance that the statesmen of England should sit for constituencies of a proper class. There are two sorts of seats, one of which we may call special and peculiar, and the other of which we may call

Digitized by Google

neutral and judicial. The first have particular opinions and interests; they have singular wants and notions, and their representatives are sent to express them. Accordingly, these representatives assume almost inevitably the character of advocates. They have a case which they wish to bring before the House; they have a lesson to teach it foreign to the experience and different from the notions of ordinary educated men, There ought to be some special constituencies in Parliament for every such special type of thought—some for the shipowner, some for the manufacturer, some for the landlord, some for the clergy; but there ought to be a vastly greater number of constituencies of no aberrant type, no eccentric idiosyncracy, which simply represent the common voice of educated men, which must hear what the commissioned advocates of classes allege, weigh their arguments, estimate their often conflicting assertions, and in the last resort decide. Oxford is, as will be admitted both by her admirers and by her critics, a special constituency, and therefore she ought not to be represented by a ruling statesman. She must enforce upon him special notions, singular ideas, unusual thoughts; she must, if she does her duty, press upon him the advocacy of her characteristic creed. But a great statesman cannot be a class advocate. He should sit for a constituency which is the judge of other constituencies—which can hear and listen—which represents the general voice of all England, not the special dialect of any bit of England.

South Lancashire is, upon the whole, and subject to some exceptions, such a constituency. There was an idea in some not very instructed quarters, that if Mr Gladstone were returned for South Lancashire, he would be pressed into Radicalism by his constituents. We will not discuss the personal compliment to Mr Gladstone, but look at the constituency. South Lancashire returns two Conservatives, Liverpool two more, and Manchester excludes Mr Bright's brother because he is Mr Bright's brother. South Lancashire is a a constituency which will wish its representative to concide in judgment with the entire people of England.

Oxford could have done Mr Gladstone no greater service than by compelling him to make these speeches at this critical moment. Tbey are statesmanlike speeches. The words in the Manchester speech on reform will remove many misconceptions:—"I have ever been, and I still am, opposed to "every sudden and violent change. Never have I spoken a "word which, fairly interpreted, gave the smallest coun- "tenance to the schemes—if such schemes there be—of any "who might view with indifference the passing of precipitate "and extensive measures that might endanger by their very "suddenness the true and just balance of the powers of the "constitution; but this I say, that the true and just balance "of those powers would not be destroyed, but improved, by a "fair and liberal and sensible—not a sweeping nor over- "whelming—admission of our brethren of the labouring "community to the privileges of the suffrage." And the whole of these speeches advertise his genius. No other man could make one such oration at three o'clock in the afternoon, and another great oration at eight o'clock in the evening. The impression of his facility in Manchester is wonderful. They say, "He goes down to make a great speech at the "Free Trade Hall just as another man goes to eat his lunch." So much effectual, telling, producible power has not been exhibited in England for many a long day. One fact is very significant. The practical question now is, Shall Mr Disraeli or Mr Gladstone lead the next House of Commons? In Mr Gladstone's case, there has been vehement criticism and eager admiration. He has, to quote again a phrase of Schiller which he himself once quoted, "been much hated and also "much beloved." But of Mr Disraeli there has been no affectionate word. No one has ventured to say that he wishes to have any confidence in him, or that he wishes to be led by him.

MATERIALS FOR LEGISLATION.

LEGISLATION, to be beneficent, must have two foundations—sound principle and full and accurate information. Neither basis will suffice without the other. We must know that our theoretic doctrine is correct; but we must know much more than this—we must be thoroughly acquainted with the actual circumstances to which we propose to apply that doctrine. Unless we are so we can form no opinion of the slightest value as to the consequences likely to result from our enactments. We do not legislate *in vacuo*, and we must not legislate *in nubibus*. Least of all must we do this in organic changes of the constitution, such as wide measures of representative reform. In most legislative matters we may experiment with a certain degree of safety, or at least with only a limited risk of mischief; because when a law turns out to be a blunder we can repeal it. But we cannot do this in reform questions. What is done in these questions cannot be undone. A hasty concession cannot be recalled. A franchise indiscreetly or inconsiderately lowered cannot be raised again. A wide basis for the suffrage, once laid, cannot be narrowed. The discovery of our mistake ensures repentance, indeed, but offers no hope of amendment.

Now, hitherto Reformers, of whatever section, have done only half their work. We have had endless discussions of principles and schemes: we have had scarcely any inquiry, certainly no authentic or reliable information, as to facts. The talk on the subject in outside circles, the discussions on the subject in the House of Commons, the articles on the subject in the periodic press and even in elaborate books, have all served to show how exceedingly loose and scanty is our knowledge of the facts which it most behoves us to know. One orator recommends a measure of extension on the ground that it will let in very few. Another opposes it on the ground that it will let in vast numbers. One man suggests a criterion for selecting the *élite*: his opponent affirms that it will open the door to the rabble. The same scheme is derided by some politicians as inoperative and denounced by others as revolutionary. But no man can do more than make random assertions or cloudy conjectures, or at best bring forward statistics of his own collecting which convince no one and carry no authority with them. The general belief is that the working classes are almost entirely and everywhere excluded from the franchise. But Mr Gladstone goes down to Chester, and assures us in an electioneering speech that one-half the constituency consists of working men. If it is so there, we do not know in how many other places it may not be so likewise. The general notion among Reformers is that at all events a liberal *lodger* franchise ought to be conceded:—the Conservative Bill included a clause of this sort as facilely as the Whig one. But now Mr Lowe astounds us by the assertion that in Lambeth a lodger franchise would give a constituency of 80,000;—and if this would be the case at Lambeth, a somewhat similar result must be anticipated in many other boroughs. Mr Baines once told us—not the other day, but many years ago—that a 5*l* rental franchise would treble the number of electors in Leeds, and that a household suffrage would enable the voters among the working class to outnumber those in all other classes in the proportion of three to one. Now, we want to know whether these things are so; because, till we do, we cannot legislate upon the subject either with wisdom, or safety, or satisfaction. On all other important questions—on some, indeed, that are comparatively unimportant—we all feel that investigation ought to precede action. On this, the most important and critical of all questions, few men seem to feel this, and not a few boldly deny it. Before we meddle, or dream of meddling, with the Poor Law, with ecclesiastical property or corporations, with railways, with national education, we issue carefully-constituted Commissions of Inquiry, and we give them plenty of time and a wide range of research. When it is proposed to reorganise the constitution,—or to do what unintentionally may turn out to be reorganisation,—the proposal for the issue of such a Commission occurs to scarcely any one, and, when suggested, is scouted as an insidious contrivance for delay, or for "burking" legislation altogether.

Yet the appointment of such a Commission, we are satisfied, is an imperative necessity—a decent and obvious preliminary to any legislative action, with which the nation cannot dispense. Lord Elcho, at the close of last Session, proposed to address the Queen to appoint such a Commission and to define its objects. Why should not the Government, as soon as the elections are fairly over, recommend Her Majesty to issue such a Commission without waiting for a Parliamentary address? It would show, at least, that they were in earnest, and were setting about the business in a business-like way. We believe it would be difficult to overestimate the valuable results of such an investigation, wisely directed and skilfully and honestly carried out. It would clear away much obscurity, it would solve many doubts, it would set at rest many questions for ever;—and it would do this without assigning to the Com-

Digitized by Google

mission the task, or laying on it the responsibility, of discussing any principle, or offering any opinion as to how far reform ought to go, or to what aim it should be directed, or by what contrivances it should be effected. Facts, once ascertained and registered, would suggest and enforce their own conclusions.

We can do no more than indicate a few of the points to which the suggested inquiry should be directed. Others no doubt will occur to those entrusted with the task of drawing up the instructions for the Commissioners.

1. We should require to know in each borough and in each county the number of working men—*i.e.*, of men belonging to the class which subsists on wages—*now possessing the franchise*, and whether they possess it as ten-pound householders, or as freemen; and we should desire some list of their several trades and occupations.

2. We should wish to ascertain *the number of electors* who, in each borough, would be placed upon the register by an 8*l*, a 6*l*, a 5*l* rental or rating franchise; the number whom a simple household franchise would add; and the number of the present municipal electors.

3. A very important item of information would be a return of the *occupations and positions* of the electors whom each of the above franchises would place on the register,—whether shopkeepers, foremen and overlookers, skilled or unskilled workmen, factory operatives or hand labourers, &c.,—that we might know precisely the class and sort of men whom each plan would affect.

4. We should know the number of Parlimentary and Municipal electors who voted respectively at the last three contested elections, compared with the number on the list; and also the callings of the men who were elected to the Town Councils.

5. The number of lodgers paying respectively 10*l*, 8*l*, 6*l*, 5*l*, for furnished or unfurnished rooms; and the number boarding with other householders, but not occupying distinct apartments.

6. The change that has taken place since 1832 in the rents of the lower sort of dwellings,—to enable us to judge what amount of truth there may be in the allegation that the occupier of an 8*l* house formerly is a 10*l* householder now,—and so on.

7. It would also be desirable to ascertain, if it could be done inoffensively, the number of householders of each class who cannot read or write; and in counties the number of 10*l* and 20*l* occupiers who hold leases and the number who are only tenants-at-will.

When all this information was properly classified, we should be in a position to form an opinion worth having, and there can be little doubt that we should be astonished at many of the results thus brought to light. We should, perhaps, find that in several towns the working classes have already a fair share of power, and we might be able to form a guess how they had used it. We should find that in some boroughs, especially in the Metropolitan ones, a 6*l* rental franchise would make no addition at all, while a lodger franchise would make a difference that would stagger every one. We should find in some towns that a 6*l* or a 5*l* franchise would bring in a class wholly different to that it would bring in in others, and that a uniformity of figure would insure a great discrepancy in the result. We should find that *here* a given limit would exclude numbers whom we all wished to enfranchise, and *there* would enfranchise a class who had no desire for the suffrage, and on whom we should be sorry to confer it. We should also be able to form some conjecture as to the probable operation of this or that change in the coal and iron districts; and to avoid the danger of only adding to the shopkeepers when we were designing to counterbalance them by an infusion of the operative class. In a word, we should know what we are about—which certainly we do not know now.

THE BANKERS' GUARANTEE AND TRUST FUND.

A VERY useful undertaking has just been commenced in Lombard street. For many years past it has been more and more the practice of bankers to require security from the clerks whom they engage in their service, and that security has been of two kinds:—Either the security of some friend or relation, or that of a guarantee society. Both of these are, however, subject to some objections. The security of a relative is subject to the worst of all objections: the banker does not get his money. The relative is almost always a person of comparatively small means, and when it comes to the point the banker cannot, and does not, sue him in order to make up a petty deficiency. He charges off the defalcation just as if he had no security whatever. A theory has prevailed that a clerk whose relative was bound for him would not take money because that relative might be made answerable. But nine-tenths of the people who commit fraud, do not expect to be found out at all, and experience shows that banks which require private security are just as much subject to frauds as those which take the security of guarantee societies.

These societies, too, have a characteristic defect. They are companies which wish to make profit in an unknown region. No one very accurately knows what proportion of people commit frauds, and what proportion do not commit them. Insurance against crime is now what life insurance was when the duration of human life was comparatively uncertain. It is a pursuit in which a Company deriving profit must necessarily take a "large margin," as the phrase goes,—must, in plain English, charge a good deal. Such a Company, too, must take various sorts of business, or it would have nothing to do, and as it charges a pretty uniform premium, the most respectable classes in fact pay for the offences and sins of the less respectable. Bankers' clerks are said to be, and we believe commonly are, of a particularly respectable class, and the number of frauds among them is very small. Bankers' clerks, therefore, who are compelled to insure their honesty in the Company, pay first, a considerable profit to the Company, and next, a sufficient compensation for the frauds of less honest classes.

To get rid of this tax on these clerks, a few banks, such as the Bank of England and the London and County, have formed a guarantee fund of their own, to which their clerks subscribe, and to which we believe they themselves give a donation by way of beginning. But the clerks in most banks do not like this system. It ties them to the bank. What they have paid to the fund in bank A necessarily counts for nothing, when they "better themselves" by going to bank B; they have to begin paying over again.

Accordingly a scheme has been started in which all banks might combine for a single fund, to which their clerks should pay, and which they should all accept as a sufficient security. This would be as universally accepted as the guarantee of a Company, and will enable the clerk who pays to it to migrate from bank to bank just as he likes, and if the promoters can carry out their intention it will have a still further advantage. The insurance is to be a mutual insurance. All profits made by the fund, and it is necessary to charge such rates that they must almost certainly make some, are to belong to the clerks who insure. So that if a clerk is charged too much by way of premium to secure his honesty, the profit so made does not go to a guarantee society, but comes back to him if he continues honest. He gets himself the money which, in the other case, a company makes by means of him.

If this system should become general, it will also have a very beneficial effect in lessening the amount of fraud committed; all the clerks in a bank will be injured by the fraud of every clerk. Every defalcation will be debited to an account which is *their property*. They will have to pay for all frauds; the sum to be divided among them will be much if other clerks are honest, and little if they are dishonest. The instinct and interest, therefore, of all clerks will be to protect the fund, and the chance of fraud will be diminished, because those nearest at hand, who have the best means of watching for it and seeing after it, will be very eager to prevent it as far as they can. As therefore this fund will lessen the tax on clerks to insure against fraud, and also lessen fraud itself, we shall hope to hear of its complete success.

The following are the particulars of the fund:—

THE BANKERS' GUARANTEE AND TRUST FUND.

PRESIDENT—*Jervoise Smith, Esq., Messrs Smith, Payne, and Smiths.

VICE-PRESIDENTS (AND TRUSTEES.*)

Martin Abell, Esq., Worcester City and County Bank.
Willam Alexander, Esq., Messrs Alexanders, Maw, and Co.
Hugh Lindsay Antrobus, Esq., Messrs Coutts and Co.
George Atherley, Esq., Messrs Atherley and Co.
R J. Atkinson, Esq., Chairman, Hull Banking Company.
Thomas Badger, Esq., Chairman, Dudley and West Bromwich Banking Company.
*Walter Bagehot, Esq., Stuckeys' Banking Company.
Crawshay Bailey, Jun., Esq., Messrs Crawshay, Bailey, and Co.
Samuel Bailey, Esq. Chairman, Sheffield Banking Company.

W. Godfrey Whatman, Esq., Messrs Bosanquet, Franks, and Co.
Arthur C. Willyams, Esq., Messrs Willyams and Co.

This fund is for the mutual guarantee of bank officials employed in the United Kingdom.

The subscription for membership is 1*l* per cent. on the amount of the guarantee, and the payment may be made in five equal annual instalments.

Members may under ordinary circumstances go from one bank to another without prejudice to their guarantees.

The charge of 2s 6d is made for policy stamp and a copy of the rules.

The fund is under the exclusive management and control of the trustees.

Forms of application, &c., to be had at the office, 3 Abchurch lane, London, where every information regarding the fund may be obtained.

June, 1865. HENRY YOUNG, Secretary.

THE COTTAGE LOAN.

ALDERMAN WATERLOW, aided by Lord Stanley, has extracted from the Treasury a very important promise, nothing less than to extend the principle of the Drainage Act and lend public money at 3½ per cent. for the rebuilding of the dwellings of the poor. The Alderman, whose exertions in the cause can hardly be over-estimated, begins, it appears, to see his way towards the provision of decent dwellings for the labouring classes. The buildings which a Company formed by him, and presided over by Lord Stanley, have erected, are declared to fulfil all the requisites of good houses for the lower working class, yet will pay an annual dividend of not less than five per cent. Unfortunately that sum, though a remunerative, is not an attractive dividend, especially when derived from a speculation always in discredit. Collecting many small rents from many small people is not only very disagreeable but very uncertain work, ensures a great deal of unpopularity, and involves a multiplicity of appeals, protests, delays, audiences, investigations, and other minor worries, highly disagreeable to people with money to invest. They want their interest paid in gold, to the hour and without any trouble at all, and they doubt if house-building of this kind will secure precisely their ends. The work, therefore, is left either to small middlemen who skin the poor, exacting heavy profits by threats of legal process, or to philanthropists like the Alderman. Unfortunately this latter class is not extensive enough to perform the immense work so urgently required, charity, however liberal, being to self-interest what a horse, however willing, is to a steam engine, and they cannot procure funds either quickly enough or largely enough to make any material impression on the evils to be faced. The security they have to offer is no doubt exceedingly good, quite as good as securities usually are, for, as Mr Waterlow points out, the house property leaves an enormous margin. Supposing the Company, for instance, to lay out 30,000*l*, and borrow 30,000*l* more for the same work, the lender will have the security of both sets of houses, worth presumably 60,000*l*. Nevertheless, it would at present be very difficult if not impossible to borrow at less than 5 per cent., and to pay 5 per cent. interest for money to build houses which will only yield 5 per cent., is a risk which, on a great scale, make even philanthropists shrink. They want some little margin to protect themselves against bad years, and bad tenants, and accidents, and all the other evils attending house property let to poor men, but not on the terms by which small builders protect themselves. Under these circumstances, money in sufficient quantities is unprocurable, and Alderman Waterlow bethought himself of an appeal to the State. The appeal has been heard, and a Bill is to be introduced into the new Parliament authorising the loan of money on the security of the new buildings at 3½ per cent., the State thus finding, besides the money for new investments, an insurance fund for the old one, the scheme in fact working in this way. Any Company which wishes to engage in the business can now invest. say 100,000*l* of its own to earn a dividend of 5 per cent. It then borrows 100,000*l* more, and doubles its tenements, earning from the new buildings also 5 per cent. to set against the 3½. The balance, or 1½ per cent., may be applied to form a guarantee fund for the original dividend, which will thus be at least as secure as an ordinary mortgage, and present a very attractive form of investment, more especially if Mr Gladstone will reconsider his decision upon one detail of the scheme. He proposes to limit the dividend to five per cent.; but the figure should be six, the rate now offered by most of the British colonies for money, and above that obtainable with ordinary mortgages on real security.

It is evident that in making this promise Mr Gladstone has engaged the State in an enterprise of no small magnitude. The scheme is, we imagine, nominally confined to the great cities; but to get it through Parliament it will be necessary to conciliate the country gentlemen by extending it to all such undertakings wherever commenced, to lay the foundation in fact of a system of State help towards the rebuilding of the cottages throughout Great Britain. That is a large undertaking, and one to which there are many *primâ facie* objections, the principal one being this. It is not improbable that within a few years the combined influences of education and emigration may change very materially the position of the labourer, and thus compel landlords to do for themselves all the State is now asked to assist them in doing. It is moreover always doubtful whether any remunerative work which is shunned by private enterprise can really be required, and it is always inexpedient to place in the hands of Government new sources of pecuniary influence. Above all, such loans tend to foster a feeling already entertained by the masses that the aid of the State can be beneficially invoked to secure objects required by classes and not by the nation, an idea to which there is no visible limit, and of which therefore politicians have an almost unreasonable dread. These *primâ facie* objections are all sound, and all point to the necessity for discussion and caution; but Mr Gladstone does wisely, we think, in over-

Digitized by Google

riding them all. The plain truth is that the necessity for raising the condition of the mass of our population is becoming a pressing one, not only on philanthropic but on political grounds. The differences of intelligence among classes are rapidly decreasing, while the disparities of their condition tend rather to increase, and the double action is not politically safe. If power, or a share of power, is to be entrusted to the masses, they must be placed in a position in which contentment is possible, or they will infallibly use their power to content themselves, in ways economists of all men will certainly not approve. A million of new voters possessed of some education, and conscious at once of the great wealth of the country and their own exceeding discomforts, would be dangerously liable to delusion by fluent promises, by suggestions such as have once or twice been made both in France and America. Now, of all the miseries of poverty in Great Britain, perhaps none is so real, certainly none is so fully recognised by the poor, as the wretchedness of their lodging. Even the submissive agricultural labourers complain bitterly in bad villages of the state of their cottages, while the artisans in cities are always on the move in the vain hope of avoiding the annoyances which they nevertheless always find renewed, the bad drainage, foul stenches, insufficiency of room, and excessive dreariness of aspect. These evils are frequently so great as to affect their health, and drive them to seek in drink an artificial equivalent for the energy of which bad accommodation has deprived them. Students of hygiene declare that in many places, such as the villages of parts of Buckinghamshire and Northamptonshire, in East London, Liverpool, and quarters of Glasgow, the mode of lodging is the greatest of the many evils with which the poor have to contend, that it is more injurious for example than camping in the open fields would be, and perceptibly increases a rate of mortality already from other causes far too high. If these assertions are even approximately true, and no one who has studied East London can doubt it, a general rebuilding of English cottages on sound principles would add a fourth or a third to the labour capital of the country, the effective strength which the workmen could throw into their work. To find a remedy for this state of affairs is not a work that can wait. It must, like the drainage, be done as soon as the population is convinced that it ought to be done, the patience so often prescribed being altogether out of place. People with an acute disorder are not comforted or cured by the assurance that in a generation or two medical science will reach a point at which such diseases will be prevented. They want medicine at once, not promises of the scientific progress to come. It is at the same time as certain as anything in commerce can be, that unassisted enterprise, if it ever performs the work, will perform it very slowly indeed. Vast numbers of cottages and houses for the poor are held by men who can do nothing, who depend on their rents for their daily bread, and who feel even a demand for a new drain as a severe or intolerable burden. Great districts, moreover, are embarrassed by a complication of titles between lessee and lessor which absolutely prohibits any improvement, and which could be removed only by companies strong enough to obtain special acts of Parliament for their protection. The poor themselves can do nothing, and capitalists avoid undertakings involving so many chances and such minute calculation with an instinctive aversion. The work is left, therefore, to little builders without capital or plans, who run up rows in the outskirts in the cheapest way, mortgage them, and begin again, but rarely or never attack the overpeopled centres. The main work is left undone, and it is worth doing, even though the State should find in the end that it has lent a large sum of money upon a security which, though complete as regards the interest, is not equally complete as regards the principal. One "dead heave," as Mr Kingsley calls it, to the condition of a million of people would amply compensate for any risk which Mr Gladstone is at all likely to incur.

MR HENLEY'S CONSERVATISM.

In his speech in Oxfordshire, on the occasion of his election, Mr Henley uttered a very curious and cynical threat in connection with the Reform question. He avowed himself opposed to all change, but said that if a Reform Bill were really forced upon the House, he should probably feel it his duty to try to settle the question of the suffrage once and for ever by proposing a reversion to household suffrage. "You all "know that Reform has never been my trade. I have never "been much in it, but I hold this opinion,—if there is to be "any Reform, it is of no use if it does not go down hill and "take in a much larger number than at present. I don't "understand 'lateral' Reform.....I have not been able to "make out why a man who rents an 8*l* or 6*l* or 5*l* house "should have a vote. I can't see it. It may be for want "of a sharp pair of spectacles, but I can't see it. I have "come, therefore, to this conclusion, *if there is to be a "change, we should go back to our old system of household "franchise.* If you make any change, and don't go below "8*l* or 6*l* or whatever the sum may be, the men who are "not included will fancy there are a great many plums "in the pudding which they can't get at, and, therefore, "they will be discontented, and think themselves badly "treated." And Mr Henley would apparently extend the same change under the same circumstances to the county franchise. "I think if we make a change in the county "franchise we ought to take taxation as the test. I think "that household suffrage and rating should go together. I "say, 'take taxation as the test.' I don't care whether you "put taxes on a 10*l* or a 20*l* house. If there be taxes upon "it, let the man vote. And I will tell you why. Because we "should not then have perpetual change. If we had voting "on the one hand and taxation on the other, we should not "have a hullaballoo all over the country about some being in "and some out." Thus Mr Henley:—but it is not easy to conceive that he really means what he says, that he would really prefer to see all householders, both in the counties and the boroughs, admitted to the franchise, to having a slighter or more gradual change. Of course, he means to condemn Mr Disraeli's "lateral" Reform Bill in 1859, which he and Mr Walpole opposed—to the great chagrin of the Tory leader, and, of course, he also means to menace the Liberals with a more daring measure than any they are willing to propose as a mode of deterring them from proposing any measure at all. Probably he also counts on the Liberal fear of the enfranchisement of a large class in boroughs and counties without independent minds of their own at all, and on the high probability that their votes would become the easy spoil of Tory enterprise. But it is scarcely possible to interpret Mr Henley's threat in any way equally honourable to his understanding and his principles. It savours too much of his very questionable conduct the other day on the Union Chargeability Bill, when he tried, after being defeated himself, to destroy the Bill by proposing to go much further than it did, and carry out its idea, as he considered, to the legitimate consequences, by abolishing altogether the power of removal. What he now says on the subject of Reform looks very like a manœuvre of the same kind. "If "you load your guns with this ammunition," virtually says Mr Henley, "we will insist on *over*loading them, so that "they may explode and injure the gunners no less than "their foes." Not that he approves of the process at all; but that, if it is to be, he wishes, in order to anticipate and forestall all further movement, to make it as final and complete as possible. On the same principle precisely he would burn down a whole town rather than only half of it, in order that there may be no further danger of a new conflagration. Or, Mr Henley would be for shooting himself at once whenever threatened with illness, in order to anticipate the worst that illness could do. Perhaps Mr Henley may argue that any state of suspense and uncertainty as to the future is more dangerous than constitutional provisions, however bad, which are known to be permanent and inevitable. But if he does, he not only deserts the true Conservative point of view which professes attachment to existing institutions because they are tried and found satisfactory, and not merely to avoid change, but he attaches an absurd and almost sentimental importance to the unsettling effect of a proposed change. What practical influence, for instance, has the agitation for a new reform had in lowering the respect for existing institutions, as shown by the elections now going on? Are they not universally taken as testing well enough practically the real opinion of the country? Do even the extreme Radicals throw ridicule upon the verdict thus given as if it were not, roughly speaking, the verdict of the nation, or even *affect* to despise the existing state of things because the improvements which they suggest have not been introduced? It may be perfectly true that the constant revival of the Reform question is a great *bore* to politicians, but we venture to say that so long as the House of Commons reflects fairly the

Digitized by Google

opinions of the nation at large, Mr Henley's notion that a prospect of coming change in any way paralyses our actual institutions is altogether chimerical. He had much better stick to what he thinks good in existing institutions until compelled to abandon it, than abandon in a pet the ideas to which he and his party are attached, in order that he may be able to say that there is nothing further to yield. For a sensible man to throw away anything he thinks really beneficial in order to discount future agitations, is as silly a line of conduct as any which a sensible man can pursue.

But we very much doubt, as we have already said, whether it is really this absurd fear of a state of political suspense which actuates a shrewd old man like Mr Henley in advocating a descent to household suffrage if any further Reform Bill be introduced at all. We suspect he thinks that if the Tories give a hint that they have such a card as this in their hand it may frighten the Liberals,—the more so because such a card, if played by the Tories (as, of course, it would not be), might really, for a time, secure their party, especially in the counties, a very sudden and brilliant success. For, of course, the extreme measure which Mr Henley proposes, if it did ensure a great victory to the Tories, would simply do so through the exceeding *dependence* of the new class of voters, through their being of a kind to follow the larger proprietors in masses to the poll as the tide follows the moon. Lord Cranborne, we think, has more than once argued that the best thing voters of a certain class can do is to accept implicitly the judgment of their superiors, adding the weight of their numbers to the opinion expressed by those superiors. Of course this is the only hypothesis on which the Tories would be likely to profit by Mr Henley's threatened amendment, and in the counties at least, and smaller boroughs, it is likely that the hypothesis might prove true.

But what course can be less worthy of a genuine Conservative than Mr Henley's monstrous proposition, whether it be looked at as genuine, or only as a scarecrow to frighten the Liberals back? If it be seriously intended, then Mr Henley is willing to throw political power into hands which he and his party consider wholly unfit for it, either in order to win fresh influence themselves for a time, or in order to go so low at once that there is no chance of going lower. Is that in any sense conservative? What does it profess to conserve? Not the Constitution, for he is anxious to do *more* to subvert it than even his opponents; nor the political results of the Constitution, for once let a class really ignorant find the power wholly in their own hands, and they would not long follow their Tory leaders, but would soon take the bit between their teeth, and follow their own demagogues. In short, there is no intelligible sense at all in which a sudden change to household suffrage could be called conservative. Nor would it even be what Mr Henley praises it for being, a final measure, unless he accompanied it by an equal division of electoral districts. If it is to be the object of any new Bill, as Mr Henley thinks it should be, to give so much that nobody will ever think of asking for more,—it certainly will not do to give as much representative power to Knaresborough as to Liverpool, to Portarlington as to Salford. It would be a very poor way of settling this question for ever, to put down the suffrage as low as anybody is likely to wish,—though even after household suffrage is granted, manhood suffrage, womanhood suffrage, and even infant suffrage might still be asked for, and lodger suffrage certainly would be,—without re-distributing the seats so as to give them to the larger centres of population. For equal electoral districts, and perhaps the ballot, Mr Henley should declare himself next, on his own avowed principles. That notion of his of giving enough to settle the question apart from the wisdom of the gift, will lead a great way and into very queer places, where a shrewd man like Mr Henley would scarcely like to follow even his own principle.

But we believe the truth to be that Mr Henley's threat is a mere scarecrow set up to frighten away the Liberals from the field of Reform. If this be so, how can an honest Conservative justify such a step? Can anything be more cynical than to use your influence to commit the Conservative party hypothetically to a course they would really disapprove, in the hope only of alarming the Liberals by an attack in front and rear at the same time,—an assault on their proposal to innovate at all, and a secondary demonstration against their proposal to do so *little* if they do anything? What sort of Conservative principles are those which do not scruple at obtaining a party triumph by holding out prospects of a policy which would injure the country and destroy the party if the time ever came when the pledge had to be redeemed? Mr Henley's threat could only answer any purpose, supposing the Liberals to be so far convinced of its truth as to be daunted by it,—and in that case does Mr Henley doubt that the extreme Radicals, having got promises of better things from the Tories, would use those promises to drive them very fast indeed "down hill," as he calls it, and very soon oblige them to fulfil in earnest pledges only given by way of menace. Mr Henley is a sort of sectional leader amongst the Tories, but the fewer who belong to his school,—if he is to take the line he took on the Union Chargeability Bill, and the other day on Reform, of trying to defeat the Liberals by outbidding them,—the better it will be for the Tories. We always used to think that Conservatism meant over-caution. In Mr Henley's mouth it is coming to mean a sinister policy rashly adopted from bitter party feeling;—and a less Conservative policy than that it would be difficult indeed for the imagination to conceive.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending July 15, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	29,530 6 1	181,019 13 7

Ditto—by last monthly account	44,394,664 19 10

Agriculture.

LANDLORDS AND LABOURERS.

HOW ARE THE RURAL WORKMEN TO BE HOUSED?

THE hardy assertions recently made in the House of Commons that landowners do not generally and systematically discourage cottages and discountenance cottage-building in their own parishes, would somewhat surprise the dwellers in rural districts, did they not know from experience the power of imagination possessed by landowners in matters connected with their assumed interests. The defective condition and the scarcity of the cottages for workpeople in the rural districts have for some time past formed topics of great interest, and have been much referred to at agricultural meetings. On nearly all such occasions an extension of the area of settlement and rating beyond the existing parochial limits have been mentioned as measures likely to relieve the present evils arising from insufficient cottage accommodation, yet we find some of the landowners in Parliament strenuously opposing and attempting to obstruct Mr Villiers's "Union Chargeability Bill," by which the union will be substituted for the parish, so far as regards rating to and settlement of the poor. Such opposition would seem incredible, without adverting to the circumstances of our agricultural districts. It is certain that the resident labourers of many, perhaps the majority of our rural parishes, are insufficient to cultivate the land in each parish, according to the actual system of cultivation, and assuredly they would be still more deficient if each parish were cultivated up to the point which the existing knowledge of agriculture requires. Why is this? The labour of husbandry is by no means distasteful to working people. On the contrary, it requires the inducement of high, or comparatively high wages, or the promptings of an adventurous spirit, to withdraw the peasant from the sedate toil of a country life.

The main cause is the want of cottages. Formerly it was the custom on most large estates to grant leases of cottages and gardens for long terms of years, or for three lives, so that a frugal and superior labourer could acquire an interest in his cottage which would be available for himself and his children. Then on

Digitized by Google

some of these lifehold tenements a second cottage would be erected, where, perhaps, the lifeholder's son would settle himself. The leases of these tenements would be renewed from time to time as the existing lives dropped, new and younger lives being substituted, on payment of a fine to the landlord proportioned in amount to the value of the interest granted. This system kept up a labouring population of remarkable independence and stability. It has, however, been almost universally abandoned, the landowners, even where they don't pull down cottages, being extremely jealous of allowing any of their cottages to be occupied by any save yearly tenants. This is partly due to the less genial and more domineering temper of our modern landowners as compared with the predecessors, and partly to the greater prevalence and more mischievous plan of game-preserving. For while every landowner regards each labourer as a possible pauper, every game-preserving landowner looks upon each able-bodied labourer in his parish as a would-be poacher. The remedy for this state of things is not easy. What is wanted is,—first, a sufficient number of plain, but decent and substantial cottages on each farm, sufficient to accommodate the regular and permanent workmen required by the farmer. These should be let with the farm, and would, of course, be under the control of the farmer. Secondly, there ought to be in each parish cottages, which might be held by labourers independently of any of the farmers, and these might be let to them directly by the landowners either on lease or otherwise according to circumstances. Any landowner who, having a considerable estate, does not provide both of these classes of cottages, not only disregards his own interest, but neglects the social and moral duties which his position as a landowner imposes on him.

Of the existence of this evil there can be no sort of doubt. Nor is there any more doubt that it has been caused by the narrow and selfish policy of the landowners on whose estates cottages have been pulled down, or omitted to be erected, to meet the requirements of the rural population. To those who have caused the evil the nation will look for its remedy, and it may not be out of place to recall a few of the utterances on the subject which have been made at agricultural meetings. Thus, in September, 1861, at the meeting of the Herts Agricultural Society, the then members for the county being present, after Sir Ed. B. Lytton had confidently predicted the "inevitable" division of the United States of America into two or more "separate independent commonwealths," and the late Mr Buller had discoursed on war and warriors, the Vice-Chairman, Mr R. Dimsdale, stated that his attraction to the meeting had been some excellent models of cottages there exhibited. He then referred to the recent "alteration of the law of settlement, which he had ventured to predict a year ago would have to be made, and by which they would get rid of the *difference between open and close parishes*,—a most unjust difference,—the close parish throwing all its burdens upon its neighbours, and the open parish being in that way compelled to bear more than its fair burden. This measure would, doubtless, lead to considerable change with respect to the building of dwellings for the poor, and the *question of improvement of cottages was therefore specially important just now*.....In justice to the agriculturists (farmers), he must say this was a question in which they had begun to take great interest. Only a few days ago I went over a farm, and one of the first questions the farmer put was, 'What is my landlord going to do for the labourers in respect of their dwellings? I want something to be done for them.' Formerly, the farmers were only anxious about their farm, and did not concern themselves about the dwellings of the poor; but now they were beginning to desire that there should be a sufficient number of decent and convenient cottages for the accommodation of the labourers on the farm."

We venture to say that desire has, since the above was spoken, greatly increased, for every intelligent farmer knows and feels that better dwellings for his workpeople is one of the great wants of the time. Mr Dimsdale also said that he agreed with the London Farmers' Club, "that it was more desirable to attach them (the cottages) to the tenant (the farmer), than to the landlord."

At the "Royal and Central Bucks Agricultural Association," in October, 1862, Mr Bernard, M.P., in reference to the Parochial Assessment Act, said: "They all knew that where parishes were in the hands of very few proprietors, it had been the custom of many of them to discourage the settlement of the families of agricultural labourers within their precincts. The consequence had been that a sufficient number of able-bodied men were not to be found in those parishes, and must be sought for elsewhere. The effect of this was that many labourers had to walk two, three, or even four miles before they reached the point where their labour was required. This was a great aggravation of the hardship of their condition, and the average of sickness and destitution was much increased, as many a man became unfit for work earlier than would be the case were his strength better economised by living in the village where his labour was required."

In 1863, Mr Walter, M.P. for Berks, said at the meeting of the "East Berks Agricultural Association," that "every one must know that cottages were systematically prevented being built in particular parishes, in order that landlords living in those parishes might draw their labour from parishes which might be saddled with the relief of the labourers when they came to require it." And Mr Benyon, M.P., in reference to building cottages as an investment said, "the amount of money necessary for building a cottage could not have its interest kept down by the rent received; but there was another consideration which ought to be taken into the account. There were always a greater number of applications for farms with cottages than where there were none; and this should convince a landlord that with cottages he would always have better farmers to occupy his land." So in the same year, Lord Naas when presiding at an agricultural meeting in Cumberland said, "there are many of their (agricultural labourers') dwellings where anything in the shape of comfort and cleanliness, nay almost decency, is impossible .....If I put it even on the lowest possible grounds, even upon grounds of economy, there is much to be said in favour of some improvement of these dwellings. Your labourer is really the most valuable machine on your farm."

So Lord Woodhouse, at the North Walsham (Norfolk) Agricultural Society, in 1863, said: "Some people say this is a question of pounds, shillings, and pence, and that unless you build cottages without regard to pecuniary results, you will never have a sufficient number. Others say it is a question as to the duty of a landlord.....I do not think that either of these views is really sound. It seems to me that the true way of doing it is this. First, as you must have tenants to cultivate the land, so you must have labourers to till the soil.....So you must have good dwellings to house your labourers. What is required is this,—that there should be upon every estate a sufficient number of cottages for the hands that are employed to farm that estate." And he afterwards added, that if you want a good class of tenants, you must have a good class of labourers, and, therefore, it is the landlord's interest to build a sufficient number of good cottages, without regard to obtaining a direct payment of interest from the cottage rental. And he truly said that if that view were generally taken, we should see a very salutary change in the existing system.

Literature.

MADAGASCAR AND ITS PEOPLE. By LYONS MCLEOD, Esq., F.R.G.S., late British Consul at Mozambique. Longman, Green, Longman, Roberts, and Green.

AMONG the countries rich in undeveloped possibilities and lavish of promises for the future that on all sides assert each its own paramount claim on the attention of the commercial world, few surpass Madagascar in the advantages of situation and natural riches, while not one has hitherto offered a less attractive field for European capital and enterprise. The unhealthiness of the climate on the low sea-board has had some share in turning aside the stream of commerce from an island which would seem to be one of its most natural and productive feeders, lying as it does between the Cape and India, and abounding in facilities for shipping. "I do not know," Mr McLeod writes, "any similar extent of coast throughout the globe which contains so many fine harbours, not even excepting New Zealand;" but the fierceness of its people, who are a far superior race to the negroes of the not less deadly Oil Rivers coast, and the unsettled state of its government since the death of Radama the Great, have had far more. The opening of the present reign has seemed to Mr McLeod a fitting time to show of what Madagascar is capable, of what importance friendly relations with it may prove to the prosperity of our Eastern Empire, and how it may be best brought under the influence of England.

Mr McLeod is honourably known for his exertions, while filling the post of British Consul at Mozambique, in the suppression of the slave trade. It is probable that the aversion Madagascar has always shown to that trade, and her endeavours to destroy the nests of Portuguese slave-pirates on the opposite coast of Africa, first drew Mr McLeod's attention to the subject of her people and history. He has brought within small compass, in a well-digested narrative, all that has been written about the "Great Britain of Africa"; his book is a study, not a sketch, from nature. It wants something of the vividness of first-hand impressions; we doubt if Mr M'Leod has visited the places he so carefully describes. This, in some degree, lessens the interest with which an account of a people and country so little known cannot fail to be received, but a brief outline of its contents will show that Madagascar, even at second-hand, is no trite or wearisome theme.

From the earliest mention of this island, under the names of Cerné, Menuthias, Zaledz, Chebona, &c., by various writers down to the 13th century, Mr McLeod passes to its discovery, by Vasco-da-Gama and Fernan Saurez, at the end of the 15th and beginning of the 16th centuries. He gives a sketch of the Portuguese attempts at occupation, and the repeated disasters (including a massacre of Governor and settlers by the natives) which compelled them to give up their undoubted claims as the first European discoverers to the possession of this fruitful land. The French now took up the perilous task of colonisation, and at first under promising auspices, but they committed the fatal error of

Digitized by Google

introducing the foreign slave trade, and raised "an undying spirit of hatred" by the acts of treachery with which it was inaugurated. "Natives who had come voluntarily to serve the French at Fort Dauphin were seized and sold by Pronis, the French Governor of the new colony, to the Governor of the Mauritius." Numbers of these captives escaping to the mountains there, maintained their freedom, and have given much trouble, under the name of Maroons, to the Dutch, French, and English masters of that island. These pirates, who so long infested the neighbourhood of Bourbon and the Seychelles, were, it is said, the descendants of rebellious French settlers and native women banished by Governor Pronis from Madagascar. From 1642 to 1773 France held her forts on the seacoast of Madagascar by a precarious tenure: three times Fort Dauphin was burnt down, a massacre as effective as that before which the Portuguese gave way destroyed the rising colony, and matters looked hopeless enough for the French idea of commanding by the possession of Madagascar the trade with the East, when Maurice de Benyowski appeared upon the scene, and gave it a short realisation. We cannot enter here into this curious episode in the life of a man the outline of whose remarkable career is well known; but a more strikingly dramatic scene is not easily to be found in history than that in which the Hungarian magnate, the escaped convict, the French adventurer stood "assagay" in hand, with "fifty thousand people prostrate before him," receiving the willing homage of the Malagasy as their Ampandzabeka or supreme chief.

After his fall, due to the nation, whose agent he was, England and France disputed for a foothold on the Madagascar shores; the surrender of the two remaining forts of the latter nation to the English fleet in 1811, giving the victory to the former. "For a short period," writes Mr McLeod, "the English were located at Port Loquez, but their commander having insulted the natives, by inflicting personal chastisement on one of their chiefs, they were massacred, with the exception of one man who escaped in a boat."

A policy of intimidation and insult was now, however, to be supplanted by one of a more rational and Christian nature; and the interior political changes of Madagascar itself favoured the new order of things. Radama the Great had succeeded to the throne of his father—a throne which that father had built up for himself on the unwilling necks of his fellow-chieftains in the mountain district of Ankova. The power thus gained by Dian-amponine was confirmed and extended over almost all the island by his son Radama, and with him it became possible for the English to open amicable relations. Sir Robert Farquhar, Governor of the Mauritius, entered into a treaty of friendship and commerce with the new King, who gave up his two younger brothers to be educated by the English at Mauritius, as a sign of amity and confidence. By this treaty the foreign slave trade was abolished, compensation being paid to the King for his loss of revenue from this source to the amount of 2,000*l* per annum. Unfortunately, some difficulties arose about the payment of the first instalment which nearly put an end to all friendly relations between the two countries. "False as the English," became a proverb among the Malagasy, and it was with much difficulty that Mr Hastie, our Envoy to their King, could gain a recognition of the former treaty and its confirmation. By this treaty, not only was the slave trade abolished, but the country was opened to legitimate commerce. Missionaries were allowed and encouraged, and a perpetual peace and protection promised to all settlers, who were not however allowed to erect forts for their protection as before. A bright future seemed opening before Madagascar when the death of Radama, two years after the conclusion of the treaty, turned a promising morning into a day of darkness and bloodshed. The Jezebel of Antananarivo, as our author most justly names Queen Ranavolona, after securing her throne by the murder of her husband's mother, sister, nephew, and brother-in-law, proclaimed the treaty with England annulled, prohibited her subjects from holding the Christian faith, banished all missionaries, and treated the French and English traders in such a way as to lead to the invasion of her dominion by a man of war of both nations in order to obtain redress. The result of which valorous enterprise must be given in Mr McLeod's own words:—

A Hova fort having a garrison of about 400 men succeded in beating a storming party of French and English nearly equal in number. No attempt to renew the combat was made, and the senior naval officers of both countries sailed away, complimentarily puffing powder at each other, while the successful natives look on, exhibiting the skulls of their vanquished enemies on the beach.

This important display of resentment on the side of civilisation was retorted on the barbaric side by a complete prohibition of foreign trade, which ceased accordingly for about eight years, to the great inconvenience of the Mauritius and neighbouring islands, who draw their supplies of rice and cattle from Madagascar. We shall not raise the curtain thus let down over that country. If our readers wish to read of martyrdom as cruel and as nobly borne as any in the primitive days of Christianity, they can turn to the 8th chapter of this volume, or to the more full relation of the Madagascar persecutions, by the Rev. Wm. Ellis. The Christian converts had one powerful friend in the Queen's son, Rakoto, whose part in the French plot to dethrone his mother (the plot in which Madame Ida Pfeiffer found herself involved). revealed the inherent weakness of his character. It is a pitiable example of the demoralising effects of despotic power, that this same prince, so amiable and excellent, with this one exception, up to the time of his ferocious mother's death, became himself so lost in dissipation and so tyrannical in his rule that his nobles rose in revolt, slew him in the presence of his Queen, "who used every effort to save his life," put to death all his advisers, quaintly called "Mena Maso," or "Red Eyes," spies "who are supposed to investigate and search into hidden matters with such intensity as to impair their vision," and raised to the vacant throne the woman whom they had just made a widow, first exacting from her a "constitution," the first provision of which is, that "the word of the Sovereign alone is not to be law, but the nobles and heads of the people with the Sovereign are to make the laws."

"The remaining clauses of this, at present, working constitution are important enough to claim a place here:—

Perfect liberty and protection are guaranteed to all foreigners who are obedient to the laws of the country.

Friendly relations are to be maintained with all nations.

Duties are to be levied, but commerce and civilisation are to be encouraged.

Protection and liberty to worship, teach, and promote the extension of Christianity are secured to the native Christians, and the same protection and liberty are guaranteed to those who are not Christians.

Domestic slavery is not abolished; but masters are at liberty to give freedom to their slaves, or to sell them to others.

No person is to be put to death for any offence by the word of the Sovereign alone; and no one is to be sentenced to death till twelve men have declared such person to be guilty of the crime to which the law awards the punishment of death."

After this who can talk of uncivilised Madagascar? Has it not got Queen, Lords, Commons, and also trial by jury? King Radama the Second was their Charles the First; Queen Rabodo, we trust, may prove their Victoria. "Every nation," says Mr McLeod, "destined to independence and greatness must have its struggle for liberty; and while Englishmen remember Friday the 19th of June, 1215, when on the field of Runnymede the nobles and commons secured their Magna Charter, Madagascar will have enrolled in its history that constitution which her nobles and heads of the people obtained from Queen Rabodo, on Tuesday the 12th of May, 1863."

The five last chapters of this useful handbook of Madagascar are devoted to a description of the country, taking province by province, which fully bears out all that has been said of its beauty and fertility. The number and size of its harbours we have already mentioned. Magnificent forests offer timber for our dockyards, and navigable rivers render them of easy access. Wild cattle abound, and the Americans carry on a lucrative trade in hides, horns, hoofs, tallow, and jerked beef; rice is grown in large quantities for exportation. Iron and coal are said to exist in some quantities, and the former of excellent quality; gum elemi, indigo, cotton, silk, wax, and a variety of hardwoods suitable for cabinet work, are among the products natural to the country "In the course of time the South-west of Madagascar may become a wool-producing country, as the sheep are covered with wool, as at the Cape of Good Hope and Natal." Finally, "during the reign of Radama I., the demand for European manufactures increased with astonishing rapidity," writes the Rev. Wm. Ellis, in his History of Madagascar, proving that a settled government, and freedom from arbitrary interference, are all that is needed for the growth of a profitable interchange of raw material and manufactured goods between it and Europe. The seeds of prosperity plainly abound; it remains to be seen if the rule of the new Queen will be firm enough to secure the necessary tranquillity, and wise enough to promote the real welfare of an island which, owing to the struggles from without of rival nations, and to internecine wars within, has done little as yet to justify the prediction of Mr Richard Boothby, London merchant, of the 17th century, that the trade with Madagascar would excel in profit all others whatsoever.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monsteur* has published the following return of the Bank of France, made up to the 20th inst. The return for the previous week is added:—

DEBTOR.	July 20, 1865.		July 13, 1865.

The changes in the situation of the Bank, compared with last Thursday, are not important. The discounts have increased by 7,243,000f; the circulation of notes by 14,957,000f; and the stock of coin and bullion has declined by 4,686,000f, the deposits by more than 9,000,000f.

In my last I stated that some eminent capitalists had been in negotiation with the City of Paris relative to the issue of its new loan. The affair was brought to a conclusion the day after my letter was posted. Baron James de Rothschild, with whom were joined M. Pinard, of the Comptoir d'Escompte, M. Fremy, of the Credit Foncier, and the representatives of the Societe Generale, proposed that the loan should be issued on terms which, including the prizes of the lottery attached to it, and the time allowed for payment of calls, would give subscribers 4¾ per cent.:— and that the bankers' commission should be 2 per cent. Messrs Pereire, in the name of the Credit Mobilier, proposed that subscribers should receive 5 per cent., and that the commission should be only 1. As you will suppose, the representatives of the City were very anxious that the great name of Rothschild should protect their loan, and that the support of the Baron and his powerful associates should be secured to it. On the other hand, they were not disregardful of the *prestige* of the Messieurs Periere, and of the services which two of their companies, the Credit Mobilier and the Compagnie Immobiliere, have rendered the City. To decide between the two parties was difficult, especially as the difference in terms and commission was perhaps one to which, taking all things, and especially the future into account, no great importance could be attached; but the city men bethought them that a censorious and superficial public would not fail to make disagreeable observations if they were to prefer the 4¾ per cent. and 2 per cent. commission of Baron de Rothschild to the 5 and 1 of Messieurs Periere, and so they pronounced for the latter. The judgment of the municipal Solomons, considering their situation, is regarded as reasonable by the money market, but, unfortunately, it will have the effect of embittering the long lasting hostility between the great financial houses—hostility which is grievously prejudicial to general interests. To be sure, however, if Messieurs Periere had been defeated instead of being victorious, the result would have been about the same.

The loan is nominally of 250,000,000f (10,000,000*l*). but in order that the Municipality may receive that amount net 600,000 bonds are to be issued at 450f. These bonds are to be of the nominal value of 500f, are to bear 20f interest, and are to be paid off in sixty years, dating from 1st February, 1869. There is to be a lottery every quarter, in which bondholders may obtain one prize of 150,000f, one of 50,000f, four of 10,000f, five of 5,000f, and ten of 2,000f. Subscribers are to pay 25f deposit, 50f from 5th to 14th August, and the rest in seven terms, beginning 5th February, 1866, and ending 15th February, 1869. Until the whole 450f be paid up, only 4 per cent. on calls actually paid are to be given; and calls in arrear are to pay 5 per cent—or the Municipality may, without any notice, sell at the Bourse the bonds on which the calls are not duly paid. The subscription is to be public, and is to be opened at the Hotel de Ville and at the Mayor's offices in Paris on the 25th inst., and is to be kept open to the 31st, unless previously filled up. The Credit Molibier is to receive subscriptions free of charge from the provinces and foreign countries. In the conditions of the loan is this stipulation:—"If at four o'clock on the 31st July the subscription be not covered, the number of bonds not subscribed are to be awarded to the Credit Molibier." It thus appears that that establishment is not a contractor for the loan in the ordinary meaning of the term; it only agrees to buy what the City of Paris cannot itself sell direct. Though this lessens its responsibility greatly, the commission, it is understood, is to stand as if the whole loan were subscribed *ferme* by it.

On the Bourse the news on Friday last that the Credit Mobilier had obtained the loan caused an advance of 50f in its shares, and all the companies under its protection progressed likewise. In most other securities, also, there was an advance. This was so, in consequence of the assumption that the Mobilier and the group of capitalists who follow in its wake would be under the necessity, in order to gain favour for the loan, of upholding the market. But on Monday there was a relapse, the Credit Mobilier falling 27f 50c on Saturday's quotation. Since then the Bourse has manifested considerable uncertainty, not knowing whether the Mobilier will be able to secure definitively the rise it needs, or whether its powerful opponents, who are ruffled at its success in the loan affair, will succeed in thwarting it. The following are the week's quotations:—

On the proposition of M. Behic, Minister of Commerce, a commission has been appointed to inquire into the causes which have produced and prolonged the unfavourable situation of the silk trade, the mode of "educating" silk worms in France and other countries, and the practical means of giving to the production of silk its former prosperity. In this inquiry England has a direct interest, inasmuch as, in order to make up for the decline in the production of silk, France has been obliged to obtain extensive supplies of Asiatic sorts, and she has done so principally through England. In the first five months of the present year, for example, out of 66,943,800f worth of raw silk imported by her for consumption, 32,711,175f of it came from England.

The same Minister has issued a circular to the Prefects of departments in which he again refuses to give protection to the agricultural interest by re-establishing the sliding scale. He takes the pains to point out that the low prices of grain of which that interest complains are owing to abundant harvests in France, not to imports from abroad.

Newspapers announce that M. Langlais, Councillor of State, has accepted the post of Minister of Finance of Mexico. The talents and acquirements of the honourable gentleman are certainly considerable, and he is known to be well versed in ecclesiastical law; but the public never heard that he possessed any aptitude for financial administration, or had made it his special study. He is, I understand, to receive a salary of 100,000f. He has only undertaken to remain in Mexico three years, and at the end of that time he is to have a liberal pension from the Mexican Government, and on his return home is to be made a senator. At least, that is what is said. He is to be accompanied by a staff of secretaries and other officials, selected chiefly from the French Ministry of Finance.

The question of Algeria is occupying much attention in governmental circles, and of no one therein more than the Emperor himself. In a recent sitting of the Senate, M. Michel Chevalier, in a speech on the Senatus Consultum relative to Algeria, threw out suggestions for the solution of that question, which have produced great effect on the public, on account of their being evidently of a practical character. The object sought being to assimilate the Arabs as much as possible to Europeans. M. Michel Chevalier holds that the first and most important thing to be done is to uproot polygamy from among them. "Families are constituted in Algeria," said he, "as unhappily for Musulmans they are in all countries in which the Koran dominates, on the basis of polygamy; and it produces all its consequences—easy divorce, repudiation not less easy, a system of education for children which leaves much to be desired, a peculiar mode of succession, and as regards manners, the usages of life, sociability and intellectual development, a state of things very different to ours. The corner stone of the social edifice being polygamy, everything suffers from it. It, in fact, constitutes not only a difference between the Arab and French society, but is further an inequality, and even a strongly marked inferiority... It is a cause of degradation and an obstacle to progress in twenty different ways. This institution produces a multitude of consequences which need not be detailed, but which prevent the development of institutions, the cultivation of the mind, the refinement of manners, the progress of arts, literature, and science. A people which has that institution for a basis carries in itself the principle of its decline." A second suggestion of the honourable senator was that the organisation by Arabs of French citizenship, which carries with it the repudiation of polygamy, would be greatly facilitated if they were allowed to demand it by tribes instead of individually as heretofore. When in 1806, he said, the Jews were admitted citizens of France they were so *en masse* on the demand of the Grand Sanhedrim, not one by one. A third measure proposed by

Digitized by Google

M. Michael Chevalier for Algeria, was that perfect equality should be proclaimed between all religions. He also spoke favourably of the reduction of the time (recently decreed) in which foreign settlers in the colony can obtain the rights of French citizens.

The half-yearly return of the taxes presents these results:—The amount of direct taxes received in the first six months of the present year was 271,253,000f, leaving due for the second six months 257,350,000f. The sum paid exceeded by 51,002,000f that which could legally be exacted; and the expenses of enforcing payment were only 72c the 1,000f, whereas in the same period of last year they were 74c. The indirect taxes in the first half of 1865 yielded 562,921,000f, and this total was 34,453,000f less than in 1864, and 40,956,000f less than in 1863.

Designation of Taxes.	First six months of 1865. f	First six months of 1864. f	First six months of 1863. f
Registration, mortgage duties, &c.	162,824,000	172,846,000	164,253,000
Stamp duties	38,848,000	37,584,000	35,528,000

Total	562,921,000	597,374,000	603,877,000

The report of the company of the West Swiss Railways presented in a recent meeting of shareholders, shows that in 1864 the net receipts were only 1,659,088f, and that the interest and sinking fund of loans, and of a floating debt and other charges required 1,899,314f, so that there was a deficit of 240,244f, and consequently nothing for the shareholders. Nevertheless, the meeting authorised the raising of a new loan of 6,000,000f, and it ordered the line to be mortgaged for 32,000,000f in favour of all bondholders.

Another unfortunate railway company, that of Nassau, which is in liquidation, will, it is calculated, only be able to give 185f on every 500f share.

A third company, still more unlucky, that of the Ligne d'Italie, has been declared bankrupt at Paris. It was under French management, and most of its shareholders were French.

A letter from Algeria says that cotton having been sown late, and in unfavourable condit ons, the crop will be much inferior to that of the last two years.

The Russian Government has sanctioned a company with a capital of 5,000,000*l* for buying estates in Poland, and selling them in small parcels. This sort of business has recently been practised with great success in Austria.

A letter from Frankfort affirms that "enormous quantities" of American securities, recently imported from New York, are offered in the German markets.

The market report is subjoined:—

FLOUR.—At *Paris*, business is not active, but prices are firm. Yesterday, choice was 47f 50c the sack of 157 kilogs; first quality, 46f to 47f; good sorts, 44f to 46f. Six marks, current month, 47f 25c, and afterwards 47f 50c; August, 48f; four months of September were demanded at 49f 75c, but held at 50f. Type Paris, the 101 kilogs, current month, 29f.

WHEAT.—In many provincial markets prices have declined. At *Paris*, yesterday, prices were the same as in the preceding week, choice being 26f 50c to 27f the sack of 120 kilogs.

COTTON.—The sales at *Havre*, in the week ending Friday, were 2,340 bales, and the arrivals 3,797. The closing quotations were the same as on the preceding Friday:—Low New Orleans, 245f the 50 kilogs; good ordinary qualities in Broach, 160f, and Tinnevelly, 150f; Madras, 155f; China, 140f; Jumel, 235f. The stock was estimated at 49,415 bales. This week, the market was not very active, and yesterday Dhollerah was 135f; Tinnevelly, 152f 50c; Madras, 165f; China, 145f.

SUGAR.—Business at *Havre*, in the week ending Friday, consisted of 1,169 casks French West India, disposable and for delivery, 49f, bonne quatrieme, the 50 kilogs, duty paid; 44 ditto, 49f 50c; some usine, 53f 50c to 65f; 8,022 sacks Mauritius, 52f 50c, bonne quatrieme, duty paid; 742 casks Porto Rico, 48f 50c; 921 Havana, 32f 25c, No. 12 in bond; 590 ditto, for delivery, 31f 50c, same number; 35 ditto, 24f, in bond. The arrivals exceeded 11,000 casks and 25,000 sacks. This week, French West India, 49f, bonne quatrieme; Havana, 31f, No. 12, and 30f 50c. At *Nantes*, last week, 461 sacks Reunion, 52f bonne quatrieme; 11,317, 52f 25c ditto; 4,742, 52f; 200 low quality, 41f; 427 Mayotte, 42f 50c; 10 casks French West India usine, 57f 50c; 16,612 sacks Mauritius, 52f 75c, bonne quatrieme; 2,570 casks Havana, crystallised, 32f 50c, No. 15; 3,600 ditto, for Paris, prices not stated. This week, Reunion, high quality, 57f 75c; low indifferent quality, 41f. At *Bordeaux*, last week, some French West India usine, 53f 50c; 3,740 Reunion, 53f 75c, bonne quatrieme; 1,020 casks Havana, 31f 50c, No. 12 of Holland; 7,570, at 32f 50c dltto. No sales this week. At *Marseilles*, last week, 1,200 casks French West India for Paris, 28f, bonne quatrieme of Havre; 1,200 casks Havana, by Spanish ship, 19f 50c, No. 12; 1,941 by English ship, 30f 25c; 2,200 by Russian, 30f. This week, French West India, 27f 50c, bonne quatrieme of Havre.

COFFEE.—The market was calm at *Havre* in the week ending Friday. 700 sacks Port-au-Prince, Cayes, and Jeremie, 82f to 85f the 50 kilogs in bond; 88 Cape, 85f; 70 Gonaives, 87f; 100 St Marc, 91f; 578 Rio, not washed, 69f to 81f; 100 ditto, for delivery, 87f; 700 Mysore, expected, 90f. By auction, some damaged Hayti. The arrivals were between 6,000 and 7,000 sacks. This week, Hayti Cape, 85f and, 83f 50c.; Rio, 74f. At *Bordeaux*, last week, 3,200 sacks La Guayra grage and non-grage, at established prices; 275 at 104f; 150 at 98f; 75 at 102f; 190 at 97f 50c and 98f; 250 at 104f; 900 Mysore, 118f; 1,100 at prices not stated; 45 Rio, washed, 100f. This week, La Guayra, grage, 96f. At *Nantes*, last week, there were no sales, and none this week. At *Marseilles*, last week, 614 sacks Rio, for delivery, 80f. Nothing done this week.

INDIGO.—The only sale at *Havre*, in the week ending Friday, were 1 chest Kurpah, 1 Manilla, at prices kept secret. No arrivals. This week, at a public sale, 11 chests Bengal new, 8f 70c to 11f 20c, being 40c to 80c premium; 13 old ditto same price, being 5c premium: 3 serons, Guatemala 5f 90c to 6f 40c. Apart from the public sale, new Bengal was taken at 50c and 25c premium; Caraccas, 35c below the estimates. At *Bordeaux*, last week, 76 chests Bengal, 20 Madras, 4 Kurpah, at prices not stated. This week, Madras prices not given.

HIDES.—At *Havre*, in the week ending Friday, 5,600 La Plata salted, part at prices kept secret, the rest at 59f to 60f for ox saladeros, and 45f cow; 860 Rio Grande salted ox, 57f 50c; 100 Rio Janerio salted ox, 51f; 203 Pernambuco, 45f; 210 Maraguan, drysalted 50f 50c; 300 Valparaiso ditto, 67f; 300 ditto salted ox, 50f; 560 Buenos Ayres horse, dry, 6f 10c to 6f 50c each; 50 bales Calcutta calf, at prices kept secret. There was a public auction of different sorts, the greater part damaged. The arrivals exceeded 17,000. This week, Rio Grande salted cow, 44f; ditto ox, 55f 50c; Buenos Ayres salted, 53f 50c; Monte Video salted cow, 45f and 44f; ditto dry, 85f.

WOOL.—At *Havre*, in the week ending Friday, 19 bales Buenos Ayres unwashed, 2f 10c to 2f 80c the kilog; and 44 Monte Video washed, 2f 70c. There were also two auctions, at which 3,191 bales, out of 8,190 offered, were sold: Buenos Ayres unwashed merinos, 172f 50c to 250f the 100 kilogs; prima, 167f 50c to 222f 50c; secunda, 130f to 220f; tertia, 140f to 202f 50c; quarta and quinta, 137f 50c to 165f; lamb, 140f to 242f 50c; Monte Video unwashed, 207f 50c to 275f; prima, 170f to 240f; secunda, 140f to 215f; tertia, 135f to 205f; quarta and quinta, 127f 50c to 152f 50c; lamb, 102f 50c to 240f; Rio Grande unwashed, 75f to 152f 50c; ditto washed, black, 175f; La Plata washed, 550f; China unwashed, 220f; Russia ditto, 182f 50c; La Plata sheepskin unwashed, 82f 50c to 155f; ditto washed, 230f to 250f. The arrivals were 133 bales from England. This week, Monte Video unwashed, 1f 12½c; Buenos Ayres ditto, 1f 10c; lamb, 1f 15c; Buenos Ayres unwashed, the 100 kilogs, 202f 50c.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 300 casks La Plata, disposable, 50f to 50f 75c the 50 kilogs; and 75, for delivery, 51f 12½c; 25 casks New York, 50f 25c. The arrivals were 350 casks. This week, Buenos Ayres inferior, 49f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, 105f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, was 57f the hectolitre.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed report of the Calcutta money market is dated the 8th ult.:—Imports of silver and gold during May were a little over 57 lakhs, or about 10 lakhs less than in April, and exports were about 6 lakhs, or one-half of the exports of April. Since the 1st instant a heavy amount of specie has come in from China and the Straits, and with the present languid demand for money the cash balance in the Bank of Bengal is very large, but the rates remain as at the date of our last. It is not improbable that the increasing monetary difficulties at Bombay may lead to an advance in the value of money on this side before long; loans on Government securities are readily granted at 6 per cent. to-day. Government securities were lower than our last quotations for a few days, but the market has been firm latterly with an improved demand, and rates to-day stand just as they did on 20th ultimo, say 9 to 9-4 premium for 5½ per Cents. Share Market—The few transactions that have taken place in the share market have been mostly at a lower figure. A considerable decline has taken place in Bank of Bengal shares. Exchange for the mail of 3rd via Bombay had declined to 1s 11 1/16d for first class 6 months' sight credit paper, at which business was done to a fair extent, but since then the rate has risen a little, bank bills have been sold at 2s, and first class credits at 2s 0⅛d.

Messrs Dymes and Co., writing from Madras, on the 13th ult., thus allude to the state of the money market:—Money continues easy, no further reduction in the bank's terms of accommodation has, however, been made, and we still quote seven per cent. for advances on Government securities, and nine per cent. on private bills. Madras bank shares after declining to 68 to 70 premium are in better demand at 75 premium. Government paper continues out of inquiry at 9 to 10 premium for 5½ per Cents., 3 premium for 5 per Cents., and 10 discount for 4 per Cents. Exchange has declined and first class credits are now quoted at 2s 0 1/16d to ¼d. Documents 2s 0⅜d to 2s 0½d. Sovereigns—Rs 10-6 each.

As regards the state of monetary affairs at Hong Kong, Messrs Sharp and Co.. in their bullion circular, dated May 30, write as follows:—Gold—The arrivals have been $300,000 value, and the exports, including shipments per Salsette, on the 13th instant, and excluding those to leave to-morrow, are $600,000. The market is now quite bare of supplies, the gold going forward by the present opportunity being chiefly North China bar. Silver—We have received $140,000 from the coast, and $130,000 have been sent away to India. There is now none on hand. Dollar Currency—A very decided change of the tide has set in as regards this coin; whereas for the past few months we have been importing dollars from every quarter the anxiety seems now to be to

Digitized by Google

to get rid of them as fast as possible. India has absorbed a large quantity, whilst clean coin has also been in good demand for Shanghai. Our imports sum up $490,000, against $3,200,000 of exports. Discounts and Mortgages—Money being now less plentiful, long loans are more difficult to negotiate, the range is now from 6 to 9 per cent, and mortgages must be quoted 10 per cent. Exchange closes rather higher than last mail. Until to-day the rate appeared to droop, but owing to the more favourable news received this morning per Imperatrice, advising also a reduction of 6d per lb in the duty on tea, an advance has taken place. The rate for rupees remains the same, and being about equivalent to a dollar remittance bullion shipments have in many instances been preferred. Shares are at present quite neglected, and quotations are generally lower. Closing Quotations—On London, 6 months' sight, 4s 4⅛d; on Calcutta, 3 days' sight, 216½ rs; on Bombay, 3 days' sight, 217½ rs; on Shanghai, 3 days' sight, 72 tls; on ditto, 15 days' sight, 72¼ tls; on ditto, 30 days' sight, 72½ tls; on ditto, 60 days' sight, 73 tls; Singapore, 15 days' sight, ½ per cent. prem.; bar silver, 10½ per cent. prem.; Sycee, 8½ per cent. prem.; clean Mexicans, 2 per cent. prem.; gold leaf, $23 per tael; gold bar, California, $22.95 per tael, equivalent to 100 touch; ditto Peking, 98 touch, $22.25 per tael; American double eagles, $18.25 each; sovereigns, $4.55 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 6 per cent. prem.; Union Dock shares, 15 per cent. prem.

The shipments of gold from Melbourne from Jan. 1 to May 23 amounted to 613,777 ounces. Of this quantity, 65,446 onnces were the produce of New Zealand. Last year, in the same period, the shipments were 659,216 ounces, 555,661 ounces being Victoria, and 103,555 ounces New Zealand gold.

The following is a statement of the business at the United States Assay Office at New York, for the month ending June 30, 1865:—

	dols	c	dols	c
Deposits of Gold.

Total	5,195,635	.....	511,350	0

Annexed is a report of the Albany lumber market for the week ending July 3:—Lumber has arrived in fair quantities during the week, though the receipts are about three millions feet short of the previous week. Shingles are scarce, both shaved and sawed. There is a good assortment of lumber in market, and a full supply. The market has been inactive, with a light attendance of buyers. Prices are down a little on clear pine and hemlock, but other kinds are held with considerable firmness, with the impression that they are now at their lowest point. Receipts for season to date:—Boards and scantling, 48,823,515 ft; shingles, 3,500 M; staves, 12,825,030 lbs.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending June 24, 1865, compared with the previous month:—

	May 27, 1865.	June 24, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	21251548	20877112	...	374436
Private Banks	3000546	2896772	...	103774
Joint Stock Banks	2847871	2747088	...	100783
Total in England	27099965	26520972	...	578993
Scotland	4596951	4557706	...	39245
Ireland	5930449	5762208	...	168241
United Kingdom	37627365	36840886	...	786479

And, as compared with the month ending the 25th of June, 1864, the above returns show an increase of 235,898*l* in the circulation of notes in England, and an increase of 544,862*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,292,319*l*, the English joint stock banks are below their fixed issue 479,269*l*,—total below fixed issue in England, 1,771,588*l*: the Scotch banks are above their fixed issue 1,808,435*l*; the Irish banks are below their fixed issue 592,286*l*. The average stock of bullion held by the Bank of England in both departments during the month ending June 21 was 16,009,921*l*, being an increase of 1,043,607*l* as compared with the previous month, and an increase of 1,830,132*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,490,749*l*; gold and silver held by the Irish banks, 2,076,401*l*; total 4,567,150*l*; being a decrease of 32,864*l* as compared with the previous return, and an increase of 130,258*l* when compared with the corresponding period last year.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 24th day of June, 1865:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300465	514934	310884
Royal Bank of Scotland	216451	580509	425681
British Linen Company	438024	522204	243823
Commercial Bank of Scotland	374880	564696	281926

Central Bank of Scotland	42923	66674	27918

The annual return has recently been issued of all the sums paid for duty on insurances against fire during the past year by each of the fire insurance companies of the United Kingdom. This is the first and will be the only return embodying the differential rates of duty on stock (1s 6d per cent.), and buildings and furniture (3s per cent.), those differential rates which commenced at Midsummer, 1864, having now been abolished by the uniform reduction to 1s 6d. Annexed is a list of the offices, showing the total amount collected and the amount at each rate of duty separately, thus exhibiting the singularly different proportions in which they insure the different classes of property. It appears that the Royal has the largest relative proportion of insurances on stock:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of July, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,798,880	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	14 148,880
		Silver Bullion	...
	28,798,880		28 798 880

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,398 909
Rest	3,460,096	Other Securities	20 496 546
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,932 103	Notes	6 564,445
		Gold and Silver Coin	934 487
Other Deposits	14,894 217		
Seven Day and other Bills	554,971		
	38,394,387		38,394,357

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,789 406	Securities	30 992,455
Public Deposits	4,932 103	Coin and Bullion	15,083,367
Private Deposits	14,894,217		
	42,615,726		46,075,822

Dated the 20th July 1865. W. MILLER, Chief Cashier

The balance of Assets above Liabilities being 3,460,096*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£154,156
An INCREASE of Public Deposits of	341,870
A DECREASE of Other Deposits of	1,335,028
No change in Government Securities.	
A DECREASE of Other Securities of	664 459
A DECREASE of Bullion of	451,099
An INCREASE of Rest of	31,756
A DECREASE of Reserve of	292,589

There is a decrease of 292,589*l* in the reserve, owing to the large withdrawals from private deposits. The amount of the public deposits has increased, and that of the private securities has decreased. The coin and bullion have been drawn on to the amount of 451,099*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	21,834,703	22,942,503	22,230,612	22,302,688	22,783 406
Public deposits	3 178,033	5 291,213	5,386,948	4.462,490	4,932 103
Other deposits	13 604,199	17,202 923	14,675,625	13,408,675	14,894,217
Government securities	13,071,978	10,952,679	11,096,888	11,092,125	10 338,909
Other securities	12,716 108	19,581 822	19.871,886	19,381,960	20,496,546
Reserve of notes & coin	9.871,287	10,507,562	7,667,567	6,126,006	7,498,932
Coin and bullion	16,644,152	17,060,617	14,620,872	13,171,561	15,083,367
Bank rate of discount	3½ p.c.	2 p. c.	4 p. c.	6 p. c.	3 p. c.
Price of Consols	90⅞	93⅛	93	91¼	90⅝
Average price of wheat	76s 4d	56s 11d	46s 7d	42s 6d	43s 1d
Exchange on Paris (short)	25 2½ 7½	25 17½ 25	25 22½ 30	25 17½ 22½	25 12½ 20
— Amsterdam ditto	11 17 17½	11 15½ 16	11 15⅝ 16¼	11 17½ 17⅝	11 17½ 18¼
— Hamburg (3months)	13 7½ 7⅝	13 7⅞ 8	13 8¼ 8½	13 8½ 8⅝	13 9½ 9⅝

In the corresponding week of 1855 a vehement debate had taken place in the House of Commons relative to Lord John Russell and the Austrian proposal. Lord John Russell's resignation had been accepted by Her Majesty. Mr Roebuck's motion reprehending the Cabinet for the disastrous results of the war had been carried by a majority of 289 to 182. The French revenue returns were satisfactory. The money market continued easy.

In 1862, news had reached London of the defeat of General M'Clellan before Richmond, after six days' fighting. Money was easy, and the general markets were quiet.

In 1863, Earl Russell had announced the decision of the Government not to go to war on behalf of Poland. The money market was quiet, with little business doing.

In 1864, negotiations had been opened for a treaty of commerce between Switzerland and Italy. The Italian Parliament had been prorogued. A royal decree had been issued regulating the legal position of the stockbrokers of Turin and authorising the constitution of a corporation of stock brokers. The Belgian Chambers had been dissolved. In America, the Confederates had invaded Maryland, and occupied Frederick. Mr Fessenden had accepted the office of Secretary to the Treasury. The demand for discount was active. An almost general rise had taken place in the foreign stock markets.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 888,091*l*; in 1862, a deficiency of 2,378,899*l*; in 1863, a deficiency of 5,196,261*l*; and in 1864, a deficiency of 5,873,285*l*. In 1865, the deficiency is 5,602,329*l*.

DISCOUNT AND MONEY MARKET.—There is more inquiry, the state of the market showing decidedly increased activity. The exchanges on Tuesday last showed symptoms of weakness from which there is no present sign of recovery. Some amounts of gold have been taken for export to Spain, and these circumstances, added to the drain upon the Bank for election and harvest purposes, have strengthened the impression that an advance in the rate of discount is at hand. In Lombard street 3½ per cent. is asked, and in consequence an increase of business is experienced at the Bank. The applications to-day have been numerous, and the following rates for paper having various periods to run show the alteration to which we have referred:—

30 to 60 days	3	per cent.
3 months	3½	per cent.
4 months	4	per cent
6 months—Bank bills	4½	per cent.
6 months—Trade ditto	5	per cent.

In the Stock Exchange money is in greater request at 2½ per cent. for short periods on Government securities.

Annexed are the rates of interest allowed on deposit:—

Joint Stock Banks	*2	per cent.
Discount houses at call	2	per cent.
Do. with seven days' notice	2¼	per cent.
Do. fourteen days	2½	per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*

Bullion.—4,000*l* have been withdrawn to-day from the Bank.

The following are the rates of discount current in the chief continental cities. In Paris the Bank rate is maintained, and in Hamburg it has advanced to 3 per cent.

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5¼ ¾
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4½ 5
Brussels	3	3
Madrid	9	...
Hamburg	...	3
St Petersburg	6	6½

The Bank of France return this week gives the following results on a comparison with that last issued:—

INCREASE.	£
Commercial bills	290,000
Notes	600,000
Treasury balance	10,000
DECREASE.	
Cash in hand	162,800
Current accounts	360,000
Advances	24,000

ENGLISH GOVERNMENT FUNDS.—The same want of animation prevails, and transactions being on the most limited scale, there are few variations in quoted prices. The supply of money has been sufficient to prevent any sales of import-

Digitized by Google

ance, and the movement in Consols have been limited to ⅛ per cent. The closing price is 90 to 90⅛ for money and for the account. New 3 per Cents. and Reduced 89¾ to 89⅞. India 5 per Cents. 104⅝ to 104⅞.

Exchequer bills are quoted at par to 4 pm. India bonds, 18s to 22s.

FOREIGN STOCKS.—Spanish Passive stock and the Certificates have been dull, rather on account of a few sales, which easily influence a limited market, than from any important element of a nature to affect their prospects of a speedy settlement. In most securities there has been the smallest possible amount of business. In a few cases the natural course of investments has led to a slight improvement in prices. Russian and Turkish stocks have advanced rather steadily. The following are the closing prices of stocks dealt in to-day: —4½ per Cont. Brazil, 1850, 79 to 81. 7 per Cent. Danubian, 77 to 79. 7 per Cent. Egyptian, 97 to 98; ditto, 2d issue, 96½ to 97½; 7 per Cent., do, 1864, 93¾ to 94¼. 5 per Cent. Italian, 1865, 77 to 77½. 3 per Cent. Mexican, 23⅞ to 24⅛. 3 per Cent. Portuguese, 47¼ to 47¾ ex div. 3 per Cent. Russian, 1859, 56 to 57; 5 per Cent. ditto, 1862, 91¾ to 92¼. 3 per Cent. Spanish, 48 to 49 ex div.; ditto, Deferred, 39¾ to 40¼; ditto, Passive, 28¾ to 29; ditto, Certificates, 13¾ to 14. 6 per Cent. Turkish, 1854, 94 to 95; ditto, 1858, 73 to 74; ditto, 1862, 73 to 73½; ditto 1863, 69 to 71; 5 per Cent. ditto, 1865, 44¼ to 44¾. 5 per Cent. Italian, 1861, 63¾ to 64¼.

The closing price of French 3 per Cent. rentes, telegraphed this evening from Paris, is 67f 72c.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The decline in prices has made further progress this week, owing to increased apprehension as to the dividends to be looked for at the approaching distribution. Metropolitan stock has declined considerably. Business, generally, has been on a very small scale, Lancashire and Yorkshire stock is 1½ per cent. lower; and London and North-Western ¾ per cent. lower. Metropolitan stock notes a decline of 3 per cent., and Midland of 2 per cent.

Indian guaranteed securities continue firm, the operations of investors in the present unsatisfactory state of the markets in miscellaneous shares being, in many cases, confined to shares and bonds issued by the Indian or Colonial Governments.

American securities are rather lower: 5-20 United States bonds, 71¼ to 71½.

The market in financial and miscellaneous shares is flat, and there is little business doing.

The Committee of the Stock Exchange appointed Thursday last as a special settling day in the 50,000 preference shares of the Atlantic Telegraph Company, recently issued by the Credit Foncier and Mobilier (Limited). These shares are already quoted in the official lists. The Committee have also allowed the shares of the Dagenham (Thames) Dock Company (Limited) to be marked in the twice-a-week list.

The Union Bank of Australia invite tenders for Queensland Government Six per Cent. Debentures for 500,000*l*, being the first issue under an act authorising a total of 1,019,000*l*. These debentures will be redeemable the 1st January, 1884. Principal and interest are payable in London or Brisbane. The payments are to be 10 per cent. at once, and the balance on the 12th October next.

The biddings for 250,000*l* Government bills on India took place at the Bank of England on Wednesday last, The proportions allotted were:—To Calcutta, 177,000*l*; to Bombay, 55,000*l*; and to Madras, 22,400*l*. The minimum prices were, as before, 1s 10⅛d on Calcutta and Madras, and 1s 10¾d on Bombay. Tenders on Calcutta and Madras at 1s 11⅜d will receive about 54 per cent., and Bombay at 2s in full.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

RAILWAY DIVIDENDS.—The dividend on Manchester, Sheffield, and Lincolnshire Railway stock has been officially announced at 1 per cent. per annum, against 2½ per cent. per annum for the corresponding period of last year.

The directors of the London, Brighton, and South Coast Railway have decided on recommending a dividend for the half-year of 2*l* 10s per cent. on the consolidated stock of the company.

FOREIGN EXCHANGES.—Rates declined on Tuesday last, and were again rather lower to-day.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The only arrivals we have to report this week are:—The Tasmanian, from the West Indies, with 98,600*l*; the City of Boston, from New York, with 3,080*l*. 95,000*l* in sovereigns and bars, and 100,000*l* in French gold coin, have been withdrawn from the Bank since the date of our last circular. There is a good demand for the Continent, and any immediate arrivals would be taken for export. The Massilia took 16,000 sovereigns for Alexandria, and the Messageries steamer, via Marseilles, 116,000*l* for ditto. 649*l* has also been shipped to Madras, per Massilia. The Australian gold ships known to be at sea are:—The Wellesley, sailed 11th April, with 17,000*l*; the Suffolk, sailed 25th April, with 122,800*l*; the Swiftsure, sailed 20th May, with 286,000*l*. The first-named vessel is overdue, and the second may be expected daily.

Silver.—The only arrival this week is the Tasmania, from the West Indies, with 121,000*l*. A large portion of the Dore was sold at 61d per oz standard; owing, however, to an increased continental demand, some was subsequently sold at 61¼d. The fine realised 60⅝d per oz standard. The shipments are:—Per the Massilia, for Calcutta, 45,700*l*; ditto, for Hong Kong, 10,000*l*.

Mexican Dollars.—Sales of Mexican dollars have been made at 59½d per oz; this price could not however be now obtained, there being no opportunity for shipment before 2nd proximo. The shipments are:—Per the Massilia, to Hong Kong, 2,750*l*; ditto, to Shanghai, 19,150*l*; per the Messageries Steamer of 19th, via Marseilles, 13,000*l*.

Exchange on India for drafts by by the banks, at 60 days' sight, may be quoted as follows:—Calcutta and Madras, 1s 11¼d to 1s 11⅜d; Bombay, 1s 11¼. to 2s. The Council drafts sold yesterday realised former prices, biddings on Calcutta and Madras at 1s 11⅜. receiving about 52 per cent., those on Bombay at 2s in full.

India Government loan notes remain at last week's quotations, which

Digitized by Google

are as follows:—For 5½ per Cents., 109 to 111; for 5 per Cents., 101 to 103; and for 4 per Cents., 89 to 91.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 73s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0¾d per oz std, last price; ditto, containing 5 grs gold, 5s 1¼d per oz std; Mexican dollars, 4s 11½d per oz., last price, nominal; 5-franc pieces, 4s 11¼d to 4s 11¾d per oz., nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The Master of the Rolls has appointed Mr Frederick Whinney and Mr F. D. Hartland joint official assignees of the London, Hamburg, and Continental Exchange Bank (Limited).

Advices from Melbourne mention the following mercantile suspensions:—Messrs Carter and Watts, with liabilities estimated at 21,000*l*, and assets 8,000*l*. Messrs Howitz and Marks, liabilities 26,512*l*, and assets 29,016*l*. A proposed dividend of 5s in the pound on the estate of Messrs Davis and Co. has been finally received.

A meeting of the creditors of Messrs F. Levick and Co., and Messrs Levick and Simpson, of London and Blaina Ironworks, in Monmouthshire, was held on Thursday. The balance sheet presented showed a large surplus. It was unanimously resolved to wind up the estate under inspection.

PUBLIC COMPANIES.—At the meeting of the London Joint Stock Bank, held on Thursday, the directors' report was adopted. A dividend and bonus equivalent to 18 per cent. per annum were declared, and a balance of 25,925*l* carried forward.

The Anglo-Ionian Steam Navigation Company have declared an interim dividend of 5 per cent. per annum for the six months ended June 30th, payable on the 7th August.

The meeting of the New Zealand Trust and Loan Company was held on the 20th instant, when the report was adopted, and a dividend at the rate of 10 per cent. per annum declared.

The directors of the Midland Banking Company (Limited) have issued their report, to be presented at the general meeting on the 28th instant. The disposable balance is stated at 7,095*l* 10s 2d, out of which a dividend is recommended, at the rate of 5 per cent. per annum, free of income tax, which will leave 1,000*l* to be carried to the reserve fund, and 2,106*l* 7s 8d to new account.

The half-yearly general meeting of the City Bank was held on Tuesday last. The directors' report was unanimously adopted, and a dividend declared of 6 per cent. per annum on 500,000*l*, the paid-up capital, together with a bonus of 2*l* 5s per share on 10,000 shares, being at the rate of 15 per cent. per annum.

The half-yearly meeting of the Bank of New Zealand was held at Auckland on the 28th April. The net divisible profit to the 31st March amounted to 52,876*l*, out of which a dividend and bonus, equal to 15 per cent. per annum were declared, 15,000*l* added to the reserve fund, and 2,691*l* carried forward to new account.

At the annual meeting of the National Bank of Australasia, held at Melbourne, on the 2nd May, the directors' report was adopted. It showed net profits for the year amounting to 35,440*l*. A dividend, at the rate of 10 per cent. per annum was declared, 15,000*l* added to the reserve fund, and the balance of 440*l* 19s 6d carried forward to next account.

The annual meeting of the Metropolitan and Provincial Bank (Limited) was held on Thursday, when the directors' report was adopted. It stated that the profits of the past six months had been absorbed by previous losses, and that consequently no dividend could be declared.

At the half-yearly meeting of the London and Westminster Bank, held on Wednesday last, the directors' report was adopted. The net profits for the half-year were stated at 151,498*l* 7s 8d. A dividend at the rate of 6 per cent. and a bonus of 10 per cent. on the paid-up capital were declared.

At the meeting of the Consolidated Discount Company, held on Wednesday, the directors' report was adopted. It was stated that no bad debts had been made during the last six months, and that the purchase money had been reduced to 13,880*l* by the transfer of the shares of Messrs Sandeman and Saunders to the Company.

The report of the directors of the Bank of Egypt, to be submitted at the general meeting on the 28th inst., has been published. The net profits are stated at 16,966*l* 18s. 3d. A dividend at the rate of 10 per cent. per annum.

The half-yearly report of the directors of the Peel River Land and Mineral Company (Limited), has been published. An interim dividend of 1½ per cent., free of income tax, upon the consolidated stock of the company, is recommended.

The directors of the Scottish Australian Investment Company (Limited), have issued their report, to be presented at the half-yearly meeting on the 28th inst. The profits for the six months is stated at 18,256*l* 0s 5d. A dividend is proposed on the ordinary stock of the company at the rate of 10 per cent. per annum, free of income tax.

The directors of the Brighton Hotel Company (Limited) have paid an interim dividend of 6 per cent. per annum.

The report of the National Discount Company (Limited), to be submitted at the general meeting on the 26th instant, has been published. The net profits, with the balance brought forward from December last, amount to 70,092*l* 0s 5d. After paying a dividend at the rate of 2 per cent. per annum, free of income tax, the directors propose to carry forward to the next account the sum of 10,092*l* 0s 5d.

The general meeting of the Imperial Bank (Limited) was held on Monday last. The directors' report was adopted, and a dividend declared at the rate of 8 per cent. per annum, free of income tax.

At the meeting of the London Financial Association, held on the 17th instant, the net profits for the year were stated at 108,943*l*. A dividend and bonus, equal to 15 per cent. per annum, were declared, and a balance of 62,660*l* carried forward to next half-year.

The half-yearly meeting of the Bank of New South Wales, was held at Sydney on the 26th April, when the accounts submitted showed a net sum of 90,844*l* for division among the shareholders. A dividend and bonus were declared, equal to 18 per cent. per annum, leaving 3,669*l* 15s 6d to be carried over to the present half-year.

The half-yearly meeting of the proprietors of the Bank of London was held to-day. The balance of profit was stated at 66,547*l* 11s 4d. A dividend and bonus, equal together to 20 per cent. per annum, were declared, free of income tax, and 2,324*l* 5s 9d transferred to the reserve fund.

At the meeting of the shareholders of the Alliance Bank, held to-day, the report was unanimously adopted, and a dividend of 5 per cent. per annum, free of income tax, declared.

The City Terminus Hotel Company (Limited) is announced. The proposed capital is 140,000*l* in 14,000 shares of 10*l* each. The company have entered into an agreement with the South-Eastern Railway, for a lease of 1,000 years, on favourable terms. The building is already in progress of erection in Cannon Street.

The Tamar Lead and Silver Smelting Company (Limited) is established to purchase and work extensive smelting works, near Plymouth, which are held on favourable terms. They have been long established, are well known in the neighbourhood, and the sellers will deposit in the hands of the directors sufficient security to guarantee a minimum dividend of 12 per cent. per annum for three years. It is not intended to call up more than 18,000*l* of capital. The shares are 1¾ to 2¼ premium.

Stephen Cave, Esq., of the firm of Messrs Prescott, Grote, Cave, and Cave, bankers, has joined the direction of the Accidental and Marine Insurance Corporation. The shares to-day were quoted at 2⅛ to 2⅜ premium.

The share list of Warren's Blacking Company (Limited) will be closed on the 29 July for London, and 31 for the country.

MISCELLANEOUS.—Venezuela Six per Cent. Loan, 1864.—The General Credit and Finance Company of London are in receipt of advices from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 24th June, 1865, of duties collected as follows on account of the above loan:—Per statement No. 34, from La Guayra, 24,749.80 dols; per statement No. 35, from La Guayra, 11,084.50 dols; per statement No. 36, from La Guayra, 2,337.10 dols; per statement No. 46, from Puerto Cabello, 50.50 dols; per statement No. 47, from Puerto Cabello, 5,601.96 dols; total, 43,823.86 dols.

Mr Sydney Alers Hankey has been admitted a partner into the house of Tod, Heatly, and Co.

The prospectus has been issued of the Anglo-Greek Steam Navigation Company, with a capital of 750,000*l* in shares of 25*l* each. The Company has been started under the auspices of the King of the Greeks, and promises to be of great utility to the mercantile classes. We are informed that provisional contracts have been made for the purchase of 5 steamers on favourable terms.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428½ per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 109 per cent. At this rate there is no profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Although the supply of English wheat on sale at Mark lane, to-day, was very moderate, and the condition of the produce good, the trade for all qualities was in a sluggish state, yet prices ruled firm. A limited business was transacted in foreign wheat, at late rates. The supply of barley was almost entirely confined to foreign samples, which sold slowly, at previous quotations. Oats were in good supply, and most qualities were in fair demand, at the late decline in their value. Beans and peas were dull, with a downward tendency in price. In flour, about an average business was transacted, at late rates. *New* English rapeseed was dull, and lower in price, the finest samples having sold at 80s to 82s per quarter. This week's import consists of 8,130 quarters of wheat, 6,880 barley, 53,160 oats, 40 sacks, and 1,110 barrels of flour.

The Liverpool cotton market opened on Friday with a brisk market, prices advancing slightly on previous quotations, and on Saturday and Monday large sales were effected at rising rates, the market being very excited, but on Tuesday the furore began to cool down, and on Wednesday things were decidedly flat, but the market closed steady, with more business doing. The sales of the week amounted to 87,810 bales, of which 17,390 bales were exported; speculators taking 22,390 bales, and spinners 48,030

Digitized by Google

bales. To-day (Friday) the market has been firmer, with slightly improved prices, sales amounting to 10,000 bales.

At Liverpool, this morning, the trade for wheat, flour, and maize was dull, and prices were somewhat lower. At Wakefield, wheat sold slowly, at about previous rates; but the trade for barley, beans, and peas was tolerably firm.

Advices from Calcutta state that during the week ending June 8, there had been an improved demand for cotton, on rather higher terms. The export in May was as follows:—To England, 6,784; to China, 908 bales.

The cotton trade at Madras for the fortnight ending June 13 was firmer, with an upward tendency in prices. Western produce was quoted at 8 3-5d per lb. The arrivals of the new crop had been inconsiderable. The following table of shipments is from Messrs Dymes, Cartwright and Co.'s circular:—

EXPORTS of COTTON from the PORT of MADRAS for Five Months.

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.
In May, 1865	23,972	477	25	24,474
In previous four months	97,731	1,706	402	99,839
Total for five months	121,703	2,183	427	124,310
Against same period 1864	104,018	8,499	1,073	113,590
— — 1863	88,528	5,343	2,723	96,594
— — 1862	55,513	6,295		61,808
Against the whole of 1864	297,235	15,809	2,557	315,601
— — 1863	422,101	35,177	6,741	464,019
— — 1862	234,745	11,475		246,220

Official returns state that the quantity of land under cotton cultivation in the Madras Presidency at the close of May was 1,682,595 acres, against 1,756,968 acres at the corresponding period last year.

We learn from Shanghai that the exports of cotton to Great Britain had entirely ceased. The business doing in that staple at the date of our latest advices was almost entirely for shipment to Amoy and Hong Kong. Best Kong-Pek was quoted at 14 to 14·5 taels per picul.

Advices from Yokohama state that so little business was passing in cotton that prices ruled almost nominal. The exports since June 1, 1864, had been 24,661 bales, viz., 17,109 bales to England, and 7,552 bales to Hong Kong; against a total of 63,298 bales during the corresponding period in 1863-4.

At Pernambuco, during the fortnight ending June 28, the cotton trade was in an excited state, and transactions were effected at the annexed rates:—Pernams, on shore, 13 93.100d to 14 12.100d; Maceios, on board, 13 9.100d to 13 50.100d per lb, with 5 per cent. commission, but without freight and insurance. The arrivals had been about 3,500 bales. Freight to Liverpool, ½d to ⅝d per lb.

A more healthy tone has pervaded the markets for colonial and foreign grocery produce. The tea trade, however, continues to exhibit a want of firmness; but as regards sugar, coffee, cocoa, and rice, previous quotations are well supported. Trinidad cocoa —owing to the limited extent of the crop—has changed hands at enhanced rates. Last week, duty was paid in London on 1,092,774 lbs of tea, whilst the export for the week ending July 13 was 479,888 lbs, making a total of 1,572,662 lbs, against 1,265,343 lbs last year.

The arrivals of sugar at Pernambuco during the fortnight ending June 28, were small. For all qualities the trade was quiet, as follows:—Whites, No 1 to 2, 32s 11d to 34s 5d; No. 3, superior, 31s 6d to 32s 2d; No. 3, regular, 29s 11d to 30s 8d; No. 4, 28s 4d to 29s 1d; muscovado yellow, 20s to 20s 4d; good brown, 17s 8d to 19s 7d; ordinary unclayed brown, 16s 11d per English cwt of 3½ arrobas, free on board, with 5 per cent. commission, but without freight and insurance, at the exchange of 24¼d.

Advices from Colombo to the 17th ult. state that the arrivals of *new* native coffee had been moderate, and that business had been done at higher prices—unpicked being quoted at 45s; picked and dried ditto at 50s 6d to 51s per cwt. Plantation coffee was quite nominal in value, scarcely any of that description of produce being on offer. The subjoined table of shipments is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from COLOMBO from Oct. 1 to June 17

Foreign ports	14392	7602
Australia and India	2484	2750
	200956	110902

Owing to more favourable advices from the United States, the coffee trade at Rio during the fortnight ending June 24, was very firm, and considerable business was done for shipment to New York at enhanced rates. The prices current were as follows:—Ordinary quality, 49s 11d to 54s 3d; regular first, 57s 10d to 59s 4d; good first, 61s 6d to 62s 2d; prime good first and superior, 63s 8d to 68s; round lots, 56s 5d to 59s 4d; better selections, 60s 8d to 63s; washed coffees, 70s 11d to 78s 2d per cwt, free on board.

In the English wool trade there has been a somewhat improved feeling, and the transactions have slightly increased, whilst prices have ruled firm. The supply of colonial wool in the market is now about 110,000 bales.

The wool "season" at the leading Australian ports at the date of our latest advices had been almost brought to a close. The arrivals of produce had been small from all quarters, and the quotations in a great measure nominal. The following were the prices current:—At Melbourne:—Greasy, inferior to ordinary, 7d to 9d; ordinary to average, 9d to 10d; good to superior, 11d to 1s 1d; ditto ditto cross bred, 1s 1d to 1s 2d. Fleece, inferior to ordinary, 1s 3d to 1s 5d; ordinary to average, 1s 5d to 1s 7d; good to superior, 1s 9d to 2s 1d. Scoured, ordinary, 1s 4d to 1s 7d; good, 1s 8d to 1s 10d; superior, 2s to 2s 2d per lb. At Sydney:—Scoured, 1s 8d to 1s 10d; ditto, 1s 5d to 1s 7d; seedy and skin, 1s to 1s 4d. Fleece, nominal; ditto, 1s 3d to 1s 4d; and low, 11d to 1s 1d. Greasy, 9d to 10½d; ditto, 6d to 8d; seedy and low, 4d to 6d per lb.

The supplies of silk on sale are small, and the trade is very firm at high prices. Stocks are much reduced, and, in several instances, the quotations are at a higher point than in any period during the last thirty years. The following statement, showing the state of the London warehouses, is from Messrs Durant and Co.'s circular:—

STATE of the SILK WAREHOUSES.

	Sold Stock. July 1, 1865. bales.	Sold Stock. July 1, 1864. bales.	Unsold Stock. July 1, 1865. bales.	Unsold Stock. July 1, 1864. bales.
Bengal	3,517	2,922	879	3,793
China	3,639	8,056	182	4,692
Japan	2,909	3,986	849	3,426
Canton	14	529	64	...
Chinese thrown	18	376	18	333

	Delivered. June. 1865. bales.	Delivered. June. 1864. bales.	Delivered. Jan. 1 to July 7, 1865. bales.	Delivered. Jan. 1 to July 8, 1864. bales.
Bengal	966	774	5,281	3,137
China	2,012	2,535	14,761	14,669
Japan	1,046	1,723	6,475	9,538
Canton	16	271	366	1,644
Chinese thrown	15	90	100	524

Our latest postal advices from Shanghai, viz., to the 21st of May, state that the yield of the *new* crop was variously estimated at from 45,000 to 60,000 bales, and that the first arrivals were expected about the first week in June. The supply of old silk on sale was exceedingly small, and prices ruled high. Contracts were reported to have been made in *new* No. 4 Taatlees at 390, and in No. 3 ditto at 413 to 420 taels per picul. Annexed is the statement of settlements, shipments, &c., since June 1, 1864:—

	1864-5. bales.	1863-4. bales.	1862-3. bales.
Receipts	40,200	39,700	71,800
Settlements	40,200	39,000	71,500
Exports	39,282	38,369	70,889
Remaining unshipped or afloat in harbour	918	631	611

We have letters from Yokohama to May 13. During the fortnight prior to that date, there had been a good demand for silk, but at reduced rates. The settlements were over 1,000 bales, whilst the stock at latest date was about 1,200 bales. The export to all quarters since June 1, 1864, had been 14,083 bales, viz., 2,289 bales to Shanghai, 257 to Hong Kong, 7,900 to England, and 3,637 bales to foreign Europe, against a total of 15,290 bales during the corresponding period in 1863-4. The quotations in Mexican dollars, duty unpaid, were as follows:—

	Best. per picul. $	Medium. per picul. $	Inferior. per picul. $

The quarterly public sales of East India indigo were brought to a close on Thursday. The opening rates for Bengal, as compared with May sale, were par to 3d discount for consuming and ordinary kinds, par for middling, and par to 3d advance for good middling to good shipping qualities, but as the sale proceeded these rates were scarcely maintained; many parcels were sold without support, and the prices finally established were 2d to 4d discount for ordinary, par to 3d decline for middling, good middling to good realising full May rates to 3d advance. A parcel of fine Bengal was held for 4d to 6d advance, but only a few lots were sold. Oudes throughout have brought May rates, but ordinary kinds were completely neglected. Of the total quantity brought forward, 12,381 chests, 5,500 were withdrawn, and 1,888 bought in,

Digitized by Google

leaving 4,993 chests sold in the room, to which must be added 600 of the withdrawn or bought in, making a total of 5,600 chests sold.

Oils, metals, and tallow have been in very moderate request. No changes of importance, however, have taken place in prices. Linseed oil, 32s 3d per cwt.; Scotch pig-iron, 54s 4½d per ton, cash, mixed numbers; and St. Petersburg Y.C. tallow, 41s 6d per cwt., on the spot.

Owing to the advance in the raw material, and the limited supply on offer, the market for cotton goods at New York, during the week ending July 8, was very firm, and most descriptions changed hands at further enhanced rates. Larger supplies, however, had been received from abroad, but they found a ready market, at advancing prices. The foreign imports of dry goods for the preceding week were valued at 279,200*l*, against 124,180*l* last year, and 158,130*l* in 1863. In wool, there was continued firmness apparent, whilst in most descriptions of woollen goods, a fair average business was doing, at fully late rates. The supplies of silk goods on sale were small, and prices continued to rule high. Subjoined is a comparison of the value of the foreign imports of dry goods at New York during the six months ending June 30, current year, with the corresponding period in 1864, 1863, 1862, 1861, and 1860; the calculations are made at 4s the dollar:—

Manufactures of—	1865. £	1864. £	1863. £	1862. £	1861. £	1860. £
Wool	1,846,640	3,881,400	2,364,990	2,177,940	1,915,940	3,175,620
Cotton	765,810	1,133,100	935,780	941,200	1,175,120	2,012,540
Silk	1,099,260	2,375,940	1,316,840	948,210	1,965,130	3,537,839
Flax	1,015,250	1,206,550	1,117,170	648,030	436,770	604,630
Miscellaneous	257,880	512,360	345,030	196,240	435,710	595,220
Total	4,924,840	9,109,350	6,079,810	4,911,620	5,928,670	9,925,840

In the general state of the grocery produce markets, there had been a fair amount of activity, and prices ruled firm. The export demand for breadstuffs continued to improve, whilst the tendency of prices had been in a favourable direction. Naval stores were in good request, spirits of turpentine having advanced to $1.42½ per 280 lbs. The stocks in yard on the 1st inst. were as follows:—

	1865. bbls	1864. bbls	1863. bbls
Turpentine	1,148	62	none
Spirits of Turpentine	604	2,308	1,000
Rosin	6,166	2,576	1,664
Tar	2,733	5,130	10,861

The fluctuations in the value of gold were trifling, the leading transactions being at 139, 139½, and 139¾ per cent. Money commanded rather more inquiry: prime short-dated paper was quoted at 6 to 7; three to four months' ditto, 6½ to 7½ per cent. The shipments of specie for the week ending July 1 were confined to 20,100*l*, making a total since Jan. 1 of about 3,597,790*l*, against 5,853,800*l* last year, and 4,117,520*l* in 1863. The balance in the Sub-Treasury on the 1st inst. was 8,564,500*l*; and the stock of bullion in the banks, 3,171,000*l*.

THE COTTON TRADE.

LIVERPOOL—JULY 21.

On Saturday, after receipt of advices from New York of a rise of 6 cents, the market was active, and a large business was done at advancing prices. On Monday the transactions became very extensive; but subsequently the inquiry has been comparatively limited, partly owing to the interruption of business caused by the election, and the market closed yesterday with only a partial advance upon last week's quotations. In Sea Island a fair business has been transacted, but the extensive choice gives to buyers a slight advantage. American advanced about 1d per lb in the early part of the week, but closed only ½d to ¾d above former rates. Brazil on Monday participated in the general excitement, and was saleable at fully 1d advance, which has since been lost in Pernam, and partially in Maceio and Maranham, the market closing with irregularity. Egyptian has been in great request, and rose 1½d, but since Monday has been more freely offered, and closed only ½d above last week. Smyrna is scarce, and has risen 1d to 1½d during the week. East India descriptions were much inquired for at the beginning of the week, and an advance of 1d to 1½d per lb on the quotations of Friday last was freely paid on Monday for the better grades. During the dulness which has succeeded about half of the advance has been lost, while the lower qualities having been neglected, no change of moment can be recorded. A good demand for China enabled holders to obtain an advance of ¾d to 1d per lb, only a part of which has been retained.

To arrive, several transactions were reported in the early part of the week. The last quotations were on Monday, Oomrawattee fair, July sailing, 12¾d; Madras, fair Western, ship named, 13d. On Tuesday Bengal fair merchants, April sailing, 8d; and yesterday, Egyptian fair open, ex quay, shipping or shipped, and at sea, 18d.

The sales of the week amount to 87,810 bales, including 22,390 on speculation, and 17,390 declared for export, leaving 48,030 bales to the trade. The sales to-day amount to about 10,000 bales, with a very steady market.

LONDON—July 21.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened with an improved demand, which gradually increased with advancing prices until Tuesday, when it met with a check, and the business during the last few days has been moderate. Prices, which, at the early part of the week had risen ¾d to 1½d per lb, have again receded about ½d per lb, Bengal and Scinde being ¼d to ½d, China and Japan ½d, and Madras ½d to ¾d dearer than on Friday last.

NEW YORK—July 8.

There has been an active demand for cotton this week, and the sales amount to about 20,000 bales, whilst an advance of 6 cents has taken place in prices, the quotation for middling Upland produce being 50 cents per lb. The arrivals comprise 9,140 bales, consisting of 4,728 bales from New Orleans, 1,044 Savannah, 389 Wilmington, 315 Newbern, 1,859 by rail, the remainder from sundry ports in the Southern States, the West India islands and China. The import from Sept. 1 to date is now 257,907 bales. The export in June was 4,882 bales, against 2,202 bales in June last year. The following are the prices current:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	39	39	39	39
Good ordinary	44	44	44	44
Middling	50	50	50	50
Good middling	52	52	52	52
Middling fair	55	55	55	55

Freight to Liverpool, 3-16d to ¼d per lb.

New York, July 11.—Middling Upland produce is quoted at 52 cents per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

There has been a fair, but by no means active, business doing in goods in the manufacturing districts, both for home use and export, at steady prices. The iron trade has been rather heavy, but the export demand for coals has continued firm.

Manchester, July 20.—At the close of last week a rally in the Liverpool cotton market brought out a few orders which had been held back. On Monday and Tuesday of this week, the higher value of material induced spinners and manufacturers to raise their rates. This at once prevented business, and the week has consequently been one of very small transactions. A few trifling purchases for China have been observed, but for the other Eastern markets scarcely anything has been done. In the Blackburn and East Lancashire districts very many looms are standing empty, both from the unprofitableness of working, and the difficulty of finding hands; and in other cases the looms are running solely in order to keep the hands together.

Bradford.—Sales of wool are far from numerous, but there is great confidence among holders, and prices are firm. There is extreme quietness in yarns. Next to nothing is done by the shipping trade, and the few sales for home consumption are chiefly in twofold yarns. There is not much life in pieces. Some large orders in fancies for America have been reported. The plain trade is very quiet.

Leeds.—Witneys, meltons, plain cloths, and tweeds, all met with a moderate demand, and for the heavier kinds of the first-named, with other winter fabrics, there was a good sale. The reports from the warehouses show that there is more doing by the export houses than lately was the case, and that the home trade is steady. Wools, yarns, and cloths all keep firm in price.

Huddersfield.—Some purchases have been made of better class fancies, and also medium fancies and plain goods. Somewhat more was doing in low goods, principally on shipping account.

Rochdale.—At the flannel market there has been more business done than on the last few market days. The plain goods trade is rather improving, and that for fancy goods keeps active. There is more generally doing for exportation than there was last month, shippers purchasing tolerably well of stocks for winter. Late prices are fully maintained for both plain and fancy goods. Yorkshire goods also maintain late prices, but the demand is slack. Wools are nominally the same as last week.

Cardiff.—The home inquiry for coals continues good, and there is no decrease in the quantity sent to the Mersey. The shipments of house coal are above the average, coasting buyers as a rule purchasing largely in the summer. Tin plates are firm, and there is no difficulty in entering into transactions at a slight advance in prices. The iron trade remains without any material change, makers being well off for orders.

Leicester.—The hosiery trade is healthy. The wool market is without much change. Worsted yarns are selling at high prices, and spinners are tolerably well employed.

Nottingham.—There is not much change in the lace trade. Business has been on the whole rather quiet. Cotton fabrics generally are in slow request. There is a tolerable sale for silk mechlins and black laces for trimmings. Stocks are kept exceedingly light. The hosiery trade continues in a satisfactory state. There are plenty of orders on hand both for shipping and the home market. The operatives are all well employed. Yarns are firm, and high in price.

Sheffield.—On the whole, the country trade is improving, travellers having resumed their journeys since the end of the half-year with good success, and better orders being moderately numerous. The railway orders are large, but in other respects the heavy trades are still languid.

Wolverhamton.—The iron trade of this district continues rather dull. In the hardware trades no improvement can be reported.

Birmingnam.—The demand for material is slack, and the brass-founders, electro-platers, and tinplate workers all of them concur in reporting business to be without the least animation.

Dundee.—There is no change to notice in our flax market. The business doing in goods on the spot is of moderate extent at about former prices. In jute, there is no change to notice. The yarn market is very steady. There is a good demand for linens, especially for the home markets. A considerable business has been doing in jute Hessians, prices of which have now a tendency to advance.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, July 8.—Moderate supplies of flour and wheat have been received this week, viz., 50,367 barrels and 441,410 bushels respectively, and the trade has ruled somewhat active, with a tolerably extensive export demand, at higher prices, flour having improved in value 30 to 40 cents per barrel, and wheat 5 to 6 cents per bushel. The receipts of corn have been 291,453 bushels, and most qualities have sold steadily at enhanced rates. The prices current are now as follows:—Flour—State, superfine brands, $5.25 to $5.60; State, extra brands, $5.95 to $6.10; State, choice brands, $6.15 to $6.30; Ohio, common brands, $6.60 to $6.75; Ohio, fancy brands, $6.80 to $6.85; Ohio, good and choice extra brands, $6.90 to $7.75; Michigan, Indiana, Wisconsin, &c., $5.25

Digitized by Google

to $6 30; Genesee, extra brands, $6 35 to $8.75; Missouri, $7.85 to $11; Canada, common, $6 to $6.25; Canada, good to choice extra, $6.30 to $8 per barrel. Wheat—Chicago spring, $1.26 to $1.30; Milwaukee Club, $1.27 to $1.30; amber Milwaukee, $1.31 to $1.32; winter red Western, $1.39 to $1.45; amber Michigan, $1.50 to $1.55; white Canada, $1.70. Corn—Damaged, 67c to 69c; unsound, 73c to 78c sound mixed Western, 78c to 81c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Somewhat increased supplies of English wheat have been received up to our market this week, in excellent condition. Owing, chiefly to the favourable reports at hand respecting the crops, and the continuance of remarkably fine weather, the demand for all kinds has ruled inactive. Prices, however, have been well supported. The imports of foreign wheat have been on a moderate scale. Selected samples have moved off steadily, on former terms. Inferior kinds have meet a heavy demand, at barely late rates. Scarcely any English barley has been brought forward, and the supply of foreign has continued only moderate. The trade for most kinds has been in a sluggish state, at previous quotations. Malt has been in good supply, and fair request, on former terms. Oats have further declined 6d per quarter, with only a moderate demand. So little has been doing in beans, that the quotations have ruled almost nominal. Peas have changed hands slowly, at barely stationary prices.

Harvest work has been commenced in our forward counties. The wheats are coming down well, but the yield of barley, oats, beans, and peas, is likely to prove under an average. The country markets have been scantily supplied with wheat, in which only a moderate business has been passing, at late rates. Most kinds of spring corn have met a slow inquiry. Our advices in reference to the potato crop are favourable. As yet, very few traces of disease are to be met with, and the growth promises to be considerably larger than last year.

On the continent most kinds of produce have sold to a fair extent, at full quotations. The shipments of breadstuffs from America are still slightly on the increase.

In Scotland there has been only a limited business doing in wheat, at late currencies. Barley and all other articles have met a dull inquiry.

The Irish markets have been heavy for most articles. In peas, however, the fluctuations have been trifling.

A very moderate supply of English wheat was received fresh up to Mark Lane, to-day, yet the trade was slow, but at full prices. In foreign wheat, a limited business was transacted, at late rates. English barley was quite nominal in value, whilst the trade for foreign produce ruled quiet, at previous quotations. Oats met a slow sale, at barely Monday's prices. Beans and peas were dull, and their value had a drooping tendency. The flour trade was quiet, at late rates.

Mr George Dornbush reports, the arrival off coast of 14 cargoes of grain, and a slow demand generally. In some instances wheat has given way 6d per quarter. In the value of other produce, very little change has taken place. Cotton seed has sold at 7l 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is steady, and some of the lower qualities as well as crystallised have sold rather dearer. A large business is reported in floating cargoes of foreign, chiefly for the United Kingdom. The home refiners have bought to a fair extent, consequently about 2,500 casks West India had sold to yesterday, including the portion sold by auction. Barbadoes, 30s to 36s 6d; crystallised Demerara, 36s to 39s per cwt. There was a large increase in the landings last week, and the stock at the close was augmented to 92,500 tons, against 89,800 tons in 1864. The week's delivery was 4,460 tons.

Mauritius.—1,508 bags partly sold: crystallised white, 40s 6d; yellow, 37s to 37s 6d; soft brown and yellow chiefly taken in at 28s to 31s per cwt.

Bengal.—800 bags Khaur have sold privately, at 27s per cwt.

Madras.—5,000 bags, offered by auction, sold readily at the extreme valuations: bright grainy yellow, 37s 6d; a few lots, 38s; grainy white, 11s 8d duty, 41s per cwt.

Penang.—Some business has been done privately at full prices.

Foreign.—By auction, 697 casks Porto Rico part sold at 32s to 39s. Five floating cargoes of Cuba have sold for the United Kingdom, at 21s 9d to 22s 3d; one of Havana molasses, at 21s; one of Porto Rico, at 24s; one of Cuba muscovado, at 22s 6d for the Continent; two of Havana, for near ports—No. 15, at 27s 6d; No. 13½ to 14, at 26s 9d. Privately, 1,500 bags unclayed Manilla have sold at 28s per cwt for superior quality.

Refined has not been active, but the demand is steady. Common dry goods at 42s 6d per cwt.

RUM.—Less inquiry prevails, but the late advance is maintained. Stocks have become very much reduced, viz., to 26,650 puncheons, 1,500 casks; against 34,370 puncheons 3,070 casks at the same time in 1864.

COFFEE.—The public sales have been large this week, but prices, with few exceptions, remain steady. 1,341 casks 370 barrels and bags plantation Ceylon sold at the full valuations: low middling to fine, 80s to 88s. 440 casks 4,221 bags native went about 6d cheaper for common kinds: ordinary to good ordinary, 66s 6d to 67s 6d; good to fine, 68s to 70s 6d. 3,115 packages East India nearly all sold: pale to fine, 73s 6d to 91s, Munzerabad 96s 6d to 102s; good Singapore Java kind 73s to 73s 6d. 213 bales Mocha partly sold at 92s to 92s 6d for mixed long berry. Of 6,511 bags Costa Rica, a great deal sold at 72s to 83s 6d. 937 bags Rio partly sold at 58s to 65s for sea-damaged and repacked. A floating cargo of St Domingo was sold for a near port, at about 65s.

TEA.—The sales on Tuesday and Wednesday passed off with irregularity, and in some instances at prices favourable to the buyers. Common to fair black leaf congou brought 11¼d to 1s 4d, being about previous rates, but common to fair red leaf sold at barely former quotations, 11¾d to 1s 4d per lb. Several small parcels of common leafy congou, with all faults, brought full rates; and two breaks of fair quality Kaisow, in boxes, 1s 7½d to 1s 8d per lb, upon the same conditions. About 1,200 boxes of common Canton gunpowder realised only 9¼d and 9½d per lb. The market is quiet by private contract.

COCOA.—613 bags Trinidad, offered by auction, sold at high prices, varying from 71s 6d to 112s for middling to fine, and 67s to 70s per cwt for ordinary to good ordinary. 243 bags Surinam were withdrawn.

RICE.—A few contracts have been made at previous quotations, and

Digitized by Google

the market remains steady. Good white Bengal has sold at 14s 9d; fair Necrancie Arracan, 9s 6d cash. A floating cargo of Necrancie Arracan has sold at 10s 6d for a near port, or 11s 1½d per cwt for the United Kingdom.

IMPORTS and DELIVERIES of RICE to July 15, with STOCKS on hand.

	1865.	1864.	1863.	1862.

SAGO.—Of 980 boxes 243 bags in public sale, rather more than half sold; small grain 18s 6d to 20s; bold, 21s 6d per cwt.

TAPIOCA FLOUR.—887 cases Singapore partly sold at 2½d to 3d per lb.

SPICES.—At the public sales this week, 2,926 bags Singapore black pepper sold at previous rates; the sound portion obtaining 3⅛d. 570 bags Penang part sold at 3d. 244 bags Malabar were taken in at 4¼d for shot kind. 245 bags Singapore white partly sold at 5⅜d to 5½d, and 971 bags of old import partly sold at 5¼d to 5⅜d. 61 cases of brown nutmegs sold at 10d to 1s 3d for small to middling. 6 cases mace sold at 1s 3d to 1s 4d. 100 bags Zanzibar cloves taken in at 3⅜d per lb. 113 cases Cochin ginger were sold at full prices: mixed small rough to fine, 67s to 100s; low, 62s to 64s. 179 barrels Jamaica sold at 3*l* to 5*l* 11s. Privately rough Bengal has sold at 26s to 27s. 531 cases cassia lignea partly sold: mouldy at 75s to 84s per cwt.

SALTPETRE.—The market continues flat. A small parcel of fine Bengal has been sold at 25s per cwt, which is the only sale reported.

IMPORTS and DELIVERIES of SALTPETRE to July 15, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....tons	3810	8110	9950	9930
Deliveries	6000	7090	7580	9600
Stock	5250	8180	6180	3460

Delivered last week, 157 tons.

COCHINEAL.—780 bags Honduras partly sold: silver, 3s 1d to 3s 5d, including some of the new crop. 115 bags Teneriffe sold steadily: silver, 3s 3d to 3s 4d; black, 3s 5d to 3s 10d. 74 bags Mexican: silver, 3s 1d; black, 3s 5d per lb.

OTHER DRYSALTERY GOODS.—The sales generally have been devoid of interest, and the market is quiet. Cutch has been firmer, and good quality is quoted 25s to 25s 6d per cwt.

METALS.—The most important feature in the market has been an active inquiry for Straits tin, which has sold freely at 90*l* on the spot, 91*l* for arrival. Since last Friday moderate transactions have occurred in spelter at 22*l* 5s to 22*l* 7s 6d, but latterly at 22*l* cash, the market now ruling flatter. No change of interest can be noticed in iron. Scotch pig has been weaker in price. The nearest value of mixed numbers is now 54s 3d per ton cash. Copper remains inactive.

MANILLA HEMP is firm with a moderate inquiry, and holders now require enhanced rates. Roping sorts have sold at 30*l* to 31*l* 10s per ton.

JUTE.—On Wednesday 6,070 bales went off steadily at last week's rates: low to very good, 10*l* 10*l* to 22*l* 5s per ton.

OILS.—Business has been done in sperm at 90*l* per tun. Common kinds of olive meet with more inquiry. Mogadore has sold at 48*l* 10s. The market has been cleared of Malaga, at 50*l* 10s per ton. Cocoa-nut is quiet. Palm has been dull: fine Lagos, 36s 6d to 37s. Linseed is steady, at 32s 3d on the spot; 32s 6d to 33s for delivery to the end of the year. Rape firm. English brown scarce, and worth 42s 6d to 43s; foreign, 43s to 43s 6d. Sales reported for forward delivery, at the latter prices. Foreign refined, 46s to 47s per cwt.

TALLOW.—Foreign is quiet. First sort Petersburg Y.C., 41s 3d to 41s 6d; October to December, 42s 3d to 42s 6d; January to March, 43s per cwt, buyers.

PARTICULARS OF TALLOW.—Monday, July 17, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The public sales to-day have been chiefly West India, various parcels of which sold at full rates, and the market closed firmly. Transactions in West India, for the week, 4,256 casks. Two floating cargoes have sold for the United Kingdom: one Havana, No. 11½, at 25s 6d; one of Cuba at 22s 3d per cwt.

COFFEE.—39 casks plantation, 54 casks 270 bags native Ceylon, sold at full quotations. 99 casks 357 barrels and bags Jamaica part sold at full rates.

RICE.—4,124 bags white Bengal of the new crop partly sold at 15s 6d to 15s 9d per cwt for good quality.

TURMERIC.—1,700 bags Bengal were taken in at 25s per cwt.

TALLOW.—325 casks Australian, by auction, sold at 3d to 6d advance. Beef, 39s 6d to 40s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues unaltered. Dutch crushed remains quiet, with only small sales, on easier terms.

DRY FRUIT.—This market is dull, but a tendency to steadier prices, shows itself in some descriptions of currants. Valencia raisins are a little lower, but sales are very slow.

TIMBER.—Large arrivals of wood cargoes from the Baltic and British America. Some activity in the trade; prices as now quoted being generally realised.

LEATHER AND HIDES.—The leather market has been very dull during the past week, and at Leadenhall on Tuesday there was a very small attendance of buyers, whilst the supplies amounted to a fair average. The general election has, no doubt, considerably interrupted the ordinary course of business. Prices are unaltered.

METALS.—Nothing of moment has taken place in our market this week. Copper is extremely dull of sale, as has been the case so long. Iron keeps steady, but Staffordshire bars and rods are a little heavy. Tin is decidedly inactive, although a little less so at close than at the beginning of the week, as several thousand slabs of Straits have changed hands. Spelter is rather lower again. Lead has found more buyers in the past ten days. Tin plates are in fair request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	43	0
Melted stuff	33	6
Rough ditto	18	6
Greaves	18	0
Good dregs	6	9

METROPOLITAN CATTLE MARKET.

MONDAY, July 17.—The total imports of foreign stock into London, ast week, amounted to 19,454 head. In the corresponding week in 1864 we received 8,215; in 1863, 18,798; in 1862, 10,394; in 1861, 10,609; in 1860, 15,120; and in 1859, 8,101 head.

The supply of foreign stock in our market to-day was again extensive, but for the most part in middling condition; sales consequently progressed slowly, but at full prices. A few of the beasts from Tonning sold at from 4s 8d to 4s 10d per 8 lbs. With English beasts we were very moderately supplied, and the quality of each breed was by no means prime. The arrival from Scotland was seasonably good. Prime Scots, crosses, Lincolns, &c., moved off readily at prices fully equal to last week; otherwise, the trade was quiet, at late rates; the general top figure was 5s 4d, the extreme price 5s 6d per 8 lbs. The show of sheep was again very moderate, and in middling condition. Good and prime breeds changed hands freely, at high currencies; but inferior sheep moved off slowly at late rates. Downs and half-breds realised 6s to 6s 4d, in some instances 6s 6d per 8 lbs. Lambs were in moderate supply, and fair request, at from 6s to 7s 4d per 8 lbs. The supply of calves was moderate, and the demand was quiet, on former terms, viz., from 4s 2d to 5s 2d per 8 lbs. Prime small pigs moved off freely, at full prices. Large hogs were a dull inquiry.

SUPPLIES.

	July 18, 1864.	July 17, 1865.
Beasts	6624	5010
Sheep and lambs	32680	25720
Calves	484	376
Pigs	480	310

THURSDAY, July 19.—The supply of beasts in to-day's market was tolerably good as to number, but in very middling condition. The demand for most breeds ruled steady, at in some instances an advance of 2d per 8 lbs. The best Scots, &c., realised 5s per 8 lbs. We were fairly supplied with sheep, for which the inquiry was firm, at very full prices. Downs and half-breds sold at 6s 2d to 6s 4d per 8 lbs. Lambs, the show of which was tolerably good, moved off steadily at full quotations, viz., from 6s to 6s 4d per 8 lbs. There was a fair sale for calves, at quite Monday's currency. Pigs and milch cows were rather dearer.

Per 8 lbs to sink the offal.

	s	d		s	d		s	d		s	d

HOP MARKET.

BOROUGH, Friday, July 21.—The accounts from the plantations continue favourable, and an early crop is anticipated. Most descriptions of hops support previous rates, owing to the limited supply on offer; but the demand rules far from active. Mid and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, 100s to 140s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 21.—Fair supplies of potatoes are on sale, the trade for which is steady, at about previous rates. Regents are quoted at 80s to 100s; and Shaws at 60s to 80s per ton.

HAY MARKETS.

THURSDAY, June 19.—The supplies of hay and straw on sale have increased. The trade has ruled inactive, and the late advance in prices is with difficulty supported.

Per load of 36 trusses.

	Smithfield.		Cumberland.		Whitechapel.	
	s	s	s	s	s	s
Old hay	90	to 130	95	to 135	90	to 130
New hay	100	to 110	100	to 115	100	to 110
Old clover	100	to 150	105	to 135	100	to 150
New ditto	100	to 120	105	to 125	100	to 120
Straw	28	to 33	30	to 36	28	to 33

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 21.—We cannot report much activity in our market this week, as consumers do not show any inclination to buy beyond

Digitized by Google

absolute requirements at present rates. The East India sales will begin on Wednesday next, the 26th inst., and continue until the 2nd proximo. The quantity is expected to reach 13,500 to 14,000 bales of this description.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 21.—Market thinly attended. Wheat in limited request, and fnlly 2d lower. Flour, slow sales at former rates, and, if possible, 1s dearer; mixed, 40s 6d; Ibrail, 30s 6d; Galatz, 31s. Beans steady. Oats and oatmeal unchanged.

The Gazette.

TUESDAY, July 18.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 8th of July, on 12,075 miles, to 710,941*l*, and for the corresponding week of last year, on 11,674 miles, to 675,792*l*, showing an increase of 401 miles and of 35,149*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,462 miles, to 581,633*l*, and for the corresponding week of 1864, on 8,190 miles, to 554,129*l*, showing an increase of 272 miles and an increase of 27,504*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 17.—In the share market to-day dulness was again the prevailing feature, although the closing prices were in but few instances disturbed. American securities were firm, but in other respects the general tendency was slightly towards lower quotations. In English railways, South Devon improved 1; Metropolitan District (paid up) declined 1, Metropolitan ½, Manchester, Sheffield, &c., a further 1, and Lancashire and Yorkshire a further ¼. In colonial, Scinde receded ½. In foreign, Antwerp and Rotterdam declined ⅛, and Lombardo-Venetian relapsed ⅛ In British mines, Great Wheal Vor improved ½, and Drakewalls declined ⅛. In foreign mines, Vancouver Coal advanced ½, and Washoe Gold (paid up) declined ½.

TUESDAY, July 18.—In the share market to-day there was no recovery from the dulness of yesterday, and with the exception of the banks which were disposed to firmness, no appreciable change of tone occurred in any of the descriptions. In English railways, Great Western advanced ½; and North London declined 1, Manchester, Sheffield, &c., and Metropolitan a further 1 each, and ditto (Extension) ½. In colonial, Calcutta and South-Eastern improved 1½, and Delhi (stock) and Punjaub receded ½ each. In foreign, Great Luxembourg improved ⅛, and San Paulo declined ½. In America, Marietta bonds improved 1, and Erie shares (paid up) relapsed ½. In British mines, South Condurrow declined ¼. In foreign mines, no alterations are recorded.

WEDNESDAY, July 19.—In the share market to-day a few of the English railways and banks were rather active, but in other respects there were scarcely any transactions, and a tendency to flatness rather generally prevailed. Of the English lines, South Devon improved 1; and Midland (Birmingham and Derby) declined 1, ditto (9*l* shares) ⅛, ditto (original) and North Staffordshire ¼ each, Lancashire and Yorkshire ¾, North-Western ¼, Metropolitan a further 1, and Manchester, Sheffield, &c., a further ½. In colonial, Great Western of Canada (shares of both descriptions) receded ⅛. In foreign railways and British mines no alterations occurred. In foreign mines, Santa Barbara improved ⅛; and Cape Copper and Panulcillo Copper declined ¼ each. In American securities Illinois Central (shares) improved ¼; and Atlantic and Great Western (Pennsylvania second mortgage) declined 1, United States (Five-Twenties) ⅜, and Erie shares (paid-up) a further ½.

THURSDAY, July 20.—In the share market to-day some fluctuations occurred in the closing prices of English railways, with an average result slightly tending to flatness, while in the banks and miscellaneous shares the balance was rather towards firmness. Of the English lines, Manchester, Sheffield, &c. recovered ½, Great Northern (A stock) improved ½; and Great Western (Oxford) declined 1, Lancashire and Yorkshire and North-Western a further ¼ each, Midland a further ½, and ditto (Birmingham and Derby) a further 1. In colonial, the only movement was a decline of ¼ in Grand Trunk of Canada. In foreign, Antwerp and Rotterdam improved ⅛; and Lombardo-Venetian receded ¼. In American, Illinois Central shares further improved ½; and Erie shares (paid up) further declined ¼. In British mines, Chiverton advanced ¼. In foreign mines, Santa Barbara relapsed ⅛.

FRIDAY, July 21.—The railway market was dull to-day, with few transactions. Metropolitan stock declined ½ per cent., Midland ¼, and South-Eastern ⅛. The other principal lines were unchanged. Indian, Canadian, and foreign railway shares exhibited no movement.

The imports of the precious metals during the week ending July 19, current year, were:—Gold, 149,133*l*—silver, 145,300*l*. The exports were:—Gold, 316,437*l*—silver, 145,271*l*.

BANK OF EGYPT.

Notice is hereby given, that an Extraordinary General Meeting of this Corporation will be held at the London Tavern, Bishopsgate street, on Friday the 28th day of July, at Twelve at noon precisely, when the Directors will present a Report and Statement of Accounts as audited for the half-year which ended on the 30th of June, 1865.

The Transfer Books will be closed from Monday, the 24th July, to Friday, the 4th August, both inclusive.—By order of the Court,

EDWARD CHESHIRE, Secretary.

26 Old Broad street, E.C., London, 18th July, 1865.

NINETEENTH REPORT OF THE

CITY BANK, LONDON.

At a General Meeting of the Shareholders, held at the London Tavern, on Tuesday, 18th July, 1865.

DIRECTORS.

John Jones, Esq., Chairman.

John Campbell, Esq.	William Macnaughtan, Esq.
Henry Vigurs East, Esq.	Jonathan Thorp, Esq.
John Hackblock, Esq.	John Vanner, Esq.
David Q. Henriques, Esq.	Augustus J. White, Esq.
Andrew Lawrie, Esq.	George Young, Esq.
Robert Lloyd, Esq.	

MANAGERS.

John Woolmore Duncan, Esq., Alfred George Kennedy, Esq.

BRANCH OFFICE—E. G. Mullins, Esq.

SOLICITORS.

Messrs Pearce, Phillips, and Pearce.

The "register of shareholders" and "register of transfers" having been authenticated by impressing thereon the corporate seal of the bank, the following report was read by the Secretary, viz.:—

The Directors beg to submit to the shareholders the annexed statement of accounts to the 30th June, showing a gross profit for the six months (including the amount brought forward from the previous half-year) of £65,315 9s. This result enables the Directors—after defraying the current expenses, providing for bad and doubtful debts, and allowing rebate of interest on bills discounted not yet due—to declare the usual dividend of £6 per cent. per annum on £500,000, the paid-up capital, and a bonus of £2 5s per share on 10,000 shares, together equal to 15 per cent. per annum; and to carry forward £1,293 13s 3d to the new profit and loss account.

The following gentlemen retire from office on this occasion, viz.:—

Mr East,
Mr Henriques, and
Mr Young,

all of whom offer themselves for re-election.

It is with deep regret the Directors have to announce that, from circumstances which have recently transpired, Mr Peter Bell has deemed it necessary to tender his resignation as a Director of this Institution; they cannot, however, allow this opportunity to pass without acknowledging the important services rendered by him to the bank from its formation, and the high honor which has invariably characterised his relations with it.

The business of the Bond street branch continues to afford highly satisfactory results.

The dividend and bonus (free of income tax) will be payable at the bank on and after Tuesday the 25th instant.

The dividend was then declared, for the period ending the 30th June last, at and after the rate of £6 per cent. per annum on the paid-up capital, and a bonus of £2 5s per share both free of income tax.

It was resolved unanimously, that the report now read be received and adopted.

The following Directors, having retired by rotation, were unanimously re-elected, viz.:—

Mr H. V. East,
Mr D. Q. Henriques,
Mr George Young.

Resolved unanimously,—

That the cordial thanks of the shareholders be given to the Chairman and Directors, for the efficient manner in which they have conducted the business of the bank during the past half-year.

That the thanks of the meeting be presented to the Managers, the Branch Manager, the Secretary, and the other officers of the bank, for their zealous attention to the interests of the shareholders.

That the thanks of the shareholders be awarded to Mr Lewis and Mr Curry, for the careful manner in which they have discharged their duties as Auditors.

(Signed) JOHN JONES, Chairman.

Extracted from the Minutes,
C. J. WORTH, Secretary.

OWEN LEWIS, } Auditors.
JOHN CURRY, }

THE CITY BANK, LONDON.

Incorporated by Royal Charter, A.D. 1835.

Head Office—(Corner of Finch lane), Threadneedle street.

Branch Office—No. 34 Old Bond street.

Subscribed Capital (10,000 shares of £100 each) £1,000,000
Paid-up Capital 500,000
Reserved Fund 140,000

Current accounts are made up to the 30th of June and 31st of December in each year: and if the credit balance shall not, at any time during the half-year, have been below £500, interest at the rate of 2 per cent. per annum is allowed on the minimum monthly balances. If not below £200, interest at the rate of 1 per cent. per annum is allowed on the minimum monthly balances; but if under £200, no interest is allowed. Parties keeping current accounts have the privilege of drawing cheques—of having approved bills discounted—of obtaining loans upon negotiable securities—of depositing bills, coupons, &c., for collection.—and of lodging with the Bank, deeds and other valuable property in the fireproof strong rooms for safe custody.

Deposit Accounts.—Money, in amounts of £20 and upwards, is received from the public generally,—subject to 7 days' notice of withdrawal, and interest is allowed thereon at the current rate of the day; the bank notifying any change in the rate of interest by advertisement in one or more of the leading London newspapers. If the money be withdrawn within a fortnight, no interest is allowed. Persons having current accounts can transfer any portion of their credit balance to deposit account.

The agency of country and foreign banks, whether joint stock or private, is undertaken by the bank.

Letters of credit, payable at any of the chief commercial towns and cities of the world are granted. Marginal credits are also granted by the bank.

Circular notes are issued by the bank, addressed to all, and payable at any, of the places on the Continent where the bank has an agent.

Dividends, &c., on Government and other stocks, annuities, pensions, &c., are received for customers of the bank without charge; the purchase and sale of stocks, shares, and securities, are also undertaken; and every description of banking business is transacted.

London, July 18, 1865.

THE IMPERIAL OTTOMAN BANK,

CONSTANTINOPLE.

(Capital £2,700,000, paid-up £1,350,000)

Branches at Smyrna Beyrout, and Salonica, and Agencies at Galatz, Bucharest, Larnaca (Cyprus), Paris, and London.

The London Agency receives money on deposit for fixed periods at rates to be agreed upon. It grants credits on Constantinople, Smyrna, Beyrout, Salonica, Galatz, Bucharest, and Larnaca; purchases or collects bills drawn on those places, and undertakes the negotiation of all Turkish Government Securities and the collection of the coupons.

The London Agency will also execute orders through the Branches of the Imperial Ottoman Bank at Salonica and Smyrna for the purchase of produce, such as Cotton, Wool, Silk, Madder roots, Valonea, Opium, Grain, &c.

Terms may be ascertained on application at the offices of the London Agency, No. 4 Bank Buildings, Lothbury.

R. A. BRENAN, Manager.

COMMERCIAL BANK

CORPORATION of INDIA and the EAST.

Incorporated by Royal Charter.

Capital £1,000,000 (one million sterling), with power to increase to £2,000,000.

Head Office, 64 Moorgate street, London, E.C.

Branches and Agencies at Bombay, Calcutta, Foochow, Hankow, Hong Kong, Shanghae, Singapore, and Yokohama.

The Bank negotiates and collects bills and grants drafts on its branches and agencies as above. It acts as the agent of parties connected with the East in transmitting funds, and in making investments in Indian and other public securities, effecting also the sale thereof either at home or abroad. It undertakes their safe custody and the receipt of interest or dividends thereon, and receives pay, pensions, and other moneys for remittance through the Bank or otherwise.

The Bank also receives money on deposit at rates of interest proportioned to the length of the notice of withdrawal agreed to be given, the terms of which may be ascertained on inquiry.

Office hours 10 to 4 Saturdays 10 to 2.

METROPOLITAN & PROVINCIAL BANK (Limited).

Report of the Directors presented to the shareholders at the Seventh Ordinary Meeting, held at the London Tavern, Bishopsgate street, on Thursday, the 20th July, 1865,

CHARLES GILPIN, Esq., M.P., in the Chair.

In accordance with the views expressed by the proprietors, at the meeting in January last, a change of management was effected in March, and the progress of the business has since been satisfactory; many new and valuable accounts having been secured for the bank.

The compensation of £2,500 paid to Mr John Burton, the late Manager, for the unexpired term of his engagement, has been charged to the reserved fund.

The profits for the past six months have been absorbed by losses incurred previously to, but not ascertained at last audit; and the Directors regret that no dividend can therefore be paid on this occasion. They have, however, full confidence that a more encouraging result will be exhibited in next account.

Mr Thomas Masters Usborne, of Cork and London, having been appointed a Director by the Board on the 6th ultimo, such appointment will be submitted for the approval of the proprietors.

BALANCE SHEET, June 30, 1865.

THE LONDON AND COLONIAL COMPANY (Limited).

Notice is hereby given, that the Lists of Applications for the further issue of Shares in this Company will be Closed on the 27th inst. for London, and on the 28th for the Country.—By order,

JOHN SPONG, Secretary.

70 Great Tower street, July 21, 1865.

SIXTH REPORT OF THE

ALLIANCE BANK, LIMITED.

At a General Meeting of shareholders, held at the London Tavern, Bishopsgate street, in the City of London, on Friday, 21st July, 1865,

THOS. STENHOUSE, Esq., in the Chair,

the following report was presented:—

The Directors have to report that the net profits of the Bank, after deducting interest on current and deposit accounts, current expenses, provision for bad debts, and rebate on bills discounted but not yet due, amount to £ 7,853 17s 6d, which they propose to dispose of as follows, viz.:—

£	s	d	
22,168	2	0	in payment of a dividend.
1,000	0	0	in reduction of preliminary expenses.
4,485	15	6	to profit and loss account of the current half-year.
27,653	17	6	

The above sum of £22,168 2s 0d enables the Directors to recommend a dividend of 12s 6d per share on the 30,000 shares, upon which £25 per share is paid, and 7s per share on the 9,766 shares, upon which £20 per share is paid, being at the rate of £5 per cent. per annum.

It is satisfactory to the Directors to be able to state that the condition of the Bank has materially improved since the last half-yearly meeting.

With respect to the account specially referred to in their last report, the Directors do not yet feel themselves in a position to determine the amount which will be required from the reserve fund to meet the loss that may arise thereon, as further time must elapse before the value of the securities and estates affecting it can be ascertained.

In accordance with the wish expressed at the last meeting, the Directors have increased their Board, by the election, subject to confirmation by the shareholders, of Christopher Atkinson, Esq., of Liverpool, and Matthew Hutton Chaytor, Esq., of London.

The Directors who retire by rotation, in accordance with the provisions of the Articles of Association, are,—

John Paterson, Esq.
James Nugent Daniell, Esq.
John Torrance, Esq.
Alfred Castellain, Esq.

and, being eligible, they offer themselves for re-election.

The auditors, Messrs G. H. Jay and H. W. Banner, retire at this meeting. Mr Banner offers himself for re-election, and Messrs Quilter, Ball, and Co., of whose firm Mr G. H. Jay was a partner, offer themselves for re-election in his place.

THE ALLIANCE BANK, (Limited).

QUILTER, BALL, and CO., } Auditors.
HARMOOD W. BANNER, }

The Secretary having read the advertisement convening the meeting;

The Chairman having authenticated the "Register of Transfers," by impressing upon it the Common Seal of the Company;

The report and accounts having been taken as read,

It was proposed by the Chairman, seconded by Mr Atkinson, and resolved unanimously, that the report and accounts be received and adopted.

The Chairman then declared a dividend for the half-year ending 30th June last (free of income tax) of 12s 6d per share on 30,000 shares, and 7s per share on the 9,766 shares issued in 1864, being at the rate of £5 per cent. per annum.

It was resolved as follows:—

That the election of Christopher Atkinson, Esq., as a Director of the Company is hereby confirmed.

That John Paterson, Esq., James Nugent Daniell, Esq., John Torrance, Esq., and Alfred Castellain, Esq., be re-elected Directors of the Company

That the remuneration of the Auditors for their services during the past half-year be £100 each.

That H. W. Banner, Esq., be re-elected an Auditor of the Company.

That Messrs Quilter, Ball, and Co., be elected Auditors of the Company, in the place of G. H. Jay, Esq.

That the remuneration of the Directors for the current year ending 30th June, 1866, be £5,000.

That the thanks of the meeting be given to the several managers, the secretary, and the other officers of the Bank for their services during the past half-year.

That a vote of thanks be given to the Chairman, and to the Directors generally for their great attention to the affairs of the Bank.

(Signed), THOMAS STENHOUSE, Chairman.

Extracted from the minutes.

ELLIS CLOWES, Secretary.

FIFTY-SIXTH REPORT OF THE

LONDON JOINT STOCK BANK.

At a General Meeting of the shareholders, held at the Banking House of the Company, in Princes street, Mansion House, on Thursday, the 20th July, 1865,

GEORGE POLLARD, Esq., Chairman,

PHILIP WM. FLOWER, Esq., Deputy-Chairman,

The following report was presented:—

The accounts which the Directors have now the pleasure of submitting to the shareholders show that the net profits of the bank, for the half-year ending on the 30th ultimo, amount to £123,125 15s 3d.

This result enables the Directors to declare a dividend at the rate of 12½ per centum per annum, and a bonus of 8s 3d per share, together £1 7s per share, equivalent to 18 per cent. per annum on the paid-up capital of the bank, now amounting to £1,080 000, and to carry forward a balance of £25,925 15s 3d for division at the end of the year.

In conformity with the resolution passed at the general meeting in January last, the Consols and New Three per Cents. have been taken at 90, and the Exchequer Bills at par. The difference between these rates and the valuation of those stocks on the 31st December last amounts to £7,075, and this sum has been carried to the credit of the guarantee fund, which, with the addition of six months' interest, according to the provisions of the Deed of Settlement, now amounts to £309,615 7s 9d.

It is with deep regret that the Directors have to announce the death of their much-esteemed colleague, Mr Henry Christy; to fill up the vacancy thus occasioned at the board, an extraordinary general meeting will be convened for Thursday, the 7th September next; and any qualified shareholder intending to become a candidate for the office of director, must give notice in writing of such intention at this office at least thirty clear days previous to the said day of election.

The Directors have to report that, owing to impaired health, Mr Fleming Hewett has retired from the management of the bank, and the Directors consider that, after a zealous and faithful discharge of his duties in various departments during a period of twenty-six years, they have not appreciated those services too highly in awarding him a retiring allowance of £1,000 per annum, and which they trust will meet with the full concurrence of the shareholders.

The dividend and bonus, free from income tax, will be payable on and after Friday, the 28th inst.

The preceding report having been read to the meeting by the Secretary, a dividend for the half-year ending the 30th June last, after the rate 12½ per centum per annum, and a further dividend of 8s 3d per share out of the net profits of the half-year ending as above, were declared by the Chairman.

Resolved unanimously,—That the report now read be received, and that it be printed for the use of the shareholders.

Resolved unanimously,—That the thanks of the shareholders be presented to the Board of Directors for their exertions during the past half-year.

(Signed) GEORGE POLLARD, Chairman.

Extracted from the minutes,

ALFRED SCRIVENER, Secretary.

Accounts of parties are kept agreeably to the custom of London bankers.

Parties keeping banking accounts with the Bank can at all times transfer to a deposit account such portion of their balance as they may not immediately require, upon which interest at the current rate of the day will be allowed. Deposits are also received from parties not customers, either at call or for fixed periods, on interest at the market rates.

The agency of joint stock and other country and foreign banks undertaken on such terms as may be agreed upon.

Investments in and sales of all descriptions of British and foreign securities, bullion, specie, &c., effected.

Dividends on English and foreign funds, on railway and other shares, debentures, and coupons received without charge to customers.

Every other description of banking business and money agency transacted, and letters of credit granted on the Continent, and on the chief commercial towns of the world.

Report of the proceedings of the sixth ordinary general meeting of the shareholders, held at the London Tavern, Bishopsgate street, on Monday, July 17, 1865,

ANDREW LUSK, Esq., M.P., in the chair.

The circular convening the meeting having been read, and the minutes of the ordinary meeting held on Thursday, January 19, having been taken as read, and sealed with the seal of the bank,

The following reports of the Directors and Auditors, and the balance sheet were then read by the Secretary:

"The accounts which the directors have now the pleasure of submitting to the shareholders show the result of the operations of the bank during the past half-year to have been very satisfactory.

"Although considerable commercial depression has existed for some time past, yet the business of the bank continues steadily progressive.

"Notwithstanding the low rate of money which has prevailed during a great portion of the last six months, and that the dividend will have to be paid on 10,500 new shares, which previously only carried interest at the rate of 5 per cent. per annum, your directors are able to recommend a dividend at the rate of 8 per cent. per annum, free of income tax.

"After payment of the dividend, and all charges of the bank, together with allowance for rebate on bills discounted, bad and doubtful debts, there remains a balance of £6,897 18s 2d, which the directors recommend to be appropriated as follows, viz :—£3,000 to the reserve fund, £889 13s 9d to be written off preliminary expenses, and £3,008 4s 5d to be carried to profit and loss new account.

GEORGE BROOM,
PETER BROAD, } Auditors.

It was moved by the Chairman, and seconded by H. L. Bischoffsheim, Esq.:—

"That the report of the directors and balance sheet, as now read to the meeting, be received, adopted, and entered upon the minutes."

Moved by the Chairman, seconded by Michael Hall, Esq., and carried unanimously:—

"That a dividend at the rate of 8 per cent. per annum for the half-year ended the 30th last be now declared, payable to the shareholders of the bank whose names are on the register, and that the same be payable at the bank on and after Tuesday, the 1st day of August, 1865."

It was proposed by Louis Isenberg, Esq., seconded by P. G. Vander Byl, Esq., and carried:—

"That the thanks of the meeting are due and are hereby given to the directors for the time and attention which they have devoted to the affairs of the bank."

It was moved by R. Michell, Esq., seconded by T. Flight, Esq., and carried:—

"That the thanks of the meeting be given to R. A. Bentham, Esq., the Manager, and other officers of the bank, for their zeal and perseverance in the discharge of their respective duties."

It was proposed by R. Michell, Esq., seconded by a shareholder, and carried:—

"That the thanks of the meeting be given to A. Lusk, Esq., M.P., for his able and courteous conduct in the chair."

(Extracted from the minutes.)

ANDREW LUSK, Chairman.
J. MANNING, Secretary.

No. 6 Lothbury, July 17th, 1865.

BANK OF NEW SOUTH WALES.

The half-yearly general meeting of the shareholders of the Bank of New South Wales was held in Sydney on the 26th day of April last.

The Hon. G. ALLEN, M.L.C., in the chair.

The Secretary read the following report and balance sheet:—

The directors have the pleasure to report a steady progress in the business of the bank during the past half-year, and to submit herewith a statement of its assets and liabilities on the 31st ultimo.

	£	s	d
The net profits for that period, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, and reducing valuation of bank premises and office furniture, amount to	86,551	8	10
To which is to be added—			
Recoveries from debts previously written off as bad or doubtful	1,413	11	1
Undivided balance from last half-year	2,809	19	7
Giving for distribution	90,844	19	6
Which the directors appropriate as follows:—			
To payment of dividend at the rate of 15 per cent. per annum			
— On old stock for 6 months	69,846 0 0		
— On new do. for 5 do.	2,800 0 0		
	72,646 0 0		
— Bonus at the rate of 3 per cent. per annum on capital paid up	14,529 4 0		
— Balance carried to Profit and Loss "New Account"	3,669 15 6		
	90,844 19 6		

By the final payment, due this day, on account of the new capital, the Bank Stock Account will be increased to £1,000,000, and the Reserve Fund to £333,333 6s 8d, the limits fixed by the Act of Incorporation and the Deed of Settlement.

During the past half-year new branches of the bank have been established in this colony at Gundagai and Wagga Wagga.

Since the last half-yearly meeting the bank has sustained a loss in the death of its late general manager, Mr Robert Woodhouse, in recognition of whose long and faithful services the directors have presented to his widow the sum of one thousand pounds.

The vacancy created at the board by the resignation of Mr James Henderson, on his departure for England in February last, was temporarily filled by the appointment of Mr Joseph Scaife Willis, who now offers himself for election, and is the only candidate.

The dividend will be payable at the head office to-morrow, and at the branches on receipt of advice.—For and on behalf of the Board of Directors,

GEORGE ALLEN, President.

BANK.

79 Lombard street, London: Admiralitat-strasse, Hamburg.

PROSPECTUS.

The bank has acquired the Banking, Bullion, and Exchange business of the late London, Hamburg, and Continental Exchange Bank, by which it has secured an extensive and profitable connection, embracing a large number of current and deposit accounts and foreign agencies.

Under the agreement for taking over the premises, business, goodwill, and assets of the London, Hamburg, and Continental Exchange Bank, the shareholders in that bank are entitled to subscribe for ten thousand shares in the General Exchange Bank (Limited), credited with £8 per share, being an exchange of two £50 shares, £8 paid, for one £100 share, £25 paid. Should the assets of the former bank not realise the sum to be credited, the deficiency to be made up by such shareholders.

In addition to the existing arrangements, negotiations are in progress for amalgamating other banks with this Company, and a concession is promised by a foreign Government which will carry with it important banking privileges.

The bank has since the issue of the original prospectus concluded arrangements for the purchase of the old and highly respectable banking business of Messrs Sciciuna and Sons, of Malta, as also that of Messrs Borg and Co., of Alexandria.

The exchange and bullion department of a banking business is well known to be most lucrative, and in this particular branch the bank, from its extensive existing connections, possesses important advantages.

The Directors have secured the services, as manager, of F. Dixon-Hartland, Esq., a gentleman of considerable banking experience.

The articles of association and agreements may be inspected at the offices of the solicitors of the bank.

Applications for shares to be made to the Secretary, at the Bank, No. 79 Lombard street; to the bankers; to the London and County Bank; or the Imperial Bank.

GENERAL EXCHANGE BANK (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED on SATURDAY NEXT, July 22nd, for London, and on Monday, July 24th, for the Country.—By order of the Board, THOMAS BRADLEY, Secretary.

July 15th, 1865.

BUSINESS TRANSACTED.

This Company negotiates Loans for Colonial and Foreign Governments;

Co-operates in the Financial arrangements of British and other Railways;

Makes Advances to Corporations, Town Councils, and other Public Bodies;

Negociates Loans for Public Works;

Assists in the introduction of Industrial and Commercial undertakings;

Makes Advances upon approved Stocks, Shares, Bonds, &c.;

Makes temporary Loans upon eligible Freehold and Leasehold Securities.

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, June 15, 1865.

DEBENTURES
ISSUED BY
THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).
ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz. :—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years	6	per cent.	per annum.
— Five years	6½	—	—
— Seven years	7	—	—

Interest payable quarterly, viz., on the 30th March 30th June, 30th September, and 30th December, in each year, at the Company's Bankers.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court.

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, June 15, 1865.

DEPOSITS
RECEIVED BY
THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).
RATES FOR MONEY ON DEPOSIT.

This Company receives money on deposit in sums of £10 and upwards at the undermentioned rates from this day until further notice, viz.:—

At 14 days' notice	3	per cent.	per ann.
At one month's notice	3½	—	—
For fixed periods of—			
Not less than 3 months and up to 6 months	4	—	—
Beyond 6 and up to 9 months	4½	—	—
Beyond 9 and up to 12 months	5	—	—
Beyond 12 and up to 24 months	5½	—	—

Forms of application can be obtained of the Secretary to whom all communications must be addressed.

By order of the Court,

ALFRED LOWE, Secretary.
17 and 18 Cornhill, London, June 15, 1865.

Fourth Half-yearly Report, presented at the General Meeting, held at the Baltic, South Sea House, Threadneedle street, on Monday, the 17th July, 1865.

The annexed statement of accounts, made up to the 30th June last, shows, after deducting expenses of every kind, and rebate of interest, calculated at the rate of 5 per cent. per annum, a total of £108,943 1s to the credit of profit and loss. The above sum includes the balance of £40,663 8s 6d brought forward from last half-year.

The Directors recommend the payment of a dividend at the rate of 5 per cent. per annum, and a bonus of 10 per cent. per annum, free of income tax, which together will absorb £45,000, and leave a balance of £62,660 1s to be carried forward to next half-year.

The dividend and bonus amount together to £1 2s 6d per share, and will be payable on and after the 18th inst.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley. Cornhill, E.C.

CHAIRMAN—Samuel Laing, Esq., M.P.late Finance Minister of India.
W. P. Andrew, Esq., Chairman Scinde, Punjaub, and Delhi Railways.
Samuel Beale, Esq., Warfield grove, Reading.
E. Blount, Esq. (E. Blount and Co., Bankers, Paris).
T. Brassey, Esq., Jun., 4 Great George st., Westminster.
Alexander Devaux, Esq. (Messrs C. Devaux and Co.).
Sir S. A. Donaldson, late Colonial Secretary of New South Wales.
J. T. Mackenzie, Esq., Deputy-Chairman of Eastern Bengal Railway.
John Bramley Moore, Esq., Liverpool.
Samuel Leo Schuster, Esq. (Messrs Schuster, Son, & Co.).
Charles Turner, Esq., Liverpool.
George Worms, Esq. (Messrs G. and A. Worms).
GENERAL MANAGER—James Macdonald, Esq.

BANKERS.

The London and Westminster Bank.
The Union Bank of London.

The Company receives deposits for short periods at the ordinary rates, and for longer periods according to agreement.

Make advances on approved securities, negotiates loans, &c.

R. J. BUTLER, Secretary.
Austin Friars, E.C.

THE JOINT STOCK DISCOUNT COMPANY (Limited), 6 and 7 Nicholas lane, Lombard street, London, E.C.

SUBSCRIBED CAPITAL, TWO MILLIONS.
PAID UP, £792,500. RESERVE FUND, £30,000.

DEPOSITS RECEIVED.

Repayable on demand ..... 2 per cent. per annum.
Ditto at 7 days' notice ... 2½ — —
Ditto 14 days' notice... 2½ — —
Special rates for money deposited for long periods.
July 20, 1865.

THE EAST INDIA IRRIGATION AND CANAL COMPANY.

NOTICE OF CALL.

Notice is hereby given, that in pursuance of a Resolution passed at a meeting of the Board of Directors, the shareholders of this Company are requested to pay, at the Company's bankers, Messrs Ransom, Bouverie, and Co., No. 1 Pall Mall East, S.W., London, a call of £2 per share (making £12 per share paid), on or before Thursday, the 24th day of August next, upon which sum of £2 per share interest at the rate of 5 per cent. per annum will be paid from that date.

Notice is also given, that shareholders are at liberty to pay up in advance of calls to any amount and upon any number of shares, upon the understanding that interest at the rate of 5 per cent. per annum will be paid thereon from the day of payment.

By order of the Board,
JOHN WESTWOOD, Secretary.
8 and 9 Queen street place, Southwark bridge, London, E.C., 17th July, 1865.

WARREN'S BLACKING COMPANY (Limited).

The last days for receiving Applications for Shares in this Company, will be Saturday, the 29th inst., for London, and Monday, the 31st, for the Country.—By order of the Board,
HENRY NORRISH, Secretary.
24 Bucklersbury, London. E.C.

ABRIDGED PROSPECTUS.

WARREN'S BLACKING COMPANY (Limited).

Incorporated and Registered under "The Companies Act, 1862," whereby the liability of each member is limited to the amount of his shares.

Capital £100,000, in 10,000 Shares of £10 each.

First issue, 6,000 Shares.

£1 per share to be deposited on application, and £2 paid on allotment. Further calls not to exceed £2 per share, at intervals of not less than three months.

DIRECTORS.

Arthur Battiscombe, Esq., 11 Kensington gardens square, W.
Edmund J. Bridell, Esq., 34 Beaumont street, Portland place, W.
G. Schroeder Bonner, Esq., 5 Rood lane, E.C.
Francis G. Haviland, Esq., 67 Gloucester place, Hyde park, W.
The Hon. George Pepys, 7 Norfolk square, Hyde park, W.
C. Foyle Randolph, Esq., 7 New square, Lincoln's inn, W.C.

MANAGER—Mr Thomas Grove.

BANKERS.

The Bank of London, 52 Threadneedle street, E.C.; and Charing cross branch, 450 West Strand, W.C.

SOLICITOR—Mr Philip Wood, 24 Bucklersbury, E.C.

AUDITOR.

Mr C. W. Gray, 4 Frederick's place, Old Jewry, E.C., public accountant.

BROKERS.

London—William Leese, 2 Angel court, Throgmorton street.
Manchester—William Hannam, Esq., Royal Insurance buildings, Manchester, and 31 Regent street, London, S.W.

SECRETARY—Mr Henry Norrish.
Offices—24 Bucklersbury, London, E.C.

The object of this Company is to purchase, carry on, and extend the old-established and well-known business, founded by the late Robert Warren, about the year 1804, in blacking, ink, &c., &c., for many years carried on under the title of WARREN, RUSSELL, and CO., late at 30 Strand, and now at Regent Works, Westminster.

The profits made by the original proprietors of the three leading firms in this trade, viz., Messrs Day and Martin; Robert Warren, afterwards Warren, Russell, and Co.; and Mr Everett, were enormous. The principals in each of these firms having realised very large fortunes, since Mr Charles Day commenced the manufacture of blacking, in 1801. [Vide, Reports of the Juries to Her Majesty's Commissioners for the Exhibition of 1851, Class 29, Page 630-631].

Prospectuses and forms of application for shares can be obtained of the bankers, brokers, solicitor, or secretary of the Company.

A portion of the shares have been subscribed privately and allotted.

NEW THEATRE ROYAL ADELPHI,

Sole Proprietor and Manager, Mr B. Webster.

Last 12 nights of the celebrated American Comedian, Mr John E. Owens, in consequence of provincial engagements.

On Monday and during the week, THROUGH FIRE AND WATER. Messrs J. L. Toole, R. Phillips, Billington, Ashley, Mrs Alfred Mellon, and Miss H. Simms. At 9, SOLON SHINGLE. Solon, Mr John E. Owens, as performed by him 170 consecutive nights in New York. And the popular Extravaganza of A PAS DE FASCENATION. Miss Fertado (her first appearance) and Mr J. L. Toole. Commence at 7.

ROYAL POLYTECHNIC.

—Patron, H.R.H. the Prince of Wales.—Wonderful "Proteus," and Professor Pepper, with Burton's Mecca and Medina, at 2.30 and 8.—George Buckland's Musical Entertainment.—King's Lectures.—Railway Models, and all the other Scientific Entertainments.—Admission to the whole, 1s. Open from 12 to 5, and 7 to 10.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE RISE IN THE VALUE OF MONEY.

As we last week led our readers to expect, there has been a rise in the rate of discount at the Bank of England. The money market is so sensitive that it is not possible to give an exact account of all the causes which conduces to a slight change in it. Very often, as now, a small alteration is the complex effect of several agencies acting in combination, and there is no dividing calculus which will enable us to apportion the due amount to each. We retain, however, the impression that the principal cause operating upon the market at the moment is the lending trade in which we have now largely engaged, and which creates an exchange demand for bullion, not in large quantities, but in a number of small quantities. In this case, the falsity of the common notion has been conspicuously shown, which ascribes all the changes in the market to the arbitrary will of the Bank of England. In this case the change has been forced on the Bank, which delayed its action till the unmistakeable pressure of the open market left no other course with propriety open to it.

The course of the market it would be difficult to predict. Perhaps the better probability is in favour of another small rise. But anything like dear money may be safely pronounced out of the question. Capital is as yet fairly abundant in comparison with the work it is called on to undertake, and the stock of bullion in the two Banks of France and England is so large as to preclude any likelihood of its scarcity at present.

THE FLUCTUATION OF BANKING PROFITS IN LONDON.

ONE of the most important and best results of the development of the system of joint stock management will be a more accurate knowledge than we now have of the profitableness of different trades, and the general profit of all trade. The accounts of a single trader, or of a private partnership, are shrouded in mystery: there is no good reason for telling them, and there are several good reasons for not telling them. But the accounts of a company in which a considerable number of shareholders are much interested, must show to those shareholders the most material facts relating to the business. We are as yet, however, far from such a desirable state of things. The only considerable trade which has been long enough under joint stock management to tell us much is the trade of banking, and even as to this the published accounts of most banks are still very imperfect. Most banks persist in concealing the amount of their *acceptances*, and while it is uncertain whether the "liabilities," vaguely classed together, are composed of paper issued by the bank, or money left with the bank, no sure deduction as to the nature of their business can be made. With such a fault in the data, no conclusion can hope to be correct. The London and Westminster Bank has set the example of dividing its deposits from its acceptances, but many banks of the greatest importance have as yet not followed its example. In the end the public will prefer a bank in which the accounts are such as they ought to be, to a bank whose accounts are such as they ought not to be.

But though the nature of the business carried on by these banks is not told us, its profits are told us. We do not know, so well as we should, *how* the money is made, but we are very fairly and fully told *what* money is made; and it is very curious to trace in this patent record the varying profitableness of monetary operations. The following are the profits *earned* by the long-established joint stock banks of London during the last half-year, and we purposely confine our attention to these comparatively old banks of acknowledged credit, to avoid the unpleasant questions which embarrass the consideration of certain of the new banks, and the still greater odium of saying that one new bank is of established credit and that another is not so.

PROFITS EARNED IN THE HALF-YEAR ENDING 30TH JUNE, 1865.

	£
London and Westminster Bank	151,598
Union Bank	144,879
London Joint Stock Bank	127,597
City Bank	34,108
Bank of London	39,219
	497,401

Whereas in the previous half-year the corresponding amounts were—

	£
London and Westminster Bank	170,995
Union Bank	180,195
London Joint Stock Bank	156,150
City Bank	26,116
Bank of London	54,301
	587,757

And this is the more remarkable, because the London and Westminster Bank, whose accounts are full and conclusive,

Digitized by Google

show an increase of 1,000,000*l* in the deposits, and likewise a large diminution in the expenses. In the case of this bank at least, the net profit has diminished, though the means of making it have augmented, and though the cost of making it has declined. In the case of this bank, too, the cause of the diminution is not to be looked for, as might have been at first fancied, in the bad debt account, for it was expressly stated at the meeting that the bad debts of the past half-year have not much exceeded the average of many years past. The figures given above would seem to indicate that the City Bank was an exception to the otherwise general diminution of profits during the present half-year. But such does not appear to be the case. That bank deducted at Christmas 30,000*l* from its profits to meet "possible claims," and so large a sum having been deducted from the profits of the Christmas half year, no unusual deduction has been necessary from the profits of the June half-year.

The true reason of this great diminution of the profits is the reduction in the value of money. A large London joint stock bank has a considerable sum of money for which it pays nothing, and also a very great sum on which, when money can be lent at 8 or 9 per cent., it only pays 5 per cent. Up to 1859 the joint stock banks used to allow for money at interest 1 per cent. below the Bank of England rate, however high that rate might be. But they found that such a rate was wholly unsuitable to a keen crisis. At such a time, unusual sums of money must be kept at hand at a low profit, or at no profit, and it is, therefore, impossible to give extravagant rates for money which may be rapidly withdrawn. For money that is deposited for considerable periods of time, the joint stock banks, as well as the bill-brokers, gave in the autumn of 1864 considerable rates; but for money left only on the ordinary terms they did not give more than 5 per cent. Consequently they had an unusual opportunity of making profit; they could lend a large sum, for which they paid nothing or a low rate, at very high rates. And if they kept clear of bad debts they made great profits. But in the last half-year, when the rate of interest was very low, they had no such opportunity. They could not charge what they had charged last autumn, and though they paid less for much of their money, the compensation was not sufficient.

It is instructive to compare these accounts with those of this time last year, and it will probably surprise some of our readers to find that in some banks at least the profits were very much higher in June 1864 than either in December 1864 or June 1865, and that the aggregate of all of them was somewhat greater. The figures are:—

PROFITS EARNED IN HALF-YEAR ENDING JUNE 30, 1864.

	£
London and Westminster Bank	234,032
Union Bank	154,371
Joint Stock Bank	124,477
City Bank	48,588
Bank of London	58,291
	619,759

The reason of these high profits was that the half-year ending June 30 was even more favourable to banking than the half-year which succeeded. In the spring there was a high rate of discount, and in the autumn a still higher rate; but there was a disadvantage in the autumn which there was not in the spring. There was not a panic, but there was a fear of a panic. A great many people, not without experience, expected that October and November, 1864, would have been more severe than they were, though they brought suffering enough. If the Bank of England had acted as it did in 1857, unquestionably 1864 would have been worse than 1857. With this apprehension in their minds, it was not possible for bankers to use their resources as freely and boldly in the autumn as they used them in the spring; and though in many cases their deposits were more and the current rates of discount higher, yet the net result was not so good. If a banker is afraid to lend his money, it is of no use to him to have much of it, or that the nominal rates for it are high.

It is to be observed that the causes which make banking profits so fluctuating in London do not apply with the same force to many parts of the country, especially to the quieter parts. The rate of interest does not change in those districts with the same rapidity upon any securities. And the securities on which a banker lends in such places are not those which would be very acceptable in the London market at all. The London and Westminster must discount at some approximation to the Bank minimum the mass of the bills which come before them; but in many districts of the country no banker ever thinks of charging common bills less than five per cent. The tradesman for whom he discounts is not known in the London market, and the bills he brings would be taxed there a good deal more than the Bank minimum. A low rate of money in London, therefore, is not attended by equal cheapness in the country; and a high rate of money is not attended by equal dearness in the country. The country banker cannot, or thinks he cannot, run his rates up to the London minimum for first-rate bills, still less to the charge which would be made in London for the sort of paper which fills a country banker's bill-case. Both ways country banking is a trade of steadier profits; so much cannot be made of money when it is at the highest value, and more can be made of it at its lowest value.

THE DUTY OF THE NEW PARLIAMENT ON REFORM.

MR GLADSTONE said the other day, in one of his Lancashire speeches, that he should not think it right as a statesman to bring in a new Reform Bill without a really respectable chance of getting it passed into law. And we think he was right, for it is undoubtedly a great injury to the Government to be continually proposing purely theoretic changes which they have not sufficient strength to turn into practical measures. An administration has something better to do than to sketch out ideal changes, and materially weakens itself in the confidence of the country by withdrawing what it has once proposed. But though Mr Gladstone as a Minister is perfectly right in declining to support any more Reform Bills likely to prove mere abortions—any, in short, without a reasonable prospect of success—we do not think that it would be at all right for members of the new Parliament to reconcile themselves to shelving reform indefinitely on the same ground. Mr Gladstone clearly can only do the work of one man, though a great and influential man, towards rendering it possible to pass a new Reform Bill, but the House of Commons will have it in its power to render it probable, if not certain, that such a Reform shall be adopted,—certainly to give Mr Gladstone much more than the reasonable expectation of success he requires. And we hold that for many reasons this is the one great public duty that devolves upon them,—that for this task they should sedulously prepare themselves throughout the long vacation.

For it is certain that if it is not done now, it will be postponed until the time of general external pressure comes, for never was thought more ripe for a considerate measure than it is at the present time. There are two ways of carrying a great Reform,—by the pressure of quiet reason from above, without any spur of immediate necessity, in the way in which most great legal reforms are carried,—such as the Bankruptcy Reforms, or the Irish Land Registration Act, or the recent great Reform in the Poor Law, the Union Chargeability Act,—or, on the other hand, by waiting till it is the subject of a popular agitation, and resistance is no longer possible, as was the case with Reform, Catholic Emancipation, and Free Trade. Now, some people suppose that every great constitutional change is most efficiently carried when carried in the latter way,—that no intellectual impetus is sufficient to produce any really beneficial change in our constitutional formulæ,—that it requires the stimulus of fear to exact anything big enough to be of any use at all. But we submit that this is a view of Reform wholly inapplicable to the sort of Reform now needed. This is the Reform which is opposed by all the strength of ancient Privilege battling against the surrender of a fraction of its rights. This was the sort of Reform, no doubt, needed in 1832. *Then*, to talk of rational Reform, granted on intellectual and moral grounds by those who held the power merely because it was *right* to give others a power in the State, would have been the most chimerical of dreams. But that such a Reform is possible now is the principal result of the more violent Reform wrung from the privileged classes then. *Now*, it is absurd to talk of its being *impossible* to persuade the governing class to admit the working class to a share of its power without the stimulus of fear. There would be much less unreason in saying that it would have been impossible to persuade the landlord class to concede the Union Chargeability Bill without the stimulus of fear,—and yet we see that the last Parliament did pass it by large majorities, without any such pressure upon them. Whatever may be said against the Parliaments returned under

Digitized by Google

our present electoral law, this at least cannot be said, that they are not open to reason—all such reason as can be expected to make itself evident to the average mind of the country. We know no Parliament more amenable to reason than the last, and we believe its rejection of the Reform Bill of 1860 was due neither to selfish privilege nor mental opacity, but rather to a sincere conviction that the Bill was defective in principle, and not a Reform of the kind which the most reasonable persons in the community would wish to see. In 1860 honest Liberals did not yet see their way any more than Lord John Russell himself, to any Reform which should not be a mere extension of the principle of the great Reform Bill. And yet honest Liberals did feel scruples which they could not get over herein, that any such Reform would necessarily *tend*, by pointing to a very speedy representation of pure numbers, to make the House of Commons less really representative of the mind of the country than it is now. It was not that any important party in the House of Commons denied or rejected the right of the great working class to be fully represented there; but no scheme was proposed, nor indeed at that time even proposable, which could effect this purpose without doing a great deal more than effect it, namely, secure that in a short time no other class would have any representatives at all, that the numbers of the working class would suck all practical political power into its own hands. Could the working classes have been given forty or fifty seats certain, without either introducing any novel principle that would be scouted as an innovation, or securing that after the next stage or two, the forty or fifty seats would become 400 or 500, we believe the Parliament of 1860 would cordially have sanctioned such a measure. But it was hampered by its own deep respect for precedent, and kept between the horns of a dilemma, either to begin a task certain to destroy the *variety* of interests and ideas that would be represented in Parliament, or to decline all reform for the present. Of course it declined all reform, and in so doing was taking the most rational course possible to it.

But the situation of the next Parliament will be very difficult. We have been discussing this matter for the last five years, and for one politician who agreed with us then as to the necessity of departing from the idea of *merely* lowering the franchise from time to time, a hundred probably agree with us now. Mr J. S. Mill has done much to popularise the true principles of national representation. The plan of Mr Hare,—impossible of practical application as it is,—has brought vividly before all educated men's minds the injustice of dooming hosts of electors to vote for ever, if they vote at all, in perpetual minorities. Even Mr Cobden had to admit the injustice and prefer his own not very efficient remedy, that of subdividing the larger constituencies so that the minority of one ward might happen to be the majority of another. Everywhere the danger of conceding any more to the principle of purely numerical representation has been freely considered, and of the members returned to the new Parliament a very great proportion of the younger men have expressed themselves freely and cordially as to the difficulty, and their wish to surmount it. In short, the public mind is now thoroughly prepared for a sincere attempt to grapple with the difficulty. And if the new Parliament does not do so, it will neglect one of the plainest of its duties. The public mind, disgusted with the want of earnestness of the Legislature, will turn away from the subject, and when we next hear of it, it will be no longer a Reform to be worked out by thoughtful men acting under no urgent pressure, but one to be instantly yielded to angry men justly indignant at the long withholding of their rights.

If, therefore, the new Parliament choose to settle this question, undoubtedly they may settle it,—for Mr Gladstone is not a man to miss so great an opportunity as any real Parliamentary consensus of opinion would give him. It is much that we have at last got a Parliament, as we believe we have, fully aware of the true difficulty, and of the necessity of meeting it by striking out a new line in the path of Constitutional Reform,—a Parliament, on the whole, less deeply pledged to any particular measure than any Parliament of recent years, and yet much more strongly moved by that hearty Liberal *impulse* which is essential to facing any difficulty with courage and a desire to surmount it. To frame a good Reform Bill, which shall have the effect of identifying the mass of the people with our institutions and learning from them their own strongest wishes for the future, without depriving the House of Commons of any of the intellectual variety which is its best safeguard, seems to us the one special work which the new members should set before themselves as their own. We should not, of course, expect to see it done or even begun in the first session or two, but we shall hope to see in the very first debates bearing on the subject, signs that the opinion of Parliament is concentrating on particular lines of thought for a great effort, of which a genuinely constructive Minister like Mr Gladstone, will certainly not hesitate to avail himself.

THE LIBERAL BANQUET AT COLOGNE.

THE little drama which has been enacting itself this week at Cologne is something more than an episode in the Prussian constitutional struggle. It ought to remind the Liberals of the continent of a duty which they have for the last twenty years grievously, not to say grossly, neglected. They have during that period enjoyed in all countries intervals of power, usually short, but still long enough to enable them to introduce reforms which the Kings, when the reaction triumphed, would have found it very difficult indeed to recall. They have never, for instance, devised, we do not recollect that they have ever fairly tried to devise, any working machinery through which the subject might at any time and through his own action be sure of a fair appeal to the law. They have been afraid to annoy the bureaucracy and affront the army by establishing legal equality before the tribunals, and they are now paying everywhere the penalty of the omission. The Courts of Prussia, for example, are, for continental Courts, rather remarkably good. The judges are learned and painstaking men, never suspected of corruption, and for continental judges exceedingly independent. They would not like, perhaps, to decide a case directly against the King, or order Herr von Bismark into arrest, or insist on treating a soldier as they treat a civilian, but they really desire justice as an intellectual pleasure, desire it so strongly that the Government is by no means so sure of victory in its Courts as it is for instance in France. Unless coerced by armed force they might be trusted to decide fairly on a constitutional suit, and kings, however absolute, do not use armed force against judges. They feel too keenly that disrespect for the Courts speedily develops into disrespect for all constituted authorities, kings included, and prefer methods either of evasion or conciliation. Yet, though the Courts are thus independent and trustworthy, the Prussian who is injured by authority can very rarely get at them. The right to meet without arms is not, in his country, a doubtful point. It is as clear as the similar right in England, is an unquestioned privilege distinctly mentioned in the written constitution. Nevertheless, it has been overthrown by a mere order of the Executive, and there is really no appeal. The Liberal deputies of the Chamber resolved to attend a banquet in Cologne, which for some reason, to Englishmen inexplicable, the Court resolved to prevent. One would have thought that the Prussian Monarchy was beyond danger from a few opposition speeches, made by men who in Parliament cannot be prevented from making them, more especially as a circular to the press would have prevented their republication. The Court, however, did not think so, and the banquet was prohibited by the police. The managers appealed, the local judge quashed the police order as clearly illegal, and the arrangements proceeded. Herr von Bismark, however, was determined, and when the deputies met, the Mayor informed them that he had orders to disperse them, and soldiers made their appearance. The guests then endeavoured to select a place of meeting beyond the limits of Prussian authority, and proceeded to Oberlahnstein, in Nassau, whence, however, they were again expelled, the Duke, with the pusillanimous servility peculiar to the lesser German Princes, having summoned soldiers by express from Wiesbaden to disperse harmless guests. The unhappy deputies, though cheered by the population of Cologne, and all along the Rhine from Oberlahnstein to the city, and quite within the law, were compelled to depart to their homes, and have not only no redress, but no means of obtaining a legal decision that they ought to have it. Had they been Englishmen, they would, in the first instance, have refused to depart until the police or the soldiery had used force, and one or more of their number would have been carried off. They would then have brought actions for assault and wrongful imprisonment, and the legality of the whole proceeding would have been solemnly

Digitized by Google

argued and formally denied. But in Prussia no action of the kind lies against an official acting as such, without the consent of his superiors, and no action against a soldier at all, for he can demand to be tried by his officers, who would in no case condemn him for having obeyed superior orders. That remedy by law against the instruments of oppression as well as the oppressors themselves, which is the best and most practical defence of English liberty, has never on the continent been secured, and the aggrieved person must therefore either submit or attack the entire power of the State. That is a most dangerous system for the State, which has thus to bear the brunt of all the hatred produced by the misconduct of individual servants; but it is far more dangerous to liberty, for the bureaucracy and the army alike become corporations above the law. The Prussian officials are in politics singularly liberal, but nevertheless an illegal order is obeyed, because the mere fact of its issue shelters the subordinate from his responsibility to the law, and the ultimate chief, whose action alone could be impugned, is the King, who is beyond trial. The continental Liberals are sure within the next ten or fifteen years of another interval of power, and their first care should be to make the bureaucracy and the people equal before the law, to secure, once for all, a legal redress against illegality, to be available when the reaction comes once more. If they can secure it only for five years, the people will never let it go again.

For the rest, the Court of Prussia seems to us, in prohibiting the banquet, to have committed two grave mistakes. It has stepped out of its fortress of legality. So carefully was the Constitution of Prussia drawn in the interest of the Executive, that it is very doubtful indeed whether the Court had, previously to the prohibition, really violated its letter, and it is one thing to resist an infraction of the Constitution, and quite another to defy a particular and possibly correct interpretation of it. They have, moreover, done this upon a point in which their action is *visible* to the mass of the common people. Prussian peasants and artisans are better educated than the same class in England, but they cannot be expected to understand the exact limits of the royal power as to the transfer of sums in the budget from one department to another, and are habitually indisposed to agitate for the freedom of a press, which, except in newspapers, is really free. But they understand perfectly well when the right of giving a dinner party is attacked, or when men are punished for simply meeting to talk quietly over their grievances, and, like all men who realise oppression, are exceedingly irritated thereat. Accordingly the Presidents of the Trades Unions, as we should call them, have urged all workmen throughout Prussia to stand by the Liberal deputies, and test the law by holding mass meetings under its authorisation. All these men, it must be remembered, have been drilled soldiers, and the men now in the ranks have been taken from their class. A feeling once excited among them, therefore, may spread far, more especially when it is a feeling of sympathy for deputies who have recommended a great increase in the pay of the petty civil offices, to which non-commissioned officers in Prussia look as their reward. An army of 200,000 men can very easily coerce the professional classes, but it is very difficult and very costly to coerce a whole population, every man of which has been taught to use his musket and obey the word of command, and Herr von Bismark has now only to irritate the peasantry to have the entire population arrayed against him, and against the dynasty which he is permitted to bring into discredit.

COMMERCE OF GREAT BRITAIN IN 1864.

The ninth annual Report of the Board of Customs, which has just been issued, brings out in strong relief both the irrepressible expansiveness of our commerce and the equally irrepressible elasticity of our revenue. Since we first courageously adopted the practice of reducing the duties on all articles of general consumption whenever there was a surplus which rendered such reduction possible, scarcely any relief, however large and generous, which the Chancellor of the Exchequer offers to the nation produces a perceptible effect upon the net receeipts derived from taxation on our foreign trade. Thus, in the course of the last seven years during which Mr Gladstone has been unusually benevolent and daring, and has greatly and even repeatedly reduced the duties on wine, tea, and sugar, the extreme variation in the net Customs revenue has never exceeded one million, or about *four per cent.* It has never gone below 23,250,000*l*, and has only once materially passed 24,000,000*l*. The aggregate amount of duties taken off in 1860-1-2-3-4 was 6,079,435*l*:—of this we have recovered by increased consumption considerably more than half, or 3,668,000*l*.

The expansiveness of the trade is even more remarkable than the elasticity of the revenue of the country. We have now before us the real values of both imports and exports for ten years, from 1855 to 1864 inclusive. Both have as nearly as possible doubled within that period:—the former have risen from 143,500,000*l* to 274,800,000*l*;—and the latter from 115,800,000*l* to 212,600,000*l*. Yet in the course of these years we have had good harvests and bad harvests, years of Indian mutinies and continental wars, years of revolution and spoliation, years of inflation and years of panic, military expeditions on a great scale to China and Japan, and lastly the terrible crisis of the cotton famine. Yet, in spite of all these sources of interruption and derangement, the year 1858 was the only one which exhibited even a temporary falling off in the aggregate value of our imports, and only in 1858 and 1861 was there any reduction in our exports. The increase, too, has been most rapid in the latest years of the series, thus:—

	Imports. £	Exports. £
1862	225,700,000	166,100,000
1863	248,900,000	196,900,000
1864	274,800,000	212,600,000

We may be said to have *established* an average rate of increase of ten per cent. per annum.

There is, however, one considerable modification to be introduced into this statement, before it can be accepted as representing the whole truth,—a modification which we have on former occasions dwelt upon at length, and therefore need only cursorily refer to here. Prices of several articles—notably of one, cotton—have risen materially, and this advance has swelled the money *value* of both exports and imports without any corresponding augmentation of *quantities*. Much that we import we export again in the same condition. Much more we import in the shape of raw material, and export again in the shape of the manufactured article. In both these instances, therefore, the expansion of our trade, as represented by the figures we have quoted above, is more nominal than real. In the case of cotton, the raw material of our principal manufacture, a large diminution in the quantities imported and exported has been accompanied by an actual increase in the nominal value. The prices which obtained in 1860 were quadrupled in 1863:—

	Cotton Imported. Quantities. Cwts.	Values £
1860	12,400,000	35,700,000
1861	11,200,000	38,600,000
1862	4,700,000	31,100,000
1863	5,900,000	56,300,000
1864	7,900,000	78,200,000

The cotton which was worth 3*l* per cwt in 1860, had risen to nearly 7*l* in 1862, and to nearly 10*l* in 1864.

Now let us see how the same fluctuations in value affect our exports of the corresponding manufactured article. It is calculated, we believe, that in ordinary years two-thirds of all the raw cotton used in this country is re-exported in the form of yarn or piece-goods.

	Cotton Manufactures Exported. Quantities. Million yards.	Value. £
1860	2,776	42,140,000
1861	2,563	37,600,000
1862	1,681	30,550,000
1863	1,711	39,500,000
1864	1,749	45,700,000

The discrepancy of course is not so observable here as in the former table, because here only a portion of the value represents the raw material (which has risen so greatly) and the rest represents the wages of labour and the profits of capital (which had fallen); but still 1,000 millions of yards *less* cost 3,600,000*l more* in 1864 than in 1860, and swelled the apparent value of our exports in the later year, in spite of an actual reduction.—A similar observation will apply, though in a much less extreme degree, to our exports of woollen and linen manufactures, both of which have participated in the advance of price.

Digitized by Google

The tables of total imports and exports continue to present the same feature on which we have commented more than once, but of which it is not possible to give any wholly satisfactory explanation. The aggregate value of imports exceeds that of exports by a considerable sum each year—a sum varying from 24,000,000*l* to 62,000,000*l*,—and this excess appears to be on the increase. It has varied thus :—

	£		£
1855	27,000,000	1860	46,000,000
1856	33,000,000	1861	58,000,000
1857	41,000,000	1862	60,000,000
1858	25,000,000	1863	52,000,000
1859	24,000,000	1864	62,000,000

Part of this excess is, no doubt, owing to the fact that the *imports* are valued in bond, and, therefore, with freight and landing charges *included*, while the exports are valued *without* these elements, as is quite proper. Part of it must certainly be attributed to the fact that the *import* valuations, being carefully made by the Custom House authorities, may be relied upon, while the *export* valuations, being carelessly declared by the merchant or shipper, and often quite at random, are by no means reliable,—though why this recklessness should prodnce such varying results from year to year we cannot explain. The residue of excess must, we apprehend, be regarded as the legitimate profits of our foreign commerce. If by sending out two hundred millions, or what we estimate at that amount, we can purchase and obtain two hundred and fifty millions' worth of goods, we gain fifty millions on the transaction. The old notion—to which Sir Archibald Alison, alone we suppose, still adheres, is that we are *poorer* by that balance,—which must, according to his theory, be either paid in bullion, or remain registered against us as a debt. Paid in bullion it certainly is not, for during the last five years, when the aggregate balances of our *goods* trade have amounted to 278,000,000*l* in our favour, our imports of bullion have exceeded our exports by about 1,000,000*l* annually,

The only other points in the report before us which offer much interest to the public are the progress of our trade with France, and with the United States, respectively. Our aggregate trade with France continues, though slowly, to increase: —our exports of *British* articles thither reached the culminating point in 1862, since which date it has slowly declined: —(The figures were 9,209,000*l* in 1862, and 8,200,000*l* in 1864.)

FRANCE.

	Imports from. £	Exports to. £
1860	17,700,000	12,700,000
1861	17,800,000	17,400,000
1862	21,600,000	21,700,000
1863	24,000,000	23,300,000
1864	24,600,000	24,100,000

AMERICA—(United States).

	Imports from. £	Exports to. £
1860	44,700,000	22,900,000
1861	49,400,000	11,000,000
1862	27,700,000	19,200,000
1863	19,500,000	19,700,000
1864	17,900,000	20,000,000

The import and consumption of wine continue to increase, but the lighter wines do not appear to grow in public favour.

Agriculture.

THE ROYAL AGRICULTURAL SOCIETY'S MEETING.

The meeting of the Royal Agricultural Society which has just taken place at Plymouth, in the far West, has been somewhat eclipsed by the elections, so that the daily newspapers have told but little about it. All who have gone down to Plymouth with a keen eye for agricultural developments, have come very much to Sheridan's conclusion,—that the further they go West the more they are convinced that the wise men (agriculturally) come from the East. The small fields, the high banks, often walled with timber trees growing upon them, and the abundant timber and hedge-rows, are wholly inconsistent with the use of improved implements, or any of the modern developments of high farming. The land, too, is but indifferently cultivated, by inferior tenants, though much of it is naturally very fertile. The moist climate and general prevalence of open subsoils render the West of England very suitable for stock, and with any fair management the quantity of live stock kept might be greatly increased. Everywhere throughout Somerset, Dorset, Devon, and Cornwall, the red cattle prevail, save here and there a varying tint shows that the crossing system is here too making its way. That a cross with the Shorthorn would greatly improve the West country cattle as productive stock cannot be doubted.

The West, however, seems to be well contented with small changes and slowly moving improvements. Here, too, as elsewhere in England, the landowners are doing next to nothing for the improvement of their property. Of the stock shown at Plymouth nothing new can be said. There were fine specimens of every kind of breed save well-bred horses. Indeed, it seems pretty evident that horse-breeding—*i.e.*, thorough-bred and hunting-horse-breeding—will receive but slender encouragement from anything the Royal Agricultural Society is able to do.

That the Society's show excited considerable attention is proved by the large amounts received for admission to the show-yard, and there cannot be much doubt that some break in the dead monotony of Western agriculture will result from the Society's visit. We wish we could anticipate large and rapid results.

THE FARMERS ARE MOVING.

GAME AND THE GAME LAWS.

The general election, now so nearly concluded, has been influenced by a novel element of much present and greater future significance. In several of the counties the farmers have been acting, not, as hitherto, mere doers of the will of their landlords, but on their own behalf. The special topic which has most commonly set them in motion has been the game. For the two or three last dry summers the game has everywhere in preserved districts become more numerous than usual, and excessively oppressive. At the same time the system of supervision has become more stringent since the passing of Sir Baldwin Leighton's Act for converting the rural police constables into game watchers. And this Act has proved the last turn of the game law screw which the farmers, dependent as many of them are, cannot bear. The result has been that the farmers have given very much greater support than usual to the liberal candidates for counties, especially where such candidates have personally dealt fairly or liberally with their own tenants in relation to game. One noticeable instance of this movement has been the defeat of Sir Baldwin Leighton himself in Shropshire, where he was justly obnoxious as the author of the last and most oppressive game law. In North Warwickshire the farmers gave great support to Mr Muntz, the Liberal candidate, mainly on the ground that, though he likes game on his estate, he trusts the preservation to his tenants, and consequently the best understanding subsists between him and them upon the subject of game. In several of the Scotch counties, the farmers have met in large numbers and passed resolutions, to the effect that hares and rabbits should no longer be considered game, and should not be in any way protected under the provisions of the game laws, and that all contracts by which such vermin—rabbits and hares—are reserved to the landlord should be declared by law to be illegal. And these views have been accepted by several of the candidates for Scotch counties. Again, in East Lothian—Haddingtonshire—Mr George Hope, the well-known farmer of that county, has been brought out—at the last moment—and has actually contested the election. Though for the present unsuccessful, Mr Hope's candidateship cannot do otherwise than greatly influence the tone and temper of the constituency of East Lothian. We regard all these things as most hopeful signs,—hopeful for the elevation of the social status of the tenant-farmer, and hopeful for the future progress of British agriculture, which at present is more kept back by the mismanagement of landed property, and the unduly depressed condition of the tenant-farmers, than by any other circumstance. With a few tenant-farmer members in the House of Commons, there probably would soon be a diminution of game on our soil, with a vastly increased amount of capital employed both in its improvement and cultivation.

The *North British Agriculturist* says, on the Haddingtonshire contest, that "the movement was really a demonstration against the game and hypothec laws; and its value lies in this—that it is the commencement of a new form of agitation. Such an issue was inevitable, and it only needed some favourable opportunity to call it forth. That laws so unjust in themselves, and pressing so severely on the commercial interests of tenant-farmers, should only evoke some fruitless discussion at an Agricultural Association or Chamber of Agriculture could not be supposed." We disagree entirely with our contemporary when he designates the discussions of game and other laws injurious to farmers as "fruitless." Such discussions are seldom fruitless; though the seed may remain in the soil for a time apparently without producing active results, our agriculturists may be assured that it is by discussion, constantly repeated, that they must prepare, not merely the public mind, but the minds of their own class, for the exertions which are necessary for obtaining redress of their grievances. With reference to the future action of the Scotch farmers in connection with their recent movement in Haddingtonshire, the *Agriculturist* says: "The Haddingtonshire movement will do some good; but the effect of it will soon pass away unless it is followed up. The country knows that the tenant-farmers have the power. They have expressed in this movement a determination to use it. But the measure of that determination remains to be proved. An indolent satisfaction at giving Lord Elcho a tolerably good fright, and leaving, for a time, a more favourable consideration of their claims, is not what is needed. The chief lesson of the recent

Digitized by Google

attempt is, organisation and action on the part of tenant-farmers. Without these the Haddingtonshire movement will be worse than useless; with these it will have the results of a great success."

In connection with the representation of an agricultural districts in Parliament, we may mention what has recently occurred in the Mitchell district of Queensland, which has now for the first time acquired the right to send a member to the Provincial Parliament. The constituency consists of thirteen voters, the squatters, or station owners, and the majority of them desired to send a gentleman of the district, Mr Dalton, as their member, he being well acquainted with their local requirements and their want of roads, a native, and the like.

It seems no opposition was anticipated, and only four voters attended on the day of election. Then a Mr Jones, a barrister of Brisbane, a gentleman wholly unknown in the district, was suddenly opposed to Mr Dalton, and the four voters being equally divided the returning officer—possibly in the plot—gave his casting vote for the stranger, who was thus returned.

Literature.

THE LIFE AND ADMINISTRATION OF ABRAHAM LINCOLN. Presenting his Early History, Political Career, Speeches, Messages, Proclamations, Letters, &c. By G. W. BACON. Sampson Low, Son, and Marston; Bacon and Co., 64 Paternoster row.

IT is yet too early to look for a full and satisfactory biography of one who in the pages of American history will occupy a place second only to Washington, both for services rendered to his country and for the integrity and simple-hearted devotion with which he served her. The life before us, as well as the earlier lives that have supplied it with much of its material, are little more than *memoirs pour servir* to that fuller record of the private and public life of Abraham Lincoln which, on the cooling down of party strife and the clearing away of party prejudices, we shall hope to receive from some competent pen.

Mr Bacon puts forward no higher claim for his book than that of being a careful compilation, from genuine sources, of the chief facts bearing upon the character and illustrative of the administration of President Lincoln. The memoir with which his book opens is of the slightest. It gives merely a truthful outline, which each reader must fill in for himself from the documentary evidence of the remainder.

It would be a difficult task in most cases to build "up the man in his habit as he lived," from such meagre sources; but President Lincoln's "political career" was in the truest sense a political life, his policy was the expression of his character. This, no doubt, is true of any really great statesman, but it was remarkably so of Abraham Lincoln. As a tree may be known by its fruits, so may his growing strength, his ripening sagacity and sweetness, be read in the speeches and proclamations of his latter years. Mr Bacon, besides freely quoting from these in the course of his narrative, has collected them, together with his earlier speeches, in an appendix, and it is to those the reader must turn for the signs of that increasing width of ideas, depth of judgment, and ever-broadening charity, of that serenity and strength under trials, that he has not, as yet, the advantage of tracing out in the more readily to be interpreted pages of private life.

Owing to this apparent singleness of heart and purpose, a biography of Lincoln is the less indispensable to the forming of a true estimate of his character; yet, when a man entirely unheard of beyond the limits of his native state, becomes in less than four years, not a household name only, but almost a household face amongst a friendly indeed, but at the same time rather a critical and unsympathetic people like ourselves,—when, amongst many conflicting opinions as to the wisdom of his aims and of his measures, we find but one as to their loftiness and disinterested patriotism,—when we consider that no statesman has ever, in so short a time and under such adverse circumstances, rooted himself so deeply in the esteem and even in the affections not alone of his own countrymen but of foreign nations,—we cannot but wish to see it a confidence so unbounded, a regard so sincere and so widely spread, is justified by a nearer and more searching investigation into the character of its object. For this reason, if for no other, the fragmentary contributions of friends and foes, of newspaper writers and book-makers, towards a life of Abraham Lincoln, will be secure of readers.

Originally of Quaker origin and of Pennsylvanian breed, the Lincoln family were settled in Virginia when Abraham, the grandfather of the President, pioneered his way into Kentucky; here he was killed and scalped at his own door, leaving a wife and many sons, the youngest of whom, Thomas, lived with his mother as a farm lad, grew up without education, married early, had two sons and a daughter (one of the sons died in infancy, the daughter is now dead, leaving no children), and both disliking slavery and disgusted with the position of a poor white in a Slave State, removed with his family to Spencer County, Indiana. Of this journey his son once said that it was the hardest experience of a hard life. Here his mother died and his father married again; but, beyond these facts, we know little of his earliest years. The lad of ten helped his father in clearing and cultivating his land, grew "quite a proficient with his rifle" in the uncleared forests around his hut, read diligently, and became "the subject of remark among the neighbouring settlers for his thoughtful ways and mental industry." He was occasionally sent to school, but as he himself asserts that the aggregate of his schooling did not amount to one year;—as he "never attended a college or academy as a student, and never even saw the inside of a college or academy till after he had won his law licence," Mr Bacon is right in saying that "what he possessed in the way of an education he attained by dint of hard unaided study." His memory was very retentive, his love of reading great, his opportunities of gratifying that love small. We will not repeat here the well-known anecdote of the borrowed book where one hour of carelessness was repaid by three days of steady labour, but pass on to another trait not less characteristic of the future man than the manliness and straightforwardness that on that occasion won for him the esteem of the neighbourhood and proved his early right to the title of "Honest Abe." "Among his schoolfellows he was invariably a 'peacemaker,' he adjusted their misunderstandings, mediated in cases of extreme difficulty, with remonstrances and soothing kindness, and in more than one instance he is said to have thrown himself between infuriated urchins and restored harmony at the risk of personal injury to himself." "Between the time of his leaving school and his nineteenth year, he was constantly employed in the hardy avocation of a Western woodman, cutting down trees, splitting rails, and the like, and during the evening eagerly devoting the few hours until bed-time to such books as he could manage to procure." At twenty he was employed in the flat boat trade on the Mississippi, a service of some danger; requiring all the strength of body and courage for which young Abraham was already noted. To these was now added a reputation for promising business talents. At twenty-one he accompanied his father and his step-mother to County Macon, Illinois. "They reared a log-cabin upon their new location, into which the family removed. The next improvement was a rail fence sufficient to surround ten acres of land, for which young Lincoln assisted in *splitting the rails*, the identical rails which afterwards became the theme of joke, song, and story." Fever and ague were hard upon the new settlers; for three weeks snow laid three feet deep on the ground; famine threatened the family, but "Abraham was willing to brave any or every hardship to relieve their household wants. Through his untiring exertions, he managed to furnish enough game to keep the family in food, although he was not a first-rate hunter, his love of books having early overcome the fondness and enthusiasm with which he had at first adopted the rifle."

A second expedition to New Orleans led to his entering as clerk in a shop and mill at New Salem, Illinois. This was in July 1831. "Here he soon made many acquaintances and friends, and won the respect of all with whom he had business dealings; while socially he was much beloved by his acquaintances, and came to be familiarly known as "Honest Abe."

In 1832, he was made captain of volunteers in the Black Hawk war, but this, his first and last essay at leading soldiers to battle, ended ingloriously without a sight of the enemy. "He is said to have been a great favourite in the army, an efficient officer, and a brave danger-scorning, fatigue-defying soldier." Mr Bacon's language strikes us as rather magniloquent for the occasion.

From this year 1832 we enter upon the public life of Abraham Lincoln. He was twenty-three years of age only, and yet it was thought that his popularity would ensure his party success. He was a Henry Clay man, in opposition to General Jackson, in the election for the State Legislature of Illinois. Failing at that time, he devoted himself to the study of law, but two years later he was again nominated as candidate. "The prospect of success was much brighter than before, for Abraham Lincoln had become a very popular man; the first to enlist and the last to leave, he was thought to have distinguished himself as a military man. He was an excellent surveyor, a tolerable lawyer, in fact, a rising man in the Western sense of the term. More than this, he was heartily esteemed for his good sense, greatness of heart, and integrity of soul." He was returned by a fair majority. Three times he was re-elected to the State Legislature, and in 1846 took his seat in Congress, for the Central district of Illinois.

From this date the scanty memorials of private life are altogether swallowed up in the vortex of public affairs. And the chief interest of the reader centres in watching the growth, not of that hatred of slavery which was inborn in Abraham Lincoln and always consistently manifested in his actions, but of his perception of the deadly nature of the feud between slavery and the Union, and of the rightfulness and necessity of crushing the one to preserve the other. For a long time reverence for law, one of the strongest features in Lincoln's character, and a deep sense of the rights of his slave-holding fellow-countrymen, restrained his actions within the narrowest bounds. The State of Illinois was disposed to conciliate the Southern States at any expense, but Lincoln "refused to vote for several of these regularly digested resolutions for the propitiation of the slavery sentiment;" and, in 1837, put his hand to a protest which, while confessing that Con-

Digitized by Google

gress had, in the opinion of the protestors, no power to interfere with State institutions; yet declared that the "institution of slavery is founded both in injustice and bad policy." In Congress he moved as an amendment to the bill for the abolition of the slave trade in the district of Columbia, that not only the slave trade but slavery itself should be abolished in that district. He was opposed to the Mexican war, and it is well known that his firmness on the subject of the extension of slavery in the territories was the immediate motive for the secession of the South. Mr Bacon holds, however, with many others, that this fear on the part of the South of a Republican President was not so much the motive as the pretence for secession, and that in order to ensure the possession of so fair a pretence for alarm the Southern party divided their votes in the elections so as to make certain their own defeat. It is not, however, our intention to enter upon the political aspect of the book before us. We will rather extract from it a passage or two giving some of the few glimpses allowed us of the President's private life.

"He was at Springfield, Illinois, during the sitting of the Convention; and having left the telegraphic office after learning the result of the first two ballots, was quietly conversing with some friends in the office of the *State Journal*, while the casting of the third ballot was in progress. In a little time the result was received at the telegraph office. The superintendent, who was present, hastily wrote on a scrap of paper, "Mr Lincoln, you are nominated in the third ballot," which he immediately sent by a boy to Mr Lincoln. A shout of applause greeted the message throughout the office of the *Journal*, but Mr Lincoln received it in silence. Then he put the paper in his pocket, rose, and said quietly: "There is a little woman down at our house would like to hear this, I'll go down and tell her."

Another anecdote relating to this period of his life has, we fear, been often quoted before, but it is too illustrative of the nature of one who retained something of childlike simplicity through all the heat and strife of his eventful and busy life to be omitted here.

"It was thus narrated by a teacher at the Five Points House of Industry:—'Our Sunday School in the Five Points was assembled one Sabbath morning, when I noticed a tall, remarkable looking man enter the room, and take a seat among us. He listened with fixed attention to our exercises, and his countenance expressed such genuine interest that I approached him and suggested that he might be willing to say something to the children. He accepted the invitation with evident pleasure, and, coming forward, began a simple address, which at once fascinated every little hearer and hushed the room into silence. His language was strikingly beautiful, and his tones musical with intensest feeling. The little faces around him would droop in sad conviction as he uttered sentences of warning, and would brighten into sunshine as he spoke cheerful words of promise. Once or twice he attempted to close his remarks but the imperative shouts of 'go on,' 'oh! go on,' would compel him to resume. As I looked at the gaunt and sinewy frame of the stranger, and marked his powerful head and determined features now touched into softness by the impressions of the moment, I felt an irrepressible curiosity to learn something more about him, and when he was quietly leaving the room, I begged to know his name. He courteously replied, 'It is Abraham Lincoln, of Illinois.'" We will conclude with a passage from Lincoln's letter to Colonel Hodges, of Kentucky, written in April, 1864. We would willingly give it in full, but space does not permit.

"I am naturally anti-slavery. If slavery is not wrong, nothing is wrong. I cannot remember when I did not so think and feel, and yet I have never understood that the Presidency conferred upon me an unrestricted right to act officially upon this judgment and feeling. It was in the oath I took that I would to the best of my ability preserve, protect, and defend the constitution of the United States. I could not take the office without taking the oath. Nor was it my view that I might take an oath to get power and break the oath in using the power. I understood, too, that, in ordinary and civil administration, this oath even forbade me to practically indulge my primary abstract judgment on the moral question of slavery. I had publicly declared this many times and in many ways, and I aver that, to this day, I have done no official act in mere deference to my abstract judgment and feeling on slavery. I did understand, however, that my oath to preserve the constitution to the best of my ability, imposed upon me the duty of preserving, by every indispensable means, that government, that nation, of which that constitution was the organic law. Was it possible to lose the nation, and yet preserve the constitution? By general law life and limb must be protected; yet often a limb must be amputated to save a life; but a life is never wisely given to save a limb. I felt that measures, otherwise unconstitutional, might become lawful by becoming indispensable to the preservation of the constitution through the preservation of the nation. Right or wrong, I assumed this ground, and now avow it. I could not feel that, to the best of my ability, I had ever tried to preserve the constitution if, to save slavery, or any minor matter, I should permit the wreck of government, country, and constitution altogether."

We must refer our readers to the letter itself as a brief and comprehensive explanation of all President Lincoln's action with regard to the question of slavery,—an action which, satisfying at the time, neither Slaveholder nor Abolitionist, has yet proved the most efficacious means to an end, only second in his eyes to the preservation of his good faith, and the fulfilment of his duty.

CAMP AND CANTONMENT: A JOURNAL OF LIFE IN INDIA IN 1857–1859. With some Account of the Way thither. By Mrs LEOPOLD PAGET. Longman, Green, Longman, Roberts, and Green.

THIS is not a dull book; a woman's account of her travels seldom is; and Mrs Leopold Paget has a good share of that liveliness of mind, that vivid sense of the picturesque, and that ease of style that make the letters and journals of a clever and sensible woman some of the pleasantest reading in the world. Yet, readable and often amusing as it is, the question that rises in our mind on closing this volume is *cui bono*. Five or six years ago any personal experience, however slight, gained on the soil of India would have had an interest beyond its intrinsic worth, and would at least have contributed some items to a wished-for knowledge. Now it was scarcely worth while opening up old wounds to gratify a vanity of authorship, innocent enough in itself and not wholly without foundation. No doubt it is quite true that the transport service in 1857 was not efficient; that the P. and O. steamers returning from the East were inconveniently crowded with passengers; and that an officer's wife following the army into Central India in pursuit of rebels had many hardships to endure—enduring them for the most part bravely; but these facts are not strictly novel ones, or sufficiently important to make us willing to turn our thoughts back to that fiery ordeal through which our Indian Empire had to pass, and to waken in many a home memories yet too recent to have lost their bitterness. There are some books to which the often quoted rule of delay does not apply, and this is one. Mrs Leopold Paget should have published her Journal earlier, or not at all.

Captain Leopold Paget, commanding one of the first detachments of artillery that left for India in the summer of 1857, obtained leave to take his wife out with him. It was a bold undertaking on both sides, but the courage and power of endurance evinced by the lady justified the risk, and would have made her a heroine, if her lot had fallen on more troubled times. As it was she saw only the traces of the storm and suffered nothing more than inconveniences amounting to hardships, some risk, and a good share of sickness. Her equanimity and cheerfulness never fails her except when she is criticising the conduct of the Indian Government, or suffering under the monotony and discomfort of the journey home. Indeed we cannot but regret that even if she felt the necessity of giving, from patriotic motives, some "account of the way thither," she did not at any rate abstain from a repetition of that trite theme, the way home.

The most marked points of this volume are the visits of the writer to the falls of Gairsapa, and her two solitary journeys in pursuit of her husband, one from Bombay to Belgaum, in which a not altogether welcome or expected addition was made to her party by the arrival of an infant son, the other with that son escorted by one native soldier from Ahmednugger to Mhow through the heart of a most disturbed district. Proofs have not been wanting, of what can be done by delicately-nurtured women under the burning sun of India, but if they were, more than one might be found in the journal of Mrs Leopold Paget.

She visited the falls of Gairsapa in the Presidency of Madras, some thirty miles from the hill station of Sircee, and is animated in her praise of the lovely scenery of this part of India, which strongly reminded her of North Devon. She was near the scene of action when the town and fort of Nurgoond fell into the hands of the English. The natural defences of this stronghold of the rebelious Rajah were great. "It is the strongest fort on this side of India", she writes, "and had bid defiance even to the victorious Tippoo Saib, and now fifty resolute men might have held it for a long time, and rendered the town below perfectly untenable for our little force." The storming party advanced up the steep rugged pathway, powder bags were fixed to the strongly fortified doors of the fort, two lieutenants volunteered for the hazardous duty of firing them, when a *sowar* climbing over the wall discovered the interior to be empty of all but a few frightened natives. When the Rajah was questioned as to why he preferred the all but certainty of capture and hanging to an honourable death in defence of his stronghold, he answered "He did not know how it was, his arms were ready to fight, his head and his legs were ready to fight, but there was something *here* (tapping his side) which *would not* fight, and he was obliged to run away; and he supposed his followers suffered from the same complaint."

After the capture of Nurgoond, Captain Paget's troop was ordered out in pursuit of the rebels under Tantia Topee, and on their complete dispersion he returned to Mhow, rejoined his wife and child, and, obtaining an exchange, set out on his return to England, via Bombay. Of the discomforts of this return journey the following passage is a fair specimen, as it also is of the authoress's style:—

"We left Sindwa at half-past five p.m. yesterday, L—— in one cart, and baby and I in another. They are the common springless carts of the country—[their own conveyance had come to grief],—partly filled

Digitized by Google

with hay, over which our mattresses were spread, and bags and boxes inserted in every crevice. They are roofed with matting, over which a thick blanket was bound, as a slight protection from the heat; mine, having matting along the sides and back to keep things from falling out, was considered a superior article, but *en revanche* the matting scratched one dreadfully. My cart inclined a good deal towards the rear, besides being always on one side, owing to my outweighing baby. The jolting over the rocky roads full of deep holes, is wholly beyond my powers of description. I was frequently obliged to hold on with both hands, and had to wedge in baby between boxes, and even then he was frequently tossed into the air, and when I dozed for a few minutes I had great fears of his jolting out. We were both of us covered with black and blue bruises and sore places from rubbing against the sides of the cart. At each changing place the drivers had a trick of letting down the end of the pole with a jerk, and one found oneself at an angle of forty-five degrees, head downwards. My pole was also in a very ricketty condition, and broke down once on the road. We arrived, after a most wretched journey, at Seerpoor at six o'clock a.m., and in an evil hour were induced to proceed about eight miles further to a new bungalow on the banks of the Taptee, recently erected for the accommodation of troops. It was tolerably clean though with *dust* floors, and had the unusual luxury of chairs and a table, but it was built of wood and the doors and windows were far from fitting, and I never can forget the burning wind that blew in at every crevice, nearly suffocating us. The people of the village were very uncivil, and bribes and threats had to be resorted to before we could even procure water or firewood. Supplies there were none, except a water melon which we greedily devoured, but fortunately our carts were well provided. I was thoroughly knocked up from the impossibility of getting any rest by day, owing to having to attend upon baby, who, in spite of heat and fatigue, looks better than when we left Mhow, and trots about the dusty floors in a state of great happiness making dirt pies to his heart's content. No traveller in civilised countries can form a conception of the state of dreadful dirt we are compelled to exist in (notwithstanding the daily bath) owing to the combined influence of dust and heat."

Mrs Paget deserves credit for her perseverance in posting up her journal daily under such discouraging circumstances, but anecdotes such as the above, with occassional commendations of "baby's" patience in travelling "fourteen hours without food!" must have been of more interest to familiar friends, than they are likely to prove to the reading public. It is satisfactory, however, to find that the human infant has such tenacity of life and such an enviable power of accommodating its habits to its circumstances.

Captain Paget has added to his wife's journal a brief account of how he helped in the chase after Tantia Topee, written in a straightforward soldierlike style. The service was no light one. "During the last five days," he writes in one place, "we had marched 165 miles—marching literally day and night. The last eighty miles, followed by the action, had been *without a halt*, and when the force bivouacked later in the day, the men had been on horseback for forty-two hours out of the previous forty-eight,"—and in another, "On the 21st February, we halted at a place called Booghra, having marched 194 miles during the last six days, of which ninety-four had been performed in the last forty-eight hours. This would be good travelling for a column of troops in a temperate climate, but in India, it must be remembered, on account of the deadly influence of the sun, troops in ordinary times only march at night, and then only from ten to twelve miles at a time, with comfortable tents in which to repose during the day. We, on the contrary, had had no shelter from the sun (an enemy at all times more to be dreaded by British soldiers than any number of rebels) since the 13th inst., when we left our equipage behind us." Officers and men who had kept in health through the fatigues and excitement of this brief campaign had no sooner defeated and dispersed the enemy and returned to their quarters at Mhow than they all fell ill, and it was while recovering from a severe attack of fever that Captain Paget and his wife set out on that journey to Bombay, the agreebleness of which we have shown in a preceding extract.

CHARACTERS AND CRITICISMS. A Book of Miscellanies. By JAMES HANNAY. William P. Nimmo, Edinburgh.

WE have some hesitation in saying that these essays are not worth republishing, for the writer may esteem popularity a sufficient test of worthiness; and, with the success of "Essays on Social Subjects," and the kindred, but even milder, lucubrations of A. K. H. B. before our eyes, it is impossible to deny that these reprints from the *Edinburgh Courant* may meet with a favourable reception from an indulgent public. The strong flavour of Toryism that runs through them will recommend them in some quarters; and if they do not rise above the level of the thoughtful and cultivated writing now general in our best newspapers, they do not sink materially below it. The best essay is that on "Plutarch," republished from the "Quarterly"; but the most interesting is one on Thackeray, written with the ardour of friendship and the clearness of personal knowledge.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monteur* has published the following return of the Bank of France, made up to the 27th inst. The return for the previous week is added:—

DEBTOR.	July 27, 1865. f	c		July 20, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	893,722,075	0	.....	899,347,175	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	8,310,734	24	.....	7,507,759	96
Treasury account	143,782,124	41	.....	143,070,305	85
Accounts current at Paris	168,620,111	6	.....	148,076,040	61
Ditto in the provinces	30,561,909	0	.....	31,397,487	0
Dividends payable	3,179,163	75	.....	4,033,916	75
Various discounts	2,414,127	82	.....	2,035,718	85
Re-discounts	1,427,623	17	.....	2,189,616	52
Surplus of receipts not distributed	752,993	36	.....	752,993	36
Sundries	12,126,623	23	.....	14,585,898	72
	1,485,548,011	20	.....	1,467,885,395	43
CREDITOR.	f	c		f	c
Cash and bullion	494,212,841	33	.....	492,997,271	55
Commercial bills overdue	213,260	47	.....	145,843	31
Ditto discounted in Paris	295,463,954	23	.....	291,749,664	46
Ditto in the branches	315,512,794	0	.....	309,961,824	0
Advances on bullion in Paris	60,587,155	15	.....	53,654,555	15
Ditto in the provinces	12,294,154	0	.....	12,880,047	0
Ditto on public securities in Paris	15,121,500	0	.....	15,264,900	0
Ditto in the provinces	10 364,200	0	.....	10,511,400	0
Ditto on obligations and railway shares	31,060,200	0	.....	31,424,600	0
Ditto in the provinces	21,494,000	0	.....	21,449,100	0
Ditto on securities in the Credit Foncier in Paris	670,300	0	.....	649,200	0
Ditto in the provinces	503,600	0	.....	539,300	0
Ditto to the State	60,000,000	0	.....	60,000,000	0
Government stock reserve	12,980,750	14	.....	12,980,750	14
Ditto other securities	36,557,487	91	.....	38,557,487	91
Securities held	100 000,000	0	.....	100,000,000	0
Hotel and property of the bank and branches	8,437,014	0	.....	8,432,463	0
Expenses of management	471,510	66	.....	470,892	16
Sundries	9,603,189	31	.....	7,226,066	25
	1,485,485,011	20	.....	1,467,885,395	43

The Bank return, compared with that of last week, presents these differences: an increase of 9,265,000f in the discounts; an increase of 215,000f in the stock of coin and bullion: a decrease of 625,000f in the circulation of notes; an increase of 19,709,000f in the deposits.

It has been affirmed in some journals that the Bank of France intends reducing the interest for advances on securities to the same rate as the discount for commercial bills; but the statement is contradicted. If the Bank were to make the two rates uniform, it would incur the reproach of making advances (a branch of business which, in the opinion of some authorities, it ought not to undertake at all) to the prejudice of discounts.

The new loan of the City of Paris has obtained, as was anticipated, the most complete success. The subscription was opened on Tuesday and closed the same day. For the 600,000 bonds to be issued, more than 800,000 were subscribed for; a proportional reduction will consequently be made. Some small sales have been already made, outside the Bourse, at a premium of 2f. Both the City of Paris and the Credit Mobilier employed great efforts to secure the success of the loan.

The Bourse has been and is much occupied with the above undertaking, and it will influence the market for some time to come. Apart from it the Bourse has manifested much interest in the Comptoir d'Escompte, the shares of which have risen considerably of late, owing to the expectation that in the coming meeting of shareholders the directors will announce a larger dividend than was at one time thought possible: also that they have secured the Comptoir a share in one or two important affairs, and that they have reason to believe that the Government will consent to an increase of its capital. The Mexican loans have been affected by the news from New York of the Federals having committed certain acts which show an unfriendly feeling towards Mexico; but the fluctuations have not been so considerable as might have been expected. The following are the quotations of the week:—

	July 20. f	c		July 27. f	c
Four-and-a-Half	96	75	.....	97	50
Fours	...		.....	...	
Threes	67	55	.....	67	47½

In the controversy about the question of Banks, which some time ago prevailed, a series of articles, in which the matter was treated with great detail and great power, appeared in the *Semaine Financiere*, and attracted universal attention. These articles have been collected into a volume entitled *Etudes sur la Circulation Monetaire, la Banque, et le Credit*, which has been published by Furne and Co.. The author, who in the *Semaine Financiere* was modestly anonymous, has attached his name to the volume—he is M. P. J. Coullet, already favourably known to the public by a treatise on Cheques and Clearing Houses and other works. M. Coullet explains and discusses the principles of metallic and paper circulation, and he comes to the conclusion that there ought to be only one Bank of Issue in a country, and one sort of bank note. He also shows how the rate of interest is regulated, and demonstrates the inanity of the doctrine that the rate can be made fixed and low—a doctrine which has been expounded here by men having authority, and which has fascinated a considerable portion of the commercial public. He further explains the constitution of the Bank of England and the Bank of France, and compares their principal operations for a series of years. In an appendix he gives in a compact form much useful information relative to the commerce of England and France and the export of precious metals from Europe; also a speech of M. Frere Orban, Belgian Minister of Finance, on the rate of interest, and a report of a Committee of the Belgian Chamber of Representatives on the same subject. Undoubtedly M. Coullet's book is a valuable contribution to the bank controversy in France: it will give foreigners a better idea of the various questions as presented here than they can obtain in any other work. It is at the same time a most able defence of the Bank of France as by law established. But M. Coullet's main conclusion, which is that monopoly in the issue of notes is not only desirable but indispensable in France, may certainly be disputed; and perhaps he has not treated with sufficient respect the arguments of writers, foreign as well as French, who consider that liberty of issue procures various advantages to the public.

A correspondent at St Petersburg states that the Government is very anxious to see foreign capital embarked more largely than hitherto in the construction of railways, but that the question is how it is to be attracted in presence of the disfavour with which the capitalists of Western Europe now regard railway undertakings in countries where the population is thin and commerce backward. Some of the railways made in Spain by the French are, it is known, in a deplorable pecuniary plight; certain lines in Austria held by them are not prosperous, and the Russian lines which they undertook have disappointed all expectation. The English, on their part, have an equally grievous tale to tell of their railway speculations in foreign countries, and yet the Governments with which the English and French have treated have not stinted subventions in money, or works, or both. To what, then, are the failures owing? To the facts that the railways cost infinitely more to make, and obtained much less traffic than the capitalists were led to expect, and than the Governments themselves calculated on; and this was so, because the estimates of works and of traffic, which are generally found accurate in Western Europe, are, from various reasons, in the countries referred to, devoid of solid foundation. It cannot of course be expected that foreign capitalists will again engage in similar enterprises on the same basis. They must be protected against the "unknown quantity" between the estimated and the real cost; in other words, they must have a guarantee of interest on all their outlay whatever it may be, not a fixed subvention, or a guarantee on a certain amount. This opinion, according to the letter, generally prevails in the commercial circles at St Petersburg; and after the disasters that have occurred, none other is likely to find acceptance in the money markets of Paris and London. The Italian Government has already adopted the system indicated; and France, for her part, brought it into practice for her secondary lines some years back. There is reason to believe that the Spanish Government is on the eve of adopting it likewise, and the Russian Ministers would do well to act on it forthwith, if they desire to see the railways Russia needs promptly executed.

The conversion of the Turkish Consolides, tavilati-mumtaze, serghis and Treasury bonds into new stock, which was decreed by the law of the 19-31 March, 1865, is to be carried into effect from the 1st August next, at London, Paris, Constantinople, Frankfort, and Amsterdam. The new stock is to bear only 5 per cent. interest, whereas the existing securities are at 6; but a nominal capital of 121 Turkish livres new stock is to be given for every 100 old. The operation is to be conducted at Paris by the Societe Generale. Considerable difference of opinion exists here as to the advantages, and even as to the justice, of the conversion.

An imperial decree authorises a new joint stock bank at Lyons, under the name Societe Lyonnaise de Depots et de Comptes Courants et de Credit Industriel. The capital is 20,000,000f in 40,000 shares.

The Caisse de Prets, a limited liability company of Paris with a capital of 2,000,000f, announces the payment of 10f per share of 200f on account of the profits realised in the first half of the present year.

The Union des Gaz, a company which constructs and carries on gas works in provincial and foreign towns, declared in its annual meeting, held a few days ago, a dividend of 10f per share for 1864-5. Last year the dividend was 8f 75c, the year before 7f 10c.

The ratifications of the commercial convention between France and Spain having been exchanged, the treaty has come into operation. It abolishes certain surcharges in the Customs duties on imports by the land frontier, which the Spanish Government established in order to encourage merchant shipping by increasing the imports by sea.

The treaty of commerce and navigation which has been concluded between France and Holland is considered of greater importance to France than any she has entered into, excepting only that with England. It will facilitate the direct import into France of coffee, sugar, pepper, and other productions of the Dutch East Indies, which she has hitherto received via Liverpool, London, Amsterdam, and Rotterdam; and as it substitutes moderate duties on French goods for the prohibition tariff which the Dutch have hitherto maintained in their East India possessions, it will give the French a market there, which it is believed will not be unimportant.

By a decision of arbitrators just given, the sum the Southern of France Railway is to pay for the Graissessac to Beziers line, of which the Company is bankrupt, is to be 16,000,000f. This sum will give only 80 per cent. to the bondholders, so that the unfortunate shareholders will not get a farthing. The Beziers Railway is one of the very few in France which have been disastrous speculations.

A meeting of the shareholders of the Roman Railways has been held within the last few days. The report presented stated that the length of lines actually ceded to the Company is 1,288 miles, and 182 additional miles are to be ceded. The Company will thus possess the lines from Nice to Naples, which serve Genoa, Florence, Civita-Vecchia, Rome, and other important towns. The length now opened for traffic is 750 miles, and 187 miles are ready to be opened. The total expense of all the lines is estimated at 554,000,000f French money, and of it 406,000,000f have already been disbursed. The Italian Government has contributed either in works or in subventions 93,000,000f, but the company is to pay back half of it, not, however, until the gross receipts shall exceed 32,000f per kilometre. Until this sum be obtained the Government is to make the company an annual subvention, varying according to the amount of receipts. By means of it, the shareholders will, it is calculated, get 20f per share, if the receipts be only 12,500f the kilometre, and 35f if they rise to 20,000f. The meeting on the proposition of the directors authorised the issue of 200,000 bonds, which it was stated will suffice to provide for the outlay of 1865 and 1866. The bonds are to be issued on the best terms that can be got, are to bear 15f interest, and to be reimbursed at 500f.

The following is the market report:—

FLOUR.—At *Paris*, yesterday, prices were firm, at 44f to 49f 50c the sack of 157 kilogs. Six months, disposable, 49f; August, 49f 25c.

WHEAT.—At *Paris*, yesterday, choice, 26f 50c the sack of 120 kilogs; first quality, 25f 50c; second, 24f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 8,177 bales. As usual, the greater part were Asiatic, but in the rest were 686 New Orleans, and more than 1,300 other sorts of American. The arrivals were 579 bales, the greater part from England. The closing quotations were 5f higher for very low United States, Peru, Brazil, Oomrawuttee, Tinnevelly, Madras, and China; 5f lower for Coconada; other sorts unchanged. Low New Orleans was, consequently, 245f the 50 kilogs; good ordinary qualities in Broach, 161f; in Tinnevelly, 155f; Madras, 160f; China, 145f; and Jumel, 235f. The stock was estimated at 43,170 bales. This week, the market has been calm, and, yesterday, Madras, disposable, was 140f; for delivery in August, 147f 50c; in September, 140f; Coconada, 150f; Bengal, 120f; China, 140f.

COFFEE.—The demand at *Havre*, in the week ending Friday, was more regular. 260 sacks Port-au-Prince and Jacmel, 82f to 82f 50c the 50 kilogs in bond; 100 Cape, 85f; 600 Gonaives, 87f 50c to 88f; 1,261 Rio, 68f to 74f; 1,000 Bahia, for delivery, 71f; 400 Wynard, 98f. By auction some different sorts of damaged were sold. The arrivals exceeded 8,000 sacks. This week, Rio, 77f to 82f; La Guayra, 84f, and grages 107f; Malabar, for delivery by English ship, 90f to 91f. At *Bordeaux*, last week, 1,000 sacks La Guayra, grage and non-grage, 93f 50c to 104f; 400, 95f; 302 Rio, washed, 102f; 400 not washed, 83f and 84f; 100 Mysore, 118f. Some damaged La Guayra was also sold. This week La Guayra grage, 106f; Rio, not washed, 81f. At *Nantes*, last week, there were no sales. At *Marseilles*, last week, calm prevailed: 300 sacks La Guayra in the port, 91f; 130 Rio, 70f. By auction, 260 Rio, sound, 64f 75c to 65f 25c; also some damaged Rio. This week, Maracaibo, 85f; Santiago, 105f; La Guayra, green, 102f, yellow, 94f.

SUGAR.—At *Havre*, in the week ending Friday, 1,100 casks French West India, for delivery, 49f, bonne quatrieme, the 50 kilogs, duty paid; 1,400 usine, for delivery between this and October, at prices varying with the dates of delivery; 250, disposable, 55f 50c to 60f; 1,400 casks Havana, disposable, by French ship, 31f, No. 12 in bond; 300, by Spanish ship, 30f 50c, same number; 917 sacks Maraguan, 21f. By auction, some French West India and Havana. The arrivals exceeded

Digitized by Google

6,000 casks. This week, usine, 60f, 58f, and 53f 75c; French West India, bonne quatrieme, 49f and 51f 75c; Havana, No. 12, 31f 50c and 31f. At *Bordeaux*, last week, 37 casks French West India usine, 58f, and some at prices kept secret; 500 casks Havana, 31f 50c, No. 12 of Holland. This week, usine, 60f 50c. At *Nantes*, last week, 4,716 Reunion, 52f, bonne quatrieme; 397, 57f 75c; French West India usine, 60f, and 59f, and at prices kept secret. At *Marseilles*, last week, some French West India, 28f and 27f 50c. By auction, San Jago, Spanish ship, 24f 25c, and 24f 50c; 1,200 casks Havana, sound, 27f 50c to 30f. This week, Porto Rico, Spanish ship, 25f; Martinique, 27f 50c, both bonne quatrieme of Havre.

INDIGO.—At *Havre*, after the public sale mentioned in the ECONOMIST, there were sold in the week ending Friday, 7 chests Bengal at 25c to 50c above the estimates; 5 Caraccas at 5f the ½ kilog, or 35c below the estimates; 11 Manilla at prices kept secret. The arrivals were ouly 2 serons from England. This week, Manilla at prices not stated. At *Bordeaux*, last week, 30 chests Madras, 6 Vellore, at prices not stated.

HIDES.—Holders at *Havre* having made concessions, business was more active in the week ending Friday: 2,183 Monte Video dry mataderos ox, 97f 50c, cow, 85f the 50 kilogs; 7,000 ditto salted, 53f 50c to 58f ox, 41f 50c to 45f cow; 750 Rio Grande salted ox, 54f to 56f; 800 ditto cow, 44f; 695 Pernambuco drysalted, 54f 50c. By auction, some lots of different sorts damaged intermixed with sound were sold; also some Trinidad sound, at 62f 50c to 64f 50c. The arrivals were not important. This week, Rio Grande salted cow, 43f 50c. By auction, some different sorts of damaged.

WOOL.—The market at *Havre*, after the public sales mentioned last week, was not very animated: 44 bales La Plata unwashed, 1f 67½c to 2f 30c; 50 bales La Plata sheepskin unwashed, 1f 10c to 1f 20c. The arrivals were 186 bales. This week, Buenos Ayres unwashed, 212f 50c and 182f 50c the 100 kilogs; Portuguese, 115f; Monte Video unwashed, 130f; La Plata sheepskin unwashed, 140f; Monte Video lamb, 210f; Buenos Ayres unwashed, 90f.

TALLOW.—At *Havre* in the week endidg Friday, 170 casks La Plata disposable, 48f 65c, for yellow and inferior, to 49f 50c the 50 kilogs; 200 casks for delivery, 51f. This week, La Plata for delivery, 51f 25c and T. 2, 48f 50c. At *Paris* yesterday the 100 kilogs, without octroi duty, 98f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 55f the hectolitre.

COMMERCIAL AND MISCELLANEOUS NEWS.

The monthly meeting of the Council of the Bradford Chamber of Commerce was held on Thursday; Mr Joseph Oddy presiding. A number of communications were read, and among the rest one from the Committee of the Privy Council for Trade, in which the Bradford Chamber were asked for "their observations" on an accompanying "project of law," which has been presented by the Belgian Government to the Chamber of Representatives for an amendment of the import duties on certain articles. It appeared, from the accompanying document, that it was intended by the proposed law to make a reduction in the import duties of a large number of articles, and among the rest a reduction from 15 to 10 per cent. per kilogramme on cotton goods, and also a similar reduction in the duties on carpets as well as on lint, hemp, and jute. The proposed amendment of the Belgian tariff was regarded as a movement in the right direction, and the Council accordingly expressed its approval of it.

In relation to the question of the supply of coal to the metropolis a statement has been prepared of the proceedings of the last Session of Parliament in sanctioning such lines of railway as will tend to promote that object, which, for manufacturing purposes, is every day becoming more essential. First in importance is the Great Western and North Wales Direct Railway, which, by shortening the route to South Wales, and avoiding the heavy gradients by the present Glocester route, will be able in connection with easy rates and a thorough narrow gage, *viâ* the Great Western to London, to bring up a largely increased quantity of the Welsh steam sorts. The Wiltshire Railway, by connecting the South-Western system with this South Wales direct railway at Sailsbury, will also be enabled in times of scarcity to afford access to London for coal from Wales, *viâ* the South-Western line. The London, Worcester, and South Wales Railway will, by more direct and independent means than at present exist, enable the London and North-Western to bring Welsh coal in largely increased quantities to London, that railway having hitherto been almost excluded from the Welsh coalfield. The East London (Thames Tunnel) line will transport coal to the South-Eastern portion of the metropolis by a more convenient route than at present exists, *viâ* the junctions at the West end of London.

Annexed are the returns of some of the American railways for June:—

	Miles open.	1865. dols.	1864. dols.	Increase. dols.	Decr. dols.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of July, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,253,050	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,603,050
		Silver Bullion	—
	28,253,050		28,253,050

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,393,909
Rest	3,480,810	Other Securities	21,782 191
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,770 902	Notes	6,181,480
Other Deposits	15,939 813	Gold and Silver Coin	900,629
Seven Day and other Bills	518,684		
	39,263,209		39,263,209

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,590.254	Securities	32,278,100
Public Deposits	4,770 902	Coin and Bullion	14,503,679
Private Deposits	15,939.813		
	43,300,969		46,781,779

Dated the 27th July 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,480 810*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£199,152
A DECREASE of Public Deposits of	161,201
An INCREASE of Other Deposits of	1,045,596
No change in Government Securities.	
An INCREASE of Other Securities of	1,285.645
A DECREASE of Bullion of	579,688
An INCREASE of Rest of	20,714
A DECREASE of Reserve of	416,823

The increase of 1,045,596*l* in the private deposits, being almost equal to that in private securities, indicates that the demand on the Bank has been chiefly of a precautionary nature. There have, however, been further withdrawals to the extent of 579,688*l* in the coin and bullion, and there is a decrease of 416,823*l* in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	22,476,460	22,933,036	21,829,681	22,158,547	22,590,254
Public deposits	4 221,408	5 895,840	5,629,282	4,961,046	4,770 902
Other deposits	11 883,528	16,903 063	14,441,872	13,719,621	15,939,813
Government securities	13,092,528	11,002,679	11,006 838	11,067,125	10,398,909
Other securities	12,913 262	19,442 371	19,374,052	20,184,532	21,792,191
Reserve of notes & coin	9,420,547	10,906,308	8,195,300	6,011,140	7,082,109
Coin and bullion	16,385,892	18,448,443	14,744,235	12,996,685	6,982,109
Bank rate of discount	3½ p. c.	2 p. c.	4 p. c.	7 p. c.	3½ p. c.
Price of Consols	91¼	94	93⅛	90¼	90
Average price of wheat	77s 7d	57s 6d	45s 11d	43s 0d	42s 0d
Exchange on Paris (shrt.)	25 2½ 7½	25 15 22½	25 25 32½	25 20 30	25 12½ 22½
— Amsterdam ditto	11 16½ 17	11 15 15½	11 16 16½	11 17½ 17¾	11 18 18½
— Hamburg (3months)	13 7½ 8	13 7½ 8	13 8½ 8¾	13 9½ 9¾	13 10 10¼

In the correspondiug week of 1855 a sortie made by the Russians on the left of the Little Redan had been vigorously repulsed by the French. Large quantities of gold were still being brought from the Ballarat district in Australia. The money market was firmer. The discussion on the new Turkish loan had engaged attention.

In 1862, a Portuguese 3 per cent. loan of 5,000,000*l* had been introduced in London at the price of 44 per cent. The Bank directors had reduced the rate of discount from 2½ to 2 per cent. The money market was easy in London, with little demand.

In 1863, news of the fall of Vicksburg and the defeat of General Lee by the Federal forces had been received from America. The Bank of France was rapidly losing gold, and there was some apprehension that it would seek to replenish its coffers by drawing on the Bank of England. Intelligence from New Zealand had come to hand announcing the outbreak of war between the natives and the settlers in the island.

In 1864, the first sitting of the Vienna Conference had taken place. At Copenhagen, the address to the Throne had been adopted by a majority of 60 votes to 21. In Mexico,

Digitized by Google

Uraga and Doblado had given in their adhesion to the French. Orders had been given to despatch ships to Mexico to bring back the troops that were to return to France. Telegrams from China had announced the disbandment of Major Gordon's force. In America, the Confederates had retired from Maryland with immense plunder. General Sherman had arrived at Atalanta. The Bank returns indicated an increased demand for money. Numerous sales had caused some depression in the English stock market.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 1,029,734*l*; in 1862, a deficiency of 2,539,303*l*; in 1863, a deficiency of 4,932,180*l*; and in 1864, a deficiency of 6,462,911*l*. In 1865, the deficiency is 5,842,378*l*.

DISCOUNT AND MONEY MARKET.—The Bank return of this week sufficiently explains the sensitive character of the money market. The late export gold movement, although produced by exceptional causes, has sufficed to confirm the previously existing belief that this country would be subjected to additional drain. An advance in the Bank rate has, therefore, been anticipated; and, as on numerous occasions during the past year, the mercantile public have drawn in excess of their requirements, increasing the sum of deposits at the Bank by an amount little inferior to that obtained on securities.

At the Bank there is less doing, and money is abundant at the official rate.

The following are the rates on paper having various periods to run :—

30 to 60 days	3½ per cent.
3 months	3½ per cent.
4 months	4 per cent.
6 months—Bank bills	4⅛ per cent.
6 months—Trade ditto	5 per cent.

Owing to the plentiful supply of money for short periods, the rate on Government securities does not exceed from 2 to 2½ per cent.

The allowance on deposits has been altered as follows by the discount houses and joint stock banks.

Joint Stock Banks	*2½ per cent.
Discount houses at call	2½ per cent.
Do. with seven days' notice	2¾ per cent.
Do. fourteen days	3 per cent.

* At the London and Westminster 1½ per cent. only on sums below 500*l*.

Bullion.—133,000*l* in gold has been sent into the Bank to-day.

The following are the rates of discount current in the chief continental cities :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	3	3
Madrid	9	...
Hamburg	...	3
St Petersburg	6	6½

The Bank of France return of this week gives the following results as compared with that last issued :—

	£
INCREASE.	
Commercial bills	368,000
Cash in hand	1000,00
Treasury balance	280,000
Current accounts	784,000
DECREASE.	
Advances	240,000
Notes	240,000

ENGLISH GOVERNMENT FUNDS.—The price of Consols has scarcely varied during the week. Very few transactions take place, and the exchanges of stock made from time to time by small holders constitutes the almost sole sources of business. There is no speculative tendency in the market, which remains much as reported for several weeks back. Consols close at 90⅛ to 90¼. New 3½ per Cents. and Reduced, 89¾ to 90. India 5 per Cents., 104⅝ to 104⅞.

Exchequer bills without alteration at par to 4s pm. India bonds, 16s to 22s pm.

FOREIGN STOCKS.—Dividend-paying securities continue firm, as investors withdraw certain small amounts almost constantly. Some stocks have become scarce, and dealers find a little difficulty in procuring bonds of the Turkish 1854 and 1862 loans. Russian stocks and Egyptian 7 per Cents. are also firm. In speculative securities there is little doing, and prices are dull, Mexican and Spanish stocks having declined. At the settlement, to-day, money was offered on most securities at from 4 to 6 per cent. The following are the prices of stocks dealt in to-day:—7 per Cent. Danish, 77 to 79. Equador land warrants, 3 to 4. 7 per Cent. Egyptian, 1864, 94 to 94½. Greek Coupons, 8 to 9. 5 per Cent. Italian, 1865, 76¾ to 77¼. 3 per Cent. Mexican, 23¾ to 24. 5 per Cent. Peruvian, 1865, 77½ to 78½. 3 per Cent. Portuguese, 47 to 47½. 5 per Cent. Russian, 1822, 92½ to 93½; ditto, 1862, 91¾ to 92¼. 5 per Cent. Sardinian, 75 to 77. Spanish Passive, 28⅞ to 29⅛. 6 per Cent. Turkish, 1858, 73 to 74; ditto, 1862, 72¾ to 73¼; 5 per Cent. ditto, 1865, 44¼ to 44¾; ditto Scrip, 5¾ to 5¼ dis. 5 per Cent. Italian, 1864, 64 to 64½.

The closing price of French 3 per Cent. rentes, telegraphed this evening from Paris, is 67.32 for the account, and 67.47 for money.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

	Money. Lowest.	Money. Highest.	Account. Lowest.	Account. Highest.	Exchequer Bills

RAILWAYS AND OTHER SHARES.—The dividends announced have tended to strengthen the markets. Prices have fluctuated considerably, but with unfavourable results. Metropolitan. stock has again receded. This evening there is rather more firmness, as compared with the early part of the day, but prices are still mostly under the closing quotations of last Friday.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.

FINANCIAL AND MISCELLANEOUS SHARES.—In the shares of almost all the established Companies prices have been extremely dull. International Financial have declined to ¾ prem.; General Credit to 1½ prem.; and Credit Mobilier shares to 3⅜ prem. The shares of the new projects lately issued have been largely dealt in. In several cases the subscriptions of the general public have been so small that the purchases of promoters have exceeded the actual allotments of shares made. Speculative sellers are compelled to buy back the excess of sales uncovered by allotments at whatever prices the purchasers think proper to allow their accounts to be closed. The high premiums quoted on most of the new projects are consequent on operations of this nature, and in such cases cannot be taken as proofs of public appreciation of the value of the shares.

Indian guaranted stocks are firm, and American securities lower than last week.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, is 250,000*l*.

The Committee of the Stock Exchange have appointed Monday, July 31, a special settling day in the shares of the Waterloo and Whitehall Railway Company, which are to be marked in the official list, and also in the shares of the Blakely Ordnance Company (Limited), which are not to be marked.

RAILWAY DIVIDENDS.—At a meeting of the directors of the Illinois Central Railway Company, held at New York, on the 10th inst., it was resolved that a dividend of 5 per cent. in cash, free of Government tax, be paid on the 1st August next to the holders of full-paid shares registered on the 15th day of July.

The dividend on the ordinary stock and new ordinary shares of the Metropolitan Railway Company is officially announced at 7 per cent. per annum, against 5 per cent. for the corresponding period of last year.

The dividend on the stock of the Lancashire and Yorkshire Railway Company is announced at the rate of 5½ per cent. per annum, against 5¾ per cent. for the corresponding period of last year.

FOREIGN EXCHANGES.—Except on Paris, where there is little change in rates, bills were more offered.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Our market has been exceeding quiet during the past week; the amounts mentioned below have been taken for the continent, and about 180,000*l* in bars, and 40,000*l* in sovereigns, have been withdrawn from the Bank. All immediate arrivals will be purchased for export, there being orders still unexecuted. The Borussia has brought 3,800*l* from New York; the Cuba has brought 47,000*l* from New York; the Edinburgh has brought 4,500*l* from New York; the Nyanza has brought 120,000*l* from Melbourne; the Nimrod has brought 4,640*l* from Melbourne. 87,500 sovereigns were despatched from London, on 24th instant, for shipment to Alexandria, via Marseilles. 4,000 sovereigns have been shipped per Syria, to Alexandria, via Southampton.

Silver.—The market is somewhat flatter in tone, and fine bars have been offered at 60½d to 60⅝d per oz standard; the demand is, however, but slight, and there are now inquiries for the continent at 60½d per oz standard

Mexican Dollars.—A small purchase has been effected at 59¾d per oz, but we do not think this price at all likely to be maintained in the event of any considerable sum arriving by the Shannon.

Exchange on India for banks' drafts, at 60 days' sight, continues as quoted in our last circular, viz., on Calcutta and Madras, 1s 11¼d to 1s 11⅜d; on Bombay, 1s 11⅜d to 2s.

India Government loan notes are unchanged in price. Our quotations are 109 to 111 for the 5½ per Cents., 101 to 103 for the 5 per Cents., and 89 to 91 for the 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9½d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅛d to 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 1⅛d per oz std; 5-franc pieces, 4s 11½d to 4s 11⅝d per oz., nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Vice-Chancellor Wood has ordered the class A contributories of the English Widows' Fund and General Life Assurance Association to pay a call of 35s per share by the 28th inst.

Vice-Chancellor Wood has fixed the 26th inst. for the appointment of an official liquidator of the London Marine Insurance Corporation.

The Master of the Rolls has appointed Mr Edwards, of the firm of Cash and Edwards, official liquidator of the East Cambrian Gold Mining Company (Limited).

The secretary and liquidator of the Imperial Sugar Refining Company (Limited) has convened a meeting for the 8th August to report upon the progress of the winding-up.

PUBLIC COMPANIES.—The ordinary meeting of the East London Bank (Limited) was held on Thursday last. The directors' report was unanimously adopted, and a dividend declared at the rate of 5 per cent. per annum.

At the meeting of the Union Bank of Ireland, held on the 27th instant, the directors' report was adopted, and a balance of 4,116*l* carried to the new account.

The report of the Estate Company (Limited) has been issued. The directors recommend a dividend at the rate of 15 per cent. per annum, free of income tax, which will leave a balance equal to the rate of 14 per cent. per annum to be carried forward to profit and loss account next year.

The first meeting of Reuter's Telegram Company (Limited) was held on Monday last. The report, which was unanimously adopted, showed profits for the six months ended 30th June last, amounting to 6,645*l* 10s 11d, out of which a dividend at the rate of 8 per cent. per annum was declared payable on the 31st instant.

At the general meeting of the Bank of Otago (Limited), held on Monday, the directors' report was adopted. The net profits were stated at 8,641*l*. A dividend at the rate of 5 per cent. per annum up to the 31st December last was declared.

The directors of the London and Southwark Insurance Company have declared a dividend at the rate of 5 per cent. per annum.

The directors of the Joint Stock Discount Company (Limited) have issued their report in anticipation of the meeting to be held on Monday next. The gross profits are stated at 54,073*l* 16s 3d. A dividend at the rate of 6 per cent. per annum is recommended, which will leave a balance of 6,573*l* 4s 7d to be carried forward to profit and loss new account.

The Electric and International Telegraph Company have resolved to recommend to the proprietors, at the meeting on the 4th proximo, to confirm a dividend of 4*l* 10s per cent. for the past half-year.

The directors of the Oriental Financial Corporation have issued their report in anticipation of the meeting to be held on the 4th August. The amount at the credit of profit and loss is stated at 11,372*l*. Unless otherwise desired by the shareholders, the directors do not intend declaring an interim dividend for the past half-year.

The Consolidated Bank held their meeting at Manchester on Wednesday last. The available balance was stated at 61,812*l*, out of which a dividend and bonus at the rate of 15 per cent. per annum was declared; 10,000*l* placed to the reserve fund, and the balance, 6,812*l*, carried forward.

The directors of the English, Scottish, and Australian Chartered Bank have issued their report in anticipation of the meeting to be held on the 31st inst. The balance of profit is stated at 22,538*l* 17s 7d, out of which the directors recommend a dividend at the rate of 7 per cent. per annum, free of income tax.

An ad interim dividend on the share capital of the General Provident Assurance Company (Limited) at the rate of 7½ per cent. per annum, for the half-year ending the 30th ult., will be payable on the 31st inst.

At the half-yearly meeting of the National Discount Company (Limited) held on Wednesday last, the directors' report was unanimously adopted, a dividend of 20 per cent. per annum, free of income tax, declared, and 10,092*l* carried forward to next account.

At the half-yearly meeting of the London and St Katharine Docks Company, held on Tuesday last, the directors' report was adopted. The balance of profit for the half-year was stated at 139,876*l* 11s 4d., out of which a dividend of 2 per cent., free of income tax, was declared.

The report of the directors of the Metropolitan Extension Telegraph Company (Limited), to be submitted to the general meeting on the 4th of August, recommends a dividend at the rate of 8 per cent. per annum on the preference capital, and 3 per cent. per annum on the original shares, the former subject to, the latter free of income tax.

Digitized by Google

The half-yearly meeting of the Bank of Egypt was held to-day, when the directors report was adopted, and a dividend at the rate of 10 per cent. per annum was declared.

At the half-yearly meeting of the Midland Banking Company (Limited) held to-day, a dividend was declared at the rate of 5 per cent. per annum.

The share list of the Tamar Lead and Silver Smelting Company will be closed on the 3rd of August for London, and on the 4th for the country.

Warren's Blacking Company's shares are at 1 to 2 premium.

The General Estates shares are at 3½ to 4 premium.

The directors of the Accidental and Marine Insurance Corporation (Limited) close the share list on the 3rd for London, and the 4th for country applications. The quotation to-day is 2¼ to 2½ premium.

The share list of the Railway Credit Company (Limited) will be closed for the United Kingdom on the 7th of August.

The allotment letters in the General Estates Company were posted this evening.

Tamar Lead shares are at 2 to 2½ premium.

The Marseilles Extension Railway and Land Company, Limited, with a capital of 400,000*l* in 20,000 shares of 20*l* each, is announced. The objects of the Company are, first, to construct a railway about nine miles in length, from the "Old Port" of Marseilles to Podestat, to afford increased facilities for the commerce and manufactures of the town and port; secondly, to acquire land on both sides of the line throughout its length, for building and other purposes, to which great value will be given by the construction of the railway. We understand that 7,000 shares have already been subscribed for in England and France.

The Massa-Carrara Marble Company has been formed for the purpose of purchasing and extending the well-known marble quarries at Massa-Carrara, near Leghorn. The proposed capital is 140,000*l*, in 7,000 shares of 20*l* each.

MISCELLANEOUS.—Messrs Cavan, Lubbock, and Co., have announced the half-yearly interest due the 1st August on Havana and Nariano Railway 7 per cent. bonds.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.17½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428½ per mark, and the short exchange on London is 13.6¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109⅛ per cent. At this rate there is no profit on the importation of gold from the United States.

POST OFFICE ANNOUNCEMENTS.

A new line of French mail packets has been established to run once a month between St Nazaire and Colon, and, in connection therewith, the Postmaster-General has made arrangements with the Pacific Steam Navigation Company to set up an additional British packet service between Panama and Valparaiso—thus (with the two existing lines of British packets) affording a third regular mail communication in each month between this country and the Pacific ports. The first packet of the new line is appointed to be despatched from St Nazaire on the 6th August next, and thenceforward a packet will leave on the 6th of each month, reaching Colon about the 30th, and the corresponding British packet will sail as soon as the mails reach Panama. To reach St Nazaire in due time for conveyance by these packets, letters, &c., must be despatched from London, at the latest, by the morning mail of the 5th of each month, or, when that date falls on Sunday, on the evening of the 4th. Letters and newspapers for Colombia (New Granada) and the States of the Pacific, intended for conveyance by the French packets, will be liable to the same rates of postage as by the present British packets, and such rates must, in all cases, be paid in advance. Any correspondence intended to be forwarded by this route must be specially addressed "By French packet."

A new postal convention having been concluded with Belgium, which will come into operation on the 1st August next, the following alterations in the rates of postage, &c., applicable to the correspondence

Digitized by Google

exchanged between the United Kingdom and Belgium, will take effect on and from that date. Letters—when prepaid, letters will be chargeable as follows:—Route, by direct packet, not exceeding ½ oz in weight, 3d; above ½ oz and not exceeding 1 oz, 6d; above 1 oz and not exceeding 1½ oz, 9d; above 1½ oz and not exceeding 2 ozs, 1. Route, via France, not exceeding ½ oz in weight, 4d; above ½ oz and not exceeding 1 oz, 8d; above 1 oz and not exceeding 1½ oz, 1s; above 1½ oz and not exceeding 2 oz, 1s 4d. When posted unpaid, letters by either route will be chargeable on delivery, with the above rate, and an additional sum of three pence; and letters insufficiently prepaid will be chargeable as unpaid letters, deducting the value of the postage stamps affixed to them. Urgent Letters—Letters addressed to Belgium, superscribed by the writers with the word "Urgent," will be delivered at the place of destination by special means. All such letters must be registered, and they will be liable in this country to the same charge as other registered letters, viz., 6d each letter, in addition to the postage. An extra charge for the special delivery will be levied in Belgium. Patterns or samples of merchandise may also be sent.

On the 1st August, and thenceforward, money orders will be issued at all money order offices in the United Kingdom on the office at "Basseterre," in the colony of St Kitts, at the same rates of charge and under the same regulations as those already in force with respect to other colonies with which money order business is transacted. Money orders will also be issued at that office on all money order offices in the United Kingdom.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day, consisted, in a great measure, of Monday's unsold produce. The trade, however, was dull, and a decline of from 1s to 2s per quarter took place in prices. Foreign wheat was in limited request, and the quotations had a downward tendency. Barley met a slow sale, at late rates. Oats—of which there was a good supply on offer—sold freely, and fine qualities realised slightly enhanced rates. Beans and peas were dull, at about stationary prices. The flour trade was steady, on former terms. *New* rapeseed was dull, at lower prices, the top quotation being 72s per quarter. A parcel of *new* oats was exhibited for sale, and a few rubbed-out ears of *new* Talavera wheat were also on the stands. This week's imports amount to 7,010 quarters of wheat; 230 barley; 46,640 oats; and 130 sacks of flour.

At Liverpool, this morning, the trade for wheat and flour was very quiet, at barely late rates. Maize, however, was in good demand, at full quotations. At Wakefield, wheat declined in value 1s per quarter.

The Liverpool cotton market opened on Monday last with a good inquiry, which, under the influence of American accounts, was well maintained with daily hardening prices until Tuesday, when the market became suddenly dull and lifeless, which feeling was strengthened by the rumour received from America by later advices, that the Southern States hold now a stock of 2¼ million of bales; and the market consequently closes to-day very quiet with sales only 5,000 bales. The latest American news received to-day reports a decline of 2 cents in the New York market, owing to large sales on the part of the Government. The total sales of the week have amounted to 49,000 bales, of which the trade have taken 32,000 bales, speculators 7,000 bales, exporters 10,000 bales. Quotations, after having advanced about ½d per lb, are now ¼d to ½d per lb below those of Friday last.

We have advices from Bombay *via* the Persian Gulf to the 14th of July. The shipments of cotton during the fortnight preceding that date were about 60,000 bales. Broach, laid down here, was quoted at 9.014d; and Dhollerah, 10.270d per lb, with freight.

With the exception of tea, the market for which rules quiet, the trade for colonial and foreign grocery produce has been firm, and previous quotations have been well supported. Sugar, however, closes, to-day, with less activity; but during the week, both raw and refined qualities, including coffee, cocoa, and rice, have been in fair average request, at fully late rates. Last week, duty was paid in London on 1,154,907 lbs of tea, whilst the export for the week ending July 13 was 1,252,191 lbs, making a total of 2,407,098 lbs, against 1,255,198 lbs last year.

During the fortnight ending July 6, the market for sugar at Havana was somewhat quieter. Muscovado qualities, however, were firm in price, but in the value of other descriptions a reduction took place. The stock of sugar at Havana and Matanzas was estimated at 445,000 boxes, against 420,000 boxes last year, and 370,000 boxes in 1863. The following statement of prices and table of exports are from Messrs Morales and Co.'s circular:—Cucurucho-, Dutch numbers, 8 to 10, 20s 3d to 21s 5d; ordinary yellows, ditto, 11 to 12, 22s to 22s 6d; middling, ditto, ditto, 13 to 14, 22s 6d to 23s 8d; fine, ditto, ditto, 15 to 16, 24s 3d to 24s 10d; florete, ditto, ditto, 17 to 19, 26s to 27s 8d; ordinary whites, 27s 1d to 28s 3d; middling, ditto, 28s 10d to 29s 11d; fine and florete, ditto, 32s 2d to 34s 6d; crystallised, No. 15 to 16, 23s 8d to 24s 3d; ditto, 17 to 20, 24s 10d to 27s 1d; muscovadoes, fair to good refining at outports, 18s 11d to 20s 1d per cwt, free on board.

The market for English wool is far from active; nevertheless, prices rule tolerably firm. According to a statement published on the 22nd instant by Messrs Gooch and Cosens, the arrivals of colonial wool to that date, for the August sales, had amounted to 114,397 bales, viz., 96,441 bales from the Australian, and 17,956 bales from the Cape colonies. The ships to arrive will bring 17,000 bales.

Hemp, flax, jute, and coir goods have not materially changed in value from last week. A very moderate business, however, has been transacted, and there has been a slight tendency to lower prices apparent.

Advices from China, stating that about 10,000 bales of the *new* crop of silk had been settled for, have caused considerable heaviness in the silk trade, and there are no buyers either of China or Japan produce, even at a reduction in price of 1s to 2s per lb.

The quarterly public sales of Guatemala indigo were held on Tuesday; they comprised 1,742 serons. Good and fine parcels sold readily at an improvement in value of 6d to 8d, but inferior qualities changed hands at a decline varying from 3d to 6d per lb.

Scotch pig iron has fallen to 54s cash, mixed numbers. In other metals, a limited business has been transacted, at about last week's currency. Spelter shows the principal change in value, the quotation, on the spot being 21*l* 17s 6d per ton.

As regards the oil trade, the leading feature to notice is a fall in French spirits of turpentine to 43s per cwt on the spot. Linseed oil is selling at 32s per cwt, but most other oils rule tolerably firm.

The tallow trade has been very quiet. P.Y.C. has realised 41s 3d to 41s 6d per cwt on the spot; and 42s 3d for October to December delivery. We learn from St Petersburg that the price current there was 44½ silver roubles, cash.

Digitized by Google

The trade for cotton goods at New York, during the week ending July 15, was very firm: the supplies both of American and European manufacture on offer were limited, and, in several instances, a further advance took place in prices. The market for woollen manufactures was firm in the extreme: choice broadcloths and the finer qualities of cassimeres changed hands at enhanced rates, and all other descriptions fully supported previous quotations. For flannels, there was a good demand, and prices ruled very firm. In the silk goods trade, considerable firmness prevailed. As regards the trade for general merchandise, there was a fair amount of activity. Grocery produce, more especially tea, sugar, and coffee, was in good demand, and prices were on the advance. Breadstuffs continued to improve in value, the export inquiry being of moderate extent. Most provisions were firm, and somewhat higher in price than in the preceding week. Gold fluctuated in value between 139 to 142⅝ per cent. The stock of bullion in the banks on the 8th ult. was 3,821,000*l*; and the balance in the Sub-Treasury, 6,084,100*l*. The export of specie, for the week ending July 8, was only 5,370*l*. The foreign imports of dry goods and general merchandise from Jan. 1 to July 8 were valued at 16,461,400*l*; against 26,574,700*l* last year; and 18,840,530*l* in 1863. The exports of some of the principal articles from New York, from Jan. 1 to July 8, 1864 and 1865, were as follows:—

The market opened steadily this week, and very full prices were obtained; but since the advices received on Monday afternoon, per the Moravian, purporting to give an official estimate of 2¼ million bales, the demand has been limited, and great heaviness has prevailed, the week closing yesterday with a decline in most descriptions. The raising of the Bank rate to 3½ per cent. had been too generally anticipated to have any material influence. In Sea Island, a moderate business has been done at previous rates; the finer kinds, however, commanding extreme prices. American has been in comparatively fair request, but quotations are reduced ¼d per lb. Brazil in the early part of the week was more saleable, but closed irregular and generally ¼d to ½d lower. Egyptian, after considerable fluctuations, closed at a decline of ½d to ¾d per lb. Smyrna is without much change, the choice being very limited, particularly in the better grades. The demand for East India has been of a retail character, and a partial decline of 1½d per lb has been submitted to; good stapled cotton maintains its value, but inferior descriptions are difficult of sale at this reduction. China has been in fair request, but the market being more freely supplied, a slight reduction has taken place, except in the better qualities, which are scarce and dearer.

To arrive, a few transactions have been reported. The latest quotations were, on Wednesday, Dhollera, fair new merchants', May and June sailing, 13d per lb, and yesterday, Egyptian, fair open, sailed, 17½d; Broach, fair new native, May sailing, 12d, and Bengal, fair merchants, March and April sailing, 7d per lb.

The sales of the week amount to 49,480 bales, including 7,310 on speculation, and 10,200 declared for export, leaving 31,970 bales to the trade. The sales to-day amount to about 5,000 bales, the market without change.

PRICES CURRENT.—July 31, 1863.

LONDON—July 28.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The rise in the price of cotton at New York, reported per Cuba, caused caused a better demand in the beginning of the week, and an occasional advance of ¼d to ½d per lb; but a rumour, received by the following steamer, that the United States Government estimated the stock of cotton in the Southern States at 2,250,000 bales, shook the confidence of buyers, who have consequently purchased very sparingly during the past few days, and not only has the advance above quoted been lost, but in some instances a further decline has been submitted to, the market closing dull and irregular.

NEW YORK—JULY 15.

About 15,000 bales of cotton have changed hands during the week, at enhanced quotations. The market, however, closes with less firmness, at a decline of 1 cent from the highest point of the week, viz., 52 cents for Middling Upland produce. The price for that quality of cotton is therefore 51 cents per lb. The arrivals have amounted to 15,619 bales; 6,840 bales being from New Orleans; 1,219 from North Carolina; 898 Savannah; 3,809 by railroad; the remainder from various points in the Southern States and in the West India Islands. The imports, since Sept. 1, 1864, now amounts to 273,526 bales. The exports for the six months ending June 30, current year, was 24,565 bales, against 24,416 bales during the same period in 1864. Present currency:—

MARKETS IN THE MANUFACTURING DISTRICTS.

About an average business has been transacted in goods during the week, and the quotations have been well supported. The stocks on hand continue very moderate. For the time of year, the coal trade has ruled steady. In the value of iron, very little change has taken place.

MANCHESTER, July 27.—The market has continued dull and inactive, only a limited business being done, and prices decidedly in favour of the buyer, though not to any great extent. India telegrams down to the 17th instant, reporting a great reaction at Bombay from the late severe depression, and very little change at Calcutta, have not affected this market in either direction. The China transactions, reported last week, appear to have been concluded for the present. The home trade, as well as all other departments, remains in suspense from the uncertainty regarding the American stock of cotton.

BRADFORD.—The wool market is very quiet. Many staplers refuse to take less money for their wool, but the sales made are all in favour of buyers. Yarns—Spinners are complaining loudly of the want of fresh business. The shipping houses are doing hardly anything, and even the demand for home use is not considerable. The demand for plain goods is not active, the home merchants only buying a little for assorting stocks, and prices in many cases are in favour of the buyers.

LEEDS.—There has been a moderate attendance of buyers in the cloth halls, and their aggregate purchases were equal to those of last week, if not rather more. The manufacturers in every department of the woollen trade are well employed. Prices of both goods and wool are firm.

ROCHDALE.—The flannel trade is steady, and the manufacturers keep well employed. The wool trade, too, was steady as to price, but the business done was not large, manufacturers showing a disposition to postpone making large purchases till more of the new clip is in the hands of staplers.

CARDIFF.—There is an average home business doing in coals. But few of the house coal collieries are on full time, owing to the falling off in the local consumption. Tin plates command a good sale, and of the 2s per box advance asked by makers, buyers freely offered 1s, which is an indication of a better feeling in the trade. Both the pig and finished iron makers of the district find no difficulty in securing orders, and bars are quoted 7*l* to 7*l* 5s per ton at the works.

LEICESTER.—Goods of a general and fancy description have been selling pretty freely. In the rural districts and at Loughborough and Hinckley trade is active, the workpeople being fully employed. Worsted yarns are firm, and high in price, spinners being well engaged. The wool market is quiet, and there is not much business doing. Cotton yarns are realising high prices.

NOTTINGHAM.—Business in the home market is quiet, although there is a fair demand for black laces for trimmings. Most descriptions of cotton goods are a dull sale. The hosiery trade remains inactive. Yarns remain firm.

HUDDERSFIELD.—For heavy goods suitable for winter wear, and overcoatings in witneys there has been a fair demand, and operations have also been effected in medium-priced fabrics. Inquiries have also been made for choice coatings, but stocks do not present a great variety for selection.

BIRMINGHAM.—The trade of this town continues dull, but there is no depression, and, although the fresh orders on account of the home trade have been inconsiderable during the last fortnight, most of the manufacturers manage to keep on working the usual time; and it is in the fancy trades only that stocks have been increased.

SHEFFIELD.—A steady trade continues to be done with America in cutlery and general goods, but the orders for steel from that market are still small. The last mail from Australia has brought very fair orders for cutlery, tools, and general goods. There is no change in other distant markets.

WOLVERHAMPTON.—On the whole the iron trade keeps tolerably firm. The hardware trades are rather better. The home orders keep small.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 15.—We continue to have a fair demand for flour and wheat for export. The trade for both articles continues firm, and a further improvement has taken place in the quotations. The receipts for the week have amounted to 53,000 barrels of flour, and 315,940 bushels of wheat. Corn—the arrivals of which have been 377,250 bushels—has moved off steadily, at fully late rates. The prices current are as follows:—Flour—State, superfine brands, $5.70 to $6.5; State, extra brands, $6.75 to $6.80; State, choice brands, $6.85 to $7; Ohio, common brands, $6.85 to $7; Ohio, fancy brands, $7.5 to $7.10; Ohio, good and choice extra brands, $7.15 to $7.20; Michigan, Indiana, Wisconsin, &c., $5.70 to $6.95; Genesee, extra brands, $7.10 to $9; Missouri, $8.50 to $11.25; Canada, common, $6.75 to $6.90; Canada, good to choice extra, $6.25 to $8.15 per barrel. Wheat—Chicago spring, $1.38 to $1.43; Milwaukee Club, $1.43; amber Milwaukee, $1.45 to $1.46; winter red Western, $1.55 to $1.65; *new* amber Jersey, $1.65. Corn—Unsound Western, 76c to 81c; sound mixed ditto, 82c to 83c; and white, 94c per bushel.

NEW YORK, July 20.—Flour is in fair request, at full prices. Wheat is much quieter, and rather lower in value. Corn moves off slowly, at late rates.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Fresh up to our market, this week, the arrivals of English wheat, coastwise and by land-carriage, have been on a very moderate scale, but in full average condition. For all kinds—as the accounts respecting the crops are very favourable, and as harvest-work has made some progress in our forward counties—the demand has ruled heavy, and, to have forced sales, lower rates must have been submitted to. The show of foreign wheat has not increased. Fine dry qualities have been held firmly, at extreme rates. All other kinds have continued very dull, at barely stationary prices. The few samples of English barley on show have been cleared off on former terms. Foreign qualities, however, have met a dull inquiry. Malt has been in good supply, and sluggish request, at late quotations. No change has taken place in the value of oats, the supplies of which have been on an average scale. Both beans and peas have been offered on lower terms. We have no change to notice in the value of flour.

Wheat is coming down well, and it is expected that the growth of barley will exceed previous estimates. Oats, beans, and peas, will, we think, prove very moderate crops.

The whole of the provincial markets have been very dull for wheat and most descriptions of spring corn.

On the continent, very little business has been doing in the grain markets. American letters state that there was more disposition shown to ship produce to England.

The Scotch markets have been very dull for wheat. In prices, however, the fluctuations have been trifling. Barley and most other articles have ruled about stationary.

In Ireland, produce generally has met a dull inquiry, at late quotations. The supplies on offer have been very moderate.

Fresh up to Mark lane, to-day, the arrivals of English wheat were small. Nearly the whole was cleared from the stands, but at a decline in prices from Friday last of 1s to 2s per quarter. Foreign wheat was dull, and the quotations had a drooping tendency. Barley met a slow sale at late rates. Oats—of which there was a good supply on offer—moved off freely, and fine samples changed hands at slightly enhanced rates. Beans and peas were dull, at about stationary prices. The flour trade was quiet on former terms.

Mr George Dornbusch reports the arrival off coast of fifty cargoes of grain, twenty-eight being wheat. The transactions have been on a moderate scale. Wheat has given way 6d to 1s per quarter. Maize, however, has advanced 1s to 1s 6d per quarter. In the value of other produce very little change has taken place. Cotton seed has sold at 6*l* 10*s* to 7*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this day's Markets see "Postscript."

MINCING LANE, FRIDAY MORNING.

Sugar.—There is not any change in the market, which may be quoted steady, although rather quiet, and the public sales have passed off without alteration in quotations. About 3,120 casks West India sold in three days, including Barbadoes at 29s 6d to 35s 6d; Jamaica, 30s to 35s; crystallised Demerara, 35s to 38s per cwt. A few floating cargoes of foreign have sold on previous terms. Low brown East India sugars on the spot command extreme rates. Grainy and crystallised sorts have been in fair demand. There were again rather heavy landings last week, which increased the stock to 96,550 tons, against 88,320 tons in 1864. The total increase in the deliveries, contrasted with those of last year is now 28,000 tons.

Mauritius.—About 3,700 bags have sold by auction and privately: grainy and crystallised, 37s to 38s 6d per cwt.

Bengal.—1,531 bags offered in public sale were partly disposed of: washed Gurpatta date, 31s to 33s per cwt. Sound taken in above the value.

Madras.—187 bags brown native sold at 25s 6d to 27s. 5,435 bags grocery: grainy yellow, 36s to 38s; fine crystallised yellow to white, 11s 8d duty, 38s 6d to 41s cwt.

Natal.—1,506 bags partly sold at 27s to 34s 6d.

Manilla.—6,000 bags clayed have sold at 30s to 30s 6d. 200 tons unclayed at 28s 6d. By auction, 3,194 bags of the latter were taken in at 28s 6d. 868 bags superior bright yellow realised 36s 6d per cwt.

Other Foreign.—790 casks 200 barrels Porto Rico, offered by auction yesterday, were partly sold at 30s 6d to 33s for the brown qualities, and at 33s 6d to 36s 6d for middling to fine grocery. 537 casks 120 barrels Cuba were withdrawn. Three floating cargoes of Havana have sold for the United Kingdom: one, low and mixed quality, at 24s 9d; No. 13 to 13½, at 26s to 26s 6d. Three of Cuba at 21s 9d to 22s 3d per cwt.

Refined.—There is rather an improved demand for dry goods, and the stock has become small.

Rum.—A few contracts have been made at former rates, and the market is still very firm. Demerara, 1s 8½d to 1s 10d; Leewards, 1s 8d. 120 puncheons Cuba at 1s 9d per proof gallon.

Cocoa.—Of 1,308 bags Trinidad by auction the greater part sold at full prices: good ordinary to fine, 64s 6d to 98s 6d. 328 bags other West India: Grenada, 53s to 61s; St Lucia, 45s to 51s 6d. 208 bags Surinam were taken in at 68s to 70s per cwt. 206 bags Guayaquil withdrawn.

Coffee.—Steady prices have been obtained for most kinds. Of 248 casks 1,204 bags native Ceylon a portion sold at 66s 6d to 68s, according to packages, and 65s to 65s 6d for ordinary up to 103s for very fine in casks. 1,019 casks 453 barrels and bags plantation brought 81s to 90s. 130 casks 920 bags Jamaica sold at 66s to 90s for ordinary to good quality. 2,380 packages East India realised 83s to 90s 6d. Of 5,127 bags Costa Rica a considerable portion sold at 70s to 82s. 177 bales Mocha sold upon moderate terms; mixed long berry, 91s to 91s 6d. Towards the close of last week a floating cargo of Brazil sold at about 57s 9d for a near port. Subsequently one of Rio at 61s 6d per cwt. for Gottenburg. 85,400 bags are declared for sale by the Dutch Trading Company on the 9th proximo.

Tea.—The market is dull by private contract. 1,512 packages Indian growths, offered by auction on Tuesday, chiefly sold, generally at the reduced rates lately established. Some few breaks of inferior quality went even cheaper.

Rice.—A few parcels of soft grain have sold at 9s 4½d to 10s, chiefly Necrancie Arracan. 6,018 bags Rangoon were taken in and were part sold at 9s 4½d. 3,000 bags Necrancie Arracan were bought in at 9s 6d. 1,980 bags white Bengal chiefly sold at 16s per cwt for fine.

Imports and Deliveries of Rice to July 22, with Stocks on hand.

	1865.	1864.	1863	1862.
Imports ..... tons	23400	29120	24800	34400
Deliveries	41050	44600	46850	32900
Stock	23500	30450	42000	51400

Sago.—500 boxes small grain sold at 18s 6d to 20s 6d per cwt for middling to fine.

Sago Flour.—1,397 bags offered by auction were chiefly sold at 14s to 14s 6d per cwt.

Spices.—The only feature of importance has been an advance on the common kinds of Jamaica ginger. 1,020 barrels were sold at 3*l* to 7*l* for ordinary to superior bold. 300 bags rough Bengal sold at 26s 6d to 27s. 168 bags African withdrawn. 696 cases cassia lignea partly sold at 82s per cwt for middling. 34 cases mace, chiefly old imports, were disposed of at 9d to 1s 3d, a few lots 1s 8d to 1s 10d. 654 bags pimento went at 2⅜d to 2⅝d. 693 bags Singapore black pepper sold steadily at 3½d, a few lots 3¼d per lb. No business of consequence has been done by private contract.

Saltpetre.—Bengal continues dull. Some common to fine has sold at 24s to 25s per cwt.

Imports and Deliveries of Saltpetre to July 22, with Stocks on hand.

	1865	1864	1863	1862
Imports ..... tons	3900	8410	10000	10230
Deliveries	6130	7320	7830	9860
Stock	5200	8250	6000	8500

Drysaltery Goods.—Good quality of Cutch remains firm. Gambier is dull. Safflower has sold steadily at previous rates, Bengal ranging from 4*l* 17*s* 6*d* to 6*l* 7*s* 6*d* per cwt.

Metals.—The markets are without activity. A few contracts have been made in spelter, at 22*l* to 22*l* 5*s* on the spot or for delivery. Foreign tin is rather dearer. The last sale of Straits was at 90*l* 10*s* cash, and holders now require more. No change can be noticed in the general position of the iron market. Coffee remains quiet.

Jute.—On Wednesday, 7,874 bales sold by auction at 11*l* to 22*l* 5*s* per ton. The deliveries have increased about 12,000 tons. According to this week's return the stock was 18,730 tons, against 23,650 and 10,300 tons.

Manilla Hemp.—1,300 bales were disposed of at full quotations, from 30*l* 15*s* to 31*l* 15*s* per ton.

Digitized by Google

OILS.—Most kinds of fish have been quiet. Olive has been unsettled by rather large arrivals. Rape is firm; foreign refined, 47s; brown, 43s per cwt, with few sellers. Linseed oil flat and rather easier, viz., 31s 9d to 32s on the spot, and 31s 6d for the last three months. Cocoa-nut quiet, at the quoted prices. Palm oil dull. Fine Lagos offers at 36s 6d per cwt.

TALLOW.—The market is quiet, and quotations of foreign slightly easier this morning. 1st sort Petersburg, Y.C., 41s 3d to 41s 6d; last three months, 42s 3d to 42s 6d; January to March, 1866, 43s to 43s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, July 24, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is unchanged to-day; many parcels of West India were offered and partly disposed of, making the week's business 4,574 casks. 889 bags Mauritius offered by auction were partly sold at 34s 6d to 37s 6d for crystallised. 886 bags Aska Madras sold as follows: syrups, 36s 6d; grainy white, 42s 6d per cwt.

COFFEE.—75 casks 969 bags native Ceylon, 312 casks 82 barrels and bags plantation, 1,854 packages East India, 37 casks Jamaica, and 1,297 bags Costa Rica, offered by auction, went off at previous quotations.

RICE.—3,408 bags new white Bengal were partly sold at 15s 6d for good.

SPICES.—Of 2,890 bags Singapore black pepper, a few lots sold at 3½d per lb, the remainder held at that price.

SAFFLOWER.—90 bales Bengal sold at 5*l* 7s 6d to 5*l* 17s 6d per cwt.

OILS.—287 casks palm by auction sold at 36s 6d to 36s 9d per cwt. 20 tons sperm went 88*l* 10s to 88*l* 15s per ton.

TALLOW.—683 casks Australian by auction sold at previous rates:—Sheep, 40s 9d to 42s; beef, 37s to 39s 6d. 241 pipes 133 boxes South American part sold at 39s 9d to 41s 6d per ton.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is no alteration in the refined sugar market; the demand continues very good. Owing to the appearance of the cholera at Constantinople and Smyrna, there is no demand for Dutch crushed for these places.

GREEN FRUIT.—Lemons scarce, and prices well supported; some parcels Naples and Palermo, sold by Keeling and Hunt, at public sale, sustained the advanced figure obtained of late. Nuts of all kinds dull, owing to the quantity of fresh fruit offering.

ENGLISH WOOL.—Market very quiet.

COLONIAL WOOL.—The market remains firm; not much doing.

FLAX.—Market firm.

HEMP.—Market firm, and a good business doing.

SILK.—Market extremely quiet. Business could only be done by concession on last rates, but holders not pressing.

TIMBER.—A moderate business has been done in American growths; a better demand has been experienced for all descriptions of substitutes.

LEATHER AND HIDES.—The leather trade continues dull. The transactions during the week, as well as at Leadenhall on Tuesday, have been limited. The fresh supplies are moderate, and prices unaltered. Good crop hides, 45lbs to 50lbs, prime light English butts, calfskins, not exceeding 48lbs per dozen, and English horse hides, with the butts in, are the articles the most in request.

METALS.—The very smallest amount of business only has been done in the course of this week. Copper is extremely inactive. Tin steady, and small demand for Straits. Spelter quiet, but without weakness Lead steady and a trifle more inquired for. Tin plates in fair demand

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	9
Fat by ditto	2	1½
Yellow Russia	43	0
Melted stuff	33	6
Rough ditto	18	6
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, July 24.—The total imports of foreign stock into London, last week, amounted to 20,528 head. In the corresponding week in 1864 we received 15,427; in 1863, 11,388; in 1862, 10,051; in 1861, 10,776; in 1860, 13,214; and in 1859, 10,972 head.

There was on sale in to-day's market a full average supply of foreign stock. The condition of the beasts and sheep was very middling; nevertheless sales progressed steadily at quite last week's quotations. The arrivals of beasts fresh up from our own grazing districts were only moderate; but there was a slight improvement in the quantity of those from Lincolnshire. Nearly all breeds were in moderate request, at prices about equal to Monday last, and at which a fair clearance was effected. The receipts from Scotland were good for the time of year; but those from Ireland were very limited. The best Scots and crosses sold at 5s 4d to 5s 6d per 8 lbs. The show of English sheep was again very limited, but in somewhat improved condition. On the whole, the mutton trade ruled steady, at full quotations. Downs and half-breds sold at 6s 2d to 6s 4d per 8 lbs. We had a dull sale for lambs, and prices had a drooping tendency. The quotations ranged from 6s to 7s per 8 lbs. Calves were in fair average supply and moderate request, at late rates—viz., from 4s 2d to 5s 2d per 8 lbs. We had a slow inquiry for pigs, on former terms.

SUPPLIES.

	July 25, 1864.	July 24, 1865.
Beasts	5530	5330
Sheep and lambs	24280	23610
Calves	442	407
Pigs	490	410

THURSDAY, July 27.—The supply of beasts here to-day was moderate and in very middling condition. The few prime breeds on offer sold at Monday's currency, viz., from 5s to 5s 6d per 8 lbs. Otherwise the trade was slow, at late rates. We were fairly supplied with sheep, which met a dull inquiry, at, in some instances, slightly depressed quotations. Prime Downs, however, produced 6s 2d to 6s 4d per 8 lbs. Lambs moved off slowly, at from 6s to 7s per 8 lbs. The supply was rather limited. Calves were a dull inquiry, on former terms—viz., from 4s 2d to 5s 2d per 8 lbs. In pigs and milch cows the transactions were limited, at last week's quotations.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8	to 4	2	Prime Southdown sheep	6	2	to 6	4
Second quality ditto	4	4	4	10	Large coarse calves	4	2	4	8

Veal	4	0	5	0	Small pork	4	10	5	2

Lambs, 5s 4d to 6s 4d.

HOP MARKET.

BOROUGH, FRIDAY, July 28.—Our market is very moderately supplied with all kinds of hops. The demand, however, rules quiet; but prices are firm, and without change from Monday. Favourable accounts continue to be received from the plantations. Mid and East Kents, 100s to 190s; Weald of Kents, 100s to 150s; Sussex, to 100s to 140s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, FRIDAY, July 28.—Moderate supplies of potatoes are on sale at these markets. The trade is steady at the annexed currency:—Regents, 60s to 120s; Shaws, 50s to 80s per ton.

HAY MARKETS.

THURSDAY, July 27.—Increased supplies of hay and straw have been on sale, and the trade has ruled heavy, at a considerable reduction in prices. Annexed are the rates current:—

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Old hay	100 to 120	105 to 126	100 to 120
New hay	95 to 110	100 to 115	95 to 110
Old clover	120 to 135	120 to 140	120 to 135
New ditto	100 to 120	105 to 126	100 to 120
Straw	28 to 32	30 to 35	28 to 32

COAL MARKET.

FRIDAY, July 28.—Wallsend Haswell, 20s; Hetton, 20s; South Hetton, 20s; Hartlepool, 19s 9d; East Hartlepool, 19s 9d; Braddyll's Hetton, 19s 3d; Hetton Lyons, 18s; Heugh Hall, 19s 3d; Eden Main, 18s 2d: Russell's Hetton, 19s; South Hartlepool, 19s; South Kelloe, 19s 3d; Tunstall, 18s; Byass's Bobside West Hartley, 17s 9d; Cowpen Hartley, 17s 9d; Hastings' Hartley, 17s 9d; Holywell Main, 17s per ton. Ships at market, 33; sold, 26; gas contracts, &c., 7—33: ships at sea, 85.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 28.—Public sales of East India, the third series of the year, opened on Wednesday the 26th inst., and the quantity being below average has attracted a full attendance of buyers The better qualities show an advance of 1½d per lb on the rates obtained in April last, but the bad-conditioned and low wools are pretty much on a par only. The sales will close on the 2nd proximo.

CORN,

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 28.—The market moderately attended, and the general tone of the market favours purchasers.

The Gazette.

TUESDAY, July 25.
